Berhampore, the 14th December 1896.

Parts I, II and III of a Descriptive Catalogue of the Sanskrit Manuscripts in the Library of the Calcutta Sanskrit College, prepared by Pandit Hrishikesa Sastri and Babu Siva Chandra Gul, M.A., B.L., of that College, are offered to the public for sale. The Catalogue is to be completed in 23 parts, the price of each part being 12 annas a copy, exclusive of postage. Copies can be obtained from the Principal of the Sanskrit College, Calcutta.

Annual Statement of the Sea borne Trade and Navigation of the Bengal Presidency and of its Chief Port (Calcutta), and each of its Subordinate Ports (Chittagong, Balasore, Cuttack, Pooree, and Narain-
gunge), Volumes I and II. Price Rs. 20 for 1895-96. Published at the Calcutta Custom House. Previous years' volumes can also be obtained at the same price.

The Indian Law Reports.

Published under Authority.

THE Indian Law Reports, published under the authority of the Governor General in Council, appear in monthly parts, published as soon as possible after the first of each month at Calcutta, Madras, Bombay, and Allahabad and comprise four series—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat Book Depot, and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad respectively.

In supersession of the previous advertisements, on and from the 1st January 1897 the terms of subscription and sale will be as follows for current issues as well as for back numbers of the Reports from 1876.—

Terms of subscription payable annually in advance

For the complete series including postage, Rs 22 8

	Without postage.	With postage.
	Rs. A. P.	Rs. A. P.
For the Calcutta Series	10 0 0	12 8 0

“ each of the Madras, Bombay, and Allahabad Series

“ a part of the Calcutta Series purchased separately (inclusive of postage in India)

“ part of each of the Madras, Bombay, and Allahabad Series purchased separately (inclusive of postage in India)

The following is the rate at which deductions will be made for parts out of print and at which duplicate copies will be supplied to subscribers when required in place of copies lost in transit—

For town. For mufussal

Rs. A. P. Rs. A. P.

For the Calcutta Series, per copy

“ each of the Madras, Bombay, and Allahabad Series, per copy

“ the Calcutta Series, For the year

“ each of the Madras, Bombay, and Allahabad Series, For the year

Persons desiring to subscribe for or purchase the Report should apply to—

Superintendent, Government Press, Madras.

The Superintendent, Government Central Press, Bombay.

“ Curator of Government Presses, North Western Provinces and Oudh.

“ Officer in charge, Bengal Secretariat Book Depot

Orders and subscriptions for 1897 should be at once registered and remitted by money-order payable to the Accountant and Treasurer, Bengal Secretariat, Calcutta

ADVERTISEMENTS will be received for publication on the wrappers of the Indian Law Reports, Calcutta Series, at the following rates, payable in advance—

	One page.	Half page.	Quarter page

For one issue	“ 55	“ 36	“ 21
“ three issues	“ 100	“ 68	“ 45
“ six “	“ 145	“ 96	“ 64
“ nine “	“ 180	“ 120	“ 80

SEVERAL VOLUMES of the **BENGAL LAW REPORTS**, from August 1888 to December 1876, and **FULL BENCH RULINGS**, Parts I and II, are available at the following rates—

	Without postage.	With postage
	Rs. A. P.	Rs. A. P.
Bengal Law Reports for one year	.. 20 0 0	22 8 0

Single copies, Rs 2 per copy

Full Bench Rulings, Parts I and II

Obtainable at the Bengal Secretariat Book Depot, Writers' Buildings, Calcutta

Remittances to be forwarded to the Accountant and Treasurer, Bengal Secretariat, Writers' Buildings, Calcutta.

All the wanting parts of the **INDIAN LAW REPORTS** (complete series) having now been reprinted, the complete Reports from 1876 to 1896 may be purchased for all the years, or for any particular year, on application to the Officer in charge of the Bengal Secretariat Book Depot

The subscription, Rs. 22-8 per annum, should be remitted in advance to the Accountant and Treasurer, Bengal Secretariat.

Notice.

It is hereby notified, for general information, that subscription to the complete series of the Indian Law Reports should be registered during the first three months of each calendar year. Subscribers are therefore requested to send in their subscriptions of the complete series before the 31st March in each year. Those who register their names after that date will understand that series will be supplied only if available.

Notice.

NOTICE is hereby given that the terms for the purchase of publications from the Bengal Secretariat Book Depot except for Government offices or offices under the control of Government Officers are strictly cash, and on no other terms will any publication be supplied, or advertisement, notice, &c., inserted in either of the Gazettes.

In the case of insolvency notices, cash must be sent with such notices when forwarded by Mofussil courts or offices and for those forwarded by the Official Assignee cash must be paid on presentation of memorandum of cost by the Accountant and Treasurer, Bengal Secretariat

Remittances in postage stamps should be accompanied by an addition of one anna in the rupee on account of discount.

Applications for Acts of the Bengal Legislative Council required on the public service should be addressed to the REGISTRAR, Office of the Legislative Department, Government of Bengal. Copies are available for purchase at the Bengal Secretariat Book Depot

NOTE.—Rate for advertisements in the Calcutta Gazette—

Full page, per issue	..	Rs. 20
Half	..	“ 10

Casual advertisements, 4 annas per line.

NOTICE TO SUBSCRIBERS.

SUBSCRIBERS to the *Calcutta and Bengali Gazettes* and *Indian Law Reports* are hereby informed that unless the amount of their subscription for 1897 is received before the 31st December 1896, it will be concluded that the Gazettes and Reports are no longer required, and the supply will accordingly be discontinued from 1st January 1897.

All remittances should be made direct to the Accountant and Treasurer, Bengal Secretariat, Calcutta, by means of money-orders. No postage stamps or stamps of any other kind will be received in payment of subscriptions.

The correct address of the subscriber should be legibly written on the money-order coupon, and the period for which the subscription is paid should also be stated. Omission to note these particulars will involve considerable delay.

B. FOLEY,

Under-Secy. to the Govt. of Bengal.

The 24th November 1896.

Catalogue of Books procurable from Thomason College Book Depot.

Application to be made to Curator. Cash must accompany order. Articles will be sent by Value-payable Post to persons in Government employment only. It is advised that letters containing remittances be registered.

N.B.—The Revised Prices herein entered cover the cost of packing, postage and other incidental charges (except commission for value payable supplies), and are for all purchasers other than resident College Students.

Drawing Instruments (electrum) are available at the College Book Depot at Rs. 62 per box. Drawing Instruments, drawing materials, &c., are also obtainable from the Roorkee Workshops, and application should be made to the Superintendent.

APPENDIX TO

The Calcutta Gazette.

WEDNESDAY, DECEMBER 16, 1896.

NOTICES TO MARINERS.

GOVERNMENT OF BENGAL—MARINE DEPARTMENT.

NOTICE TO MARINERS—No. 250.

[First Publication.]

AUSTRALIA, SOUTH WEST COAST—CAPE LEEUWIN.

Regarding establishment of a light on the Cape.

WITH reference to Notice to Mariners No. 20, dated 18th January 1896, issued by this office, the British Admiralty has given further notice (No. 655 of 1896) that only one light will be established at Cape Leeuwin, instead of a main light and an auxiliary light; and also that the light will be exhibited for the first time on 10th December 1896:—

Cape Leeuwin light will be a first order, dioptric, *flashing white light every five seconds*, thus:—flash, a *fifth of a second*; eclipse, *four and four fifths seconds*; it will be elevated 185 feet above high water, (illuminating power 145,000 candles), and visible from a distance of 20 miles in clear weather.

The lighthouse is a cylindrical, stone tower, 135 feet high, situated on the southern summit (48) of Cape Leeuwin.

Approximate position on Chart No. 413, lat $34^{\circ} 21' 55''$ S., long. $115^{\circ} 8' 0''$ E.

CAUTION—Mariners are reminded that the dangerous Geographie reef lies 8 miles to the N.W. by W. $\frac{1}{2}$ W. of this light, and that, powerful as the light is, it will be unsafe; with the weather at all thick, to stand in with the intention of making it. Mist also may hang about the land when clear to seaward.

(Variation 5° Westerly in 1896.)

H. LINDQUIST,
for Port Officer of Calcutta.

GOVERNMENT OF BENGAL—MARINE DEPARTMENT.

NOTICE TO MARINERS—No. 261.

[First Publication.]

AFRICA, EAST COAST—DELAGOA BAY

Buoy placed near Hope shoals.

WITH reference to Notice to Mariners No. 217, dated 26th October 1896, issued by this office, the British Admiralty has given further notice (No. 660 of 1896) that another buoy, red *pyramid*, has been placed near Hope shoals, in a position with Cape Inyack lighthouse bearing S. 1° W., distant 7 $\frac{1}{2}$ miles; and Black bluff S. 29° W.

Approximate position, lat. $25^{\circ} 51' 10''$ S., long. $32^{\circ} 56' 15''$ E.

(Variation 23° Westerly in 1896.)

H. LINDQUIST,
for Port Officer of Calcutta.

Published for general information.

[Second Publication.]

BAY OF BENGAL—ORISSA COAST.

Centre Elfin buoy replaced in position.

With reference to Notice to Mariners No. 229, dated 9th November, issued by this office, the Port Officer, Chandbally, has given further notice, that the Centre Elfin buoy has been replaced in position.

H. LINDQUIST,
for Port Officer of Calcutta.

Published for general information.

O. C. LEES,
Under-Secretary, Marine Department.

CALCUTTA, the 2nd December 1896.

GOVERNMENT OF BENGAL—MARINE DEPARTMENT.

NOTICE TO MARINERS—No. 249.

[Second Publication.]

INDIA, WEST—MALABAR COAST.

Port of Hangarkotta—Exhibition of a new light.

THE Presidency Port Officer, Madras, has given notice, dated 17th November 1896, that a 6th Order Red Dioptric Port Light was exhibited at the port of Hangarkotta on the 9th November 1896, and is visible seaward about 8 miles on a clear night from North through East to South except where obscured by trees between South and S. 9° E., and by St. Mary's Isles between North and N. 5° E., and between N. 9° E. and N. 15° E. All bearings magnetic.

2. The apparatus which is 12 feet above high-water is placed on the top of the small masonry column, on the beach, marking the northern limit of the port, and not on the southern pillar as stated in the preliminary notice issued on the 27th October last.

3. As this light is only intended for the use of coasting vessels during the fair-weather season, it will be extinguished yearly between the 1st June and the 14th September, both days inclusive.

H. LINDQUIST,
for Port Officer of Calcutta.

Published for general information.

O. C. LEES,
Under-Secretary, Marine Department.

GOVERNMENT OF BENGAL—MARINE DEPARTMENT.

NOTICE TO MARINERS—No. 248.

[Third Publication.]

JAPAN—(1) MEIACO SIMA; (2) BUNGO CHANNEL, (3) SETO UCHI; AND (4) Yezo, WEST COAST.

(1) *Meiaco Sima—Breakers, north-eastward of Mitsuna island.*

THE British Admiralty has given notice (No. 623 of 1896) that the Master of the steam-vessel *Ryusei Maru* reports that, in July 1896, he observed breakers, apparently on a reef, in a position bearing about N.E. by E $\frac{1}{4}$ E., distant 3 miles, from Mitsuna island.

Approximate position, lat 24° 47' N., long. 124° 45' E.

A danger line, with the words "breakers reported" written against it, has been placed in the above position on the charts.

(2) *Bungo Channel—Sunken Rock, South-Westward of Ora Sima*

Also, the existence of a rock, with a depth of 9 feet on it at low water springs, situated on the northern side of the entrance to Uwajima bay, with the centre of the islet, south-westward of Ora saki, bearing N. 65° E., distant $1\frac{1}{4}$ cables; and summit of No sima S. 38° E.

Approximate position, lat. 33° 15' 10" N., long. 132° 28' 5" E.

(3) *Seto Uchi—Shoal North-Westward of Nezumi Sima.*

Also, of the existence of a sandy shoal, with a depth of $4\frac{1}{2}$ fathoms on it, situated with the remarkable clump of trees (419) north-westward of Hangata bearing about S.W. $\frac{1}{4}$ S., distance $1\frac{1}{4}$ miles; and north-east point of Nezumi sima S.E. $\frac{1}{4}$ E.

Approximate position, lat. 34° 8' 30" N., long. 132° 57' 30" E.

(4) *Feso, west-coast—Sunken Rock, Northward of Ishikari.*

Also, that the Master of the steam-vessel *Soya Maru* reports that, in July 1896, his vessel touched on a pinnacle rock, with a depth of 15 feet on it, and 4 to 5 fathoms close around, lying about $1\frac{1}{2}$ miles off-shore in Ateuta roads, in a position with cape Skudutze lighthouse bearing W.S.W., distant 20 miles; and cape Buyimawas about N. by W. $\frac{1}{4}$ W. Approximate position, lat. $43^{\circ} 24'$ N., long. $141^{\circ} 25'$ E.

FIJI ISLAND.

Sunken rock, north-westward of Ovalau.

THE British Admiralty has given notice (No. 631 of 1896) that information has been received from Commander J. W. Combe, H.M. Surveying Vessel *Waterwitch*, dated 14th September 1896, of the existence of a small coral head, with a depth of 5 feet on it at low water springs and 6 to 7 fathoms around, situated between Naingani and Ovalau, in a position with Tumuna, Ovalau (1,735 ft.) bearing E by S $\frac{1}{2}$ S. ($S. 73^{\circ} E.$), distant $4\frac{7}{10}$ miles; and Sa Vuna, Moturiki, S. by E $\frac{1}{2}$ E ($S. 16^{\circ} E.$).

Approximate position, lat. $17^{\circ} 36' 30''$ S., long. $178^{\circ} 43' 25''$ E.

NOTICE TO MARINERS—No. 245.

[Third Publication]

AUSTRALIA—EAST COAST—MORETON BAY.

Lights exhibited and alterations in buoyage.

WITH reference to Notice to Mariners, dated 4th July 1896, issued by this office, the British Admiralty has given further notice (No. 632 of 1896) that the undermentioned lights would be exhibited, to assist in the navigation of North-west Channel, Moreton Bay:—

1. Caloundra head light is a fourth order, dioptric, *fixed* light, showing the following sectors:—*white* from S. $1^{\circ} E.$, through south and west, to N. $61^{\circ} W.$ (but may be partially obscured by trees between S.S.W. and S. by W.), *red* from N. $61^{\circ} W.$ to N. $30^{\circ} W.$ (over North banks); and *white* from N. $30^{\circ} W.$ to N. $28^{\circ} W.$ (in North-west channel); the last sector being of greater power than the others.

It is elevated 171 feet above high water, and visible in clear weather from a distance of 16 miles.

The lighthouse is a cylindrical tower, painted white and 38 feet high; situated on the summit marked 150 three-quarters of a mile westward of Caloundra head.

Approximate position, lat. $26^{\circ} 48' 45''$ S., long. $153^{\circ} 9' 30''$ E.

2. Also, two leading lights are shown from framework lighthouses erected on Bribie island:—

The front (low) light is a fourth order, dioptric, *fixed* light elevated 56 feet above high water, and visible from S. $17^{\circ} W.$ (but a faint light may be visible between that bearing and the land to the westward) to S. $77^{\circ} W.$; and from N. $46^{\circ} W.$ to N. $40^{\circ} W.$ (over the North-west channel); a distance of 12 miles in clear weather.

The lighthouse, 62 feet high, is situated 80 yards within high water mark, and S $5^{\circ} E.$, distant nearly $4\frac{1}{2}$ miles from Caloundra head lighthouse.

The rear (high) light is a dioptric *fixed white* light, elevated 95 feet above high water, and visible from about S. $62^{\circ} W.$ to S. $47^{\circ} W.$, a distance of 15 miles in clear weather.

The lighthouse, 97 feet high, is situated S. $55^{\circ} W.$, distant 1,000 yards from the front lighthouse.

NOTE.—The last two lights in line, bearing S. 55° W., lead into North-west channel between Hamilton patches, and the north-west extreme of North banks, they should be kept in line until the *white* sector of Caloundra light, visible in North-west channel, is entered, when vessels should keep in that sector, until within the *white* sector, shown up North-west channel from the front Bribie island lighthouse.

3. Also, the undermentioned alterations have been made in the buoyage of Moreton bay:—

(a) The black buoys (two) marking respectively the south-west extreme of Spitfire bank, and the western extreme of Salamander (Yule) bank, have been replaced by *gas* buoys, each showing a *fixed white* light, and numbered respectively N.W. 9 and N.W. 11.

(b) The red buoy, marking the northern extreme of Western banks, has been replaced by a *gas* buoy showing an *occulting white* light, and numbered N.W. 4.

These *gas* lights are each elevated 10 feet above the sea.

(c) Three black buoys have been placed to mark the eastern side of North-west channel —

N.W. 3 buoy, moored in 8 fathoms, with Caloundra lighthouse bearing N.N.W. $\frac{1}{2}$ W., distant $7\frac{1}{2}$ miles and mount Berwah W. $\frac{1}{2}$ S.

N.W. 5 buoy, surmounted by a topmark, moored in 10 fathoms, with Caloundra lighthouse bearing N.W. by N, distant $10\frac{1}{2}$ miles; and mount Berwah W. $\frac{1}{2}$ N.

N.W. 7 buoy, moored in 9 fathoms, with Caloundra lighthouse bearing N.W. $\frac{1}{2}$ N., distant $13\frac{1}{2}$ miles; and mount Berwah W. $\frac{1}{2}$ N.

The black buoy marking the north-western extremity of North banks has been numbered N.W. 1, and is surmounted by a topmark.

IRRIGATION DEPARTMENT

ACCOUNTS.

Dated Calcutta, the 12th December 1896.

RESOLUTION.

READ—

The Canal Revenue Reports for 1895-96 and the Chief Engineer's note on the same.

At the close of the year under review, the capital outlay on canals in Bengal, for which Capital and Revenue accounts are kept, had reached a total of Rs. 7,56,05,817. Of this sum, Rs. 1,10,89,034 have been provided from Provincial funds, Rs. 6,16,17,703* from Loan Funds, and Rs. 8,66,000 contributed by the Imperial Government from Famine Relief and Insurance Fund.

2. The total length of canals in operation is 916 miles, of which 495½ miles are for irrigation and navigation, 242½ miles for irrigation only, and 178 miles for navigation only. There are also 2,605 miles of distributaries, capable of irrigating 1,572,005 acres.

3. The receipts for the year from both Major and Minor Works amounted to Rs. 22,08,864, and the working expenses to Rs. 19,63,208, the net revenue being Rs. 2,45,646, against Rs. 1,38,135 in 1894-95, and Rs. 2,65,949 in 1893-94. The receipts were greater and the expenditure less than in the preceding year.

* Exclusive of indirect charges amounting to Rs. 20,33,110.

4. The following table exhibits the results of the year's working of the canal systems of Bengal, the Capital expenditure to date being also shown :—

NAME OF CANAL	Capital expenditure (direct and indirect) during year	Capital expenditure (direct and indirect) to date	Receipts of year, less refunds	Average receipts of nine years ending 1894-95	Expenditure of year including indirect expenditure	Average expenditure of nine years ending 1894-95	Net income of year	Average net income of nine years ending 1894-95.
1	2	3	4	5	6	7	8	9
MAJOR WORKS	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Orissa Canals	—21,101	2,02,21,846	4,16,804	3,18,951	4,72,836	4,77,768	(-) 55,591	(-) 11,56,026
Midnapore Canal	8,583	84,54,031	2,63,133	2,66,312	2,76,113	2,33,059	(-) 12,490	(+) 43,283
Hijili Tidal Canal	1,48,611	26,77,792	61,076	47,008	61,398	48,418	578	(-) 8,18
Sone Canals	16,808	2,61,20,407	7,81,916	8,50,211	5,71,434	7,19,270	1,90,882	(+) 1,30,640
Total for { 1895-96	1,53,882	6,41,80,078	16,07,720	14,83,183	13,84,240	14,68,613	1,24,389	(+) 14,557
{ 1894-95	4,91,081	6,40,26,311	15,20,127		14,68,040		58,078	
Minor Works and Navigation for 1895-96	1,00,770	1,14,25,760	7,01,143	7,62,727	5,78,863	5,26,267	1,24,207	2,51,460
Ditto for 1894-95	47,452	1,12,54,993	6,79,861		5,39,804		80,057	

The only minor works for which capital accounts are kept are the Orissa Coast, Calcutta and Eastern, and Saran Canals

The interest charges debited in 1895-96 to Provincial Revenues amounted to Rs. 24,94,499, which, after deducting the net revenue, works out to a deficit of 3.69 on the Capital expenditure.

5. The statement below shows the areas irrigated for the last ten years and the average rainfall. Except in the case of the Sone Canals, the *rabi* irrigation is too insignificant to be shown separately. The area under the head perennial is not extensive, and is included under *kharif*.

YEAR.	Orissa Canals.	Midnapore Canal.	SONE CANALS.			All Canals	Rainfall.
			Kharif	Rabi	Total.		
1	2	3	4	5	6	7	8
	Acres	Acres	Acres	Acres	Acres.	Acres	Inches
1886-87	77,709	69,702	251,542	16,662	268,204	415,675	57.32
1887-88	109,506	65,664	287,879	27,601	315,340	490,750	36.70
1888-89	159,292	69,777	286,092	69,817	355,909	584,978	52.71
1889-90	186,627	68,810	284,948	20,836	305,282	560,719	54.02
1890-91	180,290	82,012	260,382	20,632	281,014	543,315	57.03
1891-92	177,685	83,973	297,415	177,308	474,723	736,381	46.55
1892-93	160,952	91,217	284,666	126,195	416,761	662,930	45.18
1893-94	163,526	85,763	300,318	66,458	366,776	656,965	64.08
1894-95	122,561	70,116	275,475	41,864	317,134	509,811	58.15
1895-96	119,160	65,251	279,879	115,343	395,222	579,933	46.06
Average of nine years ending 1894-95	142,017	76,365	280,957	62,952	342,909	562,291	52.35

The area irrigated during the year was 579,933 acres, as compared with 509,811 acres in 1894-95, and an average of 562,291, acres during the preceding nine years. The increase was in the area irrigated from the Sone Canals, where the rainfall was generally deficient, and in the *rabi* season abnormally small.

6. The assessment and collection of water-rates are made under the orders Superintending Engineers. The recovery of arrears is under the Special Deputy Collectors in subordination to the District Officers, who also exercise appellate jurisdiction in regard to all orders passed by canal officers under Act III (B.C.) of 1876. The progress made in collection work is shown in the following table :—

YEAR.	Balance at beginning of year.	Balance at the end of the year.	Remissions, including cancelled demand statements.	Irrecoverable items.
1	2	3	4	5
	Rs.	Rs.	Rs.	Rs.
1886-87 ...	5,33,177	3,69,789	57,375	22,612
1887-88 ...	3,69,789	5,59,883	32,356	19,796
1888-89 ...	5,59,883	5,79,983	42,666	14,074
1889-90 ...	5,79,983	5,09,188	80,282	20,592
1890-91 ...	5,09,188	4,72,113	48,674	16,476
1891-92 ...	4,72,113	4,04,120	38,421	12,126
1892-93 ...	4,04,120	2,26,174	61,576	11,168
1893-94 ...	2,26,174	1,72,235	29,034	4,818
1894-95 ...	1,72,235	77,498	14,367	4,815
1895-96 ...	77,498	67,460	8,573	5,371
Average of nine years preceding 1895-96 ...	4,25,185	3,74,554	44,975	14,053

The improvement in administration steadily continues, and is still more marked than in the previous year. The balance uncollected at the close of the year was Rs. 67,460 as compared with Rs. 77,498 at its commencement.

The amount remitted was Rs. 8,763 against Rs. 14,367 in 1894-95.

7. The collection work of each canal is shown in the following table:—

Canal	DEMAND.			COLLECTIONS (INCLUDING REMISSIONS)			Percent- age of current collection on current demand	Percent- age of total collection on total demand
		Current	Total.	Arrear.	Current	Total		
1	2	3	4	5	6	7	8	9
	Rs	Rs	Rs	Rs.	Rs	Rs.		
Orissa	32,140	2,31,737	2,63,867	21,829	2,07,695	2,29,524	89 02	86 95
Midnapore	4,540	1,04,111	1,08,650	3,470	95,066	98,536	91 31	90 88
Sone	40,809	8 56,349	6,97,055	39,852	6,34,210	6,74,062	96 64	96 70

8. The collections made under navigation (excluding miscellaneous navigation receipts and those of the transport services) are shown below for ten years:—

YEAR	Orissa Canals	Midnapore Canal	Hugh Tidal Canal.	Sone Canals	Total	Miles open.	Tollage per mile
1	2	3	4	5	6	7	8
	Rs.	Rs.	Rs.	Rs	Rs	Miles	Rs.
1886-87 ...	58,664	1,09,893	51,904	49,665	2,69,926	490	551 8
1887-88 ...	66,628	1,26,674	40,406	50,984	2,84,692	490	580 7
1888-89 ...	69,880	1,46,760	53,910	52,162	3,22,662	496½	649 9
1889-90 ...	78,039	1,45,356	40,338	51,189	3,14,925	496½	634 3
1890-91 ...	1,06,961	1,16,830	27,145	56,593	3,01,529	496½	607 8
1891-92 ...	1,20,761	1,32,572	36,348	57,339	3,47,020	524½	662 2
1892-93 ...	1,00,508	1,14,141	52,180	49,996	3,16,820	524½	604 3
1893-94 ...	1,19,115	1,14,994	58,209	50,548	3,42,866	524½	654 0
1894-95 ...	96,320	1,35,492	57,089	49,349	3,38,150	524½	645 0
1895-96 ...	1,42,617	1,43,918	60,640	51,370	3,98,545	524½	700 6
Average of nine years preceding 1895-96.	90,747	1,26,268	46,892	51,980	3,15,887

The receipts from navigation far exceed those of the previous year, and are the largest yet recorded.

9. The miscellaneous revenue amounted to Rs 80,660, as compared with Rs. 83,685 in 1894-95, the average for the previous nine years being Rs. 66,107.

10. The results of the year's working have on the whole been favourable. The receipts from Major Works were somewhat less than in the previous year, but were above the average of the preceding nine years. The working expenses showed a marked reduction, and were lower than at any period during the last nine years. The net revenue more than doubled that of last year, and exceeded the average of the previous nine years by over a lakh of rupees.

As regards Minor Works, there was an increase in receipts and a decrease in working expenses; the net revenue, however, though greater than in 1894-95, was below the average.

11. The working of each canal system will now be separately considered, commencing with the Orissa Canals. The construction estimate of the Orissa project was closed on the 31st March 1895, and at that date there was a balance of Rs. 2,39,278 available for expenditure on works which had been sanctioned, but were incomplete. The Capital outlay on works during 1895-96 amounted to Rs. 71,624, and was chiefly confined to the completion of works in progress at the end of the previous year. The new distributaries from the Jajpur Canal and the flood embankment which protects them are now practically completed. The raising of the flood bank of the Kondrapara Extension Canal was proceeded with, and various drainage works were carried out.

12. The receipts on the Revenue Account were Rs. 4,16,804, as compared with Rs 3,32,345 in 1894-95, and an average of Rs. 3,18,951 for the preceding nine years. The increase in water-rates amounted to Rs. 31,098, and was due to the introduction of the new rules, which required the long lease demands to be collected in one instalment instead of two, one of which used to fall due on the 1st May of the succeeding year. The navigation receipts exceeded those of the previous year by Rs. 53,177, the result, chiefly, of a brisk traffic in rice for export. The area irrigated during the year was 119,460 acres, against 122,561 acres in 1894-95. The rainfall was plentiful and well distributed, and under such conditions an extension of leases could hardly be expected.

13. The transport service was worked at a profit of Rs. 15,683, against Rs. 7,541 in the preceding year. The charge for tollage, which is practically a receipt, is omitted from the cost of working. There was a considerable increase in traffic, and the earnings are the largest yet recorded.

14. The result of the collection of water-rates shows a balance at the end of the year of Rs. 34,343 against Rs. 32,140 at the close of 1894-95. The demand of the year was, however, increased owing to the fact that, under the present rules, the payment of the whole rate, in the case of long leases, has to be made on the 1st February of each year. Taking into consideration this increase in the assessment, the progress of collections was satisfactory. The number of objections to assessment was slightly more than in the preceding year, but the amount written off was less.

15. The number of certificate cases instituted during the year was 2,497, as compared with 5,683 in 1894-95. The Lieutenant-Governor notes this decided improvement with satisfaction. The number of cases pending at the close of the year was 165, against 127 at its commencement.

16. The working expenses of the Orissa Canals amounted to Rs. 4,72,395, as compared with Rs. 4,83,320 in 1894-95 and Rs. 5,85,477 in 1893-94. It is hoped that the tendency towards reduction of expenses will be maintained.

17. The financial result of the year's working of the Midnapore Canal is disappointing. The receipts fell to Rs. 2,63,633 from Rs. 2,94,423 in 1894-95, and the expenditure exceeded that of the previous year by Rs. 51,549. The net revenue shows a deficit of Rs. 12,480. The receipts from water-rates have, for the last three years, steadily diminished. The area irrigated was 65,251 acres, as compared with 70,116 acres in 1894-95 and 85,763 acres in 1893-94.

The Superintending Engineer remarks:—

"It is difficult to explain why the whole of the area that lapsed during the past two years was not renewed in the year under review, which was one of very deficient rainfall. The following have been assigned as reasons:—

- (1) Remeasurement of the area to be leased.
- (2) Imposition of 12-anna rate, under rule 8, for villages which did not renew their leases the same year in which they lapsed.
- (3) Collection of water-rates in one instalment.

The new rules, which came into force in 1893, determine that no lease was to be renewed without remeasurement, and an additional rate of 12 annas an acre in certain cases was also to be imposed. There is at present great objection to this remeasurement, which generally gives about 20 per cent. additional area. The imposition of an additional rate is still more unpopular."

A proposal to relax some of the rules is now under the consideration of Government. The Lieutenant-Governor hopes that by the removal of the reasons for discontent, the reluctance of the cultivators to renew the lapsed leases will disappear, and the area under irrigation will once more expand to its full extent.

Navigation receipts rose from Rs. 1,35,492 to Rs. 1,43,918, and were higher than they have been for some years.

18. The progress in collection work would, at first sight, appear to compare unfavourably with that of the previous two years, as the balance at the close of the year amounted to Rs. 10,124, against Rs. 4,549 and Rs. 7,027 in 1894-95 and 1893-94, respectively. But the Superintending Engineer explains that a large number of villages objected to pay water-rates at the enhanced rate of assessment under the revised rules, and the collection of the amounts due was stopped pending a decision of the case. Other villages declined to pay until the high and low lands included by the amins had been excluded from assessment. If the sums due from these villages are deducted, the outstanding balance would compare favourably with that of recent years. On the whole, the system of collection of water-rates continued to be satisfactory. The amount remitted or written off was less than in any of the five preceding years. The Lieutenant-Governor remarks the very creditable reduction in the number of certificate cases. Only 280 cases were instituted during the year as compared with 579 in 1894-95.

19. The working expenses of the Midnapore Canal amounted to Rs. 2,76,113, exceeding those of the previous year by Rs. 51,549. The excess was caused by heavy expenditure required in connection with the head works at Midnapore and Panchkura, and by extensive repairs to the canal distributaries and dredging plant.

20. The Capital expenditure on the Hijili Tidal Canal amounted to Rs. 1,46,000, and was chiefly incurred in completing the supply sluice and channel at Terapakia, and remodelling the Kalinagar lock. The navigation receipts increased to Rs. 60,677 from Rs. 57,089 in the previous year, and exceeded those of 1893-94, which was considered an exceptional year. The increase is very satisfactory, considering that the steamer traffic was less than usual, owing to the closure of the Terapakia and Kalinagar locks. The number and tonnage of boats was larger, but the number of passengers carried was less than in the previous year.

The working expenses were Rs. 61,398, against Rs. 47,426 in 1894-95, the increase being entirely due to the renewal of the lock gates and sills of the Terapakia lock. The unusually heavy expenditure reduced the net revenue to the small sum of Rs. 578.

21. The net revenue of the Sone Canals was Rs. 1,90,882, as compared with Rs. 1,28,095 in 1894-95, and an average of Rs. 1,30,940 for the last nine years. The total receipts were Rs. 7,65,316, against Rs. 8,34,834 in 1894-95. The receipts from water-rates fell from Rs. 7,43,243 to Rs. 6,77,714, while the navigation receipts showed a slight advance from Rs. 58,892 to Rs. 61,261. The miscellaneous revenue was Rs. 33,148 as compared with Rs. 35,620 in the previous year. The working expenses were Rs. 5,74,434, compared with Rs. 7,06,739 in 1894-95, Rs. 7,40,976 in 1893-94 and Rs. 7,51,247 in 1892-93. The reduction was almost entirely under the head "Maintenance and Repairs,"

the expenditure on which was only Rs. 1,32,057 against Rs. 2,20,227 in 1894-95, and an average of Rs. 2,59,879 for the previous five years. The cost of silt clearance and dredging has been reduced from Rs. 76,874 in 1894-95, and an average of Rs. 99,573 for the preceding five years, to the comparatively small sum of Rs. 13,115. The substantial saving on the cost of maintenance is chiefly the result of the successful measures adopted for preventing the accumulation of silt in the canals, but it is also largely due to actual economies effected by the careful supervision of the canal officers. The Lieutenant-Governor views these satisfactory results with pleasure, and desires to acknowledge the good work done by the Superintending Engineer and his executive officers.

22. The area irrigated was 395,222 acres, against 317,134 acres in 1894-95, and an average of 343,909 acres for the preceding nine years. The area under *kharif* was 4,404 acres more than in the previous year, but the great increase was in the *rabi* season, when 115,343 acres were irrigated against 41,664 acres in 1894-95. The rainfall failed at the important period of the "Hathia Naichatra", and throughout the *rabi* season it was unusually scanty. The slight reduction which appears under long-term leases is attributed to the exceedingly favourable character of the two previous years, which caused the people to defer the renewal of certain leases which had lapsed. As a matter of fact, however, before the close of the year, applications had been submitted for long-term leases, the aggregate area of which was more than twice the area which had lapsed, so that next year the long-lease area should not only recover lost ground, but will probably be largely extended. During the month of October, nearly 14,000 acres were irrigated, under the system of the sale of water by volume.

23. The Lieutenant-Governor notes with much satisfaction the continued progress made in the collection of water-rates. Last year the result was considered to be very good; this year it is still better. The arrears outstanding on the 1st April 1895 amounted to Rs. 40,800. Of this balance, Rs. 39,852 were collected during the year, giving the high percentage of 97.6 per cent. The current demand for 1895-96 was Rs. 6,56,248, of which Rs. 6,34,210, or 96.6 per cent., were collected. The unadjusted balance at the close of the year was Rs. 22,038. The balance is the lowest, and the percentage of collections the highest yet recorded.

24. The amount remitted was Rs. 5,017 against Rs. 4,091 in 1894-95. The number of objections to assessment rose from 2,557 to 3,686, and the number undisposed of at the end of the year was 511 against 75. The increase in the number of objections, and the comparatively large number pending at the close of the year, was mainly due to the extensive area irrigated in the *rabi* season. The number of certificate cases instituted fell from 2,019 in 1894-95 to 1,253 in 1895-96, and only eight cases were left undisposed of at the end of the year. This is very satisfactory.

25. The following table gives an abstract of the results of the crop experiments made in the Sone and Orissa Circles in 1895-96:—

				Quality of crop	OUTTURN PER ACRE.	
					Paddy	Straw
1				2	3	4
					Mds	Mds.
Orissa	Good ...	26 2	40
				Average ...	23 7	38 4
Sone	Good ..	85 08	77 9
				Average ...	24 8	58 9

The divergence between the results obtained in the Sone and Orissa Circles has been commented upon in previous reports, and last year the Lieutenant-Governor desired that a set of rules should be framed with a view to secure

uniformity in the method of conducting these experiments. Rules are being drawn up which will be applied to the experiments on the crops of 1896-97, and the result will be noted in the Revenue Report for that year. The figures given above show a considerable difference between the outturn of good crops in the two circles. The Superintending Engineer remarks that the yield of rice this year in Orissa is rather less than in the previous year, and that this is partly due to the nature of the season, and partly to the fact that he had issued instructions for experiments to be made chiefly on those lands which are generally only leased in dry years.

26. The financial results of the canals classed as Minor Works and Navigation are shown in the statement below. The Saran Canals, for which Capital and Revenue accounts are kept, are excluded, as they were closed during the year. The Eden Canal has been included, as revenue is derived from it, though neither Capital nor Revenue Accounts are kept.

	CAPITAL EXPENDITURE—		Receipts	Expenditure.	Net income	Average net income of 9 years ending 1894-95
	Of year	To end of year.				
1	2	3	4	5	6	7
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Calcutta and Eastern Canals	1,27,831	51,86,353	4,55,244	2,91,610	1,63,604	2,76,937
Orissa Coast Canal	40,145	44,77,008	88,328	70,119	18,09	—15,691
Nadia Rivers	Nil	Nil	1,20,016	1,40,281	—20,265	68,261
Eden Canal	Nil	Nil	30,917	55,979	—25,063	—10,905*
Total	1,67,976	99,63,361	6,94,585	5,64,010	1,30,526	2,02,516

* Average of seven years

27. The Calcutta and Eastern Canals are purely navigation works. The receipts rose from Rs. 4,43,003 to Rs. 4,55,244 and the working expenses were Rs. 2,91,610 against Rs. 2,89,267 in 1894-95. The net revenue increased from Rs. 1,53,736 to Rs. 1,63,604. It is satisfactory to note that the revenue continues to improve, notwithstanding the competition of the Railways and River Steam Navigation Companies. There was a slight falling off in the number of boats using the canals, but the number of large flats and steamers increased considerably. During the year the system of measurement of steamers and flats has been under consideration, with the result that a new rule will shortly be introduced, which will ensure toll being levied on the full weight of cargo carried. The tolls realized during the last 11 years from the Sundarbans route amounted to Rs. 58,200, while the expenditure incurred during the same period was Rs. 72,280. The question of increasing the rate of toll on steamers and flats using this route has been considered, but it has been decided to make no alteration at present.

The work of canalizing a portion of the Eastern Canals between Kulti and Bamonghatta, known as the Bhangore Khal, was commenced, and Rs. 1,05,923 were expended during the year. An important addition was also made to the Eastern Canals by the opening out of the *Bhcel* route for steamers and flats, during the rainy season, between the Kumar and Madhumati rivers. Rupees 13,009 were spent on this work against an estimate of Rs. 23,118. This expenditure accounts for the increase in the cost of the maintenance of the Circular and Eastern Canals in 1895-96.

28. On the Orissa Coast Canal the receipts were Rs. 88,328 against Rs. 65,940 in 1894-95. The expenditure on maintenance showed a decrease of Rs. 16,389, as compared with the previous year. Under the Capital account Rs. 31,183 were expended, chiefly on remodelling some of the escapes. The financial result of the year's operations was very satisfactory, the net revenue amounting to Rs. 18,209. It is gratifying to observe that this is the first year in which the Coast Canal has been worked at a profit. This excellent result is attributed to the favourable rice crops of the past three years.

There was a large increase in the number of steamers using the canal. The Superintending Engineer remarks that it is impossible to say how far the

improvement of traffic was due to the reduced through rates introduced in 1893-94, as this class of traffic was interrupted from October to March, owing to the closure of the Hijili Tidal Canal.

29. The receipts from the Nadia rivers were Rs. 1,20,046, as compared with Rs. 1,41,698 in the previous year, showing a decrease of Rs. 21,652. The expenditure rose from Rs. 1,40,879 to Rs. 1,46,281. The Superintending Engineer explains that, although the total working expenses are greater, the actual cost of training works was much less than in 1894-95. The average receipts for the previous nine years were Rs. 1,83,480, and the average expenditure Rs. 1,15,216. The net revenue shows a deficit of Rs. 26,235.

The total number of steamers and boats fell from 50,320 to 47,300, and the tonnage from 6,68,245 tons to 5,91,718 tons.

During the last four years the decline of traffic on these rivers has become particularly marked, but no satisfactory explanation has been given. The decrease has generally been ascribed to the deterioration of the Jalangi and Bhagirathi rivers, thus diverting traffic to other routes; and also to railway competition. Particular attention is being directed to this important matter, and it can only be hoped that the efforts which are being made towards solving the difficulty, and restoring the traffic to its former proportions, will ere long meet with success.

30. The area irrigated from the Eden Canal during the year was 36,221 acres, as compared with 20,300 acres in 1894-95. There was a considerable demand for water as the rainfall was deficient, and it is believed that a much larger area would have been irrigated had there been any system of distributaries to carry the water from the main canal. This want is, however, being supplied, an estimate for the construction of two distributaries having recently been sanctioned by Government. Rupees 30,690 were collected out of a total demand of Rs. 70,978, and the unrealized balance at the end of the year amounted to Rs. 33,883. The result of the collections is not satisfactory, and shows no improvement over last year, in fact, the balance is rather larger. The Superintending Engineer, however, remarks that a sum of Rs. 10,699, due on unregistered leases, will probably have to be written off as irrecoverable. The expenditure was Rs. 65,970 as compared with Rs. 52,738 in 1894-95. The increase was due to the heavy silt clearance required in the channels.

The canals were closed during the year. No application was submitted for the opening of the head sluices.

32. The Madhuban Canal is a small work in Champaran. During the year 2,254 acres were irrigated, against 3,400 acres in 1894-95, but the figures are not very reliable, as the irrigation is not measured. No water-rates are levied for irrigation from this canal. The expenditure was Rs. 3,808 against Rs. 8,035 in the previous year, the principal item being the cost of repairs to the Teur weir.

33. The Gaighatta and Buxi khal, a channel $7\frac{1}{2}$ miles in length, connecting the Rupnarain and Damodar rivers, was taken over by the Public Works Department in 1894. Its re-excavation was undertaken, and the work was completed during the year under review at a cost of Rs. 29,325. The maintenance charges were Rs. 13,009 against Rs. 27,269 in 1894-95. The receipts rose to Rs. 5,125 from Rs. 820 in the preceding year.

34. All the Superintending Engineers and Executive Engineers devoted ample time to the duty of inspection.

35. The Lieutenant-Governor desires specially to thank Mr. Buckley, Superintending Engineer of the Sone Canals, for his very successful administration. Mr. Horn, Superintending Engineer of the South-Western Circle, has also rendered very good service during the year. Mr. DeMello, Executive Engineer in charge of the Arrah Division of the Sone Circle, is likewise deserving of special mention.

ORDER.—Ordered, that a copy of this Resolution and of the Chief Engineer's note and its accompaniments be submitted to the Government of India in the Public Works Department, and published in the *Calcutta Gazette*. Also that it be circulated to other Governments and to all Departments and officers of this Government as usual.

By order of the Lieutenant Governor of Bengal,

A. S. THOMSON,

Under-Secretary to the Government of Bengal,

Irrigation Department.

Government of Bengal.

IRRIGATION DEPARTMENT.

REVENUE REPORT.

Note by COL. A. D. McARTHUR, R.E., Chief Engineer, on the Canal Revenue Reports of Bengal for the year 1895-96.

THE Capital expenditure on Irrigation Works in 1895-96 was as follows:—

	Direct charges.	Indirect charges	Total
	Rs.	Rs.	Rs.
Capital expenditure on Major Irrigation Works not charged against Revenue	1,47,488	6,394	1,53,882
Capital expenditure on Minor Works and Navigation, for which Capital and Revenue Accounts are kept ...	1,62,962	3,814	1,66,776
Total ...	3,10,450	10,208	3,20,658

2. The total Capital outlay at the end of the year 1895-96, including indirect charges, was:—

	Direct charges.	Indirect charges	Total.
	Rs.	Rs.	Rs.
<i>Major Irrigation Works—</i>			
Productive Public Works ...	6,24,36,197	17,43,881	6,41,80,078
<i>Minor Works and Navigation—</i>			
Protective grants—Imperial ...	8,66,000	...	8,66,000
Ordinary revenue { Imperial and Provincial. }	1,02,70,540	2,89,229	1,05,59,769
Total ...	7,35,72,737	20,33,110	7,56,05,847

3. The outlay abstracted above is shown in the following statement divided under the different projects:—

WORKS.	During 1895-96.			To end of 1895-96.		
	Direct charges.	Indirect charges	Total	Direct charges.	Indirect charges.	Total

* Exclusive of lands surreptitiously irrigated, for which leases were granted in subsequent years

The results of the working of each of the canal systems of the Province during the year will now be described separately, as in previous years.

GENERAL.

In all statements showing totals of receipts or expenditure, the figures are those of the Examiner of Accounts. In dealing with details, the figures of the Commissioner, or of the Superintending Engineer, have been taken.

ORISSA CANALS.

CAPITAL ACCOUNT

10. The Capital, Interest, and Revenue Accounts of these canals are given below:—

I—CAPITAL ACCOUNT.

HEADS OF ACCOUNT		Outlay during 1895-96	Outlay to end of 1895-96.

Leave and pension allowances	...	1,985	5,47,405
Total Indirect Charges		1,985	5,80,638

The principal works, charged to Capital Account, in progress during the year were—The raising of the flood bank of the Kendrapara Extension Canal, which was proceeded with. Owing to the nature of the soil, and to the injury caused by the action of waves when the river is in flood, it is difficult to hold this bank. It has just recently been breached in several places, and a considerable further outlay will be necessary to make it secure. The new distributaries from the Jajpur Canal, and the flood bank which protects them, are practically complete. A number of small syphons, under distributaries, were built to remove local interruptions to drainage, and a few drainage cuts were excavated in the Machgong Canal System. Certain quarters for zilladars, sectional officers, and toll collectors, in progress last year, were completed.

NOTE—The details by heads of expenditure for the year 1895-96 and nine preceding years will be found in the table given in paragraph 12 following.

There was an increase in the receipts, and a decrease in expenditure, the result being a deficit of Rs. 55,591, against Rs. 1,50,975 in 1894-95.

11. The following statement compares the earnings with the outlay for the last two years. The term "earnings" as applied to Irrigation denotes the assessed water-rate value of the Irrigation effected during the year; as applied

EARNINGS

to Navigation it denotes the amount of tollage assessed during the year, together with the actual realizations of miscellaneous revenue charged to Navigation. The miscellaneous earnings are the actual receipts during the year under this head:—

	1894-95.	1895-96.
Earnings.	Rs.	Rs.
Irrigation	1,76,202	1,71,025
Navigation	1,17,608	1,71,472

NOTE.—Out of the areas shown as provided with distributaries, to which water can be supplied, 100 acres are irrigable from the Kendrapara Canal direct, 3,000 acres from the Gobri Canal, 3,000 acres from the Gobri Extension Canal, and 1,800 acres from the Pattamundi Canal.

There is a nominal increase of a quarter of a mile in the length of distributaries, due to a correction in the recorded length of the distributaries of the Jajpur Canal. There is also a slight increase in the area shown as provided with distributaries, due to some corrections made in the Brahmini-Byturni Division.

14. The number of outlets which were in use during the year are given in the following Table:—

DIVISION.	Canal system	Permanent outlets	Temporary outlets	Total	Total area assessed.	Average area per outlet.
1	2	3	4	5	6	7
		No	No	No	Acres	Acres
Mahanadi	Taldanda	60	448	508	9,896	19
	Machgong	77	572	649	15,778	24
Brahmini-Byturni	Kendrapara	164	2,406	2,570	49,480	19
	Gobri	81	81	162	2,132	26
	Gobri Extension	31	31	62	1,011	6
	Pattamundi	410	410	820	11,214	27
Acquapada-Jajpur ...	High-Level Range, I	116	209	325	13,859	43
	Ditto " II	16	16	32	892	56
	Ditto " III	1	118	119	10,105	85
	Jajpur	52	52	104	4,996	56
	Total	417	4,543	4,960	119,480	24
	Total of 1894-95	272	4,425	4,697	122,501	26

The increase in the permanent outlets in the Mahanadi Division is in consequence of a proper classification having been made this year.

RAINFALL

15. The average rainfall of the last five years at thirteen stations, situated within the canal irrigated area, is shown below for the kharif and rabi seasons —

		AVERAGE OF THIRTEEN STATIONS				
		1891-92	1892-93	1893-94	1894-95	1895-96
1		2	3	4	5	6
		Inches	Inches	Inches	Inches	Inches
Kharif season	July	10.31	11.99	8.17	16.34	8.89
	August	16.48	8.08	5.63	9.59	15.91
	September	19.45	10.71	15.73	6.79	8.37
	October	1.17	5.66	5.52	6.37	5.46
	Total	47.94	36.44	38.05	39.09	38.63
Rabi	November	6.77	0.85	0.09	3.07	0.41
	December				0.03	
	January		2.00	0.02	0.02	
	February	0.20	1.89	0.18	0.80	
	Total	6.97	4.74	0.29	3.72	0.41
Whole year		61.03	56.43	74.83	68.91	63.12

The total mean fall was 63.12 inches, as compared with a mean average for the last 27 years of 58.12 inches. The rain was well distributed, and in consequence very favourable to the crops. The average rainfall recorded at the stations in the Central Provinces, from which the Mahanadi derives the greater part of its supply, was 50.99 inches in 1895-96, as compared with 60.26 inches in 1894-95.

FLOODS.

16. The maximum flood-levels recorded during the year are compared in the following Table with the maximum levels in 1894-95, and with the highest recorded levels —

NAME OF RIVER	Locality	1894-95		1895-96		HIGHEST RECORDED	
		Date	Reading	Date	Reading	Date	Reading
1	2	3	4	5	6	7	8
Mahanadi	Naray above weir	28th July 1894	83.40	1st July 1895	80.57	26th July 1892	92.10
	Do below weir	28th	89.40	1st	90.55	26th	92.10
	Joba above weir	28th	73.45	1st	74.40	25th	75.95

	Do below weir	20th	61.60	16th	51.40	16th	63.79
Shilpi	Pandua	25th	54.45	30th August ..	53.70	14th Sept 1892	59.78
Katju	Chelaga	23th	60.00	1st July ..	51.15	25th July ..	62.30
Beropa	Figturi above weir	25th	60.15	2nd	69.30	4th .. 1879	71.10
	Do below weir	25th	63.50	2nd	63.20	4th	70.60

The floods of the year were of moderate nature, and no damage of any consequence was done to the canal works.

17. The assessed and irrigated areas for the last ten years, with the yearly rainfall, are shown in the following statement —

YEAR	Kharif	Rabi.	Perennial.	Total	Rainfall
1	2	3	4	5	6
	Aores	Aores	Aores	Aores.	Inches
1886-87	75,115	2,440	154	77,709	60 07

* 117,188 acres under five year lease and 140 acres annual lease
† 103,612 acres under long lease and 55 acres annual lease

The figures given by the Deputy Collector show that 13,802 acres under long lease lapsed on 31st March 1895, and 8,654 acres were leased during the year.

The Superintending Engineer remarks that there is an apparent falling off of 5,118 acres under long lease, "but as was remarked in last year's Revenue Report a considerable area, classed as long leases, was really only under a lease for one year. Under the conditions as to rainfall, which obtained during the season, no extension of leases could be expected." The enquiries as to the areas which are really commanded by the distributaries, and which may be properly classed as irrigable, were continued.

Of the commanded area, 21·23 per cent, and of the area provided with distributaries, 30·25 per cent., were under lease during the year.

DUTY OF
WATER

19. The statement below shows the duties obtained in the kharif and rabi seasons on each of the canals, calculated on the gross discharged at the canal heads:—

PARTICULARS		Kendra- para Canal system.	Taldunda Canal system.	High-Level Canal, Range I.	High-Level Canal, Range II.	High-Level Canal, Range III.	Jajpur Canal
1		2	3	4	5	6	7
1895-96	{ Kharif ... Acres	60,569	24,905	13,410	743	9,863	1,661
	{ Duty on gross supply	56	56	60	57	101	66
1894-95	{ Kharif ... Acres	62,840	21,136	12,878	2,453	14,120	16 89
	{ Duty on gross supply	64.38	68.18	35.91	.	75.42	91 89
	{ Kharif ... Acres	50,393	11,941	10,468	2 000	15,801	...
1893-94	{ Duty on gross supply	67.56	73 82	35.95	142 25	113 50	...
	{ Rabi Acres	1,866	113	23	52	1	...
	{ Duty on gross supply	3 78	1.21	0.16	6.21	0.44	...

No information is given regarding duty in the rabi season: the area under rabi was very small.

The Superintending Engineer writes:—

"The above figures are of little or no value, as, owing to the favourable rainfall, there was no real test of the quantity of water required at a time of drought.

At such a time we may be able to work up to the Sone Canals standard of a duty of 50 acres per cubic foot per second, on the supply at the heads of main canals, but we cannot expect a higher duty than this, except, perhaps, on the ranges of the High-Level Canal, where the distance the water has to travel before reaching the fields is somewhat shorter.

Some observations were taken of the duty of the water in the rice season, measured at the outlet; but owing to the absence of any period of great demand, the results were not of much value. In a general way, the duty obtained was between 60 and 70 acres per cubic foot per second, on the assumption that one full watering in 15 days is sufficient for the rice crop. Further observations will be made in the current year. The question is of much importance, as, before building permanent outlets, we must determine what supply we are to give, per acre, of land leased. On this again will depend the area for which, at a time of drought, we can undertake to supply water."

CROP EXPERI-
MENTS.

20. The following are the results of the crops experiments, in the customary form, combined in one Table, for the year 1895-96.

	IRRIGATED AND UN-IRRIGATED LANDS																					
	Number of experi- ments	TRANSPLANTED, GOOD				Number of experi- ments	TRANSPLANTED, AVERAGE				Number of experi- ments	BROADCAST, GOOD				Number of experi- ments	BROADCAST, AVERAGE

Average	1.24 1.23	17	37	69 60	13	23	26	4	23	4
Average of five years ending with 1890-91		20 78	22 50	..	15 05	16 12	20 70	2 51	15 05	1 70
1891-92		16 00	19 20		12 15	13 70	14 00	2 11	12 16	1 58
1892-93		12 61	24 01		9 00	17 45	20 40	2 17	23 61	1 70
1893-94		11 31	24 56		9 00	21 62	27 40	2 17	20 15	2 40
1894-95		19 69	50 35		17 08	37 01	32 66	5 00	30 62	4 24

The rate for rice entered in this Table is given for common rice in the Supplement to the Calcutta Gazette of 22nd January 1896, less 1/4th for wholesale price. The rate for straw is same as entered in previous year's Reports.

The Superintending Engineer writes:—

"The yield, as ascertained this year, is rather less than in the previous year. This is probably partly due to the nature of the season, and partly to the fact that I gave instructions last autumn that the experiments should be made chiefly on those lands which are generally only leased in dry years. There is a large area of this class of land which is irrigable, and it is very desirable to determine, with some certainty, if the benefit from the use of canal water is sufficient to give a profit to the cultivator, after payment of the water-rate.

I have lately submitted draft rules, with the view of securing that the same fields should be tested for a number of years in succession, so as to get a true average result.

So far as the experiments made in the past season go, they show a balance of Rs. 3 per acre in favour of the irrigated land, as compared with a water-rate of Rs. 1-8. This being during a season which was very favourable for un-irrigated lands, would tend to show that, on the average of varying seasons, the balance will be more in favour of the irrigated fields."

"Taking the average of the experiments on both "transplanted" and "broadcast" rice crops on irrigated lands, the results are as follows, compared with those obtained in the Sone Circle:—

		Quality of crop.	OUTTURN PER ACRE	
			Paddy maunds	Straw maunds.
1	2	3	4	
Orissa	...	Good	26 2	40
		Average	23 7	38 4
Sone	..	Good	35 08	77 9
		Average	24 8	58 9

The average value of the rice out-turn from the irrigated lands in Orissa was Rs. 26 per acre, while from the un-irrigated lands, it was Rs. 23 per acre.

ASSESSMENTS
AND COLLECTIONS.

21. The demands, collections and balances of water-rates are shown below for the last five years —

YEARS	Amount out-standing at com- mencement of year	Amount falling due during the year	Total for recovery	Cash realizations	Remitted or written off	Balance at the end of the year
1	2	3	4	5	6	7
	Rs	Rs	Rs	Rs	Rs	Rs
1891-92	1,98,364	2,82,880	4,81,244	2,17,256	30,284	2,33,704
1892-93	2,33,704	2,61,023	4,94,727	3,52,368	52,513	89,816
1893-94	89,816	1,90,824	2,80,640	2,09,542	7,748	63,350
1894-95	63,350	1,68,449	2,31,799	1,93,559	6,109	32,140
1895-96	32,140	2,31,727	2,63,867	2,24,618	4,876	34,343

The outstanding balance, though larger than last year, is still satisfactory. The Superintending Engineer writes —

“The increase in the demand of the year is one in appearance only, and is due to the fact that, under the present rules, the payment of the whole rate, in the case of long leases, has to be made on the 1st February of each year, the Deputy Collector applied this to all the existing leases for a term of years. On the whole there has not been much objection made to this procedure, and there is no doubt that it is the proper course to take in Orissa, where there is practically only one crop. Allowing for this increase in the assessment, the progress of collections has been satisfactory. Since the close of the year the balance has been reduced, and in the Return received from the Deputy Collector, dated 15th August, it stands at Rs. 1,84,479.”

Of the total, Rs. 4,876, remitted and written off, Rs. 3,506 were classed as remission, and Rs. 1,870 written off as irrecoverable. Including miscellaneous revenue, the total amount realized by the Deputy Collector was Rs. 2,43,076 as against Rs. 2,12,178 realized in the previous year.

CERTIFICATES.

22 The amount of certificate work done in each district is shown in the following statement —

	CUTTACK				BALASOR				TO AT			
	1895-96		1894-95		1895-96		1894-95		1895-96		1894-95	
	Number	Amount	Number	Amount	Number	Amount	Number	Amount	Number	Amount	Number	Amount.
1	2	3	4	5	6	7	8	9	10	11	12	13
		Rs		Rs		Rs		Rs		Rs		Rs.
Cases for disposal—												
1 Cases pending at the close of the preceding year	12	1,042	429	1,346	2	17	53	509	127	1,099	476	4,055
2 Cases instituted during the year	2,257	17,074	4,421	23,014	270	2,230	1,202	5,570	2,407	19,909	5,683	27,466
Total	2,369	18,116	4,850	24,360	272	2,247	1,255	6,079	2,534	20,908	6,159	31,521
Cases disposed of—												
1 By being struck off	14	74	197	978			35	358	14	74	232	1,130
2 Wholly satisfied	2,173	18,042	4,653	23,036	272	2,247	1,278	5,504	2,445	19,071	5,800	29,130
Total	2,187	18,116	4,850	24,014	272	2,247	1,313	5,862	2,459	19,145	6,032	30,260
Balance	182	1,800	125	1,042			2	17	185	1,823	127	1,069

The large decrease in the number of certificates instituted during the year is satisfactory.

23. The following Table shows the number of objections filed against assessment and disposed of during the year:—

DIVISION	ORDINARY REMISSIONS				OTHER COMPLAINTS			Total received during the year	Pending at end of year
	Received during the year and pending from previous year	Disposed of—		Pending	Received during the year and pending from previous year	Imposed of	Pending		
		Remission allowed	Remission refused						
1	2	3	4	5	6	7	8	9	10
Revenue	576	907	804	64	51	45	8	473	78
Mahanadi	221	144	74	3	122	124	6	345	9
Brahmini-Bj turni	298	113	154	12	50	80	3	355	15
Acquapada-Jajpur	279	398	173	8	67	66	1	673	9
Total	1,643	951	605	87	338	320	18	1,729	108

24. The following is a statement of the amounts remitted, and written off as irrecoverable, during the year, on account of water-rates, &c, compared with the figures of the previous year:—

Remission of Assessment

	1894-95	1895-96
	Rs	Rs
(a) Un-irrigated crops	2,155	1,409
(b) Damaged	287	763
(c) Chaukidar's jagir	382	40
Total	2,824	2,212

Remissions

(d) Waste-land	77	61
(e) Land occupied by canals	2	
(f) Twice assessed	49	14
(g) Change of rates	590	796
(h) Erroneous assessments	25	462
(i) Loss of crops	381	71
(j) Error in totalling	7	
Total	1,134	1,407

Written off

Irrecoverable demands	2,150	1,257
Grand total	6,109	4,876
Deduct remissions under Miscellaneous Revenue		
Net Remissions	6,109	4,876

Of the above sum, Rs. 3,619 were remitted by the Deputy Collector, on the recommendation of the Executive Engineer, and Rs. 1,257 written off by the Superintending Engineer, on the recommendation of the Deputy Collector.

25. Nine appeals were entertained by the Collector of Cuttack against orders of Divisional Canal Officers determining the assessment of lands irrigated without lease. In all the cases the appeals were dismissed.

26. In the Mahanadi Division, one case in connection with cattle trespass was brought, and a conviction was obtained.

APPEALS.

CASES UNDER
ACT III (B C)
OF 1876

REVENUE
ESTABLISH-
MENT

27. The cost of the Revenue Establishment for the last five years is shown below:—

	1891-92	1892-93	1893-94.	1894-95	1895-96.
1	2	3	4	5	6
<i>Establishment under Deputy Collector</i>	Rs	Rs.	Rs.	Rs	Rs
Permanent establishment, including travelling allowance	22,014	31,086	43,981	43,679	42,735
Temporary establishment ..	17,501	16,020	11,580	11,166	6,161
Contingencies ..	3,458	4,098	3,811	3,206	2,457
Headmen's fees	6,591	20,040	3,464	80	172
<i>Establishment under Executive Engineer</i>					
Permanent and temporary establishment, including travelling allowance ...	3,417	5,930	7,874	8,568	8,905
Water-regulation establishment ..	4,127	3,274	3,278	2,982	2,809
Total ..	57,141	80,418	73,988	69,681	63,239
Collections of water-rates and miscellaneous revenue by the Canal Revenue Department ..	2,28,451	3,73,224	2,26,851	2,12,178	2,43,076
Percentage ..	25 0	21 0	32 6	32 8	26 01

The reduction in the cost of the establishment under the Deputy Collector, is a result of the very small area which had to be assessed during the year.

The increase in the charge for permanent establishment under the Executive Engineer was due to a number of patrols, who had previously been charged to temporary establishment, having been brought on to the permanent list.

The charge for water regulation is not strictly one that should be debited to revenue establishment, but should be included in the charges for maintenance of the canals, as the staff is almost exclusively employed on the various aments.

NAVIGATION

28 The following statement shows the receipts from "Navigation" for the last five years:—

YEAR	TAIDUNDA CANAL SYSTEM		KENDRAPARA CANAL SYSTEM.		HIGH LEVEL CANAL RANGE I		HIGH LEVEL CANAL RANGE II		HIGH LEVEL CANAL RANGE III		JAIPUR CANAL		TOTAL	
	Number of miles open.	Tollage receipts.	Number of miles open.	Tollage receipts.	Number of miles open.	Tollage receipts.	Number of miles open.	Tollage receipts.	Number of miles open.	Tollage receipts.	Number of miles open.	Tollage receipts.	Number of miles open.	Tollage receipts.
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
1891-92	No 55½	Rs 4,337	No 78	Rs 8,402	No 33	Rs 12,844	No 12½	Rs 3,027	No 10	Rs 1,775	No 6½	Rs 296	No 204½	Rs 1,20,791
1892-93	54½	6,534	78	71,500	33	15,278	12½	3,165	19	1,761	6½	275	204½	1,00,503
1893-94	57	14,300	78	83,905	33	14,518	12½	3,801	19	2,028	6½	504	204½	1,19,115

1895-96	55½	15,011	78	1,04,523	33	15,881	12½	3,800	19	1,989	6½	424	204½	1,43,817

There was a great increase in the traffic on the Kendrapara Canal System, and on the High-Level Canal.

The Superintending Engineer writes:—

"The most noticeable feature is the large increase in the movement of rice. This was the result of a brisk demand for export, which has continued into the first part of the current year. There had been two excellent harvests in Orissa, so there was a large quantity of rice available for export. There are also fair increases in the items "other food-grains," "oil," "salt" and "building materials." There were decreases in the items "hides," "miscellaneous goods" and "timber."

The traffic on the Orissa Canals is detailed below for the last ten years, the transport service being excluded.—

	1886-87	1887-88	1888-89	1889-90	1890-91	1891-92	1892-93	1893-94	1894-95	1895-96
1	2	3	4	5	6	7	8	9	10	11
Number of miles open	No	170½	170½	177	177	177	204½	204½	204½	204½
Toll collections	Rs	58,684	66,625	60,539	78,033	1,06,161	1,04,761	1,00,501	1,10,113	1,42,844
Rate of toll per mile		344 1	330 7	394 5	440 3	604 3	584 8	440 8	541 7	646 5
Number of boats plying	No	14,311	12,084	11,475	11,087	19,095	12,046	19,925	14,112	12,188
Tonnage of cargo and passengers	Tons	128,398	175,098	157,671	186,619½	250,243	266,601½	230,583	2,50,444½	1,97,866
Estimated value of cargo, including rafts	Rs	41,81,350	50,32,003	47,40,087	48,68,255	65,31,551	95,19,756	84,69,728	71,60,437	51,72,773

29. The total receipts from the Transport Service amounted to Rs 25,761, against Rs. 18,981 in the previous year, showing an increase of Rs 6,780. The cost of working the Transport Service, excluding the charge of Rs. 7,531 for tollage, which is practically a receipt, was Rs. 10,078, and the service therefore worked at a profit of Rs. 15,683. The Superintending Engineer writes of the Transport Service as follows.—

“There is a satisfactory increase in the traffic, especially in the 3rd class passengers, and the total is the highest yet recorded. The traffic is being well maintained in the current year, and is likely to be brisk while the Railway works are under construction.”

The charges during the year for repairs to steamers and accommodation boats amounted to Rs. 1,633.

30. The following statement shows the Miscellaneous Receipts in detail for the last five years —

DETAILS	1891-92.	1892-93.	1893-91	1894-95	1895-96.
1	2	3	4	5	6
	Rs	Rs.	Rs	Rs	Rs
Sale of water	56	158	46	112	79
Plantations	917	1,960	1,214	2,511	2,520
Other canal produce	936	1,123	528	492	1,293
Rent of buildings	6,332	4,749	4,892	4,168	4,273
Miscellaneous { Rent of lands	8,232	9,291	9,247	9,248	11,129
" fisheries	1,104	972	1,191	740	1,710
Cost of process		7,420	4,951	5,533	2,478
Sales of old materials	96	3			96
Other items	170	856	1,023	454	591
Total	17,843	26,532	23,122	21,321	24,193

31. The expenditure on maintenance and repairs during the year 1895-96 shown in the following statement, compared with the expenditure in 1891-95 and in 1893-94 —

	1893-94	1894-95	1895-96
1	2	3	4
	Rs	Rs	Rs
Extension and improvements	21,355	6,547	4,867
Head-works	45,757	59,800	57,291
Main and branch canals	1,27,100	1,21,928	83,277
Distributaries	29,261	27,950	32,694
Drainage and protective works	8,237	5,480	8,916
Cost of working Transport Service	15,707	13,094	12,851
Total	2,55,717	2,34,799	1,99,827

There was a reduction of Rs. 34,972 in the cost of maintenance and repairs, as compared with 1894-95. The expenditure on extensions and improvements was almost entirely incurred in revetting portions of the banks of the Kendrapara and Gobri Canals, to protect them from the wash caused by steamers. This work is being proceeded with gradually.

HEAD WORKS

32. The cost of maintaining each of the weirs is shown below:—

NUMBER OF WEIR.	Length.	EXPENDITURE.			RATE PER RUNNING FOOT		
		1893-94	1894-95	1895-96.	1893-94	1894-95	1895-96
1	2	3	4	5	6	7	8
	Feet	Rs	Rs	Rs	Rs	Rs	Rs
Naraj	3,833	5,641	2,505	3,284	1 48	0 65	0 86
Mahanadi	6,319	14,718	16,144	19,371	2 32	2 54	3 05
Beropa	1,980	4,043	5,980	6,001	2 04	3 00	3 03
Brahmini	4,000	4,044	1,906	2,059	1 01	0 48	0 51
Pattis	783	4,019	4,776	4,437	5 13	6 10	5 67
Byturni	1,026	4,315	2,810	1,834	4 20	2 74	1 80
Burra	526	2,262	15,306	8,454	4 30	29 10	16 07
Total of all weirs	18,497	39,022	49,427	45 440	2 11	2 67	2 40

The expenditure on the weirs was normal, with the exception of the Burra Weir, on which Rs 8,454 were spent, mainly in completing the special repairs and improvements commenced in 1894-95.

MAIN AND
BRANCH
CANALS

33. The following statement shows the expenditure on each canal for the last three years —

MAIN AND BRANCH CANALS		EXPENDITURE.			RATE PER MILE		
		1893 94	1894 95	1895 96	1893 94	1894 95	1895-96
1		2	3	4	5	6	7
	Miles	Rs	Rs	Rs	Rs	Rs	Rs
Kendrapara Canal	39	28 112	42,468	15,850	977	1,089	668
Pattamundi Canal	47	7,698	13,460	4,911	164	286	104
Gobri Canal	15	8,045	10,132	5,309	536	675	354
Kendrapara Extension Canal	15	17,901	4,970	899	1,198	331	60
Gobri Extension Canal	9	4,737	7,171	2,590	526	830	299
Taldanda Canal	51½	11,058	16,591	18,809	409	614	354
Maehyong Canal	32	11,097	7,134	6,324	346	223	198
High Level Canal, Range I	37	12,266	9,283	10,435	372	231	316
Ditto, do II	12½	4,539	3,209	1,848	349	257	148
Ditto, do III	19	7,609	6,792	5,178	400	305	273
Jajpur Canal	6½	1,547	1,024	1,098	221	157	169
Total Main Canals	279¾	1,24,601	1,21,624	82,755	488	477	296

The reduction in the expenditure on the canals is satisfactory.

The Superintending Engineer explains that the unusually small expenditure on the Kendrapara Extension Canal, is mainly due to the fact that the right, or flood bank of this canal, was being raised on an estimate chargeable to the capital account.

The Kendrapara Canal cost comparatively little this year. There was only a short closure, and consequently not much silt clearing was done; while it was not found necessary to spend much on clearing weeds.

The cost of repairs to the Pattamundi Canal was considerably less than in the previous year. This was chiefly due to thorough repairs and silt clearance having been carried out in 1894-95.

The expenditure on the High-Level Canal was moderate, and compares favourably with previous years.

34. The maintenance cost of the distributaries, per mile, is shown below. The average rate of Rs. 33 shows a satisfactory decrease, as compared with the average mileage rates of 1894-95 and of 1893-94, which were Rs. 36 and Rs. 38, respectively :—

DISTRIBUTARY TABLE.

	1893-94			1894-95			1895-96		
	Miles	Cost	Per mile	Miles	Cost	Per mile	Miles	Cost	Per mile
1	2	3	4	5	6	7	8	9	10
DISTRIBUTARIES	No	Rs	Rs	No	Rs	Rs	No	Rs	Rs
Kendrapara Canal System, including									
Gobri	357	11,182	31 32	357	10,340	29	335	14,500	51
Taldanda Canal	71½	2,002	28 07	71½	3,049	43	82½	2,380	29
Maohgong Canal	122½	4,001	32 63	122½	4,050	33	210½	8,203	39
High Level Canal, Range I	191½	4,648	24 28	181½	4,013	22	131½	2,764	21
" " " Range II	49½	3,400	68 40	40½	3,241	80	49½	1,772	36
" " " Range III	37½	2,477	66 05	37½	1,710	46	109½	2,409	22
Fastamundi Canal									
Total	768½	29,362	38	768½	27,049	35	964½	32,100	33

The lengths of distributaries in the above are those which have been brought on the revenue account and consequently differ from the lengths given in paragraph 13 which include all so far advanced as to be fit for use, whether the capital account is still open or not.

35. The total expenditure on Drainage and Protective Works was Rs. 8,945, against Rs. 6,175 in 1894-95. It includes the upkeep of 131½ miles of first class protective embankments, and 268 miles of drainage cuts. The increased expenditure is chiefly due to the cost of revetting a part of the right bank of the Salindeo river.

DRAINAGE AND PROTECTIVE WORKS

36. The following Table shows the cost of silt clearing and dredging during the year 1895-96 :—

DREDGING AND SILT CLEARING

NAME OF CANAL	SILT CLEARING			DREDGING		
	Quantity	Cost	Rate per 1,000 cubic feet.	Quantity.	Cost	Rate per 1,000 cubic f. ft.
1	2	3	4	5	6	7
Taldanda ...	2,830,244	7,075	2 49	307,823	1,983*	6 59
Maohgong ..	63,934	188	2 94			
Kendrapara	2,542,548	7,136	2 80	668,011	2,474	3 70
" Extension						
Gobri Canal	65,264	130	1 99	80,100	152	6 14
" Extension						
H " L Canal, Range I	186,794	719	3 84			
" Range II	59,372	148	2 49			
" Range III	72,016	181	2 51			
Total	6,426,172	15,577	2 42	1,018,964	4,919	4 71
Total, 1894-95	13,976,975	41,398	2 96	1,044,911	6,115	6 17

* Rs. 355 of this were paid after 1st April 95.

The silt cleared by hand was much less in quantity than in the previous year, owing to there having been no long closure on the Kendrapara Canal system.

The quantity raised by dredging is very nearly the same as in 1894-95. The average rate this year is lower. This depends largely on the distance the silt has to be carried after raising, and to some extent on the expenses of taking the dredgers to and from the sites of work.

TELEGRAPH
OFFICES.

37. The Receipts from the Postal and Telegraph offices at Jagatpur, Kendu-patna, Acquapada, and Janapur amounted to Rs. 1,373 during the year. The amount guaranteed by the Department was Rs. 1,600. The difference, Rs. 227, is a charge against the Canal Revenue.

PLANTATIONS.

38. The following table shows the state of the plantations for the last two years:—

DIVISIONS.		1894-95.	1895-96	Difference.
1		2	3	4
Mahanadi	37,917	36,954	—963
Brahmini-Byturni	72,874	73,193	+ 319
Acquapada-Jajpur	25,891	26,183	—292
Total	136,682	1,36,330	—352

The decrease in the Mahanadi Division was due to the loss of a large number of seedlings.

In the Acquapada-Jajpur Division a number of trees were cut, and used as fuel for the Transport Service. The receipts from plantations amounted to Rs. 2,520. The only expenditure on this head, charged to the Revenue Account, was Rs. 257 in the Brahmini-Byturni Division. On the Taldanda and Machgong Canals, Rs. 797 were spent on planting trees on the banks, against the Capital Account.

MIDNAPORE CANAL.

CAPITAL
ACCOUNT

39. The Capital, Interest, and Revenue Accounts of this canal are given below.—

1. CAPITAL ACCOUNT.

HEADS OF ACCOUNT.		Outlay during 1895-96	Outlay to the end of 1895-96
1		2	3
		Rs.	Rs.

Total ...	2,94,423	2,63,633	Total receipts ...	2,94,423	2,63,633

NOTE—The details by heads of expenditure for the year 1895-96 and nine preceding years will be found in the table given in paragraph 41 following

There was a decrease in the receipts owing to the falling off in water-rates, and an increase in expenditure due to extensive repairs and river training works, the net result being a deficit of Rs. 12,480.

40. The earnings of the Canal during the year, i.e., the assessed water-rate value of the irrigation done during the year, the assessed tollage plus the actual miscellaneous receipts under Navigation, and the actual receipts under the head Miscellaneous, are compared below with the actual outlay --

EARNINGS

EARNINGS.	1894-95	1895-96

LENGTHS OF
CANALS AND
DISTRIBUTARIES.

42. In the following statement are tabulated particulars concerning the canals and distributaries. There has been no change in the lengths of canals or in the areas protected or commanded:—

NAME OF CANAL	1895-96								1894-95								REMARKS
	Navigable canals	Canals for irrigation only	Distributaries and village channels	Area protected from floods	Area under command	Area irrigated with distributaries	Area irrigated	Percentage of area irrigated to area protected with distributaries	Navigable canals	Canals for irrigation only	Distributaries and village channels	Area protected from floods	Area under command	Area irrigated with distributaries	Area irrigated	Percentage of area irrigated to area protected with distributaries	
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18
Under Midnapore with Panchkuli and Tidal reaches, Ranges I and II	Miles 11	Miles 13	Miles 20 31	Acres 244 170	Acres 100 000	Acres 56 887	Acres 56 68	Acres 44	Miles 11	Miles 13	Miles 20 31	Acres 244 170	Acres 100 000	Acres 56 887	Acres 56 68	Acres 44	
Total Canal	7	73	513 75	4,7,120	1,40,000	125,000	66,251	52 20	72	73	330	437 120	1,80 000	125,000	70,110	56 00	

* NOTE.—Of this, length of distributaries is 283 97 and village channels 29 8

The percentage of the area irrigated was less than that of previous year, viz., 52 20 as compared with 56 09. The slight increase in length of distributaries was due to re-measurement. As regards village channels, the actual length of channel only is included, instead of the sanctioned length which was entered in previous returns.

43. The following statement shows the areas commanded by the distributaries, and the number of outlets in use:—

OUTLETS

PORTION OF CANAL.	Total length of channel.	Area commanded.	NUMBER OF TEMPORARY OUTLETS.		NUMBER OF PERMANENT OUTLETS.	
			1895-96.	1894-95.	1895-96.	1894-95.
1	2	3	4	5	6	7
Under Midnapore weir ...	Miles. 230 72	Acres. 100,000	1,032	737	43	32
Do Panchkurah weir ...	35 25	23,000	174	257	1	1
Do. Tidal reaches, Ranges I and II ...	18 00	2,000				
Total ...	283 97	125,000	1,206	994	44	33

The increase in temporary and permanent outlets under Midnapore weir was due to a more correct statement having been prepared, and also to larger area irrigated on account of the unfavourable season. Under Panchkura weir the smaller number was owing to re-sizing of the outlets and reduction of leased areas.

44. The average rainfall of the last five years at four stations within the canal-irrigated area is shown below.—

RAINFALL

STATIONS	1891-92	1892-93.	1893-94	1894-95	1895-96	Average of former years	
						No. of years	Average rainfall.
1	2	3	4	5	6	7	8
Midnapore	Inches 55 08	Inches 44 44	Inches 66 31	Inches 41 90	Inches 48 39	27	Inches. 55 41
Panchkurah	41 60	39 95	65 37	71 62	31 54	27	55 06
Inchmapur	57 48	47 13	74 18	54 22	39 50	11	56 08
Mowah	53 07	33 00	76 67	53 77	27 12	11	52 09
Average	51 81	41 28	70 63	55 90	36 64		51 80

The rainfall was much below the average, and was generally deficient throughout the irrigated area. It was most deficient towards the end of June and greater part of July, also in September and October; and at these times there was a considerable demand for canal water for irrigation.

The rainfall in the kharif season was distributed as follows —

	Midnapore	Panchkurah	Inchmapur	Mowah	Average 1895-96	Average, 1894-95
1	2	3	4	5	6	7
	Inches.	Inches	Inches	Inches	Inches	Inches.
July	9 30	7 90	10 15	5 15	8 12	13 95

October	3 72	2 24	2 27	0 80	2 53	4 11
Total kharif season, 1895-96	31 58	20 17	28 22	18 55	24 48	36 27
Do 1894-95 ..	27 54	50 92	34 09	28 57	36 27

FLOODS.

45. There were no high floods during the year; consequently there were no bad breaches, and no damage was done to crops. The following table shows the highest levels of the Cossye and Rupnarain rivers, compared with those of last year, and with the highest recorded levels:—

River.	Locality	1895-96		1894-95		HIGHEST RECORDED.	
		Date	Reading	Date	Reading	Date.	Reading
1	2	3	4	5	6	7	8
Cossye	Midnapore above weir	19th September 1895	85 50	25th July 1894	85 70	1883	88 30
	Ditto below weir	Ditto		Ditto	84 00	Do	81 58
	Panchkurah above weir	21st September 1895	27 10	26th July 1894	27 50	10th October 1876	25 00
Rupnarain	Ditto below weir	Ditto	26 40	Ditto	24 40	Ditto	24 30
	Dainan	19th September 1895	15 20	2nd September 1894	16 30	20th August 1885	17 30
	Kantapurah	20th "	15 50	Ditto	16 40	Ditto	16 30

The greatest discharge of the Cossye during the year was 14,571 cubic feet per second on the 19th and 20th September 1895, against 40,071 cubic feet per second on the 17th August 1894. After September the discharge diminished rapidly. The minimum discharge occurred on the 1st March 1896, when only 5 cubic feet per second was registered.

The Superintending Engineer writes:—

"The discharge of the Cossye fell to about 600 cubic feet per second, but as it did not last for more than two or three days at a time, only temporary inconvenience was caused in supplying water to the leased areas. In the month of October, however, this reduced discharge is a much more serious matter, as it is during that month, in the absence of rain, that the demand for water for irrigation is greatest. During last October, from the 9th to 29th, the average daily discharge of the Cossye was under 700 cubic feet per second, and the Executive Engineer writes that "there was great difficulty in meeting the demand, and this was only done by starting a regular system of rotation of supply to which the villagers had not before been accustomed.

This liability of the Cossye to "run down" during the most critical month of the year is a great drawback in the capacity of the Midnapore Canal for irrigation, and this fact must be remembered when applications are received for renewal of leases. It is true that last season was exceptionally dry, but such seasons will recur again, and it will therefore be the duty of the Canal Officer, when approving of new leases, to see that the lands are conveniently situated to the main canal and distributaries. In future, when each lease is approved, it must be carefully marked in the two-inch-to-a-mile map, so that each officer and subordinate may know where the leases are."

IRRIGATION.

46. The areas of the crops irrigated and leased during 1895-96 and the ten previous years, as also the average annual rainfall, are shown below:—

YEAR.	Kharif.	Rabi.	Perennial	Total.	Rainfall.
1	2	3	4	5	6
	Acres.	Acres.		Acres	Inches.
1885-86	68,769	70,604	81 28
1886-87	69,762	69,762	53 05
1887-88	64,702	1,162	...	65,864	22 08
1888-89	66,108	3,369	...	69,777	62 13
1889-90	68,370	440	...	68,810	44 47

* Mean of observations of two stations—Midnapore and Panchkurah.

† Average of four stations throughout the irrigated areas under the Midnapore and Panchkurah weirs.

The total area leased during the year was 65,251 acres as compared with 70,116 acres of the previous year.

The Superintending Engineer remarks:—

"The whole of the irrigation was *kharif* with the exception of 175 acres of *boro*, and the decrease of 4,690 acres were due to non-renewal of the lapsed leases. This decrease for one year is not marked, but, including 1893-94, it becomes considerable, amounting, as it does, to 17,875 acres. It is difficult to explain why the whole of the area that lapsed during the past two years was not renewed in the year under review, which was one of very deficient rainfall. The following have been assigned as reasons:—

- (1) Re-measurement of the area to be leased.
- (2) Imposition of twelve annas rate under rule 8 for villages which did not renew their leases the same year in which they lapsed.
- (3) Collection of water-rate in one instalment.

The new rules which came into force in 1893 determine that no lease was to be renewed without re-measurement, and that an additional rate of 12 annas an acre in certain cases was also to be imposed. Prior to the introduction of these rules, no maps had ever been prepared to show the fields under lease. About the year 1874 a number of maps and *khassas* were made by Mr. Price, Settlement Officer, but they were never used for canal assessment work. These maps are now being used, and where they are not available, sketch maps are being prepared; but as the *amins* are incompetent, it will take some years yet before the whole area of 80,000 acres can be mapped out. When this work is complete, it will never require to be done again, so that in future assessment will be much simplified. There is at present great objection to this re-measurement, which generally gives about 20 per cent additional area. The imposition of an additional rate is still more unpopular. The wording of the rule is not explicit, as it is believed that the meaning intended to be conveyed is that, if a lease is not renewed as soon as it expires, a penalty rate of 12 annas will be levied on the first year of releasing. The villagers complain that they were not informed of this rule. This is quite possible. It would therefore be expedient to make the rule inoperative for the present.

As regards collections of water-rate in one *kist*, there is no specific rule for it. The villagers complain that in order to pay up in one instalment, they have to sell their rice when the market price is low.

How far this disinclination on the part of the lessees to renew their leases is due to the above causes it is difficult to say; but there is no doubt that the previous Deputy Collector gave little attention to the work of assessment, and that neither he nor his *zilladars* were in touch with the canal officers. This state of affairs no longer exists, as the present Deputy Collector works in perfect harmony with all the canal authorities.

A proposal to relax the above rules for this year is now under the consideration of Government."

47. The following table gives particulars about the areas under lease

LEASING

PARTICULARS.	KHARIF			Sugarcane and other perennial irrigation	Rabi	Total	REMARKS
	Long leases.	Annual leases	Subsceptious irrigation				
1	2	3	4	5	6	7	8
Leases in force in 1894-95	Acres 69,926	Acres	Acres		Acres 190	Acres 70,116	
Do. which expired at the end of 1894-95	17,324				190	17,414	
Do. in force at the beginning of 1895-96	69,702					53,702	
Do. executed during 1895-96	12,063	435	25			12,543	
Do. in force during the year 1895-96	61,791	435	25			62,251	
Do. which expired at the end of 1895-96	17,201	435	25			17,661	

48. The duty obtained in the *kharif* season, calculated from the gross discharge, is given below for the last three years —

PARTICULARS		Under Midnapore weir	Under Panch-kurah weir
1		2	3
1893-94 Kharif	Acres	73,738	4,970
	Duty on gross supply	134	191
1894-95 Kharif	Acres	30,209	2,731
	Duty on gross supply	204	170
1895-96 Kharif	Acres	56,887	7,234
	Duty on gross supply	105	64

As the Superintending Engineer again remarks, the system of calculating the average duty of water is of no practical value. Unfortunately there is no accurate information available of the area irrigated between the 26th September and 25th October, which was a period of great demand. The average daily discharge between these dates was 651 cubic feet per acre, and the area under lease, 56,887 acres. Judging from these figures, it is evident that the capacity of the Midnapore Canal in a dry season is limited, and that the villagers are contented with a smaller supply of canal water for irrigation than is invariably given to lessees in the Sone and Orissa Canals.

CROP EXPERI-
MENTS

49. The usual crop experiments were made during the year. The total number of these experiments was 82, and gave an average outturn of 20 maunds 24 seers per acre of paddy, and 38 mannds 35 seers of straw, weighed dry.

The results are embodied in the statement below. There being a great demand for canal water during the year, it was a good one for determining the outturn of irrigated crops.

Statement showing the average outturn of each crop experimented by each officer of the Midnapore Canal Rivers Division during the year 1895-96.

1 NAME OF OFFICER.	2 Name of crop	3 Number of experiments.	4			
			AVERAGE WEIGHT PER ACRE IF WEIGHED WET.		AVERAGE WEIGHT PER ACRE IF WEIGHED DRY, OR REDUCED IF WEIGHED WET.

ASSESSMENTS,
COLLECTIONS,
AND BALANCES

50. The balances, assessments, and recoveries of water-rates on the Midnapore Canal during the last five years are shown in the following statement

YEAR	Amount outstanding at commencement of year	Amount falling due during the year.	Total for recovery.	Cash realization	Remitted or written off	Balance at the end of the year
1	2	3	4	5	6	7
1891-92	Rs. 64,967	Rs. 1,29,822	Rs. 1,94,789	Rs. 1,32,981	Rs. 2,836	Rs. 58,972
1892-93	58,972	1,39,990	1,98,962	1,49,057	1,33	48,567
1893-94	48,567	1,30,111	1,78,678	1,65,630	601	7,027
1894-95	7,027	1,35,016	1,42,043	1,36,882	612	4,549
1895-96	4,549	1,04,111	1,08,660	98,059	477	10,124

The cause of the large balance at the end of the year is thus explained by the Superintending Engineer:—

“Sixty-one villages objected to pay water-rates at the enhanced rate of assessment under rule 8 of the revised rules amounting to Rs 3,001. Collection of this sum had, therefore,

to be stopped pending decision by the Superintending Engineer to whom the question had been referred. Other villages declined to pay until the high and low lands included by the amins had been excluded from assessment. If these amounts are deducted, then the outstanding balance would compare favourably with that of previous years. Accepting this explanation, the system of collection of water-rates continued to be satisfactory, and the realization of the entire current demand from a lessee in one instalment was insisted on. Notices of assessment showing amount of water-rate due, date of instalment, and other matters were served, as in the previous year, upon each lessee with a view to prevent any fraud being practised on him by the tahsildars as to the amount of rate payable. The number of collecting agencies was 14, who realized Rs. 98,059 from 37,104 rate payers residing in 1,001 villages in three months' time. As the Deputy Collector only joined his appointment in January, his supervision of the collections must be considered satisfactory."

51. The following statement shows the arrears of each former year which were outstanding at the beginning of 1895-96, as well as the current dues, and the extent to which they have been worked off.—

YEAR	Amount previously due and uncollected	Amount falling due within the year.	Total amount due to end of the year.	ADJUSTMENTS OF THE YEAR				Balance uncollected at end of the month of March 1896.
				Cash recoveries.	Remissions authorised	Written off as being irrecoverable	Total.	
1	2	3	4	5	6	7	8	9
1895-96	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.
1895-96	605 0 0	127 10 0	127 10 0	127 10 0	3 3 0	4 15 6	17 10 0	387 8 0
1896-96	16 10 0	323 6 0	1,002 3 6	603 2 3			614 11 0	
1897-96	9,893 14 0	1,107 11 6	5,008 4 0	4,370 3 6	11 4 0		4,377 0 3	601 3 9
1898-96	16 10 0	1,02 6 10 6	1,02 6 10 6	92 938 4 6	453 12 3		93,417 0 9	9,046 9 9
Total	4,519 5 3	1,04,111 6 0	1,08,600 12 0	98,059 4 3	473 3 0	4 11 6	98,536 6 6	10,125 8 6

52. The remissions granted during the year were very small and were as follows.—

Remissions granted by the Collector under rule 23 of the Midnapore canal rules	Rs. 14
Remissions granted by Special Deputy Collector under clause I of rule 24 of the new rules	13
Remissions granted by Special Deputy Collector under rule 25 of the rules	450
	477

53. The extent to which recoveries by means of certificates were made during the year is shown in the following statement:—

PARTICULARS	MIDNAPORE.			
	1895-96		1896-96	
	No.	Amount	No.	Amount
1	2	3	4	5
Cases for disposal		Rs.		Rs.
1 Cases pending at the close of the preceding year	70	493	17	229
2. Cases instituted during the year	579	5,708	286	2,904
Total	649	6,201	303	3,133
Cases disposed of.				
1 By being struck off, owing to the demand having been remitted	97	1,370	2	12
2. By being wholly satisfied	535	4,602	243	2,457
Total	632	5,972	245	2,469
Balance outstanding at the close of the year	17	229	58	664

The reduction in the number of cases instituted, from 579 in 1894-95 to 286 in 1895-96, is very satisfactory, and indicates good work on the part of the collecting staff. The number of cases struck off was two only, against 97 cases in the previous year. The number of cases outstanding at the end of the year was 58, in 27 of which the demand was realized during March 1896, although the cases were not formally disposed of during the year.

COMPLAINERS

The number of complaints filed during the year, and the nature of their disposal, is shown in the following statement —

YEAR	Class of complaints.	RECEIVED			DISPOSED OF			BALANCE PENDING AT END OF THE YEAR		
		Balance pending from previous year	Received during the year	Total	Allowed	Refused	Total	Received during previous year	Received during the year	Total
1	2	3	4	5	6	7	8	9	10	11
1896-97	Ordinary remission	11	233	244	53	95	147			97
	Other complaints	7	108	115	53	63	106			9
	Total	18	341	359	105	158	263			106
1894-95	Ordinary remission	8	251	259	44	204	248			11
	Other complaints	21	208	229	110	112	232			7
	Total	29	459	488	154	316	480			18

REVENUE
ESTABLISHMENT

55. The cost of the revenue establishment during the last five years is shown below :—

ESTABLISHMENT UNDER THE COLLECTOR	1891-92	1892-93	1893-94.	1894-95.	1895-96
1	2	3	4	5	6
	Rs	Rs.	Rs	Rs	Rs.
Permanent establishment, including travelling allowances	17,917	20,263	16,620	18,436	17,530
Temporary establishment	382	441	346	1,289	332
Contingencies	1,154	1,014	1,814	873	677
Headman's fees	335	375	325	813	656
Total	20,118	22,093	19,105	21,411	19,195

In addition to the above, the following sums were paid by the Executive Engineer for water regulation .—

	Water-regulation	
	Permanent	Temporary
	Rs	Rs
1891-92	473	682
1892-93	419	500
1893-94	822	288
1894-95	1,187	263
1895-96	1,208	129

NAVIGATION

56 The navigation receipts of the year amounted to Rs. 1,43,918 as compared with Rs. 1,35,492 in 1894-95. There was an increase under all heads, in the number and tonnage of boats, and in the number of passengers. The passenger traffic was the largest on record during the last ten years.

The Superintending Engineer remarks —

"The rice crop in the irrigated tract was generally good, consequently the export was large. Paddy was also sent to Ghatal, owing to failure of the rice crop in that neighbourhood. There was considerable increase in the import of coke, coal and metal, owing to construction of the new railway. The variation under other heads was small and calls for no remarks.

Traffic through the tidal reaches in January and February was also good. Although the Calcutta Steam Navigation Company's ordinary steamers and barges went almost continually round by the river, owing to the water in the tidal reaches, and especially in the short reach from Kantapukhur to Kultapara, being too low for some days in the neap tides to allow of any but the mail steamers and country boats being passed twice a day. There is a considerable amount of silt in both reaches, but it is doubtful how much more traffic would come through these reaches even if they were cleared, as the rivers Hooghly and Rupnarain are comparatively calm at that period, and hence it is easy to go round and avoid paying toll, and, if the tides be favourable, without very much loss of time."

Particulars regarding the traffic on the canal for the last ten years are tabulated below:—

DESCRIPTION	1886-87	1887-88	1888-89	1889-90	1890-91	1891-92	1892-93	1893-94	1894-95	1895-96
1	2	3	4	5	6	7	8	9	10	11

(a) Inclusive of tolls (Rs. 41,180, Rs. 21,006, Rs. 30,647, Rs. 44,434 and Rs. 34,576) paid by the Calcutta Steam Navigation Company

(b) Inclusive of passengers (92,267, 100,916, 109,039 and 112,555 carried by the Calcutta Steam Navigation Company's steamers

56. The miscellaneous receipts for the last five years were as follows —

DETAILS	1891-92	1892-93	1893-94	1894-95	1895-96
1	2	3	4	5	6
	Rs	Rs.	Rs.	Rs.	Rs
Sale of water ...		10	4		
Plantations ...	40	31	44	55	18
Other canal produce	5	1	2	1	88
Rent of buildings ...	711	740	712	890	973
Miscellaneous { Rent of lands	8,758	8,585	12,168	12,019	10,390
" of fisheries	1,147	1,162	1,179	1,507	1,440
Cost of process	2,516	1,280	2,173	722	333
Other items	2,670	5,166	7,437	7,084	8,775
Total ...	19,147	16,979	24,319	22,308	22,017

58. The actual cost of maintenance and repairs during the last five years is shown below —

	1891-92	1892-93	1893-94	1894-95	1895-96
	Rs	Rs	Rs	Rs	Rs
Head works, including buildings	8,373	9,965	9,430	15,461	26,771
Main canal and branches ...	1,18,241	59,802	67,401	68,702	77,291
Distributaries	10,365	12,612	20,932	18,501	21,601
Drainage and protective works	1,239	2,090	2,008	1,240	3,261
Working steamers	3,044	2,961	3,311	595	3,120
Total	1,41,262	87,430	1,03,178	1,04,502	1,35,047

The outlay on repairs to the main canal, including that on head works, on working steamers, and on drainage works, but excluding distributaries, was Rs. 1,10,446, against Rs. 86,001 in 1894-95.

The expenditure was considerably in excess of that of the last three years.

59. The large increase in the cost of maintaining the head works was due to training works both at Midnapore and Panchkurah, and to sand and rubble filling below the under-sluices at Midnapore.

TRAFFIC

MISCELLANEOUS RECEIPTS

MAINTENANCE AND REPAIRS

HEAD WORKS AND WEIRS.

The expenditure on the Midnapore and Panchkurah head works during the year was Rs. 20,499 and Rs. 6,275 respectively, against Rs. 10,497 and Rs. 4,964 in the previous year. On weirs the expenditure was at the rate of Rs. 4.25 per foot run at Midnapore, and Rs. 1.25 at Panchkurah, as compared with Rs. 3.59 and Rs. 1.24 respectively last year. The rise in the cost per foot run for the Midnapore weir was due to repairs to the under-sluice shutters, and to new boards for the high and low weirs.

MAIN CANAL.

60. The mileage rate for repairs to the main canal was Rs. 2,301 as compared with Rs. 1,792 in the previous year. The increase was due to thorough repairs having been executed to the canal, including lock gates and gearing, from Mohanpur to Daman, during the closure. A new office was constructed at Luchmapur, and extra silt clearing and earthwork was done.

The cost of working Government steamers and *dhols* was Rs. 3,120 against Rs. 198 in 1894-95. This expenditure was chiefly confined to working the steam-launch *Kabaduck*.

The expenditure on Tools and Plant was Rs. 51,364, as compared with Rs. 39,599 in the previous year. The outlay was mainly incurred on thorough repairs to dredging plant at a cost of Rs. 49,510.

DISTRIBUTARIES

61. On distributaries the expenditure on repairs was Rs. 24,601, or Rs. 87 per mile, against Rs. 18,501, or Rs. 65 per mile, in the previous year. The expenditure of the year was very high, and was incurred in thorough bed clearing, repairing banks, bridges and regulators, which were in many cases in a very bad condition. The Superintending Engineer hopes that after this year the expenditure on distributaries will become normal, and bear some reasonable proportion to the annual cost of similar works in the Sone and Orissa Circles.

The cost of maintenance per mile of both the main canal and the distributaries is given below for each of the last ten years.—

YEAR.	MAIN CANAL AND HEAD WORKS, &c			DISTRIBUTARIES		
	Length of canal open	Total cost of work	Rate per mile	Length of distributary channels.	Total cost of work.	Rate per mile.
1	2	3	4	5	6	7
	Miles.	Rs.	Rs.	Miles	Rs.	Rs.
1886-87 ..	48	1,20,135	2,503	283	17,617	63
1887-88 ..	48	1,10,494	2,301	283	21,687	74

Mud Boats
Total for 1895-96	4,712,793	19,191	6,002	..	25,293	4.96	1.29	6.25
Total for 1894-95	6,289,719	22,414	4,215	..	27,776	3.6	0.7	4.3

The quantity of silt excavated during the year from the main canal and entrances was less than in the previous year, viz., 4,742,703 cubic feet, against 6,299,719 cubic feet. The cost of lifting and removing was Rs. 25,283 as compared with Rs. 27,775 of the year before. The rate increased from 4.4 to 5.3 per 1,000 cubic feet.

63. The expenditure on plantations during the year was Rs. 130, against Rs. 195 of the previous year. The following table compares the condition of the plantations in 1893-96 with 1894-95:—

YEAR.	Trees upwards of 12 feet high	Saplings between 4 and 12 feet	Seedlings below 4 feet	Total
1	2	3	4	5
1894-95	No 13,010	No 4,113	No 3,227	No 20,350
1895-96	No 15,098	No 4,545	No 1,907	No 21,610

64. The year was one of scanty rainfall and consequent high demand for canal water. The water-rate receipts were, however, smaller owing to reduction of area under lease. The financial results of the year are disappointing. The actual receipts were lower than in the three preceding years, and the expenditure on maintenance was unusually high. There is, however, a very satisfactory feature in the largely increased receipts from navigation, which were the highest on record.

HIJILI TIDAL CANAL.

65. The Capital, Interest and Revenue accounts of this canal are given below:—

1—CAPITAL ACCOUNT

HEADS OF ACCOUNT	Outlay during 1895-96	Outlay to end of 1895-96
1	2	3
DIRECT CHARGES.	Rs.	Rs.
I—Works	1,16,203	17,78,418
II—Establishment	25,792	5,77,780
III—Tools and plant	4,000	1,37,004
IV—Suspense accounts
Loss by exchange	...	22,790
Total	1,46,000	25,15,992
V.—Less—Receipts on capital account	...	925

Total working expenses.	22,735	66,576	77,040	26,722	53,574	50,688	33,089	56,501	47,426	61,398
Net revenue	30,759	(-) 25,118	(-) 22,943	15,230	(-) 25,530	(-) 13,768	20,301	2,665	11,099	578

The cost of maintenance was Rs. 61,398 as compared with Rs. 47,426 in 1894-95. The expenditure of the year includes Rs. 15,102, the cost of new wooden gates for the Terapakia lock. The receipts are the highest recorded for the last ten years, but the heavy expenditure accounted for above causes the reduction of the net revenue to the small sum of Rs. 578.

67. The rainfall registered during the year at Contai station was 43·26 inches as compared with 83·37 inches in 1894-95, and an average of 67·55 inches for the previous ten years. Although the rainfall was considerably below the average, it was evenly distributed, and the rice harvest was excellent.

68. There were no floods in 1895-96 in any of the rivers crossed by the canal. The following statement shows the highest gauge readings of the rivers Hooghly, Haldi, and Russulpur :—

NAME OF RIVER.	Locality	1895 96		1894-95		HIGHEST RECORD.		REMARKS.
		Date	Reading	Date	Reading	Date	Reading

NAVIGATION

(a) Inclusive of tolls Rs 1,603 Rs 1,592, Rs 4,590, Rs 5,323, Rs 3,616, Rs 3,634, Rs 5,568, Rs. 7,566, Rs 5,390 and Rs 4,679 paid by the Calcutta Steam Navigation Company

(b) Inclusive of passengers, 24,343 17,554 21,209 31,702 41,236 16,481 and 22,813 carried by the Company's steamers

The tollage receipts amounted to Rs. 60,677 and show an increase of Rs. 3,588 compared with the figures of 1894-95. They even exceeded, by Rs. 2,468, the tolls of 1893-94, which were abnormally large on account of the pilgrim traffic attracted by the Car festival at Puri, which only occurs once in every 10 or 12 years. Comparing the returns of 1894-95 with those of the current year, the total tonnage shows an increase of 8 per cent., while the increase in the tollage is 6 per cent.

The Superintending Engineer writes :—

"The steamer traffic was, however, less than usual, as, owing to the closure of the Terapakia and Kalinagar locks, the steamers of the Calcutta Steam Navigation Company had to go from Baitghur to Gewankhally by the river route for 19 weeks instead of 12 weeks as they generally do. In order to avoid the sea route, as soon as the Terapakia lock was opened, a separate steamer used to ply on the Hujli and Orissa Coast Canals, the passengers being transhipped at Kalinagar.

Owing to the closure of the locks above referred to, it is not possible to gauge the effect on the traffic of the introduction of through tickets at reduced rates, which was referred to in last year's revenue report. The Executive Engineer has prepared a statement for the months April to October when through traffic was possible, and the deductions to be drawn from it are that in Range II the through and local traffic was equally divided, while in Range I the local traffic was three times as much as the through traffic. The large local traffic was owing to the rich marts on the Haldi river, viz., Harikhally, Nayhat, &c., and also to the fact that the wealthy mahajans will not risk sending their boats out through the shallow mouth of the Haldi. The Executive Engineer is of opinion that the reduced through rate has been favourable to traffic, and that it should be extended to Butghur.

The only important change in the traffic was the great increase in the export of rice, viz., 50,976 tons against 41,180 tons of the previous years. There was a slight increase in the imports of bamboos and timber but all other traffic was much the same. Over 9,000 tons of straw were taken principally from the Haldi river to Calcutta. This is included under the head Miscellaneous.

The crossing of the Haldi river changed very little, except that the channel opposite Terapakia has moved more into the centre of the river, and a survey is being made to fix it accurately. It is satisfactory to note that the Rassulpur river has not deteriorated, although the season was one of short rainfall. Large pillars have been built to fix the exact sites of the cross sections which are being taken twice a year.

The Sadar khal continued to show improvement in consequence of the silt clearance of the Kolabera khul, which effected some improvement to the drainage of parganna Sujamutha."

MISCELLANEOUS RECEIPTS.

70. The miscellaneous receipts for the last five years are shown below:—

1891-92	1892-93.	1893-94.	1894-95.	1895-96.
Rs	Rs.	Rs.	Rs	Rs

Total	632,409	3,164 0 0		3,062 0 0	3,062 0 0	4 09	4 87	8 96	
Total for 1894-95	4,78,820	2,728 2 9		2,639 0 0	2,639 0 0	5 09	4 28	9 36	

The Superintending Engineer gives the following details of the work of the dredgers:—

Dredger *Marchant* No III worked from 1st to 11th April in removing the closure bund at Etamugra. It was then sent to Rajchuck to work in the 2nd and 3rd mile of Range I from 15th April to 16th October, for removing the silt which had come into the canal below the outfall of the Gewankhali supply sluice channel. The dredger then proceeded to work in the Bahaghye main drain. It was in work for 332 days during the year. Dredger *Marchant* No. I worked from 1st to 10th April in removing the closure bunds at Gewankhali, and then it was sent to No. 4 subdivision for clearance of silt from Bhograai supply channel. It returned from repairs on the 9th March 1896, and from 10th to 31st was engaged in removing the junction bund of supply channel at Terapakia. In addition to its Marchant Bucket, it has been supplied with a 10 cubic feet Bell's Digger which works equally well in hard soil and silt. The dredger was at work for 262 days in the year, during which period it was also employed in the Orissa Coast Canal.

Dredger *Jack Marchant* No II worked in Range II from 1st April to 15th June. It first removed the closure bunds at Terapakia, and then worked in the 13 and 14 miles of the Hijili Tidal Canal. After doing some work in the Bahaghye drain and Surpai sluice channel, it was sent to the Dockyard, where it was laid up for repairs from 20th September to 15th December 1895. On return it was employed at Etamugra and Terapakia in removing the bunds erected during the canal closure.

The work done during this period was small. The earth had to be removed by daily labour. The pay of the crew for the period the dredger was idle also was charged against the work. The above reason accounts for the very high rate of working. The dredger worked for 176 days during the year. The *Comus* dredger was under repairs at the Dockyard from 1st April to 31st August 1895. It was then employed up to 7th September in removing the bund at the outfall of the Terapakia supply channel in Range II, and from 8th September to 15th October in excavating the silt in the 14th mile of the canal. The dredger worked for 220 days in the year, and for part of the time it was also engaged in excavating silt in Range V, Orissa Coast Canal.

The pans khal at Terapakia was cleared of silt, 1,167,832 cubic feet having been removed at a cost of Rs. 2,813, or at the rate of 2 40 per one thousand cubic feet. During closure of the Terapakia Lock, 319,700 cubic feet of silt were taken out of the canal in front of lock at a cost of Rs. 1,348, or at the rate of 4 21 per one thousand cubic feet.

72. The following table shows the state of the plantations for the last two years.—

YEAR.	Trees upwards of 12 feet in height.	Saplings from 4 to 12 feet in height.	Seedlings under 4 feet	Total.
1	2	3	4	5
1894-95	3,051	2,199	828	6,078
1895-96	6,410	5,034	320	11,764

The large increase in the number of trees was due to the fact that no count of Babul trees was made during the previous year. The number of trees actually existing at the end of the year was 11,764.

The expenditure on plantation fell from Rs. 313 in the previous year to Rs. 81 during the year under review, owing to arrangements having been made with the lessee of the coconut plantation to tend the trees himself.

Arrangements were made for starting a small plantation on the spoil earth near the Terapakia supply sluice.

73. The long-standing question of land encroachment on Ranges I and II of the High Tidal Canal was brought to a successful termination during the year, and it is now believed that Government has got as much land as was ever paid for. The remodelling works made satisfactory progress owing to the weather being favourable.

SONE CANALS.

74. The Capital, Interest and Revenue Accounts of these canals are given below:—

I - CAPITAL ACCOUNT

HEADS OF ACCOUNT	Outlay during 1895-96	Outlay to end of 1895-96
1	2	3
DIRECT CHARGES		
I — Works	Rs. 18,801	Rs. 1,87,64,623

Leave and pension allowances . .		8,78,237
Total Indirect charges ..	580	916,148

No works of importance were carried out during the year. Under the head Major Works some minor distributaries were completed, and a number of permanent outlets and small syphons and culverts were built. Under Minor Works the expenditure was confined to the Monoharpur drainage scheme, and some permanent outlets on the Chowda Branch Canal.

NOTE.—The details by heads of expenditure for the year 1895-96 and nine preceding years will be found in the table given in paragraph 76 following

EARNINGS

75. The following statement compares the "Earnings" with the actual outlay for the years 1894-95 and 1895-96 —

	1894-95.	1895-96
Earnings—	Rs	Rs
Irrigation	6,56,332	7,83,921
Navigation	58,850	60,917
Miscellaneous	35,620	33,148
Total	7,50,802	8,77,986
Deduct refunds of revenue	2,927	6,807
Net earnings	7,47,875	8,71,179
Outlay	7,06,739	5,74,434
Earned profit	41,136	2,96,745

The irrigation earnings are the net assessments for the irrigation of the year after deducting refunds, or in other words, the water-rate value of the irrigation done during the year. A portion of these assessments, viz., those for rabi irrigation, are not legally payable until the 5th April. Consequently the total irrigation earnings during the year will not be the same as the total amount of water-rates falling due during the year. Thus the Rs. 7,81,921 shown above as the irrigation earnings of 1895-96 includes a sum of Rs. 84,926 for rabi irrigated during the year, which was not payable until 1896-97, and excludes a sum of Rs. 16,636 which fell due during the year for rabi irrigation of 1894-95. The navigation earnings are the assessed tollage for the year, together with the actual miscellaneous receipts charged to navigation. The miscellaneous earnings are the actual realisations under that head.

76. The following is a statement of the revenue account and working expenses of the canals for ten years — FINANCIAL RESULTS

	1886-87	1887-88	1888-89	1889-90	1890-91	1891-92	1892-93	1893-94	1894-95	1895-96

The decrease in the irrigation receipts was due to a reduction of the area under long leases, the very favourable rainfall of the two previous years having led the people to defer the renewal of certain leases which had lapsed. The large decrease in the working expenses is most satisfactory. The reduction was mainly due to the system of working which has reduced the heavy silt deposits which used to occur in the canals, but also to economy in the execution of repair works. The chief works carried out under the head of extensions and improvements were the completion and extension of the surface supply inlet at Dehri, deepening the first reach of the Gurra Chowbey Branch Canal, construction of certain "extension" village channels, and improving the roofs of the khalasi's huts at the locks. The eastern main series of canals was closed from the 26th April to the 6th May 1895, the Western Main Canal series was not closed at all.

LENGTHS OF
CANALS AND
DISTRIBUTARIES

77. The following table shows the length of canals and distributaries in operation, and the areas commanded, provided with distributaries, and irrigated at the close of each of the last two years, respectively.—

NAME OF CANAL		1895-96							1894-95								
		Navigable canals	Canals for irrigation only	Distributaries	Area protected from flood	Area under command	Area provided with distributaries	Area irrigated.	Percentage of area irrigated to area provided with distributaries	Navigable canals	Canals for irrigation only	Distributaries	Area protected from flood	Area under command	Area provided with distributaries	Area irrigated	Percentage of area irrigated to area provided with distributaries
1		2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17
Eastern Sone Division { Eastern Main Patna		Miles 71 79		Miles 9 341½		Acres 15,402 300,603	Acres 15,402 370,757	Acres 2,321 65,305	15 22	Miles 71 79		Miles 9 341½		Acres 15,402 300,603	Acres 15,402 370,757	Acres 2,321 78,025	14 21

	SONE CANALS	216½	148½	1,228½		1,733,509	1,545,640	305,232	25	216½	148½	1,228½		1,733,509	1,555,040	317,134	30

The lengths of canals are the same as last year. The slight increase of 1½ mile only in the length of distributaries is due to a mistake in last year's figures.

VILLAGE
CHANNELS AND
OUTLETS

78. The lengths of village channels and the number of outlets in use during the year were as follows:—

DIVISION.	Total length of village channels completed up to end of 1895-96.	Total number of temporary and permanent outlets in use during 1895-96	Number of permanent outlets.
1	2	3	4
Eastern Sone ..	Miles 439	No 1,576	No. 1,024
Arrah ...	1,101	2,438	1,853
Buxar ..	748½	1,660	642
Total, 1895-96 ..	2,288½	5,674	3,519
Total, 1894-95 ..	2,179½	4,560	3,174

The increase in the number of temporary outlets is due to the larger rabi irrigation during the year.

The increase in the number of permanent outlets is satisfactory. During the year 245 village channels were repaired by canal officers at the expense of the owners, under section 60 of the Irrigation Act, at a cost of Rs. 5,458.

79. The following is a statement of rainfall in the vicinity of the Sone Canals for the last five years :—

1	AVERAGE OF 22 STATIONS.				
	1891-92.	1892-93.	1893-94.	1894-95.	1895-96.
2	3	4	5	6

Rabi season {	November	0 03	0 34	2 08
	December	...	0 03	0 08	0 11
	January .	0 13	0 61	0 09	0 56
	February ..	1 03	2 07	0 93	0 61
Total	1 16	2 71	1 34	3 28	0 15
Whole year ...	29 12	38 36	47 66	58 22	36 66

The rainfall of the year under review, both in the kharif and in the rabi season, was very small, and that of the previous year was equally in excess. The rabi rainfall was abnormally small. During the important time of the "Hathia Naichatra" the rainfall failed to a very large extent. This produced a great demand for water, which, however, was liberally met. The failure of the October rains, followed by the small rabi rainfall, led to a largely increased demand for irrigation in the rabi season.

80. There was no high flood in the Sone during the year. The highest level at the Dohri weir was practically the same as the highest level in 1894-95, as is shown in the statement below. The R. L. of the crest of the weir is 334·00—

FLOODS

RIVER SONE

LOCALITY	1895-96—30th June 1896		1894-95—18th August 1894		Highest known 1876-77—7th July 1876

Total five-year leases		221,268	223,556	234,791	Total long-term leases	271,966	291,746	263,990	258,918
„ annual-leases .		81,011	57,458	239,932	„ season leases	138,795	75,030	53,144	136,304

* Under the new rules for the Sonu Canal there are no separate leases for sugarcane, they are included in each season lease

The total areas irrigated under each form of lease are abstracted as follows for convenient reference.—

	1892-93	1893-94	1894-95	1895-96
	Acres	Acres	Acres	Acres
Area irrigated under long-term leases	271,966	291,746	261,990	253,918
" " " season leases	129,356	74,292	51,913	120,392
" " by sale by volume	5,732	57	55	13,856
" " without permit	3,717	681	1,176	2,056
Total	410,761	366,776	317,134	395,222

The increase in the area irrigated is explained by the Superintending Engineer as follows:—

"The increase in the area irrigated in the year is due to the failure of the "Hath a" rainfall in October, and to the subsequent failure of the cold-weather rains. The failure in October produced a demand for water which was supplied under rule 18, "Sale by volume," for nearly fourteen thousand acres, and the dry October followed by a dry rabi season largely increased the demand for rabi irrigation mainly in the Buxar Division. It is disappointing, however, that the rabi demand was not larger. In the year 1891-92 nearly double the area of rabi was irrigated, and in that year the October rain was better, and the rabi rainfall was very much larger than in the year under review. In 1892-93 also the October rainfall was about the same as in 1895, and the rabi rainfall was above the average, and yet a larger area of rabi crops were irrigated than in 1895-96, when the October rains were very scanty and the rabi rainfall was less than a quarter of an inch, which is practically nothing. If the rainfall in October and in the subsequent month really determines the necessity for irrigation in the rabi season, the year 1895-96 should have surpassed all others in the area of rabi irrigated. It was not so, and the reason is not apparent."

There was a decrease of some 5,000 acres under long-term leases, and on this subject the Superintending Engineer writes —

"In 1894-95 the acreage of long-term leases which lapsed was 70,216, in 1895-96 it was 40,670 the total of the two years is 110,886 acres, which is nearly half the total area of long-term leases. The rainfall in 1893 and in 1894 was peculiarly favourable to the kharif crop, so the people were unwilling in 1894 and 1895, that is, in the years immediately following the good seasons, to renew the large number of leases which expired. The area under long-term lease steadily increased from 1858 up to 1893-94, when a check was produced by the copious rainfall of 1893, which immediately preceded a year when the area of leases which lapsed was unusually large as shown by the following statement —

YEAR			Lapsed acres	Total leased acres
1			2	3
			Acres	Acres
1888-89	..	.	31,528	200,275
1889-90	45,308	221,268
1890-91	34,952	223,410
1891-92	..	.	53,355	231,791
1892-93	..	.	44,553	255,964
1893-94	.	.	21,527	275,567
1894-95	.	.	70,216	249,854
1895-96	40,670	245,459

This check, however, has not affected the leases in the Eastern Sone Division, where there continues to be a steady increase in the area under long-term leases.

The failure of the kharif rainfall in September and October 1895 resulted in disaster to at least seventy-five per cent. of the rice crop which was not irrigated by the canals. Those villagers who had allowed their leases to lapse not only rushed for water in October under the rules of "Sales by volume," but they promptly put in application for long-term leases. The area of these leases, which had been applied for by the 1st April 1896, was 156,784 acres as compared with 70,206 acres which lapsed then.

The canals are not competent to supply water to all these applications. No doubt many of them would not have resulted in leases, as the people frequently put in applications which they have little or no intention of pushing to completion; but the fact shows the effect of a season of deficient rainfall on long-term leases. During next year (1897) and in 1898 it so happens that no long-term leases will expire, and there is little doubt that in the latter year the area leased will be as great as it will be possible to irrigate with the available discharge of the canals.

It has already been said that the year under review was a disastrous one for rice crops which were not irrigated. In large tracts of the districts of Shahabad, Patna and Gaya the unirrigated rice was a complete failure, and was cut down as fodder for the cattle. The unirrigated fields certainly did not give a "four-anna" crop, and probably not a "two-anna" one. The canal-irrigated tracts certainly gave a "twelve-anna" crop. It may safely be said that the Sone Canals placed at least sixty lakhs of rupees in the pockets of the people in 1895-96, which would not have been there had the canals not supplied water to the crops.

The Superintending Engineer thinks that it is desirable to place on record the following facts, which show how essential the canals have become in some parts, at any rate, to the rice crops.—In the first reach of the Patna canal, it had been the custom for years to maintain the water at a high level in order to irrigate certain villages. It was decided, for reasons connected with the working of the canal, to reduce the level of the water. This, it was known, would affect the irrigation of these villages, and notices were distributed that remissions would be freely given when the irrigation was inefficient, and the people were informed that long-term leases which proved unsatisfactory would be cancelled if they wished it. Not only were notices distributed, but the local officers personally informed the cultivators of the arrangements, and special measures were taken to keep a record of the areas which suffered. The Executive Engineer reports that these records show that a very large proportion of the leases obtained no water until October, and that even then there were considerable areas which were either not watered at all, or obtained very little supply. Nevertheless there has not been any application for remission, and the people have only asked that one lease should be cancelled."

It has been decided to enhance the long-term lease rate from Rs. 2 to Rs. 2-8 per acre, and the "season" lease rate from Rs. 3 to Rs. 3-8 per acre. The last of the old five-year leases will expire on the 31st March 1896, and as none of the seven-year leases which were first issued in 1892 will expire till 1899, the year 1897 offers a good opportunity for introducing the revised rates. A notification to this effect was published on the 28th January 1895. It has been ruled that the increased rate for long-term leases will remain unchanged for seven years. Widespread notice of the pending change has been given over all the area commanded by the canals.

The areas irrigated in 1895-96, in each division and subdivision, are shown below:—

		Acres	Acres.

			124,122
Total	395,222

Particulars of the long-term leases are given in the following statement:—

LONG-TERM
LEASES

DIVISION	Leases which lapsed on 31st March 1895.	LEASES IN FORCE ON 1ST APRIL 1895			LEASES ENTERED INTO DURING 1895-96		Total area under long- term leases in 1895-96
		Seven-year leases	Five year leases	Three-year leases	Seven-year leases	Three-year leases	
1	2	3	4	5	6	7	8
	Acres	Acres	Acres	Acres	Acres	Acres	Acres
Eastern Sone ..	8,549	36,594	19,594	749	11,104	178	68,609
Arrah ...	21,779	63,132	33,223	2,564	20,149	470	119,543
Buxar ..	10,342	37,117	11,760	3,434	5,006		57,307
Total ...	40,670	136,843	64,872	6,747	36,349	648	245,459

The area under long-term leases in the Eastern Sone Division continues steadily to increase.

83. The assessments for the unauthorized use of water, and for wastage, were in excess of those of the previous year. The figures for the last five years are given below —

UNAUTHO-
RIZED IRRIGA-
TION

	1891-92.	1892-93	1893-94	1894-95	1895-96
	Rs.	Rs	Rs	Rs	Rs
Unauthorized use of water ..	13,861	14,549	4,760	6,910	8,568
Wastage of water	314	105	615	682	1,103

Under the rules in force, irrigation effected without permit in the kharif season, cannot be assessed if the water used is drawn from lands which are under lease.

The assessments for wastage of water were almost entirely made in the rabi and hot-weather seasons. The Superintending Engineer remarks — "These assessments are made more unpopular than those for unauthorized irrigation, the ordinary cultivator will not believe that there can be any necessity for economy of water, and he regards assessments for wastage as extortion."

84. The assessments for water sold by "volume" amounted to Rs. 22,395.

SALE BY
VOLUME

The approximate area irrigated is given below —

DIVISION		Approximate area 1895-96	Approximate area 1894-95
1		2	3
		Acres.	Acres
Eastern Sone ...		357	29
Arrah	2,948	26
Buxar	10,551
Total	...	13,856	55

The Superintending Engineer writes : —

"This large increase is due to the failure of the rains in the "Hathia." The area irrigated is only an approximation based on the estimate that one rupee's worth of water irrigated a bigha. The area irrigated under this system in the Eastern Sone Division is disappointingly small. In the Buxar Division the area is large, and the work done in connection with it was very arduous, as outlets had to be fixed, and arrangements for supply made at very short notice. One reason why the area in the Buxar Division was so much larger than in the Arrah Division was, that in Buxar there were about 20,000 acres of land, which had formerly been under lease, where the leases had lapsed and the people were more or less prepared to irrigate their fields through the old channels. The Executive Engineer of the Buxar Division reports that in some cases the people used to cheat the canal officers by removing the pipes which had been temporarily fixed as outlets during the night, so that, for that time, they obtained an increased discharge. Very early in the morning they inserted the pipes again. In one case five men were caught and convicted before the Executive Engineer, who sentenced them to fine and imprisonment.

In the Arrah Division the largest area irrigated by "volume sale" was in the Koath subdivision, and in the Buxar Division more than half the entire area was irrigated in the Sikroul subdivision. Indeed, considerably more than half of the whole irrigation effected by this system was done in these two subdivisions. The Superintending Engineer considers that this is most creditable to Babu Beni Madhub Mitta and Mr Bremner, the Subdivisional Officers. The work done and trouble undertaken must have been considerable.

In the Agean subdivision of the Arrah Division a different system was employed to meet the sudden demand in October. The Executive Engineer, Mr. DeMello, writes —

"In the Agean subdivision no 'sale by volume' took place. This is due to the Subdivisional Officer recommending the use of rule 81, Sone Canal Book of rules, in preference to selling the water by volume, over which it is very difficult to exercise any satisfactory supervision. The distributaries were consequently opened on the 7th October, when there was a great demand for water and a large area of kharif crops irrigated under rabi suttas. The Subdivisional Officer reports that out of his 10,966 acres of rabi leases, 7,500 acres were irrigated under this rule. This figure is more or less a rough estimate, but it is confirmed in other ways, for instance, in Narganj and Ramnagar subdivisions the area under season rabi this year is double that of last year, while that of Koath is seven times that of last year. Applying either of these proportions to Agean subdivision, the rabi area ought to have been 1,732, or 6,062 acres, whereas the actual area was 10,966 acres, consequently this pseudo-rabi irrigation would by this calculation come to either 9,000 or 5,000 acres. The result is highly creditable to the Subdivisional Officer; it entailed a lot of personal supervision. It also led to a lot of objections being made to the assessment, as the signs of irrigation are soon lost, and there is strong temptation to deny irrigation altogether. From the experience gained, the Executive Engineer thinks it would have been preferable to have sold the water by volume, as was done in Koath subdivision, where the large amount of water sold is highly creditable to the Subdivisional Officer, and could only have been effected by considerable personal exertions."

Although the result is certainly creditable to the Subdivisional Officer of Agean in some ways, the Superintending Engineer is of opinion that the system he employed to meet the extraordinary demand in October was not a correct one. Rule 81 was meant for *bond fide* rabi crops and not for kharif ones at all.

On the whole the "sale by volume" system has worked well under the severe trial to which it was subjected in 1895-96. The worst of it is that, even at the best, it is a most "rough-and-ready" system. It is subject to abuse and may be easily used by unscrupulous canal servants as a source of profit to themselves. There have, however, been hardly any complaints. Water in October 1896 was worth almost any price."

85. The following statement shows the areas of the several crops actually irrigated in each Division since the year 1892-93, when the new rules came into force —

IRRIGATION IN
EACH DIVISION
(UNDER THE
NEW RULES)

Sone Canals	115,343	72.87	41,661	44.23	66,458	67.33

The Superintending Engineer remarks —

"The lower duty in the kharif season is partly due to the dry season, and partly to the fact that larger quantities of water were run in the canals for flushing purposes than were necessary for the crops. It has always been the custom to calculate the kharif duties on the maximum discharge, and not on the discharge utilised, on the theory that the discharges at the head would be kept as low as possible. But if the new system of running high discharges to reduce silt is maintained, it will be necessary in future years to alter the method of calculation, but, as a matter of fact the duties displayed in the above table are of little importance. The limit of the area irrigable by the Sone Canals will be determined by the duty obtained in the period of pressure in October. The Executive Engineers of the Arrah and Buxar Divisions discuss this point, and they both arrive at the same conclusion, which is, that a duty of 40 acres is that which can be obtained at present during the ten days of maximum demand in October. The Superintending Engineer believes that this duty will be improved gradually; but it will take years of steady persistence in the improvement of channels, in the enforcement and extension of talils, in the improvement of leases, and in the prevention of waste, to raise it to 60 acres to the cubic foot.

The duty of water which is obtained in the hot-weather season is lamentably small. The Executive Engineer of the Arrah Division shows that it was only about 30 acres to the cubic foot. This irrigation is important, and steps are being taken to improve matters by the introduction of a system of talils. It has hitherto been thought necessary to close the Eastern Main series of canals in the hot weather, in order that all the available supply might be given on the other side of the river. The Superintending Engineer believes that, with a good system of talils, both series of canals can be kept open."

Observations have been made in the Arrah Division, for the last 9 years, showing the aggregate depth of water placed on the rice fields during the months July to October, on the hypothesis that the entire "utilized" discharge of the canal reaches the fields. It is interesting to note that the combined depth of rain-water and canal-water on the fields is found to be practically the same, about $5\frac{1}{2}$ feet, every year. Although the depth of rain water, and of

canal-water, varies each year, the aggregate is nearly always the same, i.e., if the rainfall be $2\frac{1}{2}$ feet, the depth of canal water required will be 3 feet, and *vice-versâ*.

Experiments on the loss of water in distributaries have been continued in the Arrah Division, and this year the loss per cent. per mile of channel varied from 0·08 to 10·84; the latter high result being obtained on the Kesuth distributary.

CROP EXPERI-
MENTS

87. *Crop experiments.*—The results of the experiments made during the year to determine the yield of rice and wheat crops irrigated from the canals are given in the following tables.—

TABLE I.

Result of experiments on "good" rice crops irrigated with canal water for the year 1895-96.

DIVISION	Number of experi- ments	AVERAGE YIELD PER ACRE WEIGHED DRY			
		Grain		Straw	
		Maunds.	Seers	Maunds	Seers.

88. The demands, collections, and balances of water-rates for the last five years are shown below —

DEMANDS
COLLECTIONS
AND BALANCES.

YEAR.	Amount outstanding at commencement of year	Amount falling due for recovery during the year	Total for recovery.	Cash realisation	Remitted or written off.	Balance at the end of the year
1	2	3	4	5	6	7
	Rs	Rs	Rs	Rs	Rs	Rs.
1891-92	2,44,728	6,99,685	9,38,413	8,11,750	15,220	1,11,443
1892-93	1,11,443	9,50,733	10,62,176	9,59,472	14,914	87,790
1893-94	87,790	8,53,161	9,40,951	8,34,261	4,832	1,01,858
1894-95	1,01,858	6,86,905	7,88,763	7,13,863	4,091	40,809
1895-96	40,809	6,56,246	6,97,055	6,69,045	5,017	22,994

The Examiner's memorandum of irrigation revenue shows a sum of Rs 22,994 as the balance of water-rates outstanding on the 31st March 1896. This agrees with the above statement. Hitherto, in previous reports, it has always been necessary to give an explanation to show why the true "balance at the end of the year" (column 7) did not agree with the Examiner's figure. This is no longer necessary, as the Examiner has altered his account. In the "memorandum" of 1895-96, he has not included the water-rates assessed on the rabi crop of 1895-96 as part of the assessment due in 1895-96. This is correct. Those water-rates are not due until 1896-97. The Examiner formerly exaggerated the arrears on the 31st March—he has now stated them correctly. This has already been explained in paragraph 75, regarding irrigation earnings.

ARREARS

89. In the following statement the Deputy Collector shows the extent to which the arrears as well as current demand have been worked off —

	Demand of 1895-96 consisting of—	Collected or remitted in 1895-96.	Percentage of demand adjusted	Unadjusted balance at close of year
1	2	3	4	5
	Rs	Rs		Rs
Arrears of 1893-94	9,630	8,874	92 0	760
Do of 1894-95	31,168	30,978	99 3	196
Total arrears outstanding on 1st April 1895	40,807	39,852	97 6	955
Current demand for 1895-96	6,56,248	6,34,210	96 6	22,038
Total	6,97,055	6,74,062	96 7	22,993

The result of the collections in 1894-95 was considered to be highly satisfactory, it has, however, been surpassed in 1895-96. Not only are the arrears lower than they have ever been before on the Sone Canals, but the percentage of collection is higher than in any previous year.

COLLECTIONS.

90. The following statement gives the collections in each district —

DISTRICT	DEMAND			ADJUSTMENTS				Balance on 31st March 1896	Portion taken column 8 on column 4
	Arrears on 31st March 1895	Current demand for 1895-96	Total	Collection	Remission made by canal officers	Written off as irrecoverable	Total		
1	2	3	4	5	6	7	8	9	10
	Rs	Rs	Rs	Rs	Rs	Rs	Rs	Rs	
Shahabad	32,123	4,87,647	5,19,690	5,01,164	812	3,964	5,05,940	13,760	97 2
Faiza	4,514	78,891	83,505	79,487	52	140	79,679	3,853	96 3
Gaya	4,170	89,690	93,860	88,425	45	15	88,485	5,377	95 1
Total	40,807	6,56,248	6,97,055	6,69,045	908	4,100	6,74,062	22,993	96 7

Besides the collections of Rs. 6,69,045 shown above, a further sum of Rs. 10,657 was credited to water-rate accounts as below :—

	Rs.
Surplus or excess recoveries	8,669
Process fees in certificate cases	1,894
Miscellaneous	94
Total	10,657

REMISSIONS.

91. The sums remitted in 1894-95 and 1895-96 according to the figures given by the Examiner of Accounts, were—

	1894-95.	1895-96.
	Rs.	Rs.
By Canal officers	1,237	907
By Civil do.	2,854	4,110
Total	4,091	5,017

According to the figures supplied by the Superintending Engineer the remissions were—

	1891-95	1895-96
	Rs.	Rs.
Written off by Civil officers as irrecoverable .	2,665	3,811
Remissions granted by Executive Engineers, including refunds	2,640	2,430
Extraordinary remissions by Superintending Engineers .	189	298
Remitted on revised and cancelled khatiams ..	8,370	3,574
Total	13,864	10,113

The amount written off as irrecoverable is slightly in excess of the two previous years. The Deputy Collector explains that the increase is due to old arrears, which should have been dealt with before.

Of the Rs 2,430 remitted by Executive Engineers, Rs. 1,521 were in reality refunds on account of amounts which had been recovered by the Deputy Collector before the remission statements had been received by him.

The following table explains the remissions made by Executive Engineers —

Class.	Causes	Eastern Sone Division	Arrah Division	Buxar Division	Total, 1895-96	Total, 1894-95
1	2	3	4	5	6	7
		Rs	Rs	Rs	Rs	Rs
a	Charge by mistake for land cultivated by others	18	18	..
b	Excess measurement or errors in calculation ...	264	137	31	432	288
c	Left charged as flow	4	1	5	8
d	Irrigation not denied, but remitted as not chargeable under the Act ..	1	..	98	99	73
e	Land not having been irrigated at all ...	2	24	1,366	1,392	1,003
f	Injury to crop due to insufficient supply	2	27	29	206
g	Land thrown temporarily out of cultivation (applicable to long leases only)	138
h	Failure of crop originally sown, rule 82 ..	34	116	191	341	720
i	Land appropriated for other purposes than cultivation	1	8	9	10
j	Double assessment, as when land assessed on a season lease is subsequently included in a long lease in the same year ...	42	55	8	105	194
	Total ...	343	339	1,748	2,430	2,640

The totals for the last five years are given below.—

1891-92.	1892-93.	1893-94.	1894-95.	1895-96
Rs.	Rs.	Rs.	Rs.	Rs.
3,304	4,620	2,180	2,640	2,430

The percentage of remissions on the gross demand was as follows in each Division —

				Percentage of remissions to gross demand.	
				1894-95	1895-96.
Eastern Sone Division	0 10		0 05
Ariah ditto	0 08		0 05
Buxar ditto	0 31		0 28

REVENUE
ESTABLISH-
MENT

92. The following statement shows the expenditure on the revenue establishments for the last five years —

PARTICULARS	1891-92	1892-93	1893-94	1894-95	1895-96
1	2	3	4	5	6
	Rs.	Rs.	Rs.	Rs.	Rs.
<i>Establishment under Collector.</i>					
1 Permanent establishment, including travelling allowances	40,997	58,538	55,308	51,311	55,466
2 Temporary establishment ...	4,752	3,070	2,903	3,217	3,960
3 Contingencies ..	2,784	2,663	4,274	5,396	4,248
4 Headmen's fees ..	16,868	2,580	5,166	8,309	11,916
Fees to patwaris ...	2,205	1,152	368	114	..
Total establishment under Collector ..	67,606	68,003	68,019	71,547	75,590
<i>Establishment under Superintending and Executive Engineers</i>					
Permanent and temporary establishment, including travelling allowances.	50,228	52,187	49,930	45,335	46,703
Contingencies ..	5,443	4,768	3,426	3,936	2,745
Water-regulation establishment ..	2,286	2,310	2,277	2,246	2,270
Headmen's fees ..	23,550	32,032	26,080	23,896	15,003
Total establishment under Executive Engineers	84,507	91,297	81,713	75,413	66,721
Total ..	1,52,113	1,59,300	1,49,732	1,46,960	1,42,311
Collections of water-rates and miscellaneous revenue by the Canal Revenue Department ...	8,15,858	9,71,202	8,45,177	7,45,691	6,79,702
Percentage ...	18 66	16 4	17 7	19 7	20 9

The increase in the establishment under the Collector is rather satisfactory than otherwise. The increase in travelling allowance is, the Superintending Engineer thinks, a good feature, as there is no doubt the greater activity in travelling has had an excellent effect. The increase under "Headmen's Fees" is also satisfactory, there had been great arrears in the payment of these fees, and they have been paid off almost entirely during the year. The reduction in the charge for revenue establishment under Executive Engineers is due to the decreased amount paid for headmen's fees. there was a decrease in the earnings of these men owing to the decrease in long leases.

93. The total cost of the revenue establishment under each Executive Engineer, per acre irrigated, is shown below:—

COST PER
ACRE

DIVISION.	1895-96.			1894-95.
	Revenue* establish- ment.	Area irrigated.	Cost per acre	Cost per acre.
1	2	3	4	5
Eastern Sone	Rs 16,237	Acres 87,626	A P 2 11	A P 3 5
Arrah	29,681	1,83,474	2 7	3 6
Buxar	20,806	1,24,122	2 8	4 9
Total Sone Canals ...	66,724	3,95,222	2 8	3 9

* Includes proportion of water regulation establishment employed on the head works

94. The following statement gives particulars of the disposal of com- COMPLAINTS.
plaints. Claims for ordinary remission are distinguished from other complaints, such as petitions alleging damage from the canals, complaints against individuals, and other miscellaneous claims. The totals are compared with those of the two previous years:—

DIVISION	CLAIMS FOR ORDINARY REMISSION				OTHER COMPLAINTS			Total complaints received during the year, excluding those pending from previous year	Pending
	Received during the year and pending from previous year	Disposed of		Pending	Received during the year and pending from last year	Disposed of	Pending		
		Remission allowed	Remission refused						
1	2	3	4	5	6	7	8	9	10
Easter Sone	No. 350	No. 124	No. 193	No. 33	No. 18	No. 18	No.	No. 352	No. 33
Arrah	1,699	473	1,117	110	29	29		1,665	110
Buxar	1,628	651	638	387	139	128	11	1,649	398
Total, 1895-96	3,575	1,127	1,948	500	186	175	11	3,680	511
Total, 1894-95	2,641	860	1,708	67	124	116	8	2,557	75
Total, 1893-94	4,678	1,270	3,211	197	210	199	11	4,303	308

The Superintending Engineer explains that the increase in the number of complaints, and the comparatively large number pending at the end of the year was mainly due to the increased area irrigated in the rabi season.

95. The following statement shows the number of appeals to the Collectors of districts against Executive Engineers' decisions, and how they were disposed:—

APPEALS.

DIVISION.	NUMBER OF APPEALS—		Appeals allowed	Appeals dis- charged	Pending:
	Pending from last year.	Instituted dur- ing the year.			
1	2	3	4	5	6
Eastern Sone	No. 1	No. 1	No. ...	No. ...	No. 1
Arrah ...	3	8	2	8	1
Buxar ...	3	4	2	5	...
Total ...	6	13	4	13	2

CASES UNDER
ACT III (B.C.)
OF 1876

96. Eighteen cases were tried by Executive Engineers vested with Magisterial powers under the Act. Twenty-two persons accused were convicted, and four discharged. The fines imposed amounted to Rs. 215, and the number of days' imprisonment aggregated 180.

CERTIFICATES

97. The Special Deputy Collector in charge of the collections continues to deal with the certificates required in realizing water-rates.

The amount of certificate work done in each district during the year under review, as compared with that of the previous year, is shown in the following statement:—

1	SHAHADAD				PATNA				GAYA				TOTAL			
	1895-96		1894-95		1895-96		1894-95		1895-96		1894-95		1895-96		1894-95	
	Number	Amount	Number	Amount	Number	Amount	Number	Amount	Number	Amount	Number	Amount	Number	Amount	Number	Amount
	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17
		Rs		Rs		Rs		Rs		Rs		Rs		Rs		Rs
Cases for disposal—																
1 Cases pending at the close of the preceding year	60	1 40s	76	1,259	9	91	24	122	1	4			70	1,440	100	1,391
2 Cases instituted during the year	1 091	8 21s	1 813	10 804	102	500	153	1 939	57	873	53	523	1 253	9 501	2,010	18,768
Total	1 151	9 617	1,889	12 063	105	537	177	2 061	58	877	53	523	1,323	11,041	2 110	20,149
Cases disposed of—																
1 By being struck off owing to the demand having been remitted and cancelled	30	67s	91	891			14	75					39	673	105	906
2 By being wholly satisfied	1,117	8,911	1 732	1,867	105	577	160	1 954	54	770	52	523	1 276	10,220	1,944	17 713
Total	1,160	9,588	1,823	10 758	105	547	174	2 029	54	770	52	523	1,315	10,405	2,049	18 709
Balance outstanding at the close of the year	6	2s	60	1,405			3	31	2	107	1	4	8	13s	70	1 440

The large decrease in the number of cases instituted, and the small number pending at the close of the year, is very satisfactory.

NAVIGATION

98. The navigation receipts for the last five years are shown in the statement below:—

NAVIGATION RECEIPTS.

YEAR.	EASTERN MAIN SERIES			WESTERN MAIN SERIES.			Total	Total tollage only
	Number of miles open.	Tollage receipts	Transport service receipts	Number of miles open	Tollage receipts	Transport service receipts		
1	2	3	4	5	6	7	8	9
	No	Rs	Rs	No	Rs	Rs	Rs.	Rs
1891-92	86½	25,602		132½	31,737	9,178*	66,517	57,939
1892-93	86½	20,832	...	132½	29,164	9,093*	59,089	49,996
1893-94	86½	22,954	...	132½	27,594	9,477*	60,025	50,548
1894-95	86½	19,787	...	132½	29,562	9,550*	58,899	49,349
1895-96	86½	22,082	...	132½	29,288	9,891*	61,261	51,370

There is no longer any Government transport service. These receipts are on account of hire of steamers, boats, and sundries.

The Superintending Engineer writes:—

"The results are disappointing, for although the total figure is slightly more than last year, the increase is far less than it should have been, when it is remembered that Messrs Raiford & Co. pay Rs 750 a month more compounded tollage on the steamers than they used to do. There is really an appreciable decrease in the traffic in the last five years."

TOLLAGE (ASSESSED).

TOLLAGE

YEAR	Patna Canal system, Eastern Main Canal series	Arrah Canal system	Buxar Canal system	Total
1	2	3	4	5
	Rs	Rs	Rs	Rs
1891-92	25,475	21,048	10,789	57,292
1892-93	20,963	18,196	10,860	50,028
1893-94	23,098	19,812	7,450	50,360
1894-95	19,663	19,837	9,800	49,300
1895-96	21,892	17,861	11,273	51,026

COMPARISON OF TRAFFIC

TRAFFIC

	1891-92.	1892-93	1893-94	1894-95	1895-96

Estimated value of cargo, including rafts Rs	70,06,595	57,32,365	61,19,285	19,20,464	50,04,985

99. The contract for the transport service continued with Messrs Radford & Co., the rates being Rs. 750 per month for the hire of steamers, and Rs 1,250 for compounded tollage. The corresponding amounts of the former contract were Rs. 600 and Rs. 500 respectively. The ordinary repairs of the steamers which belong to Government are executed by the lessees.

TRANSPORT SERVICE

The following table shows the extent of the steamer traffic —

PARTICULARS.	Patna Canal	Arrah Canal	Buxar Canal	Total.
1	2	3	4	5
Passengers carried { Up No.	5,053½	13,424½	7,956	26,434
Down „	4,907	13,449½	7,807½	26,164
* Cargo carried { Up . Tons	1,153	425	366	1,914
Down „	768	661	497	1,926

On the Patna Canal the steamer makes one trip in a week each way, on the Arrah and Buxar Canals twice a week. Rupees 9,000 was realized during the year for the hire of steamers, and Rs. 891 for the hire of accommodation boats and mud punts.

MISCELLANEOUS RECEIPTS.

100. The details of the miscellaneous receipts for the last five years are given below :—

PARTICULARS.	1891-92.	1892-93.	1893-94.	1894-95.	1895-96
1	2	3	4	5	6

MAINTENANCE CHARGES AND REPAIRS

101. The expenditure on maintenance and repairs, by main sub-heads, for the last five years is shown below :—

PARTICULARS.	1891-92.	1892-93.	1893-94.	1894-95.	1895-96
1	2	3	4	5	6
	Rs.	Rs.	Rs.	Rs.	Rs.
Head works	20,922	22,374	27,297	29,618	21,077
Main canal, including branches	1,75,837	2,00,130	1,89,160	1,48,428	75,573
Distributaries	58,248	55,918	46,457	37,802	33,101
Drainage and protective works	3,622	2,157	3,104	4,379	2,283
Cost of working transport service	1,155
Compensation	28	23
Total	2,59,832	2,80,579	2,65,928	2,20,227	1,32,057

* Includes Rs 600 for the Arrah Dehri Telegraph line, and Rs. 4,491 on account of theft of money in the Revenue Division and of money embezzled in the Patna district.

REPAIRS TO HEAD WORKS.

102. The costs of repairs to head works during the last five years were—

	1891-92.	1892-93.	1893-94.	1894-95.	1895-96.
	Rs.	Rs.	Rs.	Rs.	Rs.
Weir on Sone River	11,617	14,058	18,262	22,426	13,922
Other works	8,773	7,577	8,301	5,696	6,344
Total	20,390	21,635	26,563	28,122	20,266

The expenditure on the Sone weir was much less than in the previous year; there was no damage done to the weir of any consequence.

103. The following table details the expenditure on maintenance and repairs in each division for the last three years :—

MAINTENANCE OF MAIN CANALS AND DISTRIBUTARIES.

	ARRAH DIVISION.			BUXAR DIVISION.			EASTERN SONE DIVISION.			TOTAL.		
	1893-94.	1894-95.	1895-96.	1893-94.	1894-95.	1895-96.	1893-94.	1894-95.	1895-96.	1893-94.	1894-95.	1895-96.
1	2	3	4	5	6	7	8	9	10	11	12	13
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Western Main Canal	66,412	87,895	11,108	19,748	9,326	8,331	28,898	30,285	6,799	66,180	47,021	14,487
Eastern ditto	28,882	21,080	14,581	16,272	15,801	8,169	30,476	26,393	12,077	28,898	30,286	6,799
Branch Canals	13,308	18,169	10,458	8,322	7,391	6,748	10,619	9,008	7,520	21,531	20,460	17,206
Distributaries	25,038	16,874	16,266	10,799	11,927	16,357	1,255	2,475	1,444	48,466	37,804	33,103
Drainage and protective works	1,424	1,062	889	335	843	448	3,014	4,380	2,981
Total	1,15,265	89,960	51,799	54,719	42,188	36,063	66,243	60,057	27,839	2,25,692	1,82,105	1,09,692

* Includes cost of maintaining the Telegraph line from Arrah to Dehri.

† Exclusive of Rs. 2,075 expended on maintenance and repairs in the Sone Canals, Revenue Division, and Rs. 23 paid for compensation in the Arrah Division.

The total expenditure shows a decrease of Rs. 82,418 as compared with the figures of 1894-95, and Rs. 1,26,000 compared with those of 1893-94.

Compared with the average expenditure of the five years ending March 1894, the saving on "Maintenance and repairs," this year, amounts to about one and-a-half lakhs of rupees. This reduction has not been confined to "Silt clearance and dredging," only, but is also due to real economies effected by the careful supervision of Executive Engineers. The Superintending Engineer and his Executive officers are again to be congratulated on the success which has attended their efforts to effect economy in the maintenance of the Sone Canals.

104. The following table gives particulars of dredging during the year, compared with the results of the two previous years:—

SILT-CLEARING
AND
DREDGING.

CANALS	1893-94			1894-95			1895-96		
	Quantity dredged	Cost, including removal over spoil bank, or discharge into river	Rate per 1,000 cubic feet	Quantity dredged	Cost, including removal over spoil bank, or discharge into river	Rate per 1,000 cubic feet	Quantity dredged	Cost, including removal over spoil bank, or discharge into river	Rate per 1,000 cubic feet
1	2	3	4	5	6	7	8	9	10
	C ft	Rs	Rs A P	C ft	Rs	Rs A P	C ft	Rs	Rs A P
Eastern Main and Patna Canals	2,180,403	12,922	5 14 9	1,267,586	6,644	5 4 6	439,308	3,353	7 10 1
Western Main Canal(1--9 miles,	6,103,980	40,045	6 8 11	4,272,874	26,211	6 2 1	44,748	192	4 4 7
River Sone	2,628,947	5,699	2 2 7	3,704,046	6,538	1 12 2	2,335,803	3,603	1 10 5
Head Lock	67,112	874	5 9 2	65,195	246	3 12 6	35,894	190	5 4 8
Total	8,795,034	46,118	5 3 10	8,043,015	32,990	4 1 7	2,416,605	4,245	1 12 1

The rates given above include the cost of lifting the silt into barges, and of carrying it over the spoil banks, or discharging it into the river.

Regarding the Eastern Main and Patna Canals, the Superintending Engineer remarks that the quantity dredged (439,308 cubic feet) in 1895-96 was executed to a large extent as a measure of precaution: the Superintending Engineer now thinks that much of it was unnecessary. The rate has increased largely, because so little work was done, and the establishment had to be maintained, up to a certain point, whether they worked or not.

The tables show a reduction in the quantity and cost of dredging done in the river Sone, as compared with the previous year. The Superintending Engineer writes:—

"The cost of this work, which is that of dredging a navigable channel across the river, has increased a good deal of late years. The reduction in the year under review has been effected by reducing the width of the channel, and also its depth to some extent. There is very little traffic across the river, and the Superintending Engineer considers that a channel, such as was cut in 1895, is sufficient: a few boats are inconvenienced perhaps, but it is not worth spending Rs. 2,000 or Rs. 3,000 more for these few boats."

There was an enormous reduction in the dredging in the Main Western Canal and Head Lock. The Superintending Engineer remarks:—

"Only 80,642 cubic feet were dredged as compared with 4,338,069 cubic feet in the previous year and as compared with 6,960,795, which was the average annual quantity excavated during the five years ending March 1894. Not only was there no dredging, or hand clearance, during the year, but the quantity of silt in the first 12 miles of the Main Western Canal at the end of the year was considerably less than the quantity which was in the canal in June 1895 before the silting season. The upper portion of the canal was regularly sectioned, and the lower six miles were gauged at the end of the year. The calculations show that there was about 1,078,000 cubic feet less silt in March 1896 than in June 1895 in the first 12 miles of the Main Western Canal. The greater portion of this was scoured from the first five miles.

It yet remains to be proved to what extent these results were due to the 'chur' which formed in the river above the Dehri head sluice. But undoubtedly they were, to a very large extent, due to the measures introduced to check the silt deposits."

There is no space here to describe the methods adopted for dealing with the silt question on the Sone Canals. For a detailed report on this matter, a reference may be made to Mr. Buckley's note "on the silt question on the Sone Canals," dated 31st December 1895. In the Arrah Division 567,231 cubic feet were dredged at a cost of Rs. 2 127, chiefly in clearing the lock channels and in the canal below Dunwar Lock, where the channel always silts a good deal. In the Buxar Division 127,747 cubic feet were dredged, at a cost of Rs. 513, in the 13th mile of the Main Western Canal.

105. The cost of lifting the silt on to the barges, or dredging proper, was as shown below:—

COST OF
DREDGING
PROPER.

	1893 94			1894 95.			1895 96		
	Quantity dredged	Cost of dredging	Rate per 1,000 cubic feet	Quantity dredged	Cost of dredging	Rate per 1,000 cubic feet	Quantity dredged	Cost of dredging	Rate per 1,000 cubic feet
1	2	3	4	5	6	7	8	9	10
	C ft	Rs	Rs A. P.	C ft	Rs	Rs A. P.	C ft	Rs	Rs A. P.
Eastern Main and Patna Canals	2,180,403	3,117	1 6 10	1,257,586	2,280	1 13 9	439,308	1,482	3 6 0
Western Main Canal	6 103,080	12,335	1 13 2	4,272,874	8,055	1 14 1	44,748	115	2 9 1
River Sone	2,623,947	5,100	1 15 1	3,704,946	6,265	1 11 1	2,335,863	3,061	1 9 1
Head Lock	67,112	222	3 5 0	65,195	198	3 0 8	35,894	110	3 1 0
Total	8,795,039	17,657	2 2 0	8,043,015	16,778	1 12 11	2,416,505	3,888	1 9 4

106. The expenditure on repairs to dredgers is shown below for the last three years.—

REPAIRS TO
DREDGERS.

	1893-94.	1894-95	1895-96
1	2	3	4
	Rs	Rs.	Rs.
12 Fouracres' dredgers	6,467	6,036	3,254
2 Bruce's ditto	627	362	114
2 English ditto	3,575	2,724	560
Mud punts	3,075	2,508	1,242
Total	13,744	11,630	5,170

The reduction in the cost of repairs was due to the small amount of work done by the dredgers.

107. The real cost of "lifting" the silt on to mud punts in 1895-96 was:—

"COST OF
"LIFTING"
SILT.

DREDGERS.	Working expenses per 1,000 cubic feet.	Interest and repairs per 1,000 cubic feet.	Interest and repairs of mud punts per 1,000 cubic feet.	Total 1895-96.	Corresponding total, 1894-95.
1	2	3	4	5	6
	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.
Fouracres' dredgers	1 9 4	2 12 4	3 14 0	5 3 8	5 4 11
Bruce's ditto	1 14 9	4 4 5	3 14 0	10 1 2	5 5 1
English or ladder dredgers	1 6 6	16 13 1	3 14 0	22 1 7	6 5 7

The great difference between the two years is due, of course, to the very small amount of work done.

The Superintending Engineer gives also the following statistics of the gross cost of dredging work done on the Sone Canals, exclusive of hand clearances, but he points out that the figures do not include provision for depreciation of the plant:—

PERIOD.	Gross quantity dredged in all divisions	Cost of "lifting" and "discharging"	Repairs to dredging plant	Total cash expenditure	Interest on capital cost of plant	Grand total
1	2	3	4	5	6	7
Average of 5 years ending 31st March 1889	Cubic feet 10,977,293	Rs. 62,826	Rs. 13,575	Rs. 76,401	Rs. 19,609	Rs. 96,010

Eastern Main and Patna Canals...	5,395,181	20,426	3 12 7	5,495,278	23,377	4 4 1	623,710	1,917	3 1 2

The Superintending Engineer Writes:—

"The Eastern Main and Patna Canals were closed from the 26th of April until the 6th of May 1895. It had previously been the custom to excavate the head of the Eastern Main Canal to 180 feet base, but during the closure in question, the base was reduced to 100 feet, and a "silt wedge" half a mile long and varying from 2' 6" to a foot in thickness, was left in the bed of the canal. The waterway was thus very largely reduced. The result was satisfactory. there was no difficulty in maintaining the discharge of the canal. During the closure only 623,710 cubic feet of silt was removed from the Eastern Main and Patna Canals by hand, as compared with 5,495,278 in the previous year. This large reduction was due partly to the fact just mentioned, and partly to the effect of the measures adopted to prevent the deposit of silt."

The practical result of all the foregoing information regarding the clearance of silt from the Sone Canals is highly satisfactory. It is summed up thus by the Superintending Engineer:—

"During the year under review, the entire cash saving which has been effected in the total cost of canal clearances has been (Rs. 113,660—Rs. 18,283) Rs. 95,377, when the expenditure of the year is compared with the average expenditure of the five years preceding the introduction of the improvements."

In view of the large amount of labour involved in the preparation of the many, and somewhat complicated, statistical tables hitherto prepared in connection with dredging work, it may be remarked that, if the dredging in future is as small, as it has been in 1895-96, it will be unnecessary to give such elaborate details about such small quantities of work.

There was no silt clearance done by hand from the Main Western Canal, as there was no closure during the year 1895-96.

109. The following figures give the cost of weed clearing for the last five years :—

WEED

Buxar	25,671	9,317	14,766	51,644	26,077	8,739	14,697	47,694	3,780	..
Total	243,946	66,693	88,731	397,380	245,186	73,627	106,111	426,676	3,786	32,906
					Net decrease	..				39,186

The decrease in the trees is partly due to the numbers cut down for firewood in the Eastern Sone, Arrah, and Dehri Workshop Divisions, but mainly to failure of young plants. During the year firewood was extensively used in the Dehri Workshop engines; a portion of this was sent across the river from the plantations on the Eastern Main Canal.

The financial results of the year are expressed in the following table:—

DIVISION.	Receipts.	Expenditure.
1	2	3
	Rs.	Rs.
Eastern Sone	1,359	765
Arrah ...	1,146	1,830
Dehri W o r k-shops.	658	2,676
Buxar ...	65	1,492
Total ...	3,228	6,763

112. A sum of Rs. 1,180 was realized during the year for the leasing of mills, against Rs. 1,715 in 1894-95; the expenditure on their up-keep being Rs. 269 against Rs. 182.

The mill at Lock XI, Buxar Canal, broke down during the year; the decrease in the receipts is partly due to this fact, but mainly to an alteration made in the dates of the receipt of the rent of the Nasriganj turbine, which is really let at higher rates than it used to be. In 1893-94, the gross receipts from mills was Rs. 978.

113. Maulvi Syed Mahamed Nasiruddin continued in charge of the Revenue Division. The excellent work hitherto done by him has, if anything, been surpassed in the current year.

CALCUTTA AND EASTERN CANALS.

114 The Capital and Revenue Accounts of these canals are given below:—

1.—CAPITAL ACCOUNT.

HEADS OF ACCOUNT.	Outlay during 1895-96.	Outlay to end of 1895-96.
1	2	3
	Rs.	Rs.
Direct charges ...	1,25,021	54,75,606
Less—Receipts on capital account ...		54,467
Total direct charges ...	1,25,021	54,21,139
Indirect charges ...	2,810	65,214

The expenditure charged to Capital Account during the year was incurred against an estimate amounting to Rs. 10,84,513, sanctioned in Bengal Government letter No. 44T.L., of the 29th May 1895, for canalizing a portion of the Eastern Canals, between Kulti and Bamonghatta, known as the Bhangore khal.

The total expenditure on works amounted to Rs. 1,05,928, as detailed below, against a budget provision of Rs. 1,50,000:—

			Rs.
Constructing boundary pillars	1,423
Cost of acquisition of land	19,362
Earthwork in remodelling, &c., of the existing khal	37,540
Bamonghatta and Kulti Locks	47,618
Bridges	—20
Total			1,05,928

Of the budget amount, Rs. 50,000 had to be surrendered owing to short expenditure on land, and also to the unsatisfactory arrangements made by the contractor for commencing the work.

Under extensions and improvements, an important addition was made to the Eastern Canals during the year. On the 24th December 1895, it was notified in the *Calcutta Gazette* that the provisions of Act V of 1864 shall be applicable to the khal and *bheel* route between the Kumar and Madhumati rivers, in the Faridpur district. On a representation made by the India General Steam Navigation Company for opening out a route for steamers and flats, during the rainy season, between Madaripur and Gopalganj, a preliminary survey was made, and as the proposal was found to be feasible, the above notification was published, and an estimate amounting to Rs. 23,118 was sanctioned for improving the route. Up to the end of March 1896 a sum of Rs. 11,009 was expended against the estimate.

The percentage of the net revenue on the capital outlay is shown below for ten years :—

• YEAR.	CAPITAL OUTLAY (DIRECT AND INDIRECT)—		RECEIPTS AND WORKING EXPENSES			Percentage of net revenue to capital outlay to end of year.
	During the year	To end of the year	Gross revenue.	Charges (direct and indirect).	Net revenue	
1	2	3	4	5	6	7
	Rs.	Rs	Rs	Rs	Rs	
1886-87 ..	5,298	52,23,274	4,83,654	1,92,264	2,91,390	5.5
1887-88 ..	15,842	52,39,116	5,79,808	2,24,656	3,55,278	6.7
1888-89 ..	49,369	52,88,485	5,75,225	2,93,801	2,81,324	5.8
1889-90 ..	(—)281	52,88,204	4,95,734	2,79,133	2,16,601	4.1
1890-91 ..	5,692	52,98,897	5,25,095	3,22,057	2,03,038	3.8
1891-92 ..	(—)10,327	52,83,570	5,25,319	3,43,399	1,81,920	3.4
1892-93 ..	74,279	53,57,849	4,80,114	2,52,177	2,27,937	4.2
1893-94 ..	(—)403	53,57,446	4,80,541	2,87,129	1,93,412	3.5
1894-95 ..	1,076	53,58,523	4,43,008	2,89,267	1,53,736	3.6
1895-96 ..	1,27,931	54,86,353	4,45,244	2,91,640	1,68,604	3.9

The actual realizations of the year were Rs. 12,241 in excess of those of 1894-95, while the increase in the working expenses was only Rs. 2,873. The improvement in the net revenue, though not great, may, on the whole, be considered satisfactory. The number of steamers and flats, which entered the canal during the year, was 312, against 221 in 1894-95, and only 45 in 1893-94. These are independent of the vessels which use the Sunderbuns route; the number which passed through this route during the year was 1,482, against 1,385 and 1,099 in 1894-95, and 1893-94 respectively.

The Superintending Engineer writes:—

"In last year's report attention was drawn to the system of measurement of steamers and flats. During the year the question of their measurement has been under consideration, with the result that a new rule will shortly be introduced which will ensure toll being levied on the full weight of cargo carried."

LENGTHS OF CANALS

116. There was an increase of 24 miles in the lengths of the channels open for navigation, owing to the opening out of a channel for the navigation of steamers and flats, during the rainy season, through the *bheel* between the Kumar and Madhumati rivers, in the district of Faridpur. The lengths are as follows:—

	Miles.
Calcutta and new canals	10
Tolly's Nala with 20 miles of Kaorapookhar khal	37
Total Calcutta Canals	47
Eastern Canals { Inner boat route 189 } { Outer ditto 127 }	316
Steamer route	850
<i>Bheel</i> route between the Kumar and Madhumati rivers connecting Khulna and Madaripur	24
Total Calcutta and Eastern Canals	787

NAVIGATION

117. The statement below shows the collections made during the year by the Collector and Supervisor of the Canals, and by the Executive Engineer, respectively:—

CANALS.	Num-ber of boats and rafts	COLLECTIONS BY COLLECTOR AND SUPERVISOR						COLLEC-TIONS BY EXECUTIVE ENGINEER	GRAND TOTAL GROSS REVENUE
		Tolls from boats and rafts.	Demurrage	Ferry tolls	Tolls from steamers and flats.	Rents of buildings, lands, and other miscellaneous receipts	Total.	Rents of buildings, lands, and other miscellaneous receipts.	
1	2	3	4	5	6	7	8	9	10
Calcutta and Eastern Canals	No. 76,431	Rs. 3,39,625	4,077	8,840	7,410	6,697	3,51,549	15,398	4,55,508
Tolly's Nala	57,743	85,498	1,730	1,030		303	88,561		
Total 1895-96	134,173	4,15,123	5,807	4,570	7,410	7,000	4,40,110	15,398	4,55,508
Total 1894-95	146,273	4,12,738	5,394	4,145	6,925	6,325	4,35,497	7,700	4,43,197

The tolls from boats and rafts, which constitute the chief source of revenue from these canals, amounted during the year to Rs. 4,15,123 against Rs. 4,12,738 of the previous year.

The Superintending Engineer writes:—

"Although the increase for the year under review is small, and hardly calls for any remarks, still it is satisfactory to note that the canals continue to attract a fair portion of the trade of the eastern districts, notwithstanding the increasing competition of Railways and Steamer Companies."

The rice traffic showed a small increase. The quantity of jute imported was largely in excess of the previous year, notwithstanding the severe competition of the Eastern, and Central Bengal Railways, and the Inland Steam Navigation Companies.

There was also an increase in the imports of firewood and lime.

118. The following table classifies the boats which used the canals during the last two years:—

TRAFFIC.

YEAR.	Canal.	NUMBER AND CLASS OF BOATS EXCLUSIVE OF RAFTS.					Total
		Up to 100 maunds.	Between 100 and 1,000 maunds.	Between 1,000 and 2,500 maunds.	Between 2,500 and 5,000 maunds.	Over 5,000 maunds.	
1	2	3	4	5	6	7	8
1895-96	Calcutta and Eastern Canals	46,900	20,508	2,692	105	45	70,354
	Tolly's Nala	24,008	12,755	80	36,843
	Total 1895-96	70,908	33,263	2,772	105	45	107,195
1894-95	Calcutta and Eastern Canals	41,409	27,278	3,494	184	37	72,402
	Tolly's Nala	24,087	12,551	136	36,774
	Total 1894-95	65,496	39,829	3,630	184	37	109,176

In the total number of boats which entered the canals during the year, there was an increase of 3,940.

There was a decrease in the number of small boats, or *saltis*, which entered Tolly's Nala from Kaorapookhar and paid tolls at Russa, from Rs. 35,965 in 1894-95, to Rs. 20,854 in 1895-96. Including these *saltis*, the total number of boats was 134,030 against 145,201 in the previous year.

The tonnage of boats, as determined by canal measurement, and the estimated weight and value of the cargo, are shown in the comparative statement below:—

YEAR.	Canal.	Number of boats, including passenger and empty boats, but excluding rafts	Tonnage of boats by canal measurement.	Weight of cargo in tons.	Value of cargo.	Tollage, including demurrage.	Percentage of toll on value of cargo
1	2	3	4	5	6	7	8
1895-96	Calcutta and Eastern Canals	76,354	777,985	590,808	4,64,74,817	3,41,015	
	Tolly's Nala	57,676	258,362	176,232	1,08,24,068	87,019	
	Total 1895-96	134,030	1,036,347	767,040	5,72,98,885	4,28,034	0.74
1894-95	Calcutta and Eastern Canals	72,462	768,964	569,601	4,69,91,110	3,31,531	
	Tolly's Nala	72,739	286,777	199,261	1,40,13,278	93,490	
	Total 1894-95	145,201	1,055,741	768,862	6,10,04,388	4,25,021	0.69

The decrease of tonnage was chiefly on rice and empty boats in Tolly's Nala. The decrease in value of cargo is attributed to the lower market value of the articles carried.

MISSING
TICKETS.

119. The number of missing tickets in each of the last ten years is shown below :—

YEAR.	No.	YEAR.	No.
1886-87	542	1891-92	210
1887-88	677	1892-93	169
1888-89	329	1893-94	252
1889-90	238	1894-95	170
1890-91	212	1895-96	155

REVENUE
ESTABLISH-
MENT

120. The following statement compares the cost of the Revenue establishment for each of the last five years :—

PARTICULARS.	1891-92	1892-93	1893-94	1894-95	1895-96.
1	2	3	4	5	6
	Rs	Rs.	Rs.	Rs	Rs
Salary and commission of Supervisor	11,863	10,529	9,780	9,946	10,481
Salary of Canal Inspectors	5,018	5,018	4,546	4,882	5,367
Supervisor's office establishment	5,424	6,076	6,879	6,931	6,847
Canal police	2,049	2,059	2,058	2,067	2,046
Supervisor's steam-launch establishment
Inspector's boat establishment	1,086	696	691	685	693
Dhappa water-boat establishment	168	168	168	168	167
Dafadars and chalan boat	480	828	747	828	829
Travelling allowances	71	71	118	42	151
Contingencies	3,125	2,106	1,877	1,624	1,676
Toll-collecting establishment	12,127*	12,391	12,486*	12,332*	12,710*
Total cost of establishment	41,359	39,935	39,344	39,405	40,966

* Includes salaries of darogas, clerks, cashiers, kootnavies, koyals, toll peons, and dinghi crews.

The increase in the expenditure is thus explained by the Superintending Engineer :—

"The increase of Rs 535 in salary of the Supervisor was due to better collection, and that under Canal Inspectors owing to the full number being employed and also to the payment of an officiating allowance to the Tolly's Nala Inspector during the absence, on leave, of the Supervisor. The increase of Rs. 478 under toll-collecting establishment was due to payments made in April 1895, of salaries of extra clerks entertained in 1894-95, and also to the entertainment of additional extra clerks for four months during the year."

MISCELLANEOUS
RECEIPTS.

121. The miscellaneous receipts during the year amounted to Rs. 21,228 against Rs. 12,688 in 1894-95, showing an increase of Rs 8,540. The increase is due to receipts from sale of wrecks, which are now credited under this head.

EXTENSIONS
AND IMPROVEMENTS

122. The expenditure under Extensions and Improvements was Rs. 13,239, against Rs. 1,766 in the previous year. The excess was incurred in opening out the wheel route between Madaripur and Gopalganj.

MAINTENANCE
AND REPAIRS.

123. The statement below shows the distribution of the maintenance charges under the several sub heads, as compared with the previous year :—

CANALS.	Locks	Masonry bridges.	Roads.	Buildings.	Plantations	Dredging	Channel banks.	Towpath	Rustic bridges.	Steam-launches.	Miscellaneous.	Drainage	Total.
1	2	3	4	5	6	7	8	9	10	11	12	13	14
	Rs	Rs	Rs.	Rs.	Rs	Rs	Rs	Rs	Rs.	Rs.	Rs.	Rs.	Rs.
Calcutta Canals { 1895 96	3,273	4,157	15,210	634	471	15,351	5,923	1,139	401	5,076	11,548	83	63,350
{ 1894 95	3,081	4,721	16,250	1,091	491	21,690	5,366	961	437	5,627	13,357	82	74,088
Tolly's Nala { 1895 96		1,574	227	522			527	903	307		292		8,875
{ 1894 95		2,284					464	420	185		97		4,149
Steamer route { 1895 96											8,806		8,803
{ 1894 95				1,830	583	2,604	28,389	21,534	21,732		2,094		2,094
Eastern Canals { 1895 96				2,014	581	8,826	31,507	15,568	22,621		15,777		97,449
{ 1894 95											8,430		84,545
Total { 1895 96	3,273	5,611	15,437	2,613	1,056	17,953	34,839	23,576	27,440	5,076	31,413	83	1,68,477
{ 1894 95	3,081	5,953	16,431	4,529	1,062	28,522	37,367	16,947	23,243	5,627	23,878	82	1,64,876

The maintenance charges show an increase of Rs. 3,601.

Extensive repairs were executed to towpaths and rustic bridges on the Eastern Canals.

Under the head "Miscellaneous," on the Sundarbans steamer route, Rs. 1,709 were expended in excess of last year in blowing up the wrecked flat *Kushava*.

There was also an increase in the cost of working steam-launches on the Calcutta Canals, owing to their being more used for inspection and towing purposes than in the previous year.

124. The work done by the dredgers, and the cost, including that of delivering the mud, are shown below :—

DREDGING AND
SILT CLEAR-
ANCE.

	Quantity dredged.	Cost.	Rate per 1,000 cubic feet.
1	2	3	4
	C. ft.	Rs.	Rs. A P.
Steam dredger <i>Victoria</i> ...	865,500	9,710	11 4 3
Fouracres' dredger ..	403,500	3,839	9 8 3
Marchant's dredger ..	263,400	2,604	9 14 3
Hydraulic dredger <i>Chinker</i> .	78,600*	1,765	22 7 3

* Includes 68,880 c.ft. of earth dredged during March 1895, but paid for in April 1896

The actual rates of dredging, excluding the cost of delivering the mud, the cost of repairs, and the interest on original cost of dredging plant, were as follows :—

		Rs	A	P.	
Steam dredger <i>Victoria</i>	5	12	8	} Per 1,000 cubic feet.
Fouracres' dredger	4	1	6	
Marchant's hand dredger	0	11	6	
Hydraulic dredger <i>Chinker</i>	11	2	3	

The dredger *Victoria* worked for 176 days, the Fouracres' dredger for 188 days, the Marchant's dredger for 182 days, and the *Chinker* did practically no work during the year, being under repairs. All the dredgers were laid up for repairs for considerable periods during the year.

125. The state of the plantations for the last two years is shown below :—

PLANTATION

YEAR.	Trees over 12 feet.	Saplings from 4 to 12 feet	Seedlings below 4 feet.	Total.
1	2	3	4	5
	No.	No.	No.	No.
1894-95 ..	2,986	1,684	601	5,271
1895-96 ...	3,656	1,46	554	5,356

The cost incurred during the year was Rs. 1,056 against Rs. 1,062 in 1894-95.

STEAMER
ROUTE.

126. The expenditure on the steamer route, and the receipts from steamers and flats using it, are shown below for each of the last ten years:—

YEARS.	Receipts.	EXPENDITURE—			Net revenue.	REMARKS.
		On capital account.	On revenue account.	Total.		
1	2	3	4	5	6	7
	Rs.	Rs.	Rs.	Rs.	Rs.	
1886-87 ...	4,365	1,627	1,627	2,738	
1887-88 ...	4,445	1,864	1,864	2,581	
1888-89 ...	4,670	5,352	5,352	(—)682	
1889-90	4,640	2,094	2,094	2,546	
1890-91 ...	5,425	2,268	2,268	3,157	
1891-92 ...	4,640	1,920	1,920	2,720	
1892-93 ...	4,955	28,964	2,094	31,058	(—)26,103	
1893-94 ...	5,495	627	2,094	2,721	2,774	
1894-95 ...	6,925	754	2,094	2,848	4,077	
1895-96 ...	7,410	3,803	3,803	3,607	
Total ...	52,970	30,345	25,210	55,555	(—)2,585	

The increase in the receipts amounted to Rs. 485 over those of last year, but the expenditure increased by Rs. 955; the net revenue therefore showed a decrease of Rs. 470.

ORISSA COAST CANAL.

127. The capital and revenue accounts of this canal are given below:—

CAPITAL
ACCOUNT

1—CAPITAL ACCOUNT.

HEADS OF ACCOUNT.				Outlay during 1895-96.	Outlay to end of 1895-96.
1				2	3
				Rs.	Rs.
Direct charges	39,141	43,74,958
Less—Receipts on capital account	3,293
Total direct charges				39,141	43,71,665
Indirect charges	1,004	1,05,943

There was an expenditure of Rs. 31,183 under capital account, during the year, on the works detailed below:—

	Rs.
(1) Completion of Baitghur bungalow . . .	778
(2) Completion of Charbattia bungalow . . .	47
(3) New bungalow at Eroum	1,340
(4) Remodelling escapes in Ranges IVA and V . . .	24,691
(5) Dredging Range V	3,501
(6) Opening a new escape in 106th mile . . .	761
(7) Closing an escape in 106th mile . . .	65
Total	31,183

The Superintending Engineer writes:—

“The Panchpally, Gumai and Attilabad escapes were completed on the east side, and a considerable quantity of stone was collected for use on the west side. The Jamka escape had to be closed, and in its place a new escape was opened out in the 106th mile. Dredging was continued in Range V, and 315,575 cubic feet of earth were removed.”

2—REVENUE ACCOUNT—(Actual).

**REVENUE
ACCOUNT.**

PARTICULARS	EXPENDITURE—		PARTICULARS	RECEIPTS—	
	During 1894-95.	During 1895-96.		During 1894-95	During 1895-96

Total working expenses	87,071	70,119	Less—Refunds of revenue	91	25
Net revenue . . .	(—)21,131	18,209			
Total . . .	65,940	88,328	Net total receipts	65,940	88,328

NOTE.—The details by heads of expenditure for the year 1895-96 and seven preceding years will be found in the table given in paragraph 128 following.

The financial result of the year's operations was very satisfactory. There was a considerable increase in the receipts, and the working expenses were largely reduced. The net revenue amounted to Rs. 18,209, a substantial improvement when compared with the yearly loss hitherto recorded. This excellent result was due to increase in the rice traffic, consequent on the favourable rice crops of the past three years. The tolls on the Ballaghaye branch drain tended to swell the receipts of the year to a certain extent.

FINANCIAL
RESULTS

128. The receipts on the Revenue account, and working expenses of the canal for the last ten years, are shown in the following statement :—

	1886-87	1887-88	1888-89	1889-90	1890-91	1891-92.	1892-93	1893-94	1894-95	1895-96

The Superintending Engineer writes .—

“As there was no alteration of the rules in force, it is satisfactory to note the large increase of tollage from Rs 64,094 in 1894-95 to Rs. 85,773 during the year. How far this improvement of traffic was due to the reduced rates for through traffic introduced in 1893-94 it is impossible to say, as this class of traffic was interrupted from October to March, owing to the closure of the Hiji Tidal Canal.

There was a large increase in the number of steamers run by the India General and Messrs Macneill and Company to take rice from Balasore to Chandbally for shipment to Mauritius and other ports

The India General Steam Navigation Company paid Rs. 10,290, and Macneill and Company Rs. 3,591, against Rs. 4,051 and Rs. 1,204 of the previous year

This development of traffic in Range V should be fostered in every way; and, considering the large shipments of rice from Balasore direct by sea (some 77,880 tons), it is possible that a share of this might be drawn to Chandbally if Range V were in a more efficient state for navigation during the period of low tides in the cold-weather months. It would be a great boon to shippers if the bed were deepened where it is high, and all the concrete blocks which have been washed in from the old escapes were removed from the canal. If funds are available, the question of closing the canal in March next will be considered. On the Ballaghaye drain the tolls increased from Rs. 5,031 in 1894-95 to Rs. 6,605 during the year

The chief traffic was “down” rice, which had increased from 29,391 tons in the previous year, to 47,913 tons during the year. The “up” rice traffic, which amounted to 6,126 tons, was exported from Chandbally, and was boated along Range V from Balasore. The import of salt increased from 3,627 tons to 4,452 tons, and the jute exports from 165 tons to 622 tons”

The working expenses showed a decrease of Rs. 16,952. On works alone, the mileage rate was Rs. 417 against Rs. 541 of the previous year

129. The following table compares the traffic of the year with that of 1894-95.— TRAFFIC.

ORISSA COAST CANAL	Number of boats*	Tonnage of boats	Value of cargo, including rafts	Tolls
1	2	3	4	5
	No	Tons	Rs	Rs
1894-95	16,340	151,442	31,27,901	64,094
1895-96	18,774	206,797	40,02,498	85,773

* Includes passenger and empty boats

130. The whole length of the canal from Bhaithghur to Charbattia, (102 miles), including $4\frac{1}{2}$ miles of river-crossings, was open for traffic throughout the year. The Superintending Engineer remarks.— LENGTH OF CANAL.

“This is the eleventh year that the Coast Canal has been open continuously without interruption. During neap tides, from January to March, boats drawing over 4 feet of water have difficulty in passing through Range V, owing to portions of the canal not having been originally cut to bed level. It will probably soon be necessary to close the canal for several months in the cold weather to get the canal bed perfectly cleared”

131. The rainfall registered at Balasore was 61.84 inches compared with 64.73 inches in 1894-95. The average of the previous 10 years was 65.60 inches. RAINFALL

132. The highest flood levels recorded on the various rivers crossed by the Orissa Coast Canal are recorded in the following table.— FLOODS

NAME OF RIVER	Locality	1895		1896		HIGHEST ON RECORD		REMARKS
		Date	Reading	Date	Reading	Date	Reading	
1	2	3	4	5	6	7	8	9
Rasarnarokha	Bhogra	20th September 1895	113.40	24th July 1896	115.00	June 1893	121.5	* Without data on of Mr. Verma
Panchpara	Panchpara	21st August 1895	112.00	27th ..	115.50	Not known	118.00	
Barraballong	Naloul	20th September 1895	113.40	29th ..	116.70	22nd September 1895	118.00	
Mukai	Charbattia	3rd October 1895	110.20	29th ..	113.00	Not known	116.05	Ditto

There were no floods during the year, so the gauge readings were in all cases extremely low. The highest levels in the various ranges were as follows:—

Range III =109 70 on 1st October 1895.
„ IVA	..	. =111·80 on 2nd August „
„ IVB =111·90 on 1st July „
„ V =111·90 on 1st „ „

MISCELLANEOUS
RECEIPTS

133. The miscellaneous receipts during the last five years are shown below:—

1891-92.	1892-93.	1893-94	1894-95	1895-96
Rs	Rs	Rs.	Rs.	Rs.
2,072	9,149	2,477	1,937	2,580

DREDGING
AND SILT
EXPENDITURE

134. The amount of dredging done during the year was more than usual. The following table gives the results of the working for the last two years:—

YEAR	Name of dredger.	Quantity dredged	COST OF—			RATE PER 1,000 C FT.		
			Lifting by dredger	Removing by mud punts.	Total	Lifting.	Removing	Total
1	2	3	4	5	6	7	8	9
1895-96	<i>Marchant</i> No 1.	C ft 395,570	Rs 1,455	Rs. 1,763	Rs. 3,218	Rs. A. P. 3 10 9	Rs. A. P. 4 7 4	Rs A. P. 8 2 1
	<i>Comus</i> with 3 mud punts	269,500	978	1,170	2,148	3 9 11	4 5 5	7 15 4

	<i>Comus</i> with 2 mud punts.	156,102	1,351	710	2,061	8 10 5	4 8 9	13 3 2
	Total ..	282,522	2,005	1,125	3,130	6 14 0	3 14 9	10 12 9

DREDGER

Dredger Marchant No. 1 worked in Range III and the Suburnarekha river, and *Comus* in Range V.

The clearing of silt from the Ballaghaye-branch drain, charged to ordinary agricultural, was finished during the year, and the branch canal opened to navigation on the 13th June 1895.

The Bhograi supply sluice was cleared of silt, and re-opened on the 10th July 1895, 1,120,737 cubic feet were removed by hand at a cost of Rs. 1,881; and the remaining quantity, 201,168 cubic feet, was dugged at a cost of Rs. 1,566.

The silt clearance of the Jamcoonda parallel drain, which drains part of the Sulapat, east of the Orissa Coast Canal, a length of two miles, was cleared, and 16,311 cubic feet of silt removed at a cost of Rs. 387.

135. The state of the plantations for the last two years is shown in the following statement:—

YEAR	Trees upwards of 12 feet in height.	Saplings from 4 to 12 feet in height	Seedlings below 12 feet	TOTAL.
1	2	3	4	5
1895-96 ..	2,564	5,437	6,644	14,645
1894-95 ...	1,454	4,627	4,602	10,683

The expenditure on this head was nominal.

SARAN CANALS.

136. The Capital account of these canals has been closed. The Revenue account is given below —

LENGTH OF
CANALS OPEN
AND AREAS
COMMANDED
AND IRRIGATED

138 There was no change in the lengths of the canals, which are given in the following table —

NAME OF CANAL	1895-96								1894-95							
	Navigable canals	Canals for irrigation only	Distributaries	Area protected from flood	Area under command	Area provided with distributaries	Area irrigated	Percentage of area irrigated to area provided with distributaries	Navigable canals	Canals for irrigation only	Distributaries	Area protected from flood	Area under command	Area provided with distributaries	Area irrigated	Percentage of area irrigated to area provided with distributaries
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17
Saran Canals	Miles				Acres		Acres			Miles				Acres		Acres
Main canal or head cut	0 34									0 34						
Branch Canals																
I — Dahn feeder	3 34				64,000		Nil			3 34			64,000		1,508	
II — Gaudaki	1 57									1 57						
III — Dhanes	1 00									1 00						
IV — Gaudaki	6 57									6 57						
In addition to the above, the following are maintained																
I — Thakraba Sota	1 50									1 50						
II — Roopan Chap Sota	27 00									27 00						

These canals were closed during the year, and no irrigation was done from them.

RAINFALL

139. The average rainfall on the area under command is shown by seasons in the table below for the last five years:—

	1891-92	1892-93	1893-94	1894-95	1895-96
	Inches.	Inches.	Inches.	Inches	Inches.
Kharif season (August, September, and October)	11 52	27 70	24 96	28 55	22 02
Rabi season (November to February)	6 61	2 29	1 08	2 62	0 50
Year	35 05	49 19	49 95	51 28	43 42

140. The floods in the Gandak, though destructive to parts of the embankment in the Saran district, were not particularly high.

141. A radical change in the system of working the canals was introduced last year, and rules were published in the *Calcutta Gazette* laying down the conditions under which water would be admitted to them. The most important of these is that payment of the charge levied for the supply of water to any canal must accompany any application for the opening of its head sluice. The amounts fixed for each canal are as follows:—

FLOODS

ASSESSMENTS,
COLLECTIONS
AND BALANCE.

			Rs
No. III —The Doha	10,000
„ IV.— „ Gandaki	...		5,500
„ V — „ Dhana	.		6,500
„ VI.— „ Gangri	8,000
Total			30,000

As no one applied to have any sluice opened, the canals remained closed throughout the year.

Regarding the old guarantee account, which has not yet been finally settled, the Executive Engineer writes:—

REVENUE.

“From last year’s revenue account it will be seen that the sums of Rs 3,167 and Rs. 75 were paid to the Moniara and Sadowa concerns, and the sum of Rs 1,996 due by the Arrowa concern was remitted, a further sum of Rs. 63 was paid by the Jogapur concern, which was the balance due by them.

The above sums were the balances at credit and debit of the various concerns at the end of March 1891, when the new guarantee came into force. When the accounts of the new guarantee with the proprietors of the Moniara and Sadowa concerns were thoroughly gone into by checking every voucher relating thereto in the collector’s office, it was found that certain amounts had been credited to the new guarantee which should have been credited to the old. These amounts consisted of small sums collected by certificate procedure, or other means, during the years 1892 and 1893, on assessments made by Mr Donald Reid many years before irrigation done in his own dehat, which he had not been able to collect. These had been by mistake entered and shown as paid under assessments made by the Public Works officer, for irrigation done outside the Moniara and Sadowa dehats under the “new guarantee.”

When the new guarantee account was closed up, these amounts were separated from this account, and credited in the old guarantee account as shown below, the matter is still under consideration by the Collector:—

Serial number	GUARANTEEING FACTORY	BY TREASURY ACCOUNT BALANCE ON 1st APRIL 1891		Collected from April 1st 1891 to 31st March 1894	BALANCE ON 31st MARCH 1894		Amount paid & written off as per Bengal Govt. MAINTENANCE
AND REPAIRS.

142. The expenditure on maintenance during the past five years is shown below :—

	Miles	1891-92.	1892-93	1893-94	1894-95	1895-96.
1	2	3	4	5	6	7
Repairs to head cut and river protective works	6 34	Rs. 4,304	Rs 1,341	Rs 1,766	Rs 432	Rs 459
Repairs to Daha feeder	3 34	357	544	490	166	397
„ to Gandaki feeder	1 57	221	1,550	556	150	
„ to Dhanai feeder	1 00	65	411	242	119	
„ to Gangri feeder	6 57	129	565	421	170	
„ to dams and channels for irrigation purposes	.	3 945	5,106	631		
Total	.	9,021	9,517	4,112	1,037	856
Establishment	.	3,710	3,772	1,738	447	437
Tools and plant (actual)	..	(—)193	213	112	(—)5	.
Refund of revenue	530	3,182	75
GRAND TOTAL	...	12,538	13,502	6,492	4,661	1,368

All that was done to keep the canals in order was the ordinary repairs to sluices, and weed clearance in the “Head cut.”

PLANTATIONS

143. The state of the plantations for the last two years is shown below —

YEAR	Trees over 12 feet.	Saplings between 4 and 12 feet	Seed lings under 4 feet.	TOTAL.
1	2	3	4	5
1891-95	No 8,436	No 4,588	No 4,935	No 17,959
1895-96	9,303	4,762	5,723	19,788

The expenditure on plantations was Rs. 35 only, against Rs. 50 in the preceding year.

MINOR PLANTATIONS

144. The only revenue derived from the canals during the year was Rs. 411, which was realized on account of the sale of grass, fisheries, &c., against Rs. 444 in the preceding year.

NADIA RIVERS.

LENGTHS

145. The rivers comprised in this system are the Bhagirathi, Bhairab-Jalangi, Mathabhanga, and part of the Hooghly, and their approximate lengths are as follows:—

Bhagirathi	...	145 miles to Nadia.
Bhairab-Jalangi	...	141 ditto.
Mathabhanga	...	138 miles to junction of the Hooghly river.
Hooghly	...	31 miles from Nadia to Chakdaha
Total	...	455 miles

This total shows a decrease of 22 miles as compared with the last year's report, owing to the present Bhagirathi entrance at Narainpur being 22 miles below the upper intake at Faraka. This upper portion of the Bhagirathi is now the main stream of the Ganges and requires no training works. Its length is not included in the channels to be maintained.

146. No Capital account of expenditure is kept. The Revenue account for the last two years is given below —

REVENUE
ACCOUNT

Regarding the financial results the Superintending Engineer writes :—

"The decrease in receipts, amounting to Rs. 21,652, was mainly due to the exceptionally dry condition of the rivers through out the cold weather, the entrance of the Bhagirathi being closed from the middle of December

Were this decrease confined to a single season, it would be of little moment, but unfortunately it has been going on for some years past, and now for the first time in the history of these rivers, extending as far back as 1820, the net revenue has become a minus quantity. It is only within the last four years, however, that the decline has become particularly marked, but no enquiry has been made, nor any satisfactory explanation given of this annual decrease of revenue. It may possibly be due to two causes—

- (1) More favourable railway rates with the view of securing the Ganges traffic
- (2) Owing to the uncertainty of the depth of water at the entrances and over the shoals, the boatmen may have lost faith in the rivers as a means of transport during the cold weather. This is not the first time in the life of these rivers that the question of railway competition and deterioration of channel has been considered

In 1868-69 the Board of Revenue, when reviewing the report for that year, wrote as follows —

'From the examination of the figures given in the statements, it appears to the Board to be perfectly clear that, apart from the vicissitudes of season and incidental circumstances which may cause temporary fluctuations in the extent and course of traffic, the chief and constant reasons for the decrease of the river traffic are the obstructions at the entrance of the river, and the deteriorated condition of the river channel generally, as alluded to by the Executive Engineer, owing to which the river is year by year navigated by a fewer number of large boats and more traffic diverted to the railway'

To test the accuracy of the above opinions, it is necessary to compare the receipts and expenditure at that time with the revenue and expenditure of recent years

In the following statement is given the receipts and charges for the years 1863-64 to 1868-69. Unfortunately the information for other years is not conveniently available

YEAR	Total receipts	Public Works Department receipts.	Total	Public Works Department charges	Net revenue.
1	2	3	4	5	6
	Rs	Rs	Rs	Rs	Rs
1863-64	2,69,017	...	2,69,017	1,90,420	78,597
1864-65	2,40,737	...	2,40,737	91,829	1,48,908
1865-66	2,18,013	...	2,18,013	1,19,206	98,807
1866-67	1,96,327	316	1,96,643	1,05,979	90,664
1867-68	2,06,383	2,559	2,08,942	1,74,755	34,187
1868-69	1,79,900	2,339	1,82,239	1,56,108	26,131
Mean	2,19,265	1,39,716	...

The mean gross annual revenue and expenditure from 1863 to 1896 were Rs. 2,19,265 and Rs. 1,39,716 respectively, compared with Rs. 1,95,981 and Rs. 98,398 for the years 1883 to 1889. The small decrease in annual revenue, extending over a period of 20 years, would seem to show that the railway has not proved such a formidable rival as was anticipated; while the large decrease in maintenance charges would tend to prove that the rivers as navigable channels were, up to a few years back, in a better condition than they were 30 years ago. At that time the Executive Engineer wrote "that the shoals in the Bhagirathi were increasing, and that it is now almost entirely abandoned as a cold-weather route". During my short acquaintance with these rivers, I have felt inclined to attribute the rapid increase of maintenance to an extension of the shoals, but, with the knowledge of what has taken place in the past, I venture to entertain a hope that the history of the Bhagirathi will repeat itself, and that the present period of depression will soon be followed by a succession of years of increased revenue and diminished expenditure. Appended to this report is a statement which has been prepared to show the average monthly receipts of the four flood months, viz., July to October, and the four dry months, January to April, for a series of years from 1831-32 up to date. This statement shows that for the years 1863 to 1869, the average monthly receipts in the flood and dry months were Rs. 24,280 and Rs. 2,508 respectively, while for the years 1883 to 1889 the receipts for the same months averaged Rs. 14,307 and Rs. 2,095 respectively. These

figures are instructive, as they show that it is when the rivers are full that the great decrease in traffic has taken place. The Executive Engineer will be requested to consider and report on this question before submission of his next annual report."

148. No rainfall register is kept up for these rivers.

RAINFALL
FLOODS.

149. The gauge readings at Gheria and Berhampore for the last ten years are given below:—

Year	Berhampore.	Gheria.
1886	29' 9 $\frac{1}{2}$ "	32 35
1887	30' 1 $\frac{1}{2}$ "	31 50
1888	30' 2"	32 35
1889	30' 4 $\frac{1}{2}$ "	34 00
1890	30' 11 $\frac{1}{2}$ "	34 70
1891	26' 7"	29 30
1892	29' 1 $\frac{1}{2}$ "	31 55
1893	27' 11 $\frac{1}{2}$ "	30 75
1894	30' 3 $\frac{1}{2}$ "	32 75
1895	26' 1 $\frac{1}{2}$ "	28 80

The reading of the Berhampore gauge on the 19th August 1895 was 26' 1 $\frac{1}{2}$ ". The flood was therefore the lowest recorded during the last ten years, and was almost 5 feet below the highest flood level of 1890.

The highest flood levels of 1895-96 are compared below with the highest levels in the previous year, and with the highest levels on record. The readings given are the heights above mean sea level:—

River	Locality	1895-96		1894-95		Highest known	
		Date	Reading	Date	Reading	Date	Reading
1	2	3	4	5	6	7	8
Bhagirathi	Berhampore	19th Aug 1895	26 12	29th Aug. 1894	64 04	14th Aug 1890	64 71
Jalangi	Barupganj	26th " "	24 25	6th Sept "	29 41	28th " "	34 83
Mathabhauga	Hanskhali	23rd " "	19 06	27th Dec "	24 96	1st Sept "	39 93

150. The several classes of boats which plied on the rivers and the tolls collected from them are tabulated below —

NAME OF RIVER	NUMBER AND CLASS OF BOATS						COLLECTIONS BY TOLL COLLECTORS					
	Up to 10 man and less	Between 10 and 100 man and less	Between 100 and 2,000 man and less	Between 2,000 and 5,000 man and less	Over 5,000 man and less	Total	Toll of cent cents	Toll of annas annas	Toll of paise paise	Total tolls Rs.	Total tolls annas annas	Total collections Rs.

TRAFFIC

151. The following is a statement of the number of boats, their tonnage the weight and value of their cargo, and the toll collection:—

NAME OF RIVER	Number of boats, inclusive of steamers, flats and rafts	Tonnage of boats	Weight of cargo.	Value of cargo	Toll* collection.	Percentage of toll on value of cargo
1	2	3	4	5	6	7
	No	Tons	Tons	Rs	Rs	
Bhagirathi	9,462	152,668	68,333	50,41,261	32,025	0 62
Ditto and Bhyruh Jalangi	28,059	324,238	112,821	1,66,42,177	66,075	0 39
Mathabhang and Ichamati	9,906	107,894	38,813	32,95,813	21,881	0 66
Total, 1895-96	47,427	591,718	219,967	2,49,79,251	1,19,981	0 48
Total, 1894-95	50,518	668,245	257,450	3,12,12,357	1,41,419	0 45

* Tolls from boats, steamers, flats and rafts

The foregoing statement shows, on the whole, a falling off under all heads, Sarupganj being most conspicuous, where the total weight of cargo registered during the year was 112,821 tons, as compared with 142,686 tons in the previous year, thus showing a decrease of 29,865 tons. This vast decrease is attributable to the deterioration of the Jalangi and Bhagirathi rivers towards the end of the cold weather, thus diverting the through traffic from the northern districts and Bihar to Goalundo, whence it was transhipped and railed to Calcutta, or continued the boat journey to Calcutta by the Sundarban route.

STEAMER SERVICE

152. No transport service is maintained by Government on these rivers. The steamer service kept up by the several companies is shown in the statement below.—

NATURE OF SERVICE	TERMINAL STATIONS—		Outward and inward	PERIOD
	From—	To—		
1	2	3	4	5
	<i>Calcutta Steam Navigation Company.</i>			
Weekly	Calcutta	Jangipur	Both	From 15th June to 10th November 1895
Twice a week	Kalna	Katwa and Jaganj	Do.	From 3rd June to 3rd November 1895
Ditto	Azimganj	Dhulian	Do.	From 23rd June to 10th November 1895.
Twice daily	Berhampore	Azimganj	Do.	From January to 12th November 1895.
	<i>East Indian Railway Company</i>			
Twice a week	Azimganj	Dhulian	Both	From 11th June to 10th November 1895.
Daily	Berhampore	Azimganj	Do.	From 9th July to 2nd November 1895.
Do.	Lalbagh	Ditto	Do.	From 3rd November 1895 to 31st March 1896.

153. The cost of the revenue establishment for the last five years is shown below:—

REVENUE
ESTABLISH-
MENT.

	1891-92	1892-93	1893-94	1894-95	1895-96
1	2	3	4	5	6
Salary and commission of Col- lectors	Rs. 13,210	Rs. 12,391	Rs. 12,614	Rs. 14,807	Rs. 14,010
Accounts and office establishment	8,942	8,879	8,901	8,494	8,407
Travelling allowance	530	601	525	766	756
Contingencies ..	452	411	947	395	409
Total ..	23,134	22,262	23,017	24,462	23,582

There was a decrease of Rs. 880 during the year, due mainly to less com-
mission having been drawn by the Toll Collectors of Sarupganj and Hanskhali
toll stations

154. The charges for maintenance and repairs (exclusive of establishment
and tools and plant) for the last three years, are detailed below:—

MAINTENANCE
AND REPAIRS

PARTICULARS	1893-94	1894-95	1895-96
1	2	3	4
Re-opening lower entrance channel, Bha- girathi river	Rs. 546	Rs. ..	Rs. ..
Training works in river Bhagnathi ..	51,481	41,642	45,694
" " Bhyrub ..	4,318	3,989	6,107
" " Jalangi ..	6,430	7,034	6,932
" " Mathabhanga ..	2,060	2,717	844
Sounding Nadia rivers ...	6,500	6,535	5,731
Maintaining and working divisional boats	2,635	2,493	2,297
Petty and other charges ..	3,384	4,178	2,386
Total ..	77,364	68,588	69,991

The total expenditure was Rs. 1,403 more than that of the previous year.
The increase was due to certain charges, which were incurred in 1894-95,
having been paid during the current year. otherwise the actual expenditure
on training works was Rs. 13,310 less than in the previous year.

155. The miscellaneous receipts during the year amounted to Rs. 124
against Rs. 279 in the previous year.

MISCELLANEOUS
RECEIPTS

156. No work was done under this head except at a few shoals, where
sand was cleared by *kodalis* in order to keep up a running stream of good
drinking water for the towns and villages along the river bank.

DREDGING
AND SILT
CLEARANCE

157. The only plantations kept up in the Nadia Rivers Division are those
on the berms of the Bhagirathi embankments. Their condition is shown by
the following statement.—

PLANTATION

Year.	Trees over 12 feet	Saplings from 4 to 12 feet.	Seedlings below 4 feet.	Total
1	2	3	4	5
1894-95 ...	No. 13,558	No. 3,169	No. 2,616	No. 19,343
1895-96 ...	13,184	4,020	1,751	18,955

EDEN CANAL.

LENGTH OF
CANALS.

158. No Capital or Revenue account of this canal is maintained. The aggregate length of the excavated channels remained the same as last year. The lengths of the several channels are as follows:—

	Miles
Joojooty sluice and channel. Nos. 1 and 2 ...	2
Eden Canal proper ...	19½
Kana Damodar junction cut ...	2½
Saraswati junction cut ...	2½
Connecting channel between the Rankini Doho and the Kana Damodar ...	½
Connecting channel between the Rankini Doho and Kana Nadi ...	½
Total ...	27½

In addition to the above, the natural channels of the Kana Nadi, Kana Damodar, Banka Nala, and North and South Saraswati are included in the system.

The gross area commanded by the Eden canal is about 300,000 acres, of which about 200,000 acres are culturable, and 100,000 acres irrigable.

REVENUE
ACCOUNT

159. The receipts and expenditure for the last two years are given below —

EXPENDITURE.	1894-95.	1895-96	RECEIPTS	1894-95.	1895-96
1	2	3	4	5	6
	Rs.	Rs.		Rs.	Rs.
Works ...	12,554	3,072	Water-rates ...	29,674	30,763
Maintenance and repairs ...	25,303	37,341	Miscellaneous ...	576	355
Establishment ...	14,129	14,951			
Tools and plant ...	752	606	Total ...	30,250	31,118
Total expenditure ...	52,738	55,970	Less—Refunds of Revenue	50	201
Balance, deficit ...	22,538	25,053	Net total receipts .	30,200	30,917

The original works executed, or in progress during the year, were the following:—

- (a) The combined bridge and regulator over the Kana Damodar at Chakdighi were completed during the year. The total cost amounted to Rs. 10,668, but of this only Rs. 2,439 were expended in the year under review.
- (b) A sum of Rs. 633 was expended during the year on land charges as under—

	Rs.
For channel connecting Rankini Doho with Kana Nadi ...	517
Ditto ditto with Kana Damodar ...	98
Compensation for land, Eden Canal ...	18
Total ...	633

- (c) A cart bridge over the channel connecting the Rankini Doho and the Kana Nadi at Srimanpur was constructed during the year at a cost of Rs. 770, which was charged to the maintenance grant of the Eden Canal.

Besides the extensions and improvements above alluded to, the Eden Canal was maintained in an efficient condition throughout the year.

The actual cost of maintenance of the canal during the year was Rs. 53,099, as compared with Rs. 40,234 of the previous year. The increase was due to heavy silt clearance from the Banka, from channel No. 1 at Joojooty, and also from that portion of the Banka immediately above the weir at Kanohannagar.

As usual, the cold-weather supply of the canal was kept up by a sand dam across the Damodar at Joojooty, at a cost of Rs. 3,522 against Rs. 4,004 of the previous year.

The receipts from water-rates showed a small increase.

160. The rainfall registered at Edilpur was 44.43 inches, as compared with 48.51 inches in the previous year, but the fall during the *kharif* season was only 29.14 inches, or 4.34 inches less than that of last year.

RAINFALL

161. Regarding crop experiments, the Superintending Engineer writes:—

CROP EXPERIMENT

“A few experiments were made with paddy crops only, with the result that an acre of middle class land irrigated by canal water produced 32 maunds 29 seers of paddy, and 45 maunds 22 seers of straw; but no experiment was made on land which did not receive the benefit of canal water, as there was almost a complete failure of crop in the non-irrigated tract”

162. The total area leased during the year was 43,525 acres, as compared with 44,584 acres in 1894-95, the falling off being due to the cancelling of old long leases of certain villages on the banks of the Banka Nala.

AREAS LEASED AND THROAT RD

The total area irrigated by the Eden Canal during the year under review was 36,221 acres, consisting of 19,156 acres of *kharif* and 1,719 acres of *rabi* in the Burdwan district, and 15,180 acres of *kharif* and 166 acres of *rabi* in the Hooghly district, as compared with 20,390 acres of the previous year, viz., 17,970 acres of *kharif* and 12 acres of *rabi* in the former, and 2,400 acres of *kharif*, and 8 acres of *rabi*, in the latter district. The increase was mainly attributable to the scanty rainfall of the year under report.

Out of 34,336 acres irrigated in the Burdwan and Hooghly districts during the *kharif* season, 3,884 acres received one watering only, as they were situated beyond the area commanded by the canal; and 158 acres were irrigated surreptitiously in the Hooghly district.

The areas irrigated by the Eden Canal during the last five years are shown below:—

YEARS.	Long leases.	Annual leases.	One flushing beyond area commanded	Unauthorized	Total.	REMARKS.
1	2	3	4	5	6	7
	Acres	Acres		Acres	Acres.	
1891-92	12,707	1,478	14,185	
1892-93	47,848	6,534	...	16,951	71,333	
1893-94	11,601	138	11,739	
1894-95	19,650	20	720	.	20,390	
1895-96	30,195	1,984	3,884	158	36,221	

The Superintending Engineer writes:—

“In last year's report it was remarked that it was only in exceptional years that there was any demand for canal water. The season under review was exceptional, and a much larger area would have been irrigated had there been any system of distributaries to carry the water from the main canal. An estimate amounting to Rs. 94,245 has been recently sanctioned by Government for the construction of two distributaries”

163. The water-rates assessed during the year amounted to Rs. 37,809, and taking the unrealized balance of the years 1892-93, 1893-94 and 1894-95, the gross demand for the year was Rs. 70,978 against Rs. 69,662 of the previous year.

DEMAND, COLLECTION AND BALANCE

Deducting the collection of Rs. 30,690 (*plus* Rs. 73 realized by the Burdwan Certificate Officer on account of interest on outstanding water-rates),

the remissions of Rs. 4,605, and Rs. 1,791 allowed as commission on advance payment, the unrealized balance remaining at the end of the year was Rs. 33,983. Out of this, a sum of Rs. 10,699 will probably have to be written off as irrecoverable.

164. The cost of the revenue establishment during the year was Rs. 4,215 against Rs. 4,052 in the previous year.

165. The miscellaneous receipts amounted to Rs. 353 against Rs. 576 in 1894-95.

166. The expenditure on plantations was the same as last year, viz., Rs. 76. A number of mahogany seedlings died owing to excessive heat, bringing down the total number from 360 to 327.

167. There were five floods in the Damodar river during the year, but as they were of an ordinary nature, no damage was done to the canal. The last and highest flood, which occurred on 20th September 1895, rose to 13 feet, or 2 feet 7 inches below the highest on record at Edilpur, on the 8th July 1894.

GAIGHATTA AND BUXI KHAL.

168. This channel, $7\frac{1}{2}$ miles in length, was taken over by the Public Works Department on the 1st April 1894. It was formerly an important trade route, connecting the Damodar and Rupnarain rivers, but its importance diminished when the Midnapore canal was opened, and it was placed under the management of the Hooghly Road Cess Committee. After this, from want of proper attention, it silted up so much that the traffic of even small boats was almost stopped. Subsequently, it came into the hands of the District Board of Howrah, and its annual income was then estimated at Rs. 2,810. Government was eventually asked to resume its management, as it continued to deteriorate, and its income in consequence to diminish.

An estimate, amounting to Rs. 31,471, was sanctioned for its re-excavation, and the work was completed during the year at a cost of Rs. 29,325. The total expenditure on its maintenance amounted, during the year 1895-96, to Rs. 13,009, against Rs. 27,269 in 1894-95. The receipts were Rs. 5,125 against Rs. 820 in the preceding year.

The right of collecting tolls was leased out for Rs. 5,125, and the full amount was realized during the year.

MADHUBAN CANAL.

169. The expenditure incurred in maintaining this canal during the last five years is shown below.—

PARTICULARS.	1891-92.	1892-93.	1893-94.	1894-95.	1895-96
1	2	3	4	5	6
	Rs.	Rs.	Rs.	Rs.	Rs.
Works ...	7,300	7,063	5,943	5,567	2,488
Maintenance ...	3,003	2,813	2,438	2,405	1,269
Establishment ...	203	126	2	36	7
Tools and plant	27	44
Refunds of revenue	27	44
Total ...	10,506	10,032	8,383	8,035	3,808

During the year, although no severe floods occurred, yet a good deal of damage was done. Again, as in previous years, a deep hole was scoured out in front of the under-sluices of the Teur Weir. The east wing wall was damaged and a portion of the toe-wall, constructed in 1894, was carried away. The east bank was considerably damaged, the river very nearly cutting through the bank into the channel behind.

The expenditure incurred during the year, amounting to Rs. 1,750, was for repairing the damage done in 1894-95. The amount expended in maintaining the canal itself was Rs. 849, and consisted of weed, and silt clearance, repairing banks, &c. A sum of Rs. 110, expended on repairing the Teur weir in 1894-95, was written back during 1895-96. The total expenditure on repairs was therefore Rs. 2,488.

No revenue is derived from the canal.

The miscellaneous receipts were Rs. 121, against Rs. 63 in 1894-95.

REVENUE.

170. The total area irrigated was 2,254 acres as compared with 5,518 acres in the previous year. A good deal of the irrigation was done during the months of January to March to the poppy cultivation.

IRRIGATION

The areas of the different crops irrigated during the last five years were as follows.—

Nature of crop.	1891-92.	1892-93.	1893-94	1894-95.	1895-96.
1	2	3	4	5	6
	Acres.	Acres	Acres	Acres	Acres.
Kharif ..	2,539	4,895	2,710	5,033	980
Rabi ...	495	150	46	117	112
Poppy ...	552	734	301	322	783
Hot-weather crops	640	14	46	379
Total ...	3,586	6,400	3,071	5,518	2,254

171. The state of the plantations for the last two years is shown below :—

PLANTATIONS

YEAR.	Trees over 12 feet.	Saplings between 4 and 12 feet.	Seedlings under 4 feet	Total.
1	2	3	4	5
	No.	No.	No	No.
1894-95 ..	247	246	202	695
1895-96 ...	251	240	211	702

GENERAL RESULTS.

172. The net results of the year 1895-96, compared with those of the previous year, are shown below :—

PARTICULARS	Receipts from all sources.	Working expenses, including refunds of revenue. (Direct and indirect charges)	Profit or loss
1	2	3	4
MAJOR IRRIGATION WORKS.	Rs.	Rs.	Rs.
1894-95	15,24,040	14,65,962	+ 58,078
1895-96 ...	15,15,315	13,91,926	+ 1,23,389
MINOR WORKS AND NAVIGATION			
<i>For which Capital and Revenue accounts are kept.</i>			
1894-95 ...	5,10,870	3,81,607	+ 1,29,263
1895-96 ...	5,45,406	3,63,472	+ 1,81,934
<i>For which only Revenue accounts are kept.</i>			
1894-95 ...	1,42,518	1,69,186	—26 668
1895-96 ...	1,25,230	1,59,844	—34,614
<i>For which neither Capital nor Revenue accounts are kept</i>			
1894-95 ...	30,313	60,823	—30,510
1895-96 ...	31,239	59,979	(—)28,740
Total { 1894-95 ...	22,07,741	20,77,578	+ 1,30,163
{ 1895-96 ...	22,17,190	19,75,221	+ 2,41,969

The total receipts exceed the figures of the revised budget estimates by Rs. 43,190, while the total direct expenditure was Rs. 90,304 less than that provided in the budget.

EARNINGS.

173. Reckoned on earnings, that is, on assessed revenue, as opposed to actual receipts, the net results of the Major Irrigation Works for the last two years were as follows :—

	Earnings.	Working expenses.	Profit or loss.
	Rs.	Rs.	Rs.
1894-95 ...	13,85,719	14,65,962	(—)80,243
1895-96 ...	15,75,422	13,91,926	(+)1,83,556

The revenue from Minor Works and Navigation is derived mainly from tollage receipts.

AURHANS

174. Good work was done during the year in the recovery of water-rates, and the reduction of the uncollected balance from Rs. 77,498 to Rs. 67,460, is satisfactory.

The figures for the three canal systems are given below:—

CANALS.	Outstanding on 1st April 1895	Demand of 1895-96	Collected or adjusted.	Outstanding on 1st April 1896.
1	2	3	4	5
	Rs	Rs.	Rs	Rs
Orissa	32,140	2,31,727	2,29,524	34,343
Midnapore	4,549	1,04,111	98,536	10,124
Sone	40,809	6,56,246	6,74,062	22,993
Total	77,498	9,92,084	10,02,122	67,460

CANAL.	DEMAND.			COLLECTIONS, INCLUDING REMISSIONS			PERCENTAGE OF COLLECTIONS.		
	Arrear	Current	Total	Arrear	Current	Total	Arrear	Current	Total
1	2	3	4	5	6	7	8	9	10
1895-96	Rs	Rs	Rs	Rs	Rs	Rs	Rs	Rs	Rs.
Orissa Canals	32,140	2,31,727	2,63,867	31,829	2,07,605	2,39,524	67 01	89 63	86 96
Midnapore Canal	4,549	1,04,111	1,08,660	8,470	95,066	99,536	76 28	91 31	90 65

Total, 1895-96	77,498	9,92,084	10,69,582	69,151	9,36,871	10,02,122	84 00	94 44	93 69
1894-95.									
Orissa Canals	63,350	1,68,447	2,31,797	49,584	1,51,075	1,90,659	76 69	80 08	86 13
Midnapore Canal	7,027	1,35,016	1,42,043	6,332	1,31,168	1,37,404	90 11	97 14	98 79
Sone Canals	1,01,858	6,80,905	7,82,763	89,418	6,55,530	7,47,954	90 73	95 43	94 59
Total, 1894-95	1,72,335	9,84,370	11,56,705	1,47,334	9,37,773	10,85,107	85 64	94 09	93 33

175. A comparison is made in the following table between the approximate value of crops irrigated by Major Irrigation Works during 1895-96 and the previous year.—

VALUE OF
CROPS

CANALS	1894-95.		1895-96.	
	Area irrigated.	Value of crops.	Area irrigated.	Value of crops.
1	2	3	4	5
	Acres.	Rs.	Acres	Rs.
Orissa	122,561	37,78,130	117,996*	25,44,254
Midnapore	70,116	25,22,086	65,251	21,53,283
Sone	317,134	1,21,71,797	395,222	1,34,87,081
Total	509,811	1,84,72,013	578,469 *	1,81,84,618

* Exclusive of 1,464 acres of additional kharif demand assessed after the close of the year.

The average value per acre of the various crops irrigated has decreased from Rs. 32.4 to Rs. 31.43.

DATE FOR
SUBMISSION OF
REPORTS

176. The date fixed for the submission of revenue reports to the office of the Chief Engineer is the 5th September. The dates when the different reports were received are shown below :—

		In 1895	In 1896.
Orissa Circle	{ Deputy Collector's report through	17th August.	11th September.
	{ Commissioner		
South-Western Circle	{ Superintending Engineer's report ...	5th September.	2nd ditto.
	{ Commissioner.		
Sone Circle	{ Deputy Collector's report through	6th August.	5th October
	{ Commissioner.		
	{ Superintending Engineer's report ...	2nd September.	4th September.
	{ Commissioner		
	{ Deputy Collector's report through	4th ditto.	7th ditto.
	{ Commissioner		
	{ Superintending Engineer's report ...	27th August	28th August.

All the Superintending Engineer's reports were punctual. The South-Western Circle Deputy Collector's report was late.

177. As far as irrigation is concerned, the year was one of a more favourable character than the two years preceding it. Although the rainfall was plentiful in Orissa, it was decidedly deficient in the Sone and Midnapore. There was a large increase in the area irrigated by the Sone Canals in the rabi season, but the financial results of the year are, nevertheless, to a certain extent disappointing. The revenue derived from the increased rabi irrigation does not appear in the year's accounts, as the water-rates from the rabi crop are not realizable till the next year. The seasons 1893 and 1894 were particularly favourable to the rice crop, and the fact that the year under review succeeded two such good seasons was not conducive to the extensive renewal of long leases which had expired. On the Midnapore Canal the reluctance of the cultivators to renew expired leases is now becoming a serious matter. The question is receiving careful attention, and if, as seems to be the case, some of the rules in force are unpopular, it will probably be necessary to modify them.

A very satisfactory feature of the year's work is the reduction in the cost of maintaining the Sone and Orissa Canals. The improvement is most marked in the Sone Circle, where the saving amounts to a very large sum, and the total expenditure is less than in any year since the canals were fully opened. This excellent result has been attained not only by the continued success of the methods introduced by Mr. Buckley for reducing the deposits of silt in the canals, but also by actual economies effected by the careful supervision of the Executive Engineers in charge of the canal divisions. The good work done by Mr. DeMello in reducing the charges in the Arrah Division, which were formerly extravagant, is brought specially to notice by the Superintending Engineer. The water-rate collections of the year were remarkably good. In the Sone Circle the uncollected balance was the lowest, and the percentage of collections was the highest on record. This satisfactory state of things reflects great credit on the Deputy Collector, Maulvi Syed Mahomed Nasiruddin, and his staff. The collections in Orissa and Midnapore were satisfactory.

178. The development of traffic on the canals, exhibited by the largely increased revenue from navigation, is very gratifying. The increase was contributed by all the canals with the exception of the Nadia Rivers. It is satisfactory to observe that the Circular and Eastern Canals continue to attract a fair proportion of trade, notwithstanding the increasing competition of the railway and steamer companies. A revision of the rules for the measurement of boats on these canals has been under consideration during the year, and a new rule will shortly be introduced which will ensure toll being levied on the full weight of cargo carried by all classes of boats. It is worthy of notice that the Orissa Coast Canal has been worked at a profit for the first time in its history. As regards the Nadia Rivers, there is, unhappily, nothing in the way of improvement to record. The difficulty of keeping these rivers open for navigation is increasing, and this year there was a falling off under all heads of traffic. For some years every effort has been made to reduce expenditure, but unfortunately with little success. The Jalangi and Bhagirathi rivers continue to deteriorate, and consequently traffic is diverted to other routes. Careful observations are being recorded with the view of proving what changes are actually taking

place in the rivers, and it is hoped that before long some satisfactory means of controlling and improving the channels may be devised.

179. In the Revenue Report for last year the Lieutenant-Governor desired that a set of rules should be framed for the guidance of officers conducting experiments on the outturn of crops, with the object of securing uniformity in the method of conducting these experiments in all irrigation divisions. Rules are accordingly being drawn up, and they will come into use for the experiments to be made in 1896-97.

180. The record of the tours of officers shows that ample time was, in every case, devoted to this duty.

181. The inspection of divisional and subdivisional offices by Superintending Engineers was satisfactorily performed.

A. D. McARTHUR, COL., R.E.,

Chief Engineer.

The 7th December 1896.

IA.

No. 1F.

STATEMENT SHOWING THE WATER-RATES PER ACRE IN FORCE ON
CANALS IN BENGAL DURING 1895-96.

CANALS.	Rate.	Different sorts of leases and crops on which the Water-Rates are charged.	WATER RATES PER man.	
			Flow.	Lift.
1	2	3	4	5
OMISSA CANALS.	I	<i>Long Leases.</i>	Rs. A. P.	Rs. A. P.
		For water supplied on a long-term lease between the 16th June and 30th November.	1 8 0	1 8 0
		For a term of 7 years for each season.		
		II For water supplied on a provisional license for which a permit for a term of years is not subsequently issued.	3 0 0	3 0 0
		III Provided that the rate for leases, whether new or renewals, required for shorter terms than seven years in order to develop the system of block (as per Rule 7 III) shall be.	1 8 0	1 8 0
		IV For <i>beah</i> lands included in long lease are not exempted from assessment, but no charge will be made for water supplied to them in the <i>rabi</i> season, that is, up to 25th March.	0 0 0	0 0 0
		V Low-lying lands included in leases for a term of years which require irrigation only in years of drought.	0 8 0	0 8 0
		<i>Season leases.</i>		
		I For water supplied for irrigation of rice between the 16th of June and 30th of November.	3 0 0	3 0 0
		II For water supplied for irrigation of <i>dalwa</i> rice.	1 8 0	1 8 0
Sched. 10 ...	III	For water supplied for irrigation of cotton, tobacco, <i>huldi</i> , ginger, wheat, vegetable, indigo and garden produce	1 8 0	1 8 0
		IV For water supplied for irrigation of linseed, oil-seed and all pulses.	1 0 0	1 0 0
		V For water supplied for irrigation of sugarcane.	5 0 0	5 0 0
		VI For filling tank or for manufacturing purposes per 10,000 cubic feet of water supply, also for filling tanks without authority or using water in an unauthorized manner.	1 0 0	1 0 0

SOUTH-WESTERN CIRCLE.

For the Rice Crop.

For water supplied between June and November—whether by flow or lift—

MIDNAPORE CANAL.	For five-year leases	Rs. A. P.	...
	For one-year lease or for water supplied on a provisional license for which a permit for a term of years is not subsequently issued	1 8 0 per acre for each season.	...
	Provided that the leases, whether new or renewals, required for shorter terms than five years in order to develop the system of blocks shall be charged	3 0 0 per acre.	...
	Otherwise, in addition to the rate of Rs. 1-8 an extra rate of 12 annas per acre shall, in the first year only, be charged on leases for less than five and more than one year	1 8 0 per acre.	...

For Winter Crops.

For supply of water, when available	...	2 8 0 per acre or per season.
For unauthorized use of canal water	...	5 0 0 per acre or such less rate as may be sanctioned by the Deputy Collector.

SOUTH-WESTERN CIRCLE—concluded.

For supply of water for manufacturing or other purposes Re. 1 to be charged for each 10,000 cubic feet or part of 10,000 cubic feet supplied

The same charge will be made if water is taken into a tank without authority or used in an unauthorized manner.

Tanks may be filled with canal water without charge wherever water can be made available without injury to the cultivation dependent on any canal under certain conditions noted in Rule 31.

		Per bigha.		
		Rs.	A.	P.
EDEN CANAL.	I.—Long leases entered into before the 1st October 1895, per season ...	0	4	0
	II.—Long leases entered into after the 1st January 1896, per season ...	0	5	0
	III.—Extra charge for long leases entered into during the irrigation season, i.e. between 1st June and 1st October in any year, in addition to the rates mentioned in I and II, for the first year only ...	0	2	0
	IV.—Season leases, kharif, per season ...	0	8	0
	V.—Single waterings outside the area commanded in each watering ...	0	4	0
	VI.—Season leases, rabi, sugarcane and potatoes and other crops ...	1	0	0

M. FINUCANE,
Secy. to the Govt. of Bengal.

STATISTICAL DEPARTMENT,
The 14th December 1896.

STATISTICS OF THE SEA-BORNE TRAFFIC OF CALCUTTA IN FOOD-GRAINS.

No 958 Statistics—The following memorandum and statements are published for general information—

STATISTICAL DEPARTMENT,
The 14th December 1896.

M. FINUCANE,
Secy. to the Govt. of Bengal.

Memorandum.

The comparative statement below shows the total quantity of food-grains imported into and exported from, Calcutta by sea during the 9 days from 22nd to 30th November 1895 and 1896:—

1	22ND TO 30TH NOVEMBER			
	1895.		1896.	
	2	3	4	5
<i>Imports</i>	Cwts	Mds.	Cwts	Mds.
From Foreign Ports ..	20,610	28,052	7,165	9,752
„ Indian „ ...	20,610	28,052	44,922	61,144
Total	20,610	28,052	52,087	70,896
<i>Exports</i>				
To Foreign Ports ...	128,021	1,74,250	49,295	67,096
„ Indian „ ...	64,135	87,295	30,145	41,031
Total ...	192,156	2,61,545	79,440	1,08,127

Imports—The increase under this head aggregated 31,477 cwts., or 152 72 per cent. the advance being most conspicuous under rice, gram and pulses, and miscellaneous food grains, as will be seen from the details given in the following table:—

1	22ND TO 30TH NOVEMBER			
	1895.		1896.	
	2	3	4	5
<i>Food grains.</i>	Cwts.	Mds.	Cwts.	Mds.
Rice	11,335	15,128	30,214	41,125
Paddy	3,309	4,504	3,675	5,002
Wheat	2,950	4,015	916	1,247
Gram and pulses	2,941	4,003	6,415	8,731
Other food-grain, such as jowar, barley, oats, &c.	75	102	10,867	14,791
Total ..	20,610	28,052	52,087	70,896

Compared with 1895, the importation of rice showed an advance of 166.55 per cent. The supplies received from Rangoon amounted to 10,912 cwts. against nil in the preceding year, while the quantities shipped from Chandbali showed an increase of 8,349 cwts. The improvement under gram and pulses was chiefly due to larger quantities having been shipped from Madras ports (1,724 cwts) and Bombay (1,642 cwts). As regards miscellaneous food-grains, the United Kingdom is shown to have contributed 6,585 cwts. and Victoria 530 cwts., but in the previous year there were no such imports: Bombay also supplied a large quantity, namely 3,702 cwts against 75 cwts. in 1895.

Exports.—The decline noticed in the preceding weeks continued during the period under report when the aggregate quantity of all sorts of food-grains exported from the metropolis showed a considerable falling off, namely, 112,716 cwts, or 58.66 per cent. The total traffic under each kind of these grains is shown below and compared with the figures for the previous year:—

1	22ND TO 30TH NOVEMBER			
	1895		1896.	
	2	3	4	5
<i>Food grains</i>	Cwts.	Mds.	Cwts.	Mds.
Rice	145,943	1,98,615	60,818	82,780
Paddy	7	9
Wheat	4,592	6,250	162	221
Gram and pulses	31,052	43,626	16,714	22,750
Other food-grains, such as jowar, barley, oats, &c.	9,662	13,015	1,746	2,376
Total ...	192,156	2,61,545	79,440	1,08,127

The foregoing figures show that the bulk of the decrease is accounted for by the heavy decline of 58.31 per cent. in the rice trade. Compared with the preceding year, the falling off was largest in the exports to Ceylon (38,214 cwts.), Mauritius (8,740 cwts) and the United Kingdom (6,433 cwts); Natal and Demerara, which together imported 12,258 cwts during 1895, received nothing during the period under report. On the other hand, 11,053 cwts were shipped for Aden against nil in 1895. As regards Indian ports, the quantity shipped for the Madras ports was merely 502 cwts. against 27,039 cwts., while Bombay showed a decrease of 6,872 cwts. The chief fluctuations in the exportation of gram and pulses are a decrease of 12,155 cwts. in the consignments to Mauritius, of 4,857 cwts in those to the United Kingdom, of 5,641 cwts. in those to Madras, and of 2,340 cwts. in those to Burma, while Bombay received 10,245 cwts. against nil in 1895. The decrease under miscellaneous food-grains was mainly due to the cessation of exports to Mauritius, which received 9,269 cwts. in 1895.

Detailed statements showing the sources of supply and the places of destination, both as regards Foreign and Indian ports, are given below:—

Statement No. I showing the Imports of Food-grains into Calcutta from Foreign and Indian Ports from the 22nd to 30th November, 1895 and 1896 (both days inclusive).

THE MONSOON OF 1896.

The following report is published for general information.

By order of the Lieutenant-Governor of Bengal,

M. FINUCANE,

Secy. to the Govt. of Bengal.

The 15th December 1896.

METEOROLOGICAL SUMMARY FOR THE MONSOON PERIOD OF 1896

The following remarks are intended to form a brief introduction to the rainfall tables and charts, which give full information regarding the rainfall measured during the south-west monsoon months in all parts of the province. Only the more important features of the general atmospheric conditions are discussed, and then only when they show a tendency favourable or unfavourable to rainfall.

The early months of the year were marked by unusually scanty rainfall, and at times by a more intense heat than has been experienced since systematic meteorological observation began, more than a quarter of a century ago. In January fairly normal weather prevailed, and moderate general rain fell towards the end of the month. The average falls for the large divisions were, however, all below the normal, but not by so much as half an inch, as the normal fall in January is light everywhere. During February a tendency to the formation of a low pressure area over Bengal appeared. Becoming established, it remained a prominent feature for at least two months, and it was probably owing to this arrangement that the unusual temperature prevailed in Lower Bengal, Orissa, and Chota Nagpur.

The natural consequence of continued low pressure over Lower Bengal would be westerly land winds, instead of the more moist southerly winds from the Bay. The land winds coming from an area, where temperature was daily increasing, have a much higher temperature and less moisture, and hence we find in February an almost entire absence of rain and a rapid increase of temperature towards the end of the month. The low pressure would have been favourable for the occurrence of rainfall, had the primary cause been present in the occasional arrival from the north-west of India of the shallow depressions characteristic of January and February. As these appear to have failed, the only effect of the low pressure over Bengal was the hot westerly winds which began to appear towards the end of February. On the 27th and 28th of that month maximum temperatures were 10° to 12° above the normal, and readings of more than 100° were recorded in parts of South-West Bengal, Orissa, and Chota Nagpur. Rainfall was practically nil except in East Bengal, which received on an average rather more than one inch.

The continued low pressure during March and the greater part of April affected the occurrence of nor' westers, on which the supply of rain during these months chiefly depends. Local storms being due to some interaction of opposing wind systems, never occur where surface winds are steadily from the west; and that being the case throughout March and April, the absence of rainfall remained a prominent feature. Temperature naturally increased with unusual rapidity, more especially in South-West Bengal and Chota Nagpur. Readings of more than 105° were recorded during March in parts of the western half of the province, and in April, South-West Bengal, Orissa, Chota Nagpur and Bihar all experienced temperature of between 112° and 114° .

These high temperatures simply show that the westerly winds were unusually steady over the western half of the province; but at times easterly winds penetrated into the eastern districts and gave rise to occasional and increasing rainfall. Thus in March, East Bengal received less than half its normal fall, and North Bengal practically nil, while in April, the average fall in the former was more than 4 inches, and in the latter about 2 inches. The heavier rainfall in East and North Bengal shows the change which was gradually being introduced from the east, and it is made more clear by the occurrence of heavy rain in Assam during April, Sibsagar receiving 16, Silchar 15, and Dhubri more than 6 inches. With the rise of pressure which set in towards the end of April, the westerly winds received a check. Easterly winds became more general over the province, temperature fell, and the local storms, which had hitherto been confined to the eastern districts, were fairly numerous over the whole province.

The effect of the change which set in towards the end of April is clearly shown in the distribution of rainfall during May. Sibsagar and Silchar reported several inches less than in April; but in East and North Bengal the average fall had increased to about 12 and 13 inches respectively. The amounts, as compared with the normal, diminished towards the South-West. In South-West Bengal and Bihar the fall was practically normal, while in Chota Nagpur and Orissa there was defect of an inch or more.

The change continued to extend slowly south-westward during June, the largest excess falls during that month being in South-West Bengal, Orissa, and Chota Nagpur. Orissa received 15, South-West Bengal 13, and Chota Nagpur 11 inches on an average. On the other hand, in North Bengal there was a large defect, less than half the normal fall being recorded.

It would appear, therefore, that a continuous series of changes can be traced beginning in the extreme north-east in April, being shown in North and East Bengal by heavy rainfall in May, and in the south-west of the province in June. What the causes may have been it is unnecessary to consider here, but that there were causes, continuous for two or three months, may fairly be inferred from the sequence of events.

The consideration of the rainfall in June brings the discussion to the period subsequent to the commencement of the south-west monsoon, after which the rainfall largely depends on changes occurring in the Bay area. During the early part of June, before the first cyclonic storm of the season, pressure was, relatively to the normal, high over the whole of the province, but more so in the north. Showers were in consequence more frequent in the southern districts. Soon after the middle of the month a cyclonic storm from the extreme south of the Bay advanced almost due northwards till the centre was near Calcutta, and after remaining stationary there for several hours, it moved away to the west. As it led to the establishment of the monsoon current over the Bay, heavy rain followed its advance, but it was confined to the south of the province, the high pressure in North Bengal being sufficient to check its influence extending in that direction. After an interval of only a few days a second depression began to form in the north-east of the Bay, and before changing its position attained to greater depth than is usual during the monsoon season. It moved west-north-west, passing over South-West Bengal and Chota Nagpur. Rainfall did not become general till these depressions had moved westward and the pressure distribution had become normal; but even then the rainfall in the north of the province was less heavy than is usual at the end of June.

During July the distribution and quantity of rainfall was chiefly dependent on two shallow depressions which formed over the land in the early part of the month, and two cyclonic storms which began in the north of the Bay and moved almost due west. The importance of the distinction between depressions over the land, however shallow, and the deeper depressions over the Bay, arises from the fact that the former may cause very heavy rainfall in the north of the province, whereas the rainfall due to the latter is largely confined to the south-west. As there were two of each class of disturbance during July, the rainfall of that month was fairly well distributed except in East Bengal, where there was defect of 5 inches. Orissa, Chota Nagpur, and North Bengal show excess falls, and South West Bengal and Bihar a small to moderate defect.

The most marked feature of the weather in July was the low pressure area which remained stationary over the north of the Bay and Lower Bengal during the last week. The cyclonic storms developed in rapid succession within it, and, moving westward, exercised a marked influence on the rainfall not only in the south-west of the province of Bengal, but in the west of India. It was probably owing to these storms, which originated in the north of the Bay, that the rainfall in Western and Central India was so heavy as to give rise to abnormal floods in Orissa.

During the three months May to July rainfall, though not regularly distributed, was, on an average for the whole province, practically equal to that of an average year. But from the beginning of August a decided weakening in the strength of the monsoon current was shown. From that time till the end of the season not a single cyclonic storm developed over the Bay, and the land depressions were few in number,

During August weather was unusually settled over the Bay, but there were distinct peculiarities in Bengal. The most important of these was the great absence of rainfall in the east of the province. The reasons for the scanty rainfall in the eastern districts appear to be the high pressure over the north-east as compared with the south-west, and the absence of widespread disturbances. Two shallow depressions formed over the Bay—one at the beginning of the month, and the second, further south, about the middle. Both moved westward and gave heavy rain in Orissa. In the third week a shallow depression appeared over the land and caused heavy rain in North Bengal and Bihar between the 20th and 23rd. There was at that time general showery weather in all districts. Orissa was the only Division that received average rain in excess of the normal, the actual fall being 15·31 inches as compared with 11·98 inches. Chota Nagpur had only a small deficiency, but in all the others there was a large defect increasing towards the east. In both North and East Bengal it was between 8 and 9 inches.

The settled weather and absence of rainfall, which had become more noticeable towards the end of August, continued throughout September with one important interruption caused by a shallow depression which formed over the north of the Bay and the Sundarbans. As the depression moved very slowly and followed an irregular path, first to the west into Chota Nagpur, and then to the north-east into North Bengal, the only part of the province which escaped its influence was the extreme west of Bihar. There was general moderate rainfall between the 13th and 20th in the south and centre of the province, and very heavy falls in the north on the 17th and 18th, more especially in North Bengal and the east of Bihar, while the depression was filling up. In consequence of the rain which fell during the existence of the disturbance, all parts of the province received very nearly the amount normal for September, except the western districts of Bihar, such as Champaran and Saran. The average defect for Orissa and South-West Bengal was only one inch, in Bihar two inches, and in Chota Nagpur about three inches; while in East and North Bengal there was excess of between one and two inches. During the rest of September, that is, with the exception of the days between the 13th and 20th, very little rain fell in Bihar and Chota Nagpur, and only scattered showers occurred in other parts, chiefly in North and East Bengal.

The south-west monsoon practically ceased to affect weather in any part of the province after the end of September. A few showers fell in East and North Bengal in the early part of October, and showery weather occurred again in North Bengal towards the end of the month, but the amounts were insignificant. North Bengal received on an average 1·1 inch and East Bengal 49 inch, the normal falls for these divisions being 4·28 and 5·45 inches respectively. Chota Nagpur was entirely rainless, Bihar and South-West Bengal practically so, and the average for Orissa was only a tenth of an inch.

A depression, which began in the extreme south of the Bay about the middle of November, after moving northwards over the Arabian Sea, crossed the north Bombay coast, and recurring ultimately reached Bengal as a very shallow depression about the 23rd. It caused cloudy weather over the whole province, but very little rain except in Chota Nagpur and Bihar, where there were light general falls. The average fall was not quite half an inch in Bihar, and between a half and one inch in Chota Nagpur.

The average fall for the whole province for the monsoon period, May to October, is within a few hundredths of an inch, the same as last year, viz., 51·38 as compared with 51·32 inches. The normal fall for the same period is 58·62 inches, so that for the past two years the monsoon rainfall has on an average been 7 inches in defect.

The distribution during 1896, however, differed somewhat from that of the previous year; South-West Bengal and Chota Nagpur having received 7 and 4 inches more, respectively, and North and East Bengal and Bihar less by from 1 to 5 inches. In Orissa there was very little difference.

The main features of the rainfall distribution during the present year are—

1. The almost entire absence of rain during the early part of the year, that is, till near the end of April.

2. The change which began in April in the extreme north-east and determined more or less heavy rain in Assam in April, in North and East Bengal in May, and in South-West Bengal, Chota Nagpur, and Orissa in June.

3. The numerous cyclonic storms during the latter half of June and July, which, however, caused rain in excess of the normal in the south-western districts only.

4. The almost entire absence of disturbances from the beginning of August till the end of the monsoon season.

Important exceptions, so far as concerned rainfall, occurred in the middle of August and the middle of September. Two shallow depressions caused heavy general rain over the greater part of the province about those dates, but were not accompanied by stormy weather.

5. Rainfall ceased finally in Bihar and Chota Nagpur about the end of the third week in September, and in other parts of the province, except North Bengal, about the beginning of October.

Light showers fell in North Bengal towards the end of October, but were confined largely to the hill tracts and the neighbouring plains.

Actual Rainfall in inches during 1896.

METEOROLOGICAL OFFICE, BENGAL,

The 8th December 1896.

C. LITTLE,

Meteorological Reporter to the Govt. of Bengal.

WEATHER AND CROP REPORT.

For the week ending the 14th December, 1896.

Burdwan.—Rainfall nil. Weather clear. *Aman* harvest in full swing. Prospects of *rabi* crops fair except in Raiganj, where sugarcane and *rabi* crops require rain. Fodder and water sufficient. Condition of cattle good. Common rice selling as follows:—

	Srs	c	Srs	c.	
Sadar	10	0 to 11	0
Kalna	9	8 to 10	0
Kalwa	11	2 to 12	3
Raiganj	10	0

} per rupee

Birbhum.—No rain. Weather cold and clear. *Aman* harvest in progress. Price of rice 9 seers 12 chittaks to 12 seers per rupee.

Baakura.—No rain. Weather seasonably cold. Harvesting of *aman* continues. No improvement in *rabi*. Fodder at present sufficient except in portions of thina (Gangajalghata). Sporadic cases of cow-pox in Gangajalghata and Onda. Rice selling at Bankura 12 seers and Vishnupur 11½ seers per rupee.

Midnapore.—No rain. Weather seasonable. Prospect of *rabi* moderate and of sugarcane and indigo good. Harvesting of winter rice continues. Fodder and water sufficient. Cattle disease reported from Silbont, Garhbeta, Jharguon, Bampur, and Keshpur police-stations. Common rice selling as follows:—

	Srs	
Sadar	...	(Old rice 9)
Contai	...	(New " 10)
Tamuk	...	11 to 16
Ghatal	...	11½ to 12½

} per rupee

Hooghly.—No rain. *Aman* is withering in places. *Rabi* and sugarcane suffering for want of rain. Common rice sells from 8 to 11 seers per rupee.

Howrah.—Rainfall nil. Weather seasonable. Rain wanted for *rabi* crops. Harvesting of *aman* partly progressing. Fodder and water sufficient. Common rice sells from 8 to 10½ seers per rupee.

24-Parganas.—Rainfall nil. Cold weather has set in. Harvesting of *aman* rice continues. It is estimated to yield 10½ annas. *Rabi* crops suffering for want of rain, prospects unfavourable. Fodder and water sufficient. Common rice (now) sells as follows:—

	Srs	
Sadar	...	9 to 12
Basirhat	...	10
Barasat	...	10
Diamond Harbour	...	11

} per rupee

Nadia.—Rainfall nil. Weather seasonable. Harvesting of *aman* in progress, outturn exceedingly poor. *Muy*, *kalai*, and *til* are being harvested in the Moherpur subdivision. Prospects of standing crops, except sugarcane and *arhar*, are bad. Common rice sells from 8 to 11 seers per rupee. Number attending on test works as follows:—

7th December	435
8th "	447
9th "	459
10th "	408
11th "	371
12th "	389

Latest price of rice where test-works are open is 11 seers per rupee.

Murshidabad.—No rain. Weather seasonable. Harvesting of *aman* continues. State of *rabi* crops not good; that of sugarcane, mulberry, and indigo appears to be good. Fodder sufficient. Common rice sells as follows:—

	Srs.	c.	
Sadar	10 0
Jangipur	11 8
Kandi	11 12

} per rupee.

Jessore.—Weather seasonable. The harvesting of *aman* commenced. Rain is badly wanted throughout the district. Prospects of *rabi* crops bad on high lands for want of rain. Fodder and water available. No cattle-disease reported. Common rice sells as follows:—

				Srs.	
Jessore	9 to 10	} per rupee.
Jhenida	8½	
Magura	9 to 10	
Narail	11	
Bongaon	10	

Khulna.—Rainfall nil. Weather fine. *Aman* paddy being harvested; the crop is considerably below the average. No cattle-disease. Fodder and water available. Common rice sells as follows:—

				Srs.	
Khulna	8 to 10	} per rupee.
Bagerhat	10	
Satkhira	8	

Number of men employed on test relief works in Satkhira subdivision.—

4th December	262
5th "	...	"	"	..	227
6th "	"	272
7th "	89
8th "	...	"	82

Wages calculated at a rate of 8 seers per rupee.

Rajshahi.—No rain. Harvesting of winter rice going on. Prospects of standing crops not good. No cattle-disease. Fodder and water available. Common rice selling from 7½ to 11½ seers per rupee.

Dinajpur.—No rain. Weather seasonable. Mustard has been sown to the extent of about 14 annas. Harvesting of winter rice going on. Fodder and water sufficient. Common rice sells from 9 to 10 seers per rupee.

Jalpaiguri.—Rainfall nil. Weather seasonable. *Hamanti* paddy being harvested. *Rabi* crops doing well. No complaint of want of fodder and water. Average prices of common rice 8 seers per rupee.

Darjeeling.—Rainfall nil. Weather seasonable. Hills—*Bira marua*, *kalai*, *bhutmas*, and *aaham dhan* are being harvested; wheat, barley, and mustard coming up; *phaphur* flowering. Terai—Harvesting of *hamanti dhan* commenced; sowing of mustard and *kalai* nearly finished; potato and tobacco doing well. Coarse rice selling as follows:—

				Srs.	
Hills	6 to 8	} per rupee.
Terai	8 to 9	

Bhutla sells at 13 seers per rupee.

Rangpur.—No rain. Harvesting of *aman* in progress. Sugarcane is being cut. Sowing of *rabi* crops complete. Mustard in flower. Prospects fair. Common rice selling at 8 to 10 seers per rupee. Fodder and water sufficient.

Bogra.—Rainfall nil. Weather clear and cold. Oilseeds and pulses doing well. Winter rice being reaped. Ploughing for *aus* and jute going on. Price of common rice at head-quarters 10 seers 14 chitaks, and in the interior 9 to 12 seers per rupee.

Pabna.—Rainfall nil. Weather dry and cool. No change in prospects of crops. Common rice selling at 8 to 9 seers per rupee. Fodder available.

Dacca.—Rainfall nil. Weather seasonable. Harvesting of *aman* paddy nearly completed. Prospects continue unchanged. Fodder available. No cattle-disease. Price of common rice 8 to 10 seers per rupee.

Mymensingh.—Rainfall nil. Weather seasonable. The *aman* harvest is nearly over. *Rabi* crops, particularly mustard, promise well. Common rice sells from 9 to 12 seers per rupee.

Faridpur.—No rain. Weather seasonable. Prospects as before. Common rice selling from 8 to 10 seers per rupee. Fodder and water available.

Backergunge.—No rain. Prospects of standing crops fair. No cattle-disease. Price of common rice (new *aman*) 7½ to 12 seers and (*aus*) 8½ to 13 seers per rupee.

Tippera.—No rain. Weather seasonable. Fodder and water available. No cattle-disease. Price of common rice varies from 8 to 12 seers per rupee.

Noakhali.—No rain. Reaping of *aman* commenced. Prospects not good. No cattle-disease. Fodder and water available. Price of rice ranges from 8 to 11 seers per rupee.

Chittagong.—Rainfall nil. Weather cold and dry. *Aman* crop though reaped but poor. *Rabi* crops suffering for want of rain. Prospects unfavourable. Water and fodder sufficient. Rice sells from 8 to 10 seers per rupee.

Patna.—No rain. Paddy being reaped. *Rabi* and poppy doing well. *Arhar* flowering. Fodder and water for cattle sufficient. Prices slightly risen. Common rice (new) selling in Patna to-day (14th) at 10½ seers and (old) 9½ seers per rupee. Only two test-works are now open. Numbers on test-works on Saturday (12th)—men 40, women 20, and children 32; gratuitous relief nil.

Gaya.—Paddy harvesting and sugarcane pressing continue. Prospects of *rabi* favourable. Price of common rice at Sadar 10 seers per rupee.

Shahabad.—No rain. Rice being harvested. Sowing of *rabi* still continues; early sowings coming on well. Common rice selling at 9½ seers per rupee. Number on relief works on Saturday (12th)—men 340, women 297, and children 112.

Saran.—*Rabi* and poppy doing well where irrigated. Pressing of sugarcane going on. Prices are—common rice 10 seers, wheat 8½ seers, barley 12 seers, *maka* 12 seers, gram 10½ seers, *arhar* 11½ seers, and *masua* 14½ seers per rupee. Relief-works opened in three places in Gopalganj subdivision. Number on relief-works on Saturday (12th)—men 249, women 335, and children 359; gratuitous relief—men 124, women 333, and children 90.

Champaran.—No rain. Winter rice harvest well advanced, outturn 3 to 4 annas. *Rabi* sowings still continue under irrigation; germination fair, but rain urgently needed. Prices generally risen somewhat. Common rice sells at Sadar 9½ seers per rupee, against average 17½ seers. Unground maize sells at 12 seers per rupee. Number on relief-works on 12th—Sadar subdivision—men 1,628, women 803, and children 1,027; Bettiah subdivision—men 1,578, women 894, and children 393,—total 6,323, gratuitously relieved—men 316, women 605, and children 208,—total 1,129.

Muzaffarpur.—Harvesting of winter rice nearly over. *Rabi* prospects so far fair. Principal food-grains selling as under—common rice 8 seers, wheat 8 seers, *maka* 12 seers, barley 12 seers, *arhar* 12 seers. *Maka* and *arhar* fix the relief prices.

Darbhanga.—Harvesting of paddy in progress. *Rabi* badly in need of rain. *Rahan* alone is good in Madhubani subdivision. Common rice selling at 10 seers per rupee. In Madhubani subdivision the number on relief-works on Saturday (12th)—men 505, women 332, and children 307; gratuitous relief—men 137, women 113, and children 56.

Monghyr.—No rain. Weather seasonable. Harvesting of paddy going on. *Rabi* sowings still continue. Some of the *rabi* land left fallow. *Rahan* and *jowar* being harvested. Chillies, tobacco, and poppy promising well. Cattle-disease reported from Bogusara. Ample fodder and water. Prices of common rice—

				Srs	
Monghyr	8 to 10	} per rupee.
Begusarai	9	
Jamun	10 to 11½	

Bhagalpur.—Weather cold with westerly winds. Paddy, *kurthi*, and *kala* are being harvested. Prospects of *rabi* crops not hopeful. Wheat is being damaged by insects. Fodder and water sufficient. Common rice sells as follows:—

				Srs. c	
Sadar	10 1	} per rupee.
Banka	12 8	
Madhipura	10 0	
Supaul	11 0	

Purnea.—No rain. Harvesting of *aghani* rice in progress. Sowing of *rabi*, tobacco, and mustard continues. Cattle-disease decreasing. Fodder and water sufficient. Common rice sells as follows:—

				Srs	
Sadar	{ New rice ...	12	} per rupee.
Araria	{ Old „ ...	9 to 11	
Kishanganj	11	
	10	

Malda.—No rain. Weather seasonable. Harvesting of winter rice continues. Sowing of *rabi* crops almost complete. Common rice selling at 9 seers a rupee. No want of fodder or water at present. Partial failure in cocoon rearing business is reported from Kalachak thana.

Sonthal Parganas.—No rain. Weather cooler. Harvesting of winter rice still continues. Prospects of *rabi* crops unchanged. Prices about the same. Cattle-disease has appeared in Pakour and Deoghur subdivisions. Price of coarse rice 9 to 12½ seers, and maize 12 to 14 seers per rupee.

Cuttack.—Rainfall nil. Weather seasonable. *Lagu sarad* being harvested. *Guru sarad* ripening and being reaped in some places. *Daua* being sown. Condition of cattle generally good. Fodder sufficient. Common rice sells as follows:—

			Srs. o.	
Cuttack	New rice, 13 2	} per rupee.
Jajpur	Old „ 11 13	
Kendrapara 14 7	
Banki 14 7	
			.. 16 13	

Balasore.—Weather seasonable. No special change in prospect or condition of crops. Harvesting of winter rice going on. *Rabi* crops suffering for want of rain. *Daua* being sown. Sugarcane doing well; pressing commenced. Coarse rice sells at 12½ and 14 seers per rupee at Sadar and Bhadrak respectively. In the mulasal prices vary from 12 to 18 seers per rupee. Fodder and water sufficient.

Angul.—No rain. All rice crops, also *biri*, *kass*, and *arhar* have been gathered. *Kulthi* and *mug* doing well. Rice sells at 16 seers in Angul and 19 seers in Khondmals.

Puri.—No rain. Condition and prospects of rice crops much as before. *Rabi* sowing greatly retarded for want of rain. Fodder sufficient. Price of rice almost stationary, in Malud it has fallen from 9 seers 5 chitaks to 11 seers 13 chitaks for the rupee.

Hazaribagh.—Rain wanted for *rabi* and poppy crops; prospects of latter 8 annas. Harvesting of winter rice going on. Rice sells from 6 to 9 seers per rupee.

Lohardaga.—Reaping of *don dhan* finished. Rice sells at head-quarters 10 to 11 seers, and in the interior 11 to 12 seers per rupee. Fodder and water sufficient. No report of cattle-disease.

Palamau.—Rainfall nil. Weather seasonable. Barley is still being sown in a few parts. Rice selling at 8 to 10 seers per rupee.

Manbhum.—Rainfall nil. Weather seasonable. Winter rice almost all cut; there remains a little on lowest lands. The crop on the ground is *rabi*, which does not promise well where it exists. Cattle-disease still reported from thana Raghunathpur. Fodder and drinking-water sufficient for the present. Average price of common rice (old) 8 seers and (new) 10 to 11 seers at Sadar, and 10½ seers at Gobindpur. Existing stock of food-grains sufficient for the present.

Singhbhum.—No rain. No change in prospects or prices.

General Summary.—There was no rain during the week, and little change in the agricultural prospects of the Province. The harvesting of winter rice is in progress in all districts. The prospects of the *rabi* and poppy crops in Patna, Gaya, Shahabad, and Saran continue favourable, but elsewhere in Bihar these crops, though so far fair, are urgently in need of rain. In North Bengal and in Mymensing the *rabi* crops are doing well. In almost all other parts of the Province they are reported to be poor. In Orissa sowings of *datur* or spring rice have begun. Sugarcane is doing well, and pressing has commenced in some districts. Cattle-disease is reported from a few districts only. The price of common rice is reported to have fallen in a few stations in the Burdwan and Presidency Divisions. In Patna, Gaya, Saran and Champaran it is said to have slightly risen. Prices of common rice in the distressed districts:—Nudia 11 seers, Khulna 8 seers, Patna 10½ seers, Shahabad 9½ seers, Saran 10 seers, Champaran 9½ seers, Darbhanga 10 seers, in Muzaffarpur *mahar* sells at 12 seers. The numbers on relief-works and in receipt of gratuitous relief on Saturday, the 12th December, were—

Relief works—

Nadia	389
Khulna	82 (for 8th December)
Patna	92 (men 40, women 20, and children 32).
Shahabad	749 (men 340, women 297, and children 112)
Saran	943 (men 249, women 335, and children 359)
Champaran	6,323 (men 3,206, women 1,697, and children 1,420).
Darbhanga	1,144 (men 605, women 332, and children 207)

Gratuitous relief—

Saran	547 (men 124, women 333, and children 90).
Champaran	1,129 (men 316, women 605, and children 208)
Darbhanga	306 (men 137, women 113, and children 56).

By order of the Lieutenant-Governor of Bengal,

REVENUE DEPARTMENT,

The 15th December, 1896.

M. FINUCANE,

Secy. to the Govt. of Bengal.

Metecrological Report of the Province of

**SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS
TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS
TAKEN IN ASSAM, FOR THE MONTH OF NOVEMBER 1896.**

WEATHER during November, both in Bengal and the north of the Bay, was, as in previous months, marked by the almost entire absence of disturbances. Except on the 21st and 22nd, when light rain fell in the west and north of the province, fine cloudless weather prevailed with a rather abnormal temperature arrangement. The days were several degrees warmer than usual in the south-western districts and the excess diminished steadily towards the north-east, being zero in part of North Bengal on an average for the whole month. The nights also were warmer in the west, but there was generally a moderate defect in East and North Bengal.

The north-east monsoon was not established on the Madras coast till near the middle of the month. The delay was due to the high pressure which was a prominent feature of atmospheric conditions during October, and which remained unchanged during the early part of November. The apparent cause of the change was a low pressure area which began in the south of the Bay about the 9th. It crossed Ceylon on the 13th, and the extreme south of the Peninsula on the 14th, after which it moved northwards up the Arabian sea. Weather was not seriously disturbed in the south-west of the Bay during the passage of the shallow depression, but it was followed by a rather prolonged period of heavy rain on the Madras coast and in Ceylon.

At the beginning of November pressure was above the normal over the whole area, by small amounts in Bengal, but by between 1 and 15 inch on the west coast of the Bay from Gopalpur southwards. Westerly winds, with very little cloud, prevailed inland, and the average daily temperature was above the normal by amounts varying from 5° in the west of Bihar to 2° in East Bengal and Assam. During the first half of the month no change of any importance occurred. Pressure underwent the usual small oscillations; the winds became at times more northerly, and temperature fell slightly, especially in the north and east where there was usually a small defect.

The relatively high pressure gave way somewhat on the occurrence of the disturbance in the south of the Bay, and from the 11th to the 13th there was a small to moderate defect, greatest on the 12th, when it was nearly a tenth of an inch. Moderate oscillations about the normal followed and continued for several days throughout which fine settled weather prevailed with winds between northerly and westerly and temperature above the normal except in the eastern districts where there was still a small defect. Changes such as those stated above, all characteristic of fine settled weather, continued till the 20th, when the first signs of unsettled weather began.

The disturbance which began in the south of the Bay on the 9th, and crossed the extreme south of the Peninsula on the 14th, appears to have followed a curved path up the Arabian sea, and crossed the Bombay coast on the 20th or 21st. The depression then turned eastward, and drifted slowly, becoming daily more diffused, till it filled up some days later in Bengal. Pressure began to fall in Bengal on the 20th and continued to fall slowly till the 22nd, when the change was rapid in Orissa Nagpur and part of Bihar. Dense cloud soon gathered over the whole province and light showers fell in the western districts. On the 23rd, when defect was greatest, it was 17 inch in the west of Bihar and more than 1 inch over almost the whole province. The low pressure area remained over Bengal on the 23rd with easterly or south-easterly winds, heavily clouded skies, and light scattered rainfall. On the 24th there was a brisk to rapid rise of pressure, the depression had largely filled up, but there were still a few light showers. By the 25th the depression had disappeared and weather was again fine and settled.

*During these days a second depression had formed in the south-west of the Bay. Though very shallow, the indraught towards it on the Madras coast led to a stoppage in the rainfall for nearly a week at stations in that part of India. The depression moved slowly westward, the centre crossed the coast on the 27th near Cuddalore, and another burst of monsoon winds followed. This depression had no effect on conditions in the north of the Bay or in Bengal, and though pressure was at times low, fine settled weather continued without interruption till the end of the month.

Pressure in Bengal has been above or below the normal by small to moderate amounts, and the oscillations usual in settled weather have prevailed throughout the month, except on the 23rd and 24th, when there was a rather rapid fall followed by a similar rise. Mean pressure for the whole month is, in consequence, normal, the difference varying from excess of 0.1 inch in the east to defect of 0.3 inch in the north-west.

Temperature.—Day readings have been above the normal throughout the month over almost the whole province, but especially in the western districts, where excess was at times upwards of 10°. Mean difference in maximum temperature varies from excess of 5° at Balasore and Midnapore to defect of 1° in the north of Assam and the adjacent part of North Bengal.

On an average the nights were warmer than usual by 2° in Orissa, Orissa Nagpur and Bihar, and about 1° cooler in the greater part of Bengal. The means for the larger divisions are normal in East and North Bengal, 2° above in South-West Bengal and Bihar, and more than 3° above in Orissa and Orissa Nagpur.

Rainfall.—No rain fell except on the 23rd and 24th when the shallow depression from the west caused cloudy showery weather over the western and central districts. Falls were almost without exception light, the average for Chota Nagpur being .45 inch, Bihar 32 inch and North Bengal .15 inch. In Lower Bengal and Orissa the average varies from .03 to .07 inch, rainfall in these divisions being very light and scattered.

As rainfall is very light in November under ordinary conditions, the falls for Bihar and Chota Nagpur are slightly above the normal, whereas in Lower Bengal and Orissa a large defect is shown varying from 76 inch in South-West Bengal to 2.02 inches in Orissa. As the falls reported from the various stations were irregular in amount, it is unnecessary to remark on them. They are given in a preceding table under the dates 23rd and 24th.

The following table gives in a condensed form the rainfall information for each of the six large meteorological divisions of Bengal for the present year up to the close of November. The numbers there given, as in the case of the former months of the year, are the actual average rainfalls in each division, expressed as a percentage of the normal fall for the period, and the last column also gives the total rainfall up to the close of November, expressed in the same way :—

METEOROLOGICAL DIVISIONS.	January.	February.	March.	April.	May.	June.	July.	August.	September.	October.	November.	Actual rainfall of first eleven months of 1896 expressed as a percentage of the normal fall for the period
South-West Bengal .	81	18	18	36	97	128	95	71	86	1	4	81
North Bengal .	8	5	2	68	142	49	106	99	100	26	50	78
East Bengal .	48	110	43	94	116	99	73	46	118	9	4	79
Bihar .	10	5	0	26	102	84	85	75	75	2	100	76
Orissa .	3	0	50	31	78	162	131	128	88	2	3	100
Chota Nagpur .	6	9	0	0	49	139	112	89	66	0	102	88

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the month of November 1896 :—

METEOROLOGICAL DIVISIONS	TEMPERATURE							RAINFALL						
	Highest observed during month	Lowest observed during month	Averages for month			Average mean of month above or below normal mean of month	Of month			Rainy days			Since 16th October 1896

The mean pressure of the seven days	Inches
The average pressure of the corresponding period for 24 years, Surveyor-General's Office	30.072
The total number of hours of bright sunshine	Hours, 56.2
The maximum possible number of hours of sunshine	75.3
The mean temperature of the seven days	67.5
The average temperature of the corresponding period for 24 years, Surveyor-General's Office	68.6
The extreme variation of temperature	25.1
The maximum temperature	81.1
The highest velocity of the wind in one hour	Miles, 8
The mean relative humidity	% 69
The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office	71
The total fall of rain from 6th to 12th December 1896	Inches, Nil
The average fall of the corresponding period for 24 years, Surveyor-General's Office	0.03
The total fall from 1st January to 12th December 1896	53.22
The average fall of the corresponding period for 24 years, Surveyor-General's Office	65.22

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h., 10h., 16h. and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed, open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official Tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

△ dew.

RESOLUTION ON THE ANNUAL GENERAL ADMINISTRATION REPORT
OF THE PATNA DIVISION FOR THE YEAR 1895-96.

GENERAL DEPARTMENT—MISCELLANEOUS.

Calcutta, the 15th December 1896.

RESOLUTION—No 4118

. READ—

The Annual General Administration Report of the Patna Division for 1895-96

The Commissioner's report was received on the 14th July, 13 days after it was due to Government.

Mr. A. Forbes, C.S.I., held charge of the Division throughout the year, except from the 23rd September to the 21st October, when he was on leave and Mr. H. C. Williams officiated for him, and from the 26th March to the end of the year, when Mr. Bourdillon, by whom the report is submitted, was in charge.

2. *Tours and Inspections.*—The Commissioner was 127 days on tour, or seven days more than the prescribed period. Of the District Officers, the Collector of Shahabad (Mr. Marindin) was, owing to illness and his transfer to act as Commissioner, unable to be on tour for the prescribed number of days. The tours of the Collectors of Champaran and Muzaffarpur also fell short owing, in the case of the former (Mr. D. Macpherson), to an accident which for some time incapacitated him for travelling, and in that of the latter (Mr. Haro), to his transfer to act as Commissioner of Dacca. All Subdivisional Officers, except the Subdivisional Officer of Bettiah, spent the prescribed number of days or more in camp. The frequent changes of officers in the Bettiah subdivision accounts to some extent, but is not a sufficient explanation, for the shortness of the tours in that subdivision.

3. *Weather and Crops.*—The rainfall was plentiful during the early months of the monsoon, but almost ceased after September, with the result that there was a good *bhadoi* harvest, an indifferent rice crop, and a poor *rabi*. The shortness of the rice and *rabi* crops is the more to be deplored in view of the facts that the rainfall is again so very seriously short in the current year, and that the cultivators will therefore have smaller stocks to fall back upon from the surplus of the year under review than they otherwise would have possessed. The facilities of canal irrigation were largely utilised where available. The poppy crop was below average everywhere, save in Gaya and Shahabad. The outturn of indigo was fair and prices high.

4. *Public Health.*—The year was one of the most healthy on record, owing, the Commissioner says, to the abundance and cheapness of food during the early part of the year, the plentiful supply of good drinking-water, the comparative absence of epidemics, and fine clear weather in November and December. The vital statistics are of little absolute value; but assuming that they are prepared with equal care or want of care in successive years, they show to some extent how far one year's health is better or worse than another's. So far as they go, they indicate that the death-rate was less, and that the birth-rate was greater than in the previous year.

5. *Material Condition of the People.*—The Commissioner remarks that the people were a little less prosperous than in the previous year, but still far removed from scarcity or want. The Lieutenant-Governor would be glad to think that Mr. Bourdillon's opinion on this point is not too sanguine, especially in view of the fact that the hopes which he entertained, when the report was written, of the coming harvests being sufficient to put the people of Bihar in good case, have, unfortunately, been altogether falsified since that time by shortness of rain and failure of crops.

6. *Emigration and Immigration.*—There was a decrease in the number of registered emigrants to the Colonies and tea districts, the numbers being 1,961 to the Colonies and 865 to the tea districts in 1895-96, against 3,579 and 1,229 respectively in the previous year. The Commissioner says that as a guide to the real emigration, these figures are worthless, as they take no note of the free emigration which prevails largely, or of the temporary emigration which takes place from and to the North Gangetic districts year by year.

In this he is no doubt correct, but the registered emigration to the Colonies and Assam, though the numbers are insignificant compared with the population, is still important, for though the numbers of emigrants may now be small, it is desirable that no opportunity should be lost to foster emigration from a Division where, as the Commissioner rightly remarks, the population is too dense and the struggle for existence too keen. If only a few emigrants go now to the Colonies, Assam, or Burma, and settle down and prosper in these countries, they may encourage others to go later, and so open streams of emigration from these congested districts. No sufficient explanation of the diminution in the numbers of emigrants has been given; that offered by the Magistrate of Shahabad, namely, that the demand for coolies in the tea-gardens and the Colonies fell off, is not quite correct, for the emigration statistics furnished by the Protector of Emigrants and Superintendent of Emigration show that though the indents for coolies for the Colonies decreased, the demand for coolies and the total number of emigrants who passed through Calcutta and Dhubri for Assam largely increased during the year under report. The Commissioner's attention is invited to the questions of why it is that the number of registered emigrants from Bihar is decreasing, and why it is that the great majority of emigrants, who pass through Calcutta for the tea districts and the Colonies, are natives of the North-Western Provinces and of the Central Provinces, where the population is neither so dense nor so poor as in Bihar.

7. *Prices of Food and Labour.*—The prices of unskilled labour remained the same as in the preceding year, and continues to be exceedingly low. The opening up of railway communications which has, as the Commissioner remarks, the effect of levelling up and consequently increasing the price of food-grains, in places previously not opened up by railway communications, appears to have little or no effect in inducing the labouring classes to move away from Bihar, or in increasing the rates of ordinary agricultural labour. The wage is now, as it was 20 years ago, a miserable pittance, of about $1\frac{1}{2}$ to $2\frac{1}{2}$ annas per day, while the price of food-grain, &c., has largely increased in the same period.

8. *Trade and Statistics.*—The report is encumbered with 12 pages of statistics and comments on the statistics of trade, much of which would more fittingly find a place in the appendices.

The general result of them is that the total imports and exports from and to the Division compare as follows:—

Imports		Exports.	
1894-95.	1895-96.	1894-95.	1895-96.
1	2	3	4
Mds. 1,22,50,106	Mds. 81,21,000	Mds. 83,25,021	Mds. 27,83,000

9. *Civil Justice.*—There was a general falling off in the number of civil suits disposed of. The number of rent suits disposed of in the whole Division was 213 by District and Subordinate Judges, and 22,705 by Munsifs, against 284 and 21,079, respectively, in the previous year. The number of such suits instituted is very small, compared with the enormous number of raiyats in the Division. If the smallness of the number of rent suits could be taken as evidence that the relations of landlord and tenant are satisfactory, and that rents are punctually paid, their fewness would be a matter for congratulation; but in view of the fact that the zamindars have often complained of not being able to realise their rents with facility, the paucity of rent suits cannot, the Lieutenant-Governor fears, be accepted in Bihar as a healthy symptom, and it only indicates what on other grounds there is reason to apprehend, namely, that extra-legal practices are sometimes had recourse to. If

this be so, Sir Alexander Mackenzie hopes that the local officers will use their best efforts to check any abuses that may prevail.

10. *Crime*.—There was a decrease in cognizable and an increase in non-cognizable offences, and a net increase of 1,976 cases in the aggregate of the two classes together. As the subjects of crime, police and chaukidars have been separately reviewed in the Judicial Department, they need not be commented on here.

11. *Criminal Justice*.—The average number of cases disposed of by each officer was somewhat higher, and the ratio per cent. of witnesses detained for more than two days about the same as in the previous year. The divisional ratio of witnesses detained for more than two days (4·4) is high, compared with some of the other Divisions—Orissa, for example, where it is only 2·5.

The percentage of witnesses detained for more than two days is particularly high in Patna City (16·07), Patna Sadar subdivision (11·14), and Birh (12·72). No explanation has been furnished. Explanations should be called for from the officers concerned, and submitted to Government. The percentage of convictions on the number of cases committed to the Sessions was high in Champaran, Gaya, and Saran, and low in Darbhanga, Muzaffarpur, and Shahabad. It is scarcely necessary to point out that when it is said by Government, or its officers, that the percentage of convictions is unsatisfactory, it is not because they have any desire to obtain convictions of persons against whom there is not sufficient proof of guilt, but because it is desirable that such persons should not be committed for trial at all, unless the evidence is such as to afford reasonable grounds for a conviction. The superior courts are better judges of what is sufficient proof than the committing officers; and when an officer frequently commits cases for trial which result in acquittals, he must ordinarily be wanting in care, or knowledge of the law, or sound judgment.

12. *Land Revenue*.—The current demand on account of land revenue was Rs. 82,33,667, against Rs. 82,22,868 in 1894-95. The total current and arrear demand was Rs. 85,13,036, and of this amount Rs. 81,98,610 were collected, or 96·3 per cent.

In the permanently-settled estates the percentage of current land revenue collections on current demand attained the standard of 99 per cent. in all the districts, except Saran (98·32), Muzaffarpur (97·63), and Shahabad (96·09). The low percentage attained in Shahabad is no doubt due to the excessive leniency with which the sale law has been exercised in that district—a matter on which the Lieutenant-Governor has already drawn attention in paragraph 12 of the Resolution on the Land Revenue Administration.

In temporarily-settled estates and estates the property of Government, the prescribed standards were nowhere reached (except in the case of khas mahals in Darbhanga), as the following statement shows—

Standard	Temporarily-settled	Khas mahals.
				estates.	
			95 per cent.		90 per cent
Percentage of current collections on current demand in—					
Patna	75·78	71·32
Gaya	91·28	67·67
Shahabad	87·84	79·89
Saran	84·07	84·44
Champaran	85·86
Muzaffarpur	69·44	85·33
Darbhanga	94·93	97·79

The reasons why collections were so short in the temporarily-settled estates of Muzaffarpur and in the khas mahals of Gaya are not explained.

The balances remaining at the end of 1895-96 were Rs. 3,00,551, against a balance of Rs. 5,71,318 at the end of 1894-95. This large apparent reduction is mainly due to the discovery of extensive frauds in the tauzi accounts of Patna and Shahabad, which are now being investigated. It is unsatisfactory to find that the balance in estates under direct management rose from Rs. 84,717 to Rs. 1,01,128; no explanation of this very large increase has been offered.

The total current and arrear demand of Road and Public Works Cesses was Rs. 31,82,689, of which Rs. 24,21,299 were collected, or 76·1 per cent. The standard of 90 per cent. was not attained in any district.

Much attention was given to land registration during the year, and 25,669 cases of this kind were disposed of, being 3,049 more than in the previous year. Advances of Rs. 50,000 were made in Gaya under the Land Improvement Loans Act; advances for wells and irrigation channels and embankments have been found to be most useful in this district.

13. *Wards' and Attached Estates.*—There were 19 of these estates in the Division at the beginning of the year. Three estates were released, and five new estates came under management during the year. The entire debt due to Government by the Deo Estate in Gaya was paid during the year; the balance of the debts of the estate has been since wiped off, and the estate itself has been released from charge. The current rent and cess demand of estates under the Court of Wards was Rs. 13,81,170, and the arrear demand was Rs. 14,62,583, or Rs. 81,413 more than the current demand. The Lieutenant-Governor has already pointed out in the Resolution on the Administration of Wards' Estates and in previous Resolutions on Divisional Reports, how desirable it is that these large outstanding balances should be reduced by collection or remission. The most important estate in the Division under the Court of Wards is that of Tikari with a rent-roll of Rs. 7,15,806; Narhan comes next with a rent-roll of Rs. 1,96,400. The arrear demand of the Paigambarpur Estate, in Darbhanga, amounts to nearly 4½ times the current demand; that of Shewhar, in Muzaffarpur, is more than twice, and that of the small estate of Bhagwat Narain Singh in Patna is more than twelve times, the current demand.

14. *Excise: Stamps: Income-Tax.*—The total excise revenue of the Division amounted to Rs. 27,38,244, against Rs. 26,14,063 in 1894-95, and the incidence per head of population rose from 2 annas 8 pies to 2 annas 9 pies per head. Country spirit contributed an increase of Rs. 58,273, and *ganja* and *bhang* an increase of Rs. 18,161; all the other important heads of excise revenue also showed increase. There was an increase of Rs. 6,498 in the opium revenue of the district of Patna, which is ascribed to greater competition among bidders and to better supervision over illicit dealings. A further enquiry is being made into the causes of this increase. Stamps yielded a revenue of Rs. 21,37,468, being Rs. 68,780 more than in the preceding year. This increase is mainly due to increased sales of court-fee stamps. There were 15,820 persons assessed to an income-tax of Rs. 4,40,201. In the Patna district the whole demand was collected, and collections were good in Gaya, Saran, and Champaran; but in Darbhanga they amounted to only 93·1 per cent. of the demand. The aggregate collections of the Division were 98·1 per cent. of the demand.

15. *Monetary arrangements.*—The question of enforcing the Metal Tokens Act strictly so as to prevent the use of the copper dumps known as Lohia or Gorakhpuri pice in this Division, is under the consideration of Government in the Financial Department.

16. *Railways and other Public Works.*—Arrangements were made during the year for commencing the construction of four lines of railway which are to run through the Division, namely, the Moghalsarai-Gaya and Gaya-Lakhiserai (or South Bihar) lines in connection with the East Indian Railway system, and the Hajipur-Begumserai-Katihar and Segowli-Ruxaul lines in connection with the Bengal and North-Western Railway system. The works which will be commenced upon these lines will be of the very greatest value in the present season of distress.

The Commissioner has given a detailed account of the expenditure on communications in each district; altogether Rs. 4,48,261 were spent on original works, and Rs. 4,00,693 on repairs. This Division has undoubtedly the most complete system of roads in the Province.

17. *Working of the Lodging-house Act.*—The Lodging-house Act is in force only in the town of Gaya. The receipts of the fund (including the opening balance) amounted to Rs. 16,690, of which only Rs. 8,026 were spent; but the Committee have arranged to spend part of this balance during the current year, mostly on sanitary improvements.

18. *Education*.—The total number of schools under the control of the Education Department rose by 31 to 6,591, and that of pupils by 6,358 to 176,197. The increase was mainly in primary schools, which numbered 6,429 with 158,997 pupils. There were also 2,421 indigenous pathshalas and *makhtas* with 34,974 pupils, which do not conform to the rules of the Department. The ratio of boys attending schools to the whole number of boys of a school-going age rose from 14·7 to 15·3 per cent.; but there must still be very great improvement in this respect before Patna reaches the level of other Divisions. It is a deplorable thing that only one boy out of every six of a school-going age is receiving instruction of any kind in this Division. The proportion of Muhammadan pupils at school to the total number of pupils is greater than the proportion of Muhammadans to the total population in all the districts, except in Saran, where it is only slightly less.

The amalgamation of the Bihar Industrial School with the Survey School at Patna has been carried out in the current year. The total expenditure on education from all sources was Rs. 7,04,992, against a sum of Rs. 6,90,875 in the previous year. The District Boards and Municipalities contributed generally a fair proportion of their income to the expenses of primary education.

19. *Dispensaries and Hospitals*.—There are 48 of these institutions in the Division, four having been opened during the year under report. A zanzibar hospital at Gaya was opened by Her Excellency the Countess of Elgin, and named after Her Excellency. In all 640,758 in and out-patients obtained treatment in the dispensaries and hospitals of the Division; the number of out-patients treated was 3·9 per cent. of the total population. The income of these institutions was Rs. 1,94,230; the contributions of the District Boards in Shahabad, Saran and Champaran show a satisfactory increase, and private subscriptions likewise increased generally, except in Saran and Muzaffarpur. The Gaya Pilgrim Hospital and the Chapra, Bankipore and Darbhanga dispensaries (in that order) treated the largest average daily numbers of out-patients. The Commissioner points out the inadequacy of the medical relief provided in Muzaffarpur, where there is now only one dispensary to every 429 square miles of country.

20. *Libraries and Museums*.—The Oriental Library at Bankipore is famous for its ancient manuscripts; and the Halliday Library, Gaya, is said to be a useful institution. Mr. Bourdillon comments on the fact that a Province so full of historical associations as is Bihar contains no archaeological museum.

21. *Local Self-Government Institutions*.—There are 25 municipalities in the Division, with an aggregate income of Rs. 6,33,214; Rs. 6,20,274 were spent during the year. The Patna Municipality had an income of Rs. 1,78,262, Muzaffarpur of Rs. 82,029, and Gaya of Rs. 76,848. The Arrah and Chapra Municipalities had incomes of between Rs. 40,000 and Rs. 50,000; the receipts at Darbhanga fell by Rs. 13,730 to Rs. 28,045; and Bihar, Sasaram, Bettiah, Madhubani, Dinapore, Motihari, and Hajipur had incomes of between Rs. 12,000 and Rs. 20,000. The others had less than Rs. 10,000 each. Four out of the seven municipalities at the head-quarters of districts are in an unsatisfactory condition. The financial position of the Patna Municipality is precarious; efforts are being made by the executive to secure better collections and efficient management generally. The Commissioners have now before them the important question whether it is possible or desirable to construct a complete system of water-works, or whether they should confine their efforts to the installation of a system for flushing the drains. Mr. Bourdillon recognizes that the Commissioners have taken pains with their budget for the coming year, and have a genuine desire to improve their administration. The municipalities of Arrah and Chapra are also in financial embarrassment which in the former case is due to the cost of construction and maintenance of the new water-works, and in the latter to inadequate assessment. In Darbhanga (which is also under-assessed) serious faults in the conservancy system were revealed by the Sanitary Commissioner's inspection.

There are 7 District and 20 Local Boards in the Division; the Sadar Local Board of Muzaffarpur has been abolished since the close of the year. The Commissioner thinks that the maintenance of such a Board in addition to the District Board at each head-quarters station is superfluous, and this has certainly been the case in Muzaffarpur. Among the District Boards, that of Darbhanga had the highest

percentage of attendance (52.0), and the Local Board of Gopalganj had the highest percentage (66.07) among Local Boards. Both classes of Boards have generally done good work; but there is room for considerable improvement in the attendance of members. Particulars of the aggregate income and expenditure of District Boards are not given in the report; their expenditure on communications, education, and medical relief has already been touched upon in previous paragraphs of this Resolution.

22. *Employment of Muhammadans.*—Muhammadans hold 31.3 per cent. of appointments of all classes in the Division, including 24.8 per cent. of the gazetted appointments and 20.2 per cent. of the ministerial posts. The proportion of Muhammadans to the total population is not more than 11 per cent.

23. *Fairs.*—Important fairs are held at Sonapur in Saran, Barahpur in Shahabad, and Sitamarhi and Muzaffarpur. The attendance at these fairs was large, and the conservancy and police arrangements were successful. The fairs at Sonapur are largely, and those at Barahpur and Sitamarhi are primarily, cattle fairs; at each of them prizes were given for exhibits of cattle. The competition at Sitamarhi was especially popular.

24. *Social and Political Institutions.*—The most important are the Bihar Indigo Planters' and the Bihar Landholders' Associations. The former has continued to render effective assistance to Government, and the latter had, it is reported, but little occasion to show activity during the year. At Arrah, the Garakshini Sabha and the Society for the Prevention of Cruelty to Animals have joined hands; and at Gaya two Muhammadan Associations appear to flourish.

25. *State of Public Feeling.*—In submitting the Report for 1894-95, Mr. Forbes gave an account of certain disturbances between Hindus and Muhammadans, which had occurred on the boundaries of the Muzaffarpur and Champaran districts at the end of that year and in the early part of 1895-96. Mr. Forbes held at the time that the disturbances were merely local and were due to a local cause, and were not fomented by any outside agency. He expressed the hope that they would extend no further; that hope has been amply justified, and the measures then adopted to prevent the spread of violence were entirely successful.

The survey and settlement operations are, it is reported, becoming more popular among zamindars and planters, as well as raiyats.

26. *Conduct of Zamindars.*—The Lieutenant-Governor notices with regret that there were several deaths among the leading proprietors of the Division during the year. Mr. Bourdillon reports that among the following most respected zamindars, Mr. L. H. Mylne of Behga, the elder Maharani of Bettiah, Rani Ratun Kaur of Tikari, and Raja Doo Nandan Singh of Shewhar—all died during the year; and since the close of the year the Division lost one of the best of its great land-owners—Maharaja Sir Krishna Pratap Sahi, Bahadur, K.C.I.E., of Hatwa. Of the five great houses of Bihar, Darbhanga is, therefore, the only one that is now ruled by an adult male. The conduct of zamindars was generally good, with certain exceptions, which are specified in the report.

27. Mr. Bourdillon has given a summary at the end of his report of the events of the year and of the subjects which must occupy the attention of District Officers in the future. The prospect of scarcity, the most pressing and important of them all, was not before him when he wrote.

28. The Lieutenant-Governor desires to thank Mr. Forbes for his uniformly careful and successful administration of this very important Division from which he has been recently transferred, on his return from furlough, in accordance with a wish expressed by himself. His Honour's thanks are also tendered to Mr. Bourdillon for his clear and interesting report. He need not, however, enter so fully into details in future years.

By order of the Lieutenant-Governor of Bengal,

M. FINUCANE,

Secy. to the Govt. of Bengal.

*Extracts from the Annual General Administration Report of the Patna Division
for the year 1895-96.*

III.—WEATHER AND CROPS

23. I reproduce, for the better elucidation of this chapter of the report, the useful table prepared by Mr. Forbes and inserted for the first time in his report for 1894-95:—

Rainfall, 1895-96

MONTH.	PATNA.		GAYA		SHAHABAD		SARAN		CHAMPARAN		MUZAFFARPUR		DARBHANGA		AVERAGE FOR PATNA DIVISION.

24. The characteristics of the year were good rainfall during the early months of the monsoon and then an almost total absence of rain after September. The result is a total which was a little below the mean almost everywhere, except in Champaran, and a good deal below the heavy rainfall of 1894-95. In all the south Gangetic districts and in Darbhanga there was a deficiency represented by the figures in the margin, while in Champaran (+8.78) and Muzaffarjūr (2.53) there was an excess, and in Saran the figures were practically the same. Fortunately, Gaya, which shows the largest deficiency, is at the same time the district where such a deficiency is least important, owing to its elaborate system for the storage and distribution of every drop of available water.

25. A glance at the statement above will show further how marked the deficiency was after September. Up to the end of August the rainfall all over the division was 2.16 inches above the average, but during the remaining seven months of the year the position was reversed, and there was a general deficiency of 4.07 inches. In October, against a normal of 3.35, the recorded rainfall was less than half an inch. When it is remembered that the success of the winter rice crop and the *rabi* depends greatly on sufficient rain in one or more of the asterisms of Hathiyā, Chitā and Siwātī, which fall in the end of September and the month of October, it will be understood how significant this failure of the rains was. Moreover, the almost entire absence of rain in the cold weather aggravated the inconvenience. During the months of December, January and February, it is usual for this Division to receive on the average an inch and a quarter of rain which refreshes the *rabi* and the poppy, and provides moisture for the indigo. In 1895-96 the rainfall was only .17 of an inch, or less than one seventh of what usually falls.

26. In the above circumstances, the crop results of the year were as follows:—(a) a good *bhādōi* almost everywhere, (b) an indifferent rice crop, and (c) a poor *rabi*. Fortunately the bad season of 1895-96 had been preceded by two good ones, and thus no inconvenience has been felt and prices have not risen. In a year such as this the advantage of our canal system is heartily appreciated. I learn from the Superintending Engineer at Arrah that the collections of the Irrigation Department during 1895-96 have exceeded all previous records, and he calculates that the Sone Canals in Patna, Gaya and Shahabad have bestowed on the raiyats of the protected area crops worth 40 lakhs of rupees which they would not have had but for the canal water.

27. The following table presents the estimates formed by the different district officers of the outturn of the crops in their districts, expressed in the usual manner in sixteenths, a 16-anna crop being considered a full ordinary crop.—

DISTRICT.	Bhadoi.	Raoe.	Rabi.
1	2	3	4
Patna ..	13	11	8½
Gaya ..	14	9	8
Shahabad ...	13	8½	11½
Saran ...	16	12	11½
Champaran ...	13	13	11
Muzaffarpur ...	12	10½	8
Darbhanga	11	8

On the whole, the year has been a bad one for the agriculturists of the Division, except those who were within reach of canal water in Patna, Gaya and Shahabad. A contraction is everywhere reported in the area under *rabi*.

28. Except in Shahabad and Gaya, the poppy crop was below the average. Everywhere the absence of rain in October induced the cultivators to postpone sowings in the hope that the much desired rain would fall. Eventually the sowings were conducted without the rain, with the result that, besides being very late, they failed in many of the unirrigated tracts for lack of moisture. The failure of the January rains further retarded the development of the plant except in irrigated lands, and eventually the high west winds, which blew unusually early this year in some districts, aggravated the mischief. The raiyats were spared, however the storms which sometimes in January and February destroy the crop and reduce their profits by 25 per cent. or more in a few hours. Moreover, in some parts of the division which did not suffer from early west winds, the unbroken fine weather proved wholly beneficial. The reported variations between different districts are sometimes very large. Thus Gaya and Shahabad had crops much above the average, while from Darbhanga the poppy is returned as only a 3-anna crop, and in the other districts below the average, but not absolutely hopeless. The general statistical results for the whole division are given in the following table —

Season.	Estimated produce	Actual outturn	PAYMENTS TO CULTIVATORS—				Remarks.
			On account of opium	On account of leaves	On account of trash	Total	
1	2	3	4	5	6	7	8
1897-98	Mds. 33,000	Mds. 34,115 12 12½	Rs. 82,001 15 6	Rs. 79,447 8 10	Rs. 5,078 18 3	Rs. 166,526 8 7	* Gross produce ascertained at weighments.
1896-97	35,271	39,131 15 54	81,60,000 0 0	56,000 0 0†	6,375 0 0	88,28,375 0 0	† Approximate estimate calculated on 81,000 mounds of opium, on 2,600 mounds of leaves, and on 18,000 mounds of trash.
1895-96	26,244	27,804 10 54	75,40,000 0 0†	55,280 0 0	4,875 0 0†	75,95,575 0 0	

29. The year was not a good one for indigo. The excessive rain in July spoiled the manufacture from the first cuttings, and in many factories made a second cutting impossible. Nevertheless the outturn was respectable or good throughout, and extraordinary prices were obtained. The failure of the winter rains has left a very unfavourable outlook for the crop of the current year.*

V—MATERIAL CONDITION OF THE PEOPLE.

42. In the absence of great calamities, such as drought, floods or pestilence, it is not to be expected that much change should occur in the condition of the

people of a whole Division from one year to another. In a country where social institutions change so slowly as in India, a decade is too short an interval for the institution of comparisons, and it is difficult for the keenest observer to trace much difference from year to year, save when some calamity occurs. All that can be said is that with a people so largely agricultural as the population of the Patna Division, the margin of prosperity beyond the fixed limit of bare existence varies directly with the harvests of the year. In 1893-94 and 1894-95 the harvests were good, in 1895-96 the year began well with a good *rabi* in the early months of 1895, and a good *bhadai* to follow; the *aghani* rice and the *rabi* were both poor, but it so happened that in the north Gangetic districts, where the opium was poor, the indigo was fair, and south of the Ganges, where there is no indigo to speak of, the poppy was rather better than usual. In these circumstances, all that can be said for 1895-96 is that the people were a little less prosperous than in the previous year, but they are very far from scarcity or want, and a year of good harvests will put them into good case once more.

VII—PRICES OF FOOD AND LABOUR

53. In spite of the comparative failure of the rice and *rabi* crops, the price of the common food-grains of the people at the end of the year differed but little from those which ruled at the end of the two previous years. *Makai*, or Indian-corn, is largely eaten throughout the Division in the shape of *sattu* or flour, and as the *bhadai* crops, of which the *makai* is the principal, were, after a bumper year in 1894-95, again almost up to the average everywhere, there were ample stocks to carry the people on through the cold weather and preserve them from feeling the deficiency in rice and the cold-weather cereals, such as wheat, barley and *rahur*. In the whole Division the price of common wheat averaged at the end of the year 12 seers 11 chitaks, as against 14 seers 6 chitaks in 1893-94 and 14 seers 4 chitaks in the following year, the only districts where it was cheaper than in previous years being Shahabad and Darbhanga. Common rice was much cheaper than in either of the previous years. A chart, similar to that furnished in 1894-95, has again been submitted by Mr. Slack, Collector of Saran, but I do not think it necessary to reproduce it. It shows that in 1895 there was a sharp fall in the price of rice in September from 16 seers to 20 seers to the rupee. In the two previous years this fall took place later, the lowest price being reached in December of both 1893 and 1894. Apparently the prospects of rice were so good in September, and *maka* i was so plentiful (30 seers for the rupee), that the holders of rice stocks placed them on the market; there was, however, a sharp recovery when it began to be clear that the autumn rains were failing, since *maka* i, which was selling for 30 seers on the 30th September, had risen to 25½ seers by the 31st October, and rice rose from 20 seers on the 15th October to 17½ on the 31st idem.

54. Looking at all the figures, the fact seems to be established that the development of communication in Bihar has had the effect of levelling prices over larger and larger areas, as it has done elsewhere; therefore the loss of one, or even of two crops, of the year has a tendency to become less and less felt, as well as the effect of failures in isolated tracts. Every district in the Division is penetrated by at least one line of railway, and the great rivers and innumerable roads admirably supplement the work of the railways. Consequently we may expect, as the years pass, to see less and less variation in prices between district and even parts of the same district.

55. As regards the prices of labour, little has to be said in addition to what Mr. Forbes wrote a year ago. The price of unskilled labour rises by almost imperceptible degrees, and it were easier to compare prices once in a decade instead of once in twelve months: the population is for the most part so dense and labour so abundant that no rise need be expected. But with skilled labour the same remark does not hold true. Returning to Bihar after a three years' absence, I find a rise in the price of labour, at any rate in the large towns, which it is impossible to overlook. The silversmith charges a higher rate for his workmanship; the shoe-maker and the tailor have raised their tariff; and there is a similar tendency among domestic servants. My experience fully corroborates all that was said by Mr. Forbes in the 77th paragraph of his report for 1894-95.

IX—TRADE AND COMMERCE

79. *Food-grains*.—It will be observed that the balance of trade in food-grains during the past year was very heavy against the Division as a whole. Taking all the food-grains together, the imports amounted to 27,71,000 maunds against exports aggregating 11,69,000 maunds, showing a balance against the Division of 16,02,000 maunds. The only districts which show a balance in their favour are Patna and Gaya to the extent of 3,15,000 and 1,000 maunds respectively. The balance against the other districts was—

	Mds
Shahabad	3,55,000
Saran	5,17,000
Champanan	14,000
Muzaffarpur	3,80,000
Darbhanga	7,55,000

It has long been known that the districts of this Division cannot feed their extremely dense population without aid from outside.

86. Taking the districts individually, I note the following points:—

Patna.—The natural situation of the Patna City, viz., near the confluence of the Ganges, Gogria and Gandak, makes it the most important commercial town in Bihar. The produce of the neighbouring districts of Saifan, Tirhut, Champaran, Ghazipur, Gaya and Fyzabad, is collected here and exported to Calcutta and Eastern Bengal; on the other hand, miscellaneous manufactured goods imported here in vast quantities are eventually exported in their turn to the districts named. The principal articles, imported to this place during the year, says Mr. Inglis, are—

“Kerosene-oil to the value of 6 lakhs of rupees and oil-seed to the value of 45 lakhs, piece goods 11 lakhs, and silver about 9 lakhs. These are no doubt large figures, and are to be explained by the fact that Patna is a distributing trade centre, from which many of the neighbouring districts obtained their supplies. Last year the imports of silver were valued at 7 lakhs of rupees, and this year their value is set down at 9 lakhs, which may perhaps be taken as an indication of the increasing prosperity of this part of the country.”

The railway, river steamers and country boats are the means of transport employed. The India General Steam Navigation Company now runs steamers daily, and is apparently doing a good business, or rather one that promises well, for the venture is yet new and it will be some time before it can be said to be fully developed. The Collector understands that this steamer service has drawn off much of the railway traffic in grains, oil-seeds and country produce, for which it affords special facilities and cheaper rates.

87. *Gaya*.—The principal trade route of the district is the Patna-Gaya Railway. A portion of the trade of the west of the district goes by the Patna (Eastern Sone) canal, but statistics for this portion are too insignificant to call for separate notice. The trade of the east of the district goes *via* Bihar through Bakhtiarpur, and *via* Shaikhpuria through Lakhiserai on the East Indian Railway, and a considerable portion of the trade of the south goes by the Grand Trunk road. Statistics of these routes are not available. Comparing the import and export trade of the district, it appears that the total imports during the year amounted to 6,78,794 maunds, as against 4,84,722 maunds exported. Grain and pulse and other food-grains constituted the principal imports, while rice, grain and pulse were the principal exports. About a lakh of maunds of rice was exported, of which the major portion went to other Bihar districts.

88. *Shahabad*.—The East Indian Railway passing through this district constitutes the main artery of trade and commerce. The canals and other feeder roads afford easy communication with the railway. The riparian tracts along the river Ganges between Ballia and Buxar are served, partly by boats and partly by steamer, which latter regularly ply daily between Ballia and Ghazipur *via* Buxar. The Sasurain, Buxar and Dehri-Arrah canals were

largely used throughout the year as one of the principal navigation channels and routes of traffic from the southern part of the district. Almost all grains, oil-seeds, cotton, ghee and jungle produce are imported into the Sasaram subdivision by pack-bullocks from a large market at Gharwa in the Palamau district and they are sent by canal steamer or cart along the chief roads of the district to the nearest railway station. The following figures furnished by the Collector compare the general state of trade of some of the chief articles during the past two years —

Articles.	IMPORTS.	
	1894-95	1895-96
	Mds.	Mds.
Rice	6,53,369	3,29,529
Piece-goods	58,386	66,363
Salt	2,21,621	2,69,834
Tobacco	35,466	28,480
Other grains	1,91,196	33,502
Kerosine-oil	9,144	10,179

EXPORTS.		
Wheat	11,658	3,114
Linseed	1,98,272	83,912
Sugar	2,09,821	2,56,376
Mustard	2,817	2,701

89. The importation of rice and other food grains has fallen by more than 3 and 1½ lakhs maunds, respectively; and the Collector remarks that this leads to the inference that the stock of the previous harvest was sufficient to meet the requirements of the district, and this theory, he says, may also account for the prices of rice having ruled lower than in the previous year. The increase in piece-goods is due, it is said, to the large number of marriages occurring during the year. Of the total quantity of salt imported, about a third is exported to Palamau, and this accounts for the increase. The decrease under head "Tobacco" is due to a bad harvest of this crop, while the increase in kerosine-oil is owing to increased demand on account of its cheapness. Among exports the decrease in wheat and oilseeds is due to unfavourable harvest, while the increase in sugar is owing to an exceptionally favourable season and consequent good outturn of sugarcane. Besides the above, a large trade is carried on in the district in bamboos and wood in the Sasaram subdivision. The value of the trade during the year is reported to be Rs. 1,36,999, against Rs. 1,39,204 in the year before. The figures, below show the canal-borne traffic of the Anah, Dehri and Buxar-Sasaram canals together during the past two years —

		Mds	Value Rs
1894-95	36,120	31,45,322
1895-96	21,538	28,81,671

The Collector explains that trade was very slack during the year, and that there was a great falling off in the imports and in all the principal exports.

90. *Saran*.—The principal imports and exports of the district are represented by the following figures —

IMPORTS			Mds
(1) Rice	11,23,487
(2) Paddy	1,43,416
(3) Other food-grains	7,81,962
(4) Salt	2,59,363

EXPORTS.			Mds
(1) Linseed	3,52,534
(2) Sugar	1,14,645
(3) Other food-grains	1,20,299
(4) Mustard-seeds	23,367

The quantity of rice imported as noted above was 11,23,487 maunds, and that exported was only 15,962, practically therefore the export trade in rice is nil. The export trade in paddy is likewise trifling. As regards grain and pulse, the import trade is rather more than three times the export trade. The import of salt is considerable, it comes from Calcutta, Muzaffarpur and the North-Western Provinces. The export trade of this commodity forms an insignificant fraction, as compared with the import. Linseed is largely exported to Calcutta, the North-Western Provinces and Patna. The import trade in this article is next to nothing. The ratio of exports to imports of sugar is roughly 15:1. It goes chiefly to the North-Western Provinces. Besides the articles mentioned above, cotton piece-goods and kerosine-oil are imported in large quantities into the district.

91. *Champaran*.—The Collector of Champaran reports as follows —

“Generally speaking, there was a marked decline in the export trade, especially in rice paddy, wheat and all other kinds of food-grains except pulses. This falling off, which was also shared by indigo, was due to the poor crops, and the reason why there was nevertheless an increase in the exports of the pulses is that *arhar* and peas were a good crop, and mustard seed was also a much better crop than in the preceding year. The export of linseed was much the same as in the preceding year. It comes principally from Nepal. The increase in the export of unrefined sugar is counterbalanced by smaller exports to that country, and was probably due therefore to a better price being got elsewhere than in Nepal. The import trade shows a marked increase only in the case of rice and unmanufactured tobacco. But there was also some increase in European piece-goods and salt * * * * The increase in the importation of salt is comparatively small, only about 3 per cent, and is explained by smaller exports to Nepal. The increased importation of rice is explained by the short crops, but is partly discounted by decreased imports of paddy. The falling off in kerosine-oil is no doubt attributable to its price having been high by about 20 per cent and the decrease in Indian piece-goods is probably explained by a larger demand for European cloth, the imports of which show an increase.”

92. *Muzaffarpur*.—The Collector is unable to submit any explanations of the variations in the trade of his district, as he has no figures for the year 1894-95.

93. *Darbhanga*.—Mr. Carlyle, the Collector of Darbhanga, remarks:—

“It is remarkable that there was a large falling off in the importation of food-grains, notwithstanding the poor crops of 1895-96. It seems to show there must have been a considerable stock in hand. With regard to other articles of imports, there was a considerable increase under the heads Tobacco, Piece goods and Salt, which may be attributed to the greater number of marriages celebrated during the year of report. The decrease in the export of rice and paddy, oilseeds and sugar, is due to unfavourable harvests. The most striking feature, however, is that there was a large increase in the exportation of wheat and other food-grains. The export of tobacco was about the same as in the previous year. On the whole, taking imports and exports together, there was a heavy falling off in trade in comparison with the preceding year.”

94. It is to be noted here that the figures of trade given in the above abstracts from the district reports will not correspond with those shown in the divisional returns, as, under the orders of Government quoted above, all traffic between the districts of the Division have been excluded from the divisional returns.

It will be seen that the principal articles of import from Nepal are rice, paddy, gram and pulse and other food-grains and linseed, while the chief articles of export to that country are cotton piece-goods, salt and kerosine-oil, besides considerable quantities of sugar and tobacco. On this subject Mr. Macpherson, the Magistrate of Champaran, writes as follows:—

“There was a large increase in the imports from Nepal of rice, paddy, wheat and other food-grains, except gram and pulses. All this was due to short crops in this district. There was a considerable falling off in the imports of linseed, but a slight increase in those of mustard-seed. The former crop was deficient, and the latter better than last year in Nepal. The exports to that country show a large increase in European piece-goods, kerosine-oil and tobacco, and a marked decrease in sugar and salt and Indian piece-goods, no exports at all being shown under the last named head.”

“This last circumstance,” Mr. Macpherson remarks, “coupled with the increase in European piece-goods, gives rise to a suspicion that the registering officers do not distinguish these properly, but for all that the demand for

European goods is probably increasing in Nepal. This is very likely the case with kerosine-oil also, in spite of the recent rise in its price."

Mr. Carlyle, the Magistrate of Darbhanga, writes:—

"The import of rice and paddy from Nepal shows a considerable increase, as compared with the figures of the previous year, while that of other food-grains and oil-seeds show a falling off, due principally to the poor outturn of the *rahi* crops. The decrease under the head of "Exports" is remarkable, and it cannot be traced to any particular cause. The large falling off under the heads of Piece-goods and Salt may, perhaps, be due to the fact that the quantity exported during the preceding year exceeded the requirements of the year."

96. There is no record of trade between British territory and Tibet Sikim and Bhutan.

* * * * *

STATE OF PUBLIC FEELING AND THE PUBLIC PRESS.

386. In his last two reports, Mr. Forbes was unfortunately compelled to give a long account, first, of the anti-kine-killing agitation and the riots which accompanied it in 1893-94, and, secondly, of the rioting and violence which marked the festival of the Bakr-Id of 1895 in Muzaffarpur and Champaran. These occurrences, which he detailed in paragraphs 443 to 446 of his later report, actually fell for the most part within the year 1895-96, but they were so intimately connected with events which he had been relating that they were dealt with at once. I am glad to be able to report that the measures then adopted have been entirely successful, and that after the prolonged storm of 1893 and the cyclonic disturbances of 1894, this part of the political horizon remained clear throughout the remainder of 1895. Some rioting occurred in Darbhanga during the Bakr-Id just past, and there were some petty ebullitions in Patna and Saran, but these have been separately reported to Government, and will be treated in the report for the current year.

387. The Collector of Patna reports that a better feeling is beginning to be visible between the Hindus and Muhammadans of the upper classes and of some education and intelligence, and he believes that, in course of time, this feeling of mutual forbearance and concession may reach the lower classes. Nothing better could be desired for the prosperity of Behar, but this opinion, I think, does not sufficiently take into account the influence of *mullahs*, on the one side, and of *sadhus* and religious agitators, on the other, over the masses of the population. This is the force with which we have to reckon—the leading of the priests instead of the nobles, and all history shows which power is the greater and how difficult it is to control an ignorant, emotional and priest-ridden people.

388. In Gaya, the Magistrate reports that the Bodh Gaya temple case excited a languid and temporary interest among the public, though the principals on both sides were keenly moved.

389. In Saran, a faint echo of the anti-kine-killing agitation still hangs in the air, and Mr. Slack reports a very remarkable falling off in the number of *sadhus* and *nagus* who visited the district. He is of opinion, however, that the district authorities cannot afford to relax their vigilance for some years to come. This also is the opinion of Mr. Macpherson of Champaran, who reports that the punishments inflicted upon the Hindu rioters in his district and the heavy price which the thirty-eight offending villages have had to pay for the additional police quartered among them have had a most salutary effect. Eighty-one persons were put upon their trial, of whom 52 were convicted, and received long sentences, while the amount payable was Rs. 17,101 for additional police and Rs. 5,945 compensation for damage caused by the rioters.

390. The survey and settlement operations are regarded with interest by all classes of the agricultural community. In Saran and Champaran, the petty zamindars, it is said, still object. In Muzaffarpur, it is reported that a change of feeling has occurred, and the zamindars accepting the survey are doing all they can to turn it to their own advantage. It is added that planters and the larger zamindars thoroughly approve of it, and that the rayat places a high value on his *parchu*.

391. Some interest has been excited among the upper classes and the educated men of the Division, and class feelings have been aroused by the academic suggestion that Behar should be separated from Bengal and placed under a separate Administration. The strongest supporters of the separation are the Muhammadans of Patna with a contingent of Behari Hindus, while the unionists are chiefly composed of the Bengali colonists, reinforced by a few of the older and wiser men who recognise how much the Division would lose by the separation. Meetings have been held at Patna and elsewhere, and a society has been projected, the object of which is to bring about, by every means in its power, the separation of Bengal from Behar. The presidency of this Association was offered to the Maharaja of Darbhanga, but he, with characteristic prudence, declined the proffered honour.

* * * * *

XXXVII—GENERAL REMARKS.

405. Almost every point of interest in the history of the Division for 1895-96 has already been touched on in the preceding paragraphs, but a word remains to be said as to the excavations near Patna on the supposed site of the ancient city of Pataliputra. Mr. Forbes's report last year gave an account of some excavations which were carried on in 1894-95 with more zeal than intelligence, and which resulted in confirming one of Dr. Waddell's conjectures at a needless expense. It was hoped that during the cold season of 1895-96 operations would have been undertaken afresh at another site under the orders of Dr. Waddell himself, but unfortunately he could not arrange to visit the locality till quite late in the season, and operations were not commenced till a few days before the year closed. An account of these operations will more appropriately be included in the report for the current year; but it should be mentioned that important discoveries have been made, tending to confirm the conclusions formulated by Dr. Waddell in his monograph on the site of the ancient city of Pataliputra.

406. Looking back over the events of the past year, the following seem to be its more prominent features. The public health was extraordinarily good, cholera in particular being extremely rare as compared with the previous year. The harvests were fair, the *bhados* being a very good crop, and the rice and *rabi* fair in spite of the early cessation of the rains: opium and indigo, the two sheet anchors of the agricultural population in the northern Gangetic districts, were fair, and poured somewhat less than the usual stream of wealth into the rural villages. The public peace was well preserved. Except at the commencement of the year in parts of the Champaran district, no religious riots occurred, and the Muhurram passed off without incident. In respect of criminal justice, the most important events of the year were the prosecution and conviction, in Saran, of the dacoit gangs who for years have terrorised not only that district, but many districts in Lower Bengal. The conviction of two of these gangs must be followed by that of a third. The effect of these measures is already very great, and the local influence of the District Superintendent of Police (Mr. Knyvett) and the late Magistrate (Mr. Slack) immense. Turning to more peaceful matters, it is satisfactory to notice that the survey and settlement operations have everywhere proceeded without serious trouble or friction, and that an appreciation of their value and importance is rising. Great efforts have everywhere been made to improve the administration of the Certificate Department, and to give full effect to the improvements introduced by the new Act. The new *tauzi* procedure has given a great deal of trouble to all Collectors, and it is clear that, at any rate for the first year or two after its introduction, it is not likely to diminish work, but to increase it. But the elaborate character of the forms and statements which form an important characteristic of the procedure have caused everywhere a great examination of details, and in more than one district frauds have been disclosed which are now under investigation. Lastly, municipal administration has left a good deal to be desired. The average Municipal Commissioner fears his fellow-citizens, and is as sensitive to local criticism as ever, while in too many cases press of private business, or natural inaptitude, causes the Vice-Chairman to neglect his duties, and leave everything to his subordinates, with the usual results—slackness of administration, delay in collections and peculation everywhere.

407. For the current year some of the principal tasks to which district officers should direct their attention have already been indicated. Special attention must be given to the administration of the Certificate Procedure, and the tauzi procedure which has now passed through a year's trial. Municipal administration requires to be forced to a higher standard almost everywhere. Much remains to be done towards developing and improving the water-supply both of municipal and rural areas. A scheme of roads has to be arranged, so that the maintenance and development of communications shall proceed in future on a definite system. Much has been done to introduce the Chaukidari Act in all the districts of the Division, as far as they are suited to its introduction; and in this connection too much care cannot be expended on the inspection of assessments and on improving the personnel of the force. Lastly, perpetual vigilance must be maintained to prevent the outbreak of religious fanaticism and the repetition of disorders, such as those which occurred in Patna, Gaya, Shahabad and Saran during 1893 and in Champaran early in the summer of 1895.

A. D. McARTHUR, Colonel, R.E.,
Secy. to the Govt. of Bengal.

[Second Publication.]

The 15th December 1896.

REVISED WATER-RATE RULES FOR THE MIDNAPORE CANAL.

No. 248 Notification.—His Honour the Lieutenant-Governor of Bengal is pleased to propose the following modifications in the Water-rate Rules for the Midnapore Canal passed by him under the provisions of sections 99 and 78 of Act III (B.C.) of 1876 in notification No. 162 of the 19th June 1893.

A. D. McARTHUR, Col., R.E.,
Secy. to the Govt. of Bengal.

1. The Divisional Canal Officer is responsible for maintaining the canal in an efficient state of repair, for providing drainage channels where necessary, and generally for all engineering work involved in its management, as well as for the distribution of water to lessees. The word "canal" is here used as defined in section 3 of the Act

2. The Deputy Collector is responsible for the assessment and collection of water-rates accruing to Government from the canal

3. Water shall not be distributed otherwise than on the application of a lessee, or to a person in whose favour a provisional license under Rule 15 has been issued. Such application may be made verbally or in writing to any subordinate in charge of that part of the canal from which water is required.

4. If any lessee apply for water to the Deputy Collector or one of his subordinates verbally, he shall be directed to address himself to an irrigation officer or subordinate. If he makes such an application in writing, his petition shall be forwarded direct by the zilladar, to whom it is addressed, to the Sub-divisional Canal Officer in charge of that part of the canal from which the petitioner's village is supplied.

5. The Divisional Canal Officer shall map out the irrigable area into blocks in accordance with the natural features of the ground, and so determine that the whole block shall be irrigable from one outlet or from one set of outlets. So far as may be practicable, the blocks shall be separated by drainage lines

6. Each block determined as above shall be numbered and recorded with its irrigable area in registers to be maintained by the Divisional Canal Officers and Deputy Collector. The blocks shall also be marked on maps to be maintained by the same officers.

~~7. Leases for not more than five years may be granted for the whole irrigable area of a block, or, subject to the provisions of Rule 13, for definite parts of a block, under the following conditions:—~~

I.—Ordinarily the whole irrigable area of any village, so far as situated within the block, must be included in the lease.

II.—All leases within one block shall be granted so that they shall expire on the same date.

III.—In order to equalise the areas to be dealt with in each year, the date of expiry of the leases in each block shall be determined by the Divisional Canal Officer in consultation with the Deputy Collector, so that, as far as practicable, one-fifth of the total area usually irrigated may fall out of lease in each year.

IV.—No permit shall be granted, when the supply of water must of necessity be delivered across an unleased area, unless a village channel exists, which, in the opinion of the Sub-divisional Canal Officer, will deliver water without waste across the unleased area.

8. The rates to be charged for water supplied between 16th June and 30th November, whether by flow or lift, to lessees on application shall be—

For a term of five years—Rs. 1-8 per acre for each season.

For one year or for water supplied on a provisional license for which a permit for a term of years is not subsequently issued, Rs. 3 per acre.

Provided that the leases, whether new or renewals, required for shorter terms than five years in order to develop the system of blocks as explained above, shall be charged Rs. 1-8 per acre only.

9. For the supply of water, when available, for winter crops, a rate of Rs. 2-8 per acre per season shall be charged.

10. For the unauthorized use of canal water a rate of Rs. 5 per acre, or such less rate as may be sanctioned by the Deputy Collector, shall be charged.

11. Application for water leases under section 74 of the Act shall be presented to the Sub-divisional Officer through the zilladar in whose charge the land lies.

12. Every application for a water-lease shall contain the following particulars:—

1.—Name and residence of applicant.

2.—Name of pargana, mahal and village in which the land to be irrigated is situated.

3.—Total area for the irrigation of which the application is made and its boundaries, and if the lands to be irrigated lie in separate *chaks*, the name of each *chak*.

4.—Names of the rayats whose lands are to be irrigated, and the quantity of land held by each

5.—Name of the canal and number of distributary from which water is required.

6.—Signatures of the applicants.

13. A separate application must be presented for lands in each village, but *tehsilalanda* or other lands lying within the village boundary at the time of survey may be included.

14. Before a permit for a term of years is granted, the written consent of the Divisional Canal Officer shall be obtained, but permits for one year only and provisional licenses may be issued with the written assent of the Sub-divisional Canal Officer. The Deputy Collector shall on the day of issue forward a copy of all permits granted to the Divisional Canal Officer.

Existing leases may, with the written consent of the Divisional Canal Officer, be extended for not more than three years, without enquiry or re-measurement, payments being made in accordance with the existing assessment.

15. When a water-lease is granted, a *kabuliyat* shall be taken in a form approved by Government, and a "permit" shall be given to the lessee or lessees in a form similar to that prescribed in Schedule C of the Act. Pending the completion of a lease, the zilladar may issue a provisional license for the supply of water to an area covered by an application.

16. On the issue of a permit or provisional license, the zilladar shall forward to the Sub-divisional Canal Officer direct a requisition requesting him to supply water to the lessee on application. This requisition shall be kept by the Canal Officer till January 1st next following, and shall then be returned to the Deputy Collector. On the back should be noted the several dates on which the village was supplied with water. A fresh requisition shall be issued on or before June 1st, and returned on or before January 1st each year, till the lease expires.

17. When it comes to the knowledge of the Sub-divisional Canal Officer that canal water has been taken without authority, he shall hold a local investigation and transmit the record thereof to the Divisional Officer, who shall, if he is of opinion that the fields should be assessed, forward the case with his remarks to the Deputy Collector. Separate proceedings shall be taken in the case of each village irrigated without authority.

18. On receipt of the record mentioned in Rule 17, and after hearing any objection which may be raised, the Deputy Collector shall determine whether water-rates can be legally charged, and if so, he shall proceed to assess, at the rate provided in Rule 10, the land irrigated without authority. Water-rates shall not be charged where the unauthorized irrigation has occurred through the act, neglect or default of a Canal Officer or subordinate.

19. The statements of the amounts demandable for water-rates leviable under the rules in force shall be prepared under the supervision and signature of the Deputy Collector in such form as shall from time to time be sanctioned by the Lieutenant-Governor. Persons charged under Rule 10 or 18 shall be served, by post or otherwise, with a statement showing the amounts charged to enable them to lodge an appeal to the Collector under section 91 of the Act, if they desire to do so.

20. Should it be proved, after due enquiry, that the supply of water given to any leased area is habitually wasted, or used for the irrigation of lands not under lease, it shall be competent for the Superintending Canal Officer to direct that the lease shall be cancelled with effect from the 1st of June next following.

21. The rates for water supplied from June to November shall in each season fall due on the 1st January and 15th February following, but all sums of Rs. 5 and under shall become due on the 1st January and be payable in one instalment. The Deputy Collector may, however, require one-half of the rates due on applications filed after the 1st of September to be paid in advance, and may refuse to issue a permit for more than one year. The rates for water supplied for winter crops shall fall due on the 1st April following.

22. Water-rates imposed under Rule 10 or 18 shall fall due as soon as the assessment is made, and shall be realized at once.

23. The Superintending Canal Officer may, with the concurrence of the Collector, direct the Deputy Collector to—

I.—Cease to issue permits for the irrigation of lands in villages where there have been constant difficulties in realizing water-rates until all the arrears of water-rates due are paid up, and also, if specially so ordered, unless half the amount due under new applications is paid in advance. An order under this rule shall be in force for the time stated therein, which shall not exceed three years.

II.—Cancel any five-years' lease if on the 1st of June of any year water-rates to the extent of half the demand for one year are in arrears.

24 Remission of water-rates, either in whole or part, as the case may require, shall be granted by the Deputy Collector for—

I.—Errors in the assessment of rates

II.—Injury to the crop on a leased area caused by deficient supply of water, provided a written application for remission has been made 15 days at least before the crop is cut.

In regard to applications under II, the written opinion of the Divisional Canal Officer shall be obtained and form part of the record of the case.

25. The Deputy Collector, with the written consent of the Divisional Canal Officer, may grant remissions of water-rates, either in whole or part, for injury to the crops on leased areas caused by excess of water due to deficient drainage.

26 The Deputy Collector may, with the written assent of the Divisional Canal Officer, commute rates charged under Rules 10 and 18 to those chargeable for water supplied on application, provided that a lease either for a term of years or for the season has been subsequently executed for the lands in question.

27. Remissions on other grounds than the above require the sanction of Government.

28. In cases where sums due on account of water-rates cannot be collected owing to the death, bankruptcy, or absconding of the defaulter, the amount which is non-realizable may be written off as irrecoverable on the authority of the Superintending Canal Officer.

29. Before awarding compensation under section 16 of the Act, or making a reference under section 17 of the Act, the Collector shall obtain the written opinion of the Superintending Canal Officer, and his written opinion shall form part of the record of the proceedings.

30. The *chaulidar* of any village in which lands are leased for a term of years shall be entitled to a remission of water-rates for his holding either as a *jaghir* or *rayati* up to a limit of 8 acres, provided he gives efficient and willing assistance to the Canal Officers in respect to the following matters—

I.—In the preparation of applications for leases.

II.—In the measurements of irrigated lands.

III.—In giving the names of the occupiers of the various fields.

IV.—In receiving demand statements and informing the cultivators of the demands against them.

V.—In receiving *tappas* from the zilladars and distributing them.

VI.—In being present when complaints are investigated by Canal Officers, and giving information regarding the matters under investigation.

VII.—In reporting to the zilladars any mutations in holdings of persons who have signed a lease for a term of years.

31. Tanks may be filled with canal water without charge, wherever water can be made available without injury to the cultivation dependent on a canal under the following conditions:—

I.—No tank shall be filled unless the water is to be exclusively used for domestic purposes or for watering cattle.

II.—No tank shall be filled from which irrigation is practised.

III.—No tank shall be filled which intercepts any line of drainage or is liable to overflow from the accumulation of water from natural causes.

IV.—No tank shall be filled except on the written order of the Sub-divisional Canal Officer issued on the written application of the persons concerned.

V.—No tank shall be filled unless the village channel used to convey water to it shall be shown to the satisfaction of the Sub-divisional Canal Officer to be in a sound condition when the application is made

VI.—The privilege here accorded may, by the written order of the Sub-divisional Canal Officer, be suspended for twelve months for the breach of any of the above rules.

32. The Divisional Canal Officer may supply water for manufacturing or other purposes, and charge for the same at the rate of one rupee for each 10,000 cubic feet or part of 10,000 cubic feet supplied. The same charge will be made if water is taken into a tank without authority or used in an unauthorized manner.

33. No person shall, without the permission in writing of the Divisional or Sub-divisional Canal Officer, pass or cause any animal or vehicle to pass on or across any of the works, banks or channels of a canal or drainage work after he has been desired to desist therefrom, except by means of such bridges, fords and ferries and their approaches as are provided by the Divisional Canal Officer.

34. No officer employed on the canals, unless specially exempted by the Lieutenant-Governor from the operation of this rule, shall have any interest in the distribution of water from any of the canals, or purchase or bid for any Government property sold thereon, either in his own name or in the name of another, or jointly, or in shares with others.

35. Except as provided in the Act and in these rules, no appeal shall lie from any order passed by a Canal Officer; but the Sub-divisional Canal Officer shall modify any order passed by him in accordance with the order of the Divisional Canal Officer, and the Sub-divisional Canal Officer or Divisional Canal Officer shall modify any orders passed by them in accordance with the orders of the Superintending Canal Officer, who shall exercise a general control over the proceedings of all Canal Officers.

36. In appeals to the Collector under section 91 of the Act other than those specially provided for in Rule 19, the Collector may require the Superintending Engineer to state his opinion in writing, which shall form part of the record of the proceedings in the case.

A. D. McARTHUR, Colonel, R.E.,

Secy. to the Govt. of Bengal.

[Third Publication.]

The 8th December 1896.

No. 348.—*Notification.*—Notice is hereby given that the Lieutenant-Governor of Bengal proposes, under the provisions of section 6 of Act II (B.O.) of 1882, to declare that the provisions of clause (b) of section 76 of that Act shall take effect over the whole area between the sea-dyke and the Bay of Bengal, commencing from the village of Darlapur, pargana Baljora, and ending where the sea-dyke terminates at a masonry pillar in the village of Khandalgobra, pargana Birkul, save and except the tract specified hereunder, viz., the lands between the sea-dyke and the sea so far as they appertain to the Majumtha estate, bounded on the east by the boundary of mauza Kalurairan (up to the creek near Kansichata), pargana Baljora, and on the west by the boundary of mauza Saradpur, pargana Sarifabad near Haripur, pargana Dakshinmal.

2. The erection of any new embankment, or any addition to any existing embankment, or the obstruction or diversion of any water-course within the tract above declared without the previous sanction of the Collector of Midnapore, is prohibited.

Boundary of the tract to be declared.

[Subject to the exceptions above noted.]

RAILWAY DEPARTMENT

The 18th December 1896.

No. 158.—*Notification.*—Babu Bakhsh Das Chatterjee, Land Acquisition Deputy Collector, Midnapore, is granted privilege leave, under Article 291 of the Civil Service Regulations, for one month and ten days, with effect from the afternoon of the 17th November 1896.

The 21st December 1896.

No. 167.—*Notification.*—Babu Kartik Chandra Roy Chaudhuri, Sub-Deputy Collector, Cuttack, was employed in acquiring lands required for the East Coast Railway from the 27th November 1895 to the 3rd of January 1896, inclusive.

The 22nd December 1896.

No. 159.—Declaration.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz., for the station site for the Howrah-Amta Tramway, in the village of Domjur, pargana Balia, zilla Howrah; it is hereby declared that for the above purpose a piece of land measuring, more or less, 6 cottahs 13 chitaks of standard measurement, bounded on the North by the Jagatballabhpur road, and on the East, South and West by nickings on the ground, is required within the aforesaid village of Domjur.

This declaration is made, under the provisions of section 6 of Act I of 1894, to all whom it may concern.

A plan of the land may be inspected in the office of the Land Acquisition Deputy Collector of the Howrah-Amta Tramway at Howrah.

No. 160.—Declaration.—Whereas it appears to the Lieutenant Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz., for the station site for the Howrah-Amta Tramway, in the village of Borgachia, pargana Balia, zilla Howrah, it is hereby declared that for the above purpose a piece of land measuring, more or less, 4 bigha 3 cottahs 15 chitaks of standard measurement, bounded on the North by the Jagatballabhpur road, and on the East, South and West by nickings on the ground, is required within the aforesaid village of Borgachia.

This declaration is made, under the provisions of section 6 of Act I of 1894, to all whom it may concern.

A plan of the land may be inspected in the office of the Land Acquisition Deputy Collector of the Howrah-Amta Tramway at Howrah.

No. 161.—Declaration.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz., for borrow-pits for the Howrah-Amta Tramway, in the village of Borgachia, pargana Balia, zilla Howrah, it is hereby declared that for the above purpose a piece of land measuring, more or less, 7 cottahs 5 chitaks of standard measurement, bounded on the North by the Amta road, and on the East, South and West by nickings on the ground, is required within the aforesaid village of Borgachia.

This declaration is made, under the provisions of section 6 of Act I of 1894, to all whom it may concern.

A plan of the land may be inspected in the office of the Land Acquisition Deputy Collector of the Howrah-Amta Tramway at Howrah.

No. 162.—Declaration.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz., for borrow-pits for the Howrah-Amta Tramway, in the village of Domjur, pargana Balia, zilla Howrah, it is hereby declared that for the above purpose a piece of land measuring, more or less, 6 cottahs 13 chitaks of standard measurement, bounded on the North by the Amta road, and on the East, South and West by nickings on the ground, is required within the aforesaid village of Domjur.

This declaration is made, under the provisions of section 6 of Act I of 1894, to all whom it may concern.

A plan of the land may be inspected in the office of the Land Acquisition Deputy Collector of the Howrah-Amta Tramway at Howrah.

No. 163.—Declaration.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz., for borrow-pits for the Howrah-Amta Tramway, in the village of Makarda, pargana Balia, zilla Howrah, it is hereby declared that for the above purpose a piece of land measuring, more or less, 6 cottahs 15 chitaks of standard measurement, bounded on the North and East by nickings on the ground and on the South and West by the road to Domjur, is required within the aforesaid village of Makarda.

This declaration is made, under the provisions of section 6 of Act I of 1894, to all whom it may concern.

A plan of the land may be inspected in the office of the Land Acquisition Deputy Collector of the Howrah-Amta Tramway at Howrah.

No. 164.—Declaration.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz., for borrow-pits for the Howrah-Amta Tramway, in the village of Jhaparda, pargana Balia, zilla Howrah, it is hereby declared that for the above purpose a piece of land measuring, more or less, 9 cottahs 15 chitaks of standard measurement, bounded as follows:—

Plot No. 1.—On the North, East and West by nickings on the ground, and on the South by the house of Naderally Sekh,

Plots Nos. 2, 3, 4, and 5.—On the North by the Amta road, and East, West and South by nickings on the ground.

Plot No. 6.—On the North, East and West by nickings on the ground, and on the South by the Amta road, is required within the aforesaid village of Jhaparda.

This declaration is made, under the provisions of section 6 of Act I of 1894, to all whom it may concern.

A plan of the land may be inspected in the office of the Land Acquisition Deputy Collector of the Howrah-Amta Tramway at Howrah.

No. 165.—Declaration.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz., for borrow-pits for the Howrah-Amta Tramway, in the village of Rajapur, pargana Bahia, zilla Howrah, it is hereby declared that for the above purpose a piece of land measuring, more or less, 4 chitaks of standard measurement, bounded on the North, by the Amta road, and on the East, South and West by nickings on the ground, is required within the aforesaid village of Rajapur.

This declaration is made, under the provisions of section 6 of Act I of 1894, to all whom it may concern.

A plan of the land may be inspected in the office of the Land Acquisition Deputy Collector of the Howrah-Amta Tramway at Howrah.

No. 166.—Declaration.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz., for borrow-pits for the Howrah-Amta Tramway, in the village of Shibrapur, pargana Bahia, zilla Howrah, it is hereby declared that for the above purpose a piece of land measuring, more or less, 1 cottah 10 chitaks of standard measurement, bounded on the North by the Amta road, and on the East, South and West by nickings on the ground, is required within the aforesaid village of Shibrapur.

This declaration is made, under the provisions of section 6 of Act I of 1894, to all whom it may concern.

A plan of the land may be inspected in the office of the Land Acquisition Deputy Collector of the Howrah-Amta Tramway at Howrah.

J. G. H. GLASS,
Secy. to the Govt. of Bengal.

MARINE DEPARTMENT.

The 18th December 1896.

No. 147 Marine.—Declaration.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up by the Government at the public expense for public purposes, viz., for the erection of a landing ghat, resting sheds, &c, for the use of passengers in the village of Protappur, called Basitpur ghat, pargana Bajuranasarpur, zilla Pabna, it is hereby declared that, for the above purposes, two pieces of land measuring, more or less, 2 bighas 11 cottahs 11 chitaks of standard measurement, one bounded on the North by Gopal and Madhab Biswas' land, on the South by Basitpur-Pabna road, on the East by an Indigo Factory and a halot, and on the West by Madhab Bura, and the other bounded on the North by Basitpur-Pabna road, on the South by Pedma river, and on the East and West by *chor*-land, are required within the aforesaid village of Protappur.

This declaration is made, under the provisions of section 6 of Act I of 1894, to all whom it may concern.

A plan of the land may be inspected in the office of the Collector of Pabna.

A. D. McARTHUR, Colonel, R.E.,
Secy. to the Govt. of Bengal.

The 31st December 1896.

No. 148 Marine.—Notification.—Under section 10 of the Indian Merchant Shipping Act, 1859, the Lieutenant-Governor is pleased, with the sanction of the Governor-General in Council, to make the following additional rules for the conduct of examinations for Masters and Mates of Foreign-going Ships and Home Trade Ships and as to the qualifications to be required. The rules will come into force on the 1st of January 1897.

A. D. McARTHUR, Colonel, R.E.,
Secy. to the Govt. of Bengal.

The following should be inserted after paragraph 18 of the Rules sanctioned under notification No. 19 Marine, dated the 13th February 1895:—

14A With reference to the latter portion of the foregoing paragraph which exempts applicants in certain special cases from the requirements that officer's service must be performed with the requisite certificate, it is to be clearly understood that this exemption does not apply to foreign officers serving in foreign vessels.

18B. Foreign officers who may be desirous of obtaining a Certificate of Competency in the Mercantile Marine will be required to comply strictly, whatever may be their rank in the Mercantile Marine of their own or any other country, with the requirements in the first part of paragraph 18, viz, they must have performed their officer's service with the requisite certificate (see paragraph 17) as specified in paragraphs 53, 62, and 84 and in Appendix S

18C This service, however, may have been performed in foreign vessels, provided the applicant can produce satisfactory testimonials as regards conduct and character, and is able to prove that the service has been in the required capacities, and that during such service he has held a Certificate of Competency of the rank required by the Regulations.

The following should be inserted after paragraph (9) of Note A in Appendix T of the Rules referred to above:—

(10) It has been decided that for the present all cases of failure to pass the form vision test due to short sight only, and not arising from loss of form sense accompanying colour-blindness induced by disease or injury, are to be submitted to the Port Officer for special consideration, and that the local Examiner must await his instructions before returning a candidate as failed.

(11) To enable the Examiner to distinguish whether the defective form vision is due to short sight only, or is induced by disease, boxes of pellets will be supplied, by which all candidates who fail to pass the form vision test are to be examined. Instructions for conducting this examination are given below.

(12) Should the candidate pass the pellet test, the form Examination 17B., together with the remarks of the Examiner, is to be forwarded to the Port Officer for his instructions as to whether the candidate is or is not to be regarded as having failed in form vision.

(13) Should, however, the candidate fail in the pellet test, thus indicating that the defective form sense is due to disease, &c., it will not be necessary to submit the case to the Port Officer, but the Examiner should report the candidate as having failed in form vision as at present, and in forwarding the usual papers a description of the colours of the pellets incorrectly selected as matches in the respective tests, with any remarks, should be given on the form Examination 17C., in the space allotted for the incorrect words.

Instructions for conducting the pellet test.

The pellet test is to be conducted in exactly the same manner as the test by Holmgren's wools (see note B. of the Rules, Appendix T).

(a) A box of pellets of the same colours as most of the skeins of wools will be supplied, amongst which will be test pellets, corresponding to the three test skeins and of the same shade and colour. These will not be marked, but are easily distinguishable.

(b) The pellets should be placed on a white plate and the first test pellet should then be placed a little distance from the box on another white plate. The candidate should be required to pick out and lay by the side of the test pellet, all pellets of the same colour. The same should be done with the second and third test pellets, and the examination should proceed in the same way as the wool test.

The following should be inserted after paragraph 40 of the Rules referred to above:—

40A. With reference to the service of midshipmen in the Mercantile Marine necessary to qualify for examination for a Second Mate's certificate, it has been decided that in the case of midshipmen who may not have been bound by indentures, as required by the foregoing paragraph, the whole of their service may notwithstanding be accepted as actual sea service under the Rules, and as counting towards the service required for a Second Mate's examination, subject to the conditions that in every case such service shall have been continuous, and that the applicant shall have served at sea four-fifths of the time claimed as midshipman (i.e., that he shall not have spent more than one-fifth of such time in Home Ports).

MARINE DEPARTMENT.

The 21st December 1896.

No. 149 — Notification.—Under section 10 of the Indian Merchant Shipping Act, 1850, the Lieutenant-Governor is pleased, with the sanction of the Governor-General in Council, to make the following revised rules (with appendices) for the conduct of examinations for Masters and Mates of Foreign-going Ships and Home Trade Ships and as to the qualifications to be required. These rules are in supersession of rules 56 to 185 of the Rules issued under notification No. 19 Marine, dated Calcutta, the 13th February 1895. Appendix B takes the place of the Appendix B attached to the Rules issued under that notification, while two new Appendices, U and V, should be inserted after Appendix T of the Rules.

The revised rules (with appendices) will take effect from the 1st of January 1898.

A. D. McARTHUR, Colonel, R.F.,
Secy. to the Govt. of Bengal.

ORDINARY CERTIFICATES OF COMPETENCY
FOR FOREIGN-GOING SHIPS.*Second Mate.*

56 *Examination in Navigation*—A Candidate for a Second Mate's Certificate will be required—

- (a) To write a legible hand and spell correctly; this will be tested by a quarter-of-an-hour's dictation.
- (b) To write a short definition of various astronomical and other terms and to draw a rough sketch or diagram to illustrate their meaning. *See supplementary and voc test in paras 171 to 173, and Appendix B.*
- (c) To show a competent knowledge of the first five rules of arithmetic and the use of logarithms.
- (d) To work a day's work complete, correcting the courses for leeway, deviation, and variation.
- (e) To find the latitude by the meridian altitude of the sun.
- (f) To work any practical problem in parallel sailing.
- (g) To find the true course and distance from one given position to another by Mercator's method; also the compass course, the variation and deviation being given.
- (h) To find the time of high water at a given port.
- (i) To find the true amplitude of the sun and the error of the compass therefrom; also the deviation, the variation being given.
- (j) To find the longitude by chronometer from altitude of the sun by the usual methods, computing the daily rate of chronometer from errors observed when required; also to find the true azimuth of the sun, and the error of the compass; and the deviation, the variation being given.
- (k) To find the true azimuth of the sun by the "Time Azimuth" tables; the error of the compass; also the deviation, the variation being given.
- (l) To find on either a "true" or "magnetic" chart* the course to steer and the distance from one given position to another, to find the ship's position on the chart from cross-bearings of two objects; from two bearings of the same object the course and distance run between taking the bearings being given; also the distance of the ship from the object at the time of taking the second bearing. *See Appendix G.*

* The terms "true" and "magnetic" are used throughout the Regulations for the sake of brevity and convenience to indicate charts that have compasses engraved upon them showing the true or magnetic points of the compass respectively.

He will be required to answer and pose questions on the following subjects:—

- (m.) The use and adjustments of the sextant, read off and on the arc, and the mode of finding the index error by both horizon and sun.
- (n) The International Code of Signals.
- (o.) The construction, use, and principle of the barometer, thermometer, and hydrometer.
- (p) Weights and measures.

57 *Examination in Seamanship*—He must understand and give satisfactory answers on the following subjects:—

- (a) The standing and running rigging of ships.
- (b) Bending, unbending, setting, reefing, taking in, and furling sail.
- (c) Sending masts and yards up and down, &c.
- (d) Management of a ship when under canvas.
- (e) Management of a ship's boat in heavy weather.
- (f) Dunnaging and stowing cargo, &c.
- (g) The Rule of the Road as regards both steamers and sailing vessels, their regulation lights and fog and sound signals.
- (h) The signals of distress, and the signals to be made by ships wanting a Pilot, and the liabilities and penalties incurred by the misuse of these signals.
- (i) The marking and use of the lead and log lines
- (j) The use and management of the rocket apparatus in the event of a vessel being stranded
- (k) Any questions of a like nature appertaining to the duties of a Second Mate that the Examiner may think necessary to put to him.
- (l) Also questions on the additional subjects which are specified in the Rules of Examination for Second Mates' Certificates of Competency for Foreign-going Steamships.

Only and First Mate

58 **ONLY MATE.**—A Candidate must be not less than nineteen years of age, and have served five years at sea

59 **FIRST MATE**—A Candidate must be not less than nineteen years of age, and have served five years at sea, of which

- (a) One year must have been in a capacity not lower than Fourth Mate of a Foreign-going Vessel whilst holding a Second Mate's Certificate for Foreign-going Vessels,

[If his service was as Third or Fourth Mate, proof will be required that he had during the whole year *charge of a Watch* (see para. 35).]

- (b) or one year and-a-half must have been in a capacity not lower than Only Mate in a Home Trade or Coasting Vessel whilst holding a Second Mate's Certificate for Foreign-going Vessels, or a Mate's Certificate for Home Trade Passenger Ships,
- (c) or one year must have been as Pilot with a First Class Pilot's Certificate (see para. 36).

60. *Examination in Navigation.*—A Candidate for an Only or First Mate's Certificate will be required—

- (a) To work out any *three* of the nautical problem prescribed for the Second Mates' examination that may be given him by the Examiner, in addition to the chart paper (f) and the oral subjects (m, n, o, p) prescribed for that grade
- (b) To compute the time at which a given star will be on the observer's meridian. [Occasionally by inspection.]
- (c) To describe where tables giving the names of the principal stars passing the meridian may be found.

- (d.) To describe where the meridian passage of the principal planets may be found
- (e.) To determine what bright stars will be within an hour or two (or more) on the observer's meridian at any given time, and whether to the east or the west of the meridian, or to the north or the south of the observer.
- (f.) To describe any maps or diagrams known to, and preferred by, the Candidate for further facilitating the recognition of the stars and planets
- (g.) To compute the approximate meridian altitude of one of the stars just found, for setting the sextant
- (h.) To find the latitude from the meridian altitude of the same star.
- (i.) To find the longitude by chronometer by altitude of a star
- (j.) To find the true azimuth of a star by the "Time Azimuth" tables, and get the deviation therefrom
- (k.) To find the latitude by ex meridian altitude of the sun or a star.
- (l.) To find the *line of position* and the true bearing of the sun, and the ship's position, by Sumner's method by projection.
- (m.) To answer certain questions, oral as well as written, relative to cyclones or revolving storms. See Appendix H.

He will be required to answer viva voce questions on the following subjects —

- (n.) How to keep a ship's log book
- (o.) How to calculate the capacity of a given bunker or hold
- (p.) How to calculate a freight and its commissions

61. *Examination in Seamanship.*—In addition to the qualifications required for a Second Mate's Certificate, an Only and First Mate will be required to show a knowledge of the following subjects —

- (a) Shifting large spars, rigging sheers, taking lower masts in and out
- (b) How to moor and unmoor ship; to keep a clean anchor; and to carry out an anchor.
- (c) How to manage a ship in stormy weather, and to cast a ship on a lee shore.
- (d) How to secure the masts in the event of accident to the bowsprit
- (e) How to rig purchases for getting heavy weights, anchors, machinery, &c, in or out.
- (f) How to dispose various kinds of cargo and weights in a stiff, and in a tender vessel
- (g) The ventilation of holds, and the stowage of explosives.
- (h) How to rig a sea anchor, and what means to employ to keep a vessel, disabled or unmanageable, out of the trough of the sea, and lessen her lee drift.
- (i) How to get a cast of the deep sea lead in heavy weather
- (j) Accidents, and how to deal with them
- (k) Any other questions appertaining to the duties of an Only and First Mate of a ship which the Examiner may think necessary to put to him
- (l) Also questions on the additional subjects which are specified in the Rules of Examination for Only and First Mate's Certificates of Competency for Foreign-going Steamships

Master

62. A Candidate must be not less than twenty-one years of age, and

- (a) he must have served six years at sea, of which one year must have been in a capacity not lower than Only Mate of a Foreign-going Vessel whilst

holding a Certificate not lower than an Only Mate's Certificate for Foreign-going Vessels, and, unless this service as officer was performed whilst holding a First Mate's Certificate for Foreign-going Vessels, he will also be required to prove the officer's service prescribed for that grade (para. 59);

- (b) *or*, he must have served six years at sea, of which one year and-a-half must have been in a capacity not lower than Only Mate of a Home Trade or Coasting Vessel whilst holding a Certificate not lower than an Only Mate's Certificate for Foreign-going Vessels, and, unless this service as officer was performed whilst holding a First Mate's Certificate for Foreign-going Vessels, he will also be required to prove the officer's service prescribed for that grade (para. 59);
- (c) *or*, he must have served six and-a-half years at sea, one year of which must have been in a capacity not lower than Second Mate of a Foreign-going Vessel whilst holding a First Mate's Certificate for Foreign-going Vessels, and one year and-a-half not lower than Third or Fourth Mate of a Foreign-going Vessel *in charge of a Watch* whilst holding a Second Mate's Certificate for Foreign-going Vessels;
- (d) *or*, he must have served nine years at sea in the Home or Coasting Trade; of which three years must have been as Master, *or* one year as Master and three years in a capacity not lower than that of Mate, *provided that in either case* he has served in such capacity for not less than one year with a Second Mate's Certificate for Foreign-going Vessels or a Master's Certificate for Home Trade Passenger Ships.

63 *Examination in Navigation.*—A Candidate for an Ordinary Master's Certificate will be required to work out any *three* of the nautical problems prescribed for an Only and First Mate (including *any three* of the problems for Second Mate) that may be given him by the Examiner, in addition to the chart paper, the cyclone paper, and the oral subjects prescribed for a Second, Only and First Mate's Certificate. He will also be required—

- (a) To find the latitude by the altitude of the Polar star at any time.
- (b) To find the latitude by the meridian altitude of the moon.
- (c) To find the magnetic bearing of any fixed object when at sea or at anchor from bearings of the object taken with the ship's head on equidistant compass points, and to compute the deviation therefrom; to construct a deviation curve upon a Napier's diagram which will be furnished by the Examiner, and show that he understands its practical application; to give satisfactory written *and oral* answers to certain practical questions as to the effect of the ship's iron upon the compasses, and the method of determining the deviation, and show how to compensate the deviation by magnets and soft iron by the aid of Beall's Compass Deviascope. *See Appendix I.*
- (d) To find on a chart the course to steer by compass in order to counteract the effect of a given current, and find the distance the ship will make good towards a given point in a given time; and to work out practically the correction to apply to soundings taken at a given time and place to compare with the depth marked on the chart. *See Appendix G.*

He will be required to answer viva voce questions on the following subjects. —

- (e.) The law as to the engagement and discharge and management of the crew, and the entries to be made in the official log
- (f.) How to prevent and check an outbreak of scurvy on board ship
- (g.) The law as to load line marks, and the entries and reports to be made respecting them
- (h.) Invoices, charter party, bills of lading, Lloyd's agent, nature of bottomry, bills of exchange, surveys, averages, &c
- (i.) The prevailing winds and currents of the globe.
- (j.) The trade routes.
- (k.) Tides.

64. *Examination in Seamanship.*—In addition to the qualifications required of a Second, Only and First Mate, an Ordinary Master will be required to show a knowledge of the following subjects.—

- (a) Construction of jury rudders for both wooden and iron vessels, also rafts.
- (b) Resources for the preservation of the ship's crew in the event of wreck
- (c) Management of ship in heavy weather.
- (d) Rescuing the crew of a disabled vessel.
- (e) Steps to be taken when a ship is on her beam ends, or in any danger or difficulty, or disabled or unmanageable and on a lee shore
- (f) Having a keel out.
- (g) How to proceed when placing a ship in dry dock, and directing repairs, and when putting into port in distress with damage to cargo and ship
- (h) Any other question of a like nature appertaining to the management of a ship which the Examiner may think it necessary to touch upon.
- (i.) Also questions on the additional subjects which are specified in the Rules of Examination for Masters' Certificates of Competency for Foreign-going Steamships.

CERTIFICATES OF COMPETENCY FOR FOREIGN-GOING FORE AND AFT-RIGGED VESSELS

65. The examinations for the grades of Second Mate, Only Mate, First Mate, and Master, of fore and aft-rigged vessels will be precisely the same as for the Ordinary Certificates, excepting that in seamanship a knowledge of the management of square rigged-vessels is not required

66. A Certificate "for Fore and Aft-rigged Vessels only" will not entitle the possessor to act in a capacity for which a Certificate is required in square-rigged vessels, amongst which are classed full-rigged ships, barques, brigs, barquentines, brigantines, and steamships carrying square sails

67. A Candidate possessing a Certificate "for Fore and Aft-rigged Vessels only," and desiring to be examined for an Ordinary Certificate, must prove that he has served at sea at least one year in a square-rigged sailing vessel, within the last five years, *unless* he has previously held an Ordinary Certificate of a lower grade.

CERTIFICATES OF COMPETENCY FOR FOREIGN-GOING STEAMSHIPS.

68. Certificate of Competency will be issued, subject to the examinations hereinafter described, for officers who have served in steamships, or who prove in course of examination that they are ignorant of the management of square-rigged sailing vessels, provided they are qualified as to service (see paras 75 and 78).

69 These Certificates will entitle the holders to go to sea as Masters or Mates of Foreign-going Steamships, but will not entitle the holders to go to sea as Masters or Mates of Foreign-going Sailing Ships.

There will be no distinction in respect of "Fore and Aft" and "Square-rigged" Steamships.

70 A Candidate possessing a Certificate for "Foreign-going Steamships only," and desiring to be examined for an Ordinary Certificate, must prove that he has served at sea at least one year in a square-rigged sailing vessel within the last five years, *unless* he has previously held an Ordinary Certificate of a lower grade

Second Mate.

71. A Candidate must be not less than seventeen years of age, and must have served four years at sea.

72. *Examination in Navigation*—The examination in navigation, &c., for a Second Mate's Certificate for Foreign-going Steamships will be precisely the same as that prescribed for an Ordinary Second Mate's Certificate

73. *Examination in Seamanship*.—The Candidate must understand and be able to give satisfactory answers as to the following subjects:—

- (a) The standing and running rigging of steamships.
- (b) Bending, unbending, setting, reefing, taking in, and furling sail
- (c) Sending masts and yards up and down, &c.
- (d) Seeing everything in readiness and clear for getting under way, and the precautions to be then observed with regard to engines, propeller, &c.
- (e) Management of a steamship when under canvas.
- (f) Management of a ship's boat in heavy weather
- (g) Dunning and stowing cargo, &c.
- (h) The Rule of the Road as regards both steamers and sailing vessels, their regulation lights and fog and sound signals
- (i) Signals of distress, and signals to be made by ships wanting a Pilot, and the liabilities and penalties incurred by the misuse of these signals
- (j) The marking and use of the lead and log lines.
- (k) The construction, use and action of the sluices, and of the water-ballast tanks
- (l) Engine-room telegraph, &c.
- (m) Use and management of the rocket apparatus in the event of a vessel being stranded.
- (n) Any other questions of a like nature appertaining to the duties of the Second Mate of a steamship which the Examiner may think necessary to put to him.

Only and First Mate.

74 ONLY MATE—The qualifications as to age and service are the same as for an Only Mate's Ordinary Certificate for a Foreign-going Ship (*see* para. 58), excepting that no service in square-rigged vessels is required

75 FIRST MATE—The qualifications as to age and service are the same as for a First Mate's Ordinary Certificate for a Foreign-going Ship (*see* para. 59), excepting that the service required as officer must have been in Steamships, and that no service in square rigged vessels is required.

76 *Examination in Navigation*—The examination in navigation, &c., for an Only and First Mate's Certificate for Foreign-going Steamships will be precisely the same as that prescribed for an Ordinary Only and First Mate's Certificate.

77. *Examination in Seamanship*.—In addition to the qualifications required for a Second Mate, an Only and First Mate will be required to show a knowledge of the following subjects:—

- (a.) Shifting large spars; rigging sheers; and taking lower masts in and out.

- (b.) How to moor and unmoor ship; keep a clear anchor; and to carry out an anchor.
- (c.) Management of a steamship in stormy weather
- (d.) How to rig purchases for getting heavy weights, anchors, machinery, &c, in and out.
- (e.) How to dispose various kinds of cargo and weights in a stiff, and in a tender vessel.
- (f.) Ventilation of holds, and the stowage of explosives.
- (g.) The effects of the screw race upon the rudder; and the effect produced on the direction of the head of the ship by going [ahead] [astern] with a [right] [left] handed screw when the rudder is [ported] [starboarded]; also, the effect of twin screws under the same conditions, and when going ahead with one and reversing the other, &c, &c
- (h.) How to rig a sea anchor, and what means to employ to keep a steamer, with her machinery disabled, out of the trough of the sea, and to lessen her lee drift
- (i.) How to turn a steamship short round.
- (j.) How to get a cast of the deep sea lead in heavy weather.
- (k.) Any other questions of a like nature appertaining to the duties of an Only and First Mate of a steamship which the Examiner may think necessary to put to him.

Master.

78 The qualifications as to age and service are the same as for a Master's Ordinary Certificate for a Foreign-going Ship (see para 62), excepting that the service required as officer must have been performed in steamships, and that no service in square-rigged vessels is required

79 *Examination in Navigation*—The examination in navigation, &c, for a Master's Certificate for Foreign-going Steamships will be precisely the same as that prescribed for an Ordinary Master's Certificate

80 *Examination in Seamanship*—In addition to the qualifications required for a Second, Only, and First Mate, a Master will be required to show a knowledge of the following subjects:—

- (a) Construction of rafts and jury rudders suitable for screw steamships
- (b.) The preservation of the ship's crew in the event of wreck
- (c.) Management of steamships in heavy weather
- (d.) Rescuing the crew of a disabled ship
- (e.) Steps to be taken when a vessel is on her beam ends, or disabled and on a lee shore.
- (f.) How to use steam appliances in the event of fire
- (g.) The best arrangement for towing vessels under different circumstances
- (h.) Placing ship in dry dock; directing repairs; and the mode of procedure when putting into port in distress with damage to cargo and ship
- (i.) Any other questions of a like nature appertaining to the management of a steamship which the Examiner may think it necessary to put to him.

CERTIFICATES OF COMPETENCY FOR HOME
TRADE PASSENGER SHIPS

81. **MATE.**—A Candidate must be not less than nineteen years of age, and have served four years at sea.

82 *Examination in Navigation, &c*—He must write a legible hand and spell correctly, and understand the first five rules of arithmetic, both simple and compound. He must be able to take a bearing by compass, and be conversant with the use of Mercator's Chart, and be able to find, on either a "true" or "magnetic" chart, the course

to steer, and the distance from one given position to another; to find the ship's position on the chart from cross bearings of two objects, from two bearings of the same object, the course and distance run between taking the bearings being given; and the distance of the ship from the object at the time of taking the second bearing. He must also pass an examination in the International Code of Signals.*

83. *Examination in Seamanship, &c.*—He must possess a thorough knowledge of the rule of the road as regards both steamers and sailing vessels, their regulation lights, and fog and sound signals†. He must be able to describe the signals of distress, and the signals to be made by ships wanting a pilot, and the liabilities and penalties incurred by the misuse of these signals,‡ also the use and management of the rocket apparatus in the event of his vessel being stranded. He must be able to mark and use the lead and log lines, to moor and unmoor a vessel, and to manage a ship's boat in heavy weather, &c., &c. He must also understand the construction, use, and action of the bulkhead sluices, the engine-room telegraph, &c., and to answer any other questions of a like nature appertaining to the duties of the Mate of a Home Trade Passenger Vessel which the Examiner may think proper to put to him.

84. § MASTER—A Candidate must be not less than twenty years of age and have served five years at sea, of which—

- (a) One year must have been in a capacity not lower than that of Only Mate of a Home Trade or Coasting Vessel, whilst holding a Mate's Certificate for Home Trade Passenger Ships, or an Only Mate's Certificate for Foreign going Vessels,
- (b) or, two and-a-half years must have been in a capacity not lower than Second Mate of a Home Trade or Coasting Vessel *in charge of a Watch* whilst holding a Mate's Certificate for Home Trade Passenger Ships, or a Second Mate's Certificate for Foreign-going Vessels (*see para. 35*);
- (c) or, one year must have been as Pilot with a First Class Pilot's Certificate (*see para. 36*).

85. *Examination in Navigation, &c.*—In addition to the qualifications required of a Mate of a Home Trade Passenger Ship, a Master will be required to find on a chart the course to steer by compass in order to counteract the effect of a given current and to find the distance the ship will make good towards a given point in a certain time, and to *work out practically* the correction to apply to soundings taken at a given time and place, to compare with the depth marked on the chart,|| &c. He will also be required to understand the use of the quadrant, to be able to observe with it, to read *off* and *on* the arc, and to find the index error by the horizon. He will also be required to find the latitude by a meridian altitude of the sun, and to give written answers (*vide also supplementary and vocæ test, page 38*) to certain practical questions on the subject of the deviation of the compass¶.

86. *Examination in Seamanship, &c.*—In addition to the qualifications required of a Mate of a Home Trade Passenger Ship, a Master must understand how to rig a sea anchor, and what means to apply to keep a steamship with machinery disabled out of the trough of the sea, &c.; how to get a cast of the lead in heavy weather, &c. He will be examined as to his resources for the preservation of the crew and passengers in the event of wreck and the steps to be taken if his vessel is disabled and drifting towards a lee shore, and will be required to answer any other questions appertaining to the management of a Home Trade Passenger Vessel which the Examiner may think necessary to put to him.

* See Appendix D.

† See Appendix E.

‡ See Appendix F.

§ For convenience of calculation the service required is stated in a tabular form in Appendix S.

|| See Appendix G.

¶ See Appendix M.

EXTRA AND HONORARY CERTIFICATES OF COMPETENCY.

Extra Master.

87 An Extra Master's Certificate will entitle the holder to go to sea as Master of any vessel, sailing or steam.

88. An EXTRA MASTER'S EXAMINATION is voluntary and intended for such persons as wish to prove their superior qualifications and are desirous of having Certificates of the highest grade granted by the Board of Trade.

89 The extra examination may take place when the Applicant is qualified to go up for examination for an Ordinary Master's Certificate, or at any time subsequent to his having passed as Master Ordinary.

90 *Examination in Navigation.*—The Candidate will be required to work out and show the construction of any four of the problems,* prescribed for the Ordinary Certificates, and to satisfy the Examiner in the oral subjects prescribed for those Certificates. He must also be prepared to be examined in any of the following subjects, showing the construction of all the problems† —

- (a) To work a lunar observation by either sun, star, or planet; and to compute the altitudes when they are not given.
- (b) To find the latitude from double altitudes of the sun or of a star.
- (c) To determine, from simultaneous observations of two different stars, the position of the ship, and the true bearing of the stars, by Sumner's method: The Candidate may either determine the four longitudes from the two assumed latitudes which will be given, or solve the questions in any other way he may choose.
- (d) To find the error of a chronometer from the altitude of the sun or of a star, observed with an artificial, or with the natural, horizon.
- (e) To explain clearly in writing the principles of (1) Great Circle sailing; (2) Windward Great Circle sailing, (3) Composite Great Circle sailing, and their advantages and disadvantages.
- (f) To show approximately on a terrestrial globe the Great Circle track and the distance from one given position to another; also the latitude and longitude of vertex; and the longitude from vertex; and to explain how the track can then be transferred to a Mercator's chart.
- (g) To determine the initial Great Circle course, and the distance, from one given position to another, the latitude and longitude of vertex, the longitude from vertex and the latitudes and longitudes through which the Great Circle will pass, laying the track, composite or otherwise, down on a Mercator's chart, and explaining briefly how the course and distance from one point to another on this track is then found. This problem may, subject to the decision of the Examiner, be solved either by calculation, or by any tables, graphic method, or Great Circle chart, known to and preferred by the Candidate, but it will usually be set so as to leave the choice of method to the Candidate.
- (h) To draw a figure, and write down the trigonometrical ratios.
- (i) Right-angled plane trigonometry; deducing and writing down the formula for each computation in the problem given.
- (j) Oblique-angled plane trigonometry, deducing and writing down the formula, or the rule, for each computation in the problem given.

* Either of the chart papers Exn. 9c or Exn. 9d may be given as one of the four problems.

† Two or three of these problems may usually be omitted, but all those set in the examination papers given to the Candidate must be worked.

- (k) To give Napier's rules for circular parts for the solution of right-angled spherical triangles, explaining clearly how the different angles and sides are considered in deducing the formulæ
- (l) Right-angled spherical trigonometry
- (m) The laws of the deviation of the compass in iron ships *See Appendix I.*
- (n) To construct a Mercator's chart
- (o) The law of storms. The Candidate to write a paper of what he knows of this subject,

He must be prepared to answer viva voce questions on the following subjects —

- (p) The leading principles of the construction of the sextant and of the vernier
- (q) The civil duties of a shipmaster, in which he will be expected to show a more extensive knowledge and aptness than a Candidate for an Ordinary Master's Certificate

91. The construction of the problems mentioned in paragraph 90 must be shown as follows:—

- (a) A circle should be drawn projected on the plane of the horizon—unless the problem can be solved better otherwise—and a correct figure drawn in it, the magnitude of the sides and angles being estimated approximately by the eye
- (b) The sides and angles used in solving the problem should be marked by distinguishing letters in the figure, and the Candidate should for each fresh computation write down clearly what is given and what he is required to find, together with the formula which he proposes to use
- (c) Opposite each quantity in the computation he should put the letters denoting the part of the triangle which it represents, writing 'comp' before the letters when the quantity is the complement of that part of the triangle.

Candidates will not be required to enter into the mathematical investigation of the rules and formulæ used in the solution of problems, involving oblique-angled spherical triangles, but credit will be given to any Candidate showing such knowledge. When, however, a problem or part of a problem is solved by right-angled spherical trigonometry, the simple process of deducing the formula from the figure, by Napier's rules for circular parts or other method, must be shown.

Where a problem is solved by right-angled plane trigonometry, the deduction of the formula for each of the computations in it must be shown.

The rule for finding the latitude by meridian altitude must be proved by the figure

92 *Examination in Seamanship*—In addition to the qualifications required of an Ordinary Master, the Extra Master will be expected to give satisfactory answers to any questions in practical seamanship that the Examiner may think proper to put to him

93 *Extra Master of a Foreign-going Steamships*—Extra Certificates for Steamships only will also be issued, subject to the examination hereinafter described to Officers who can show the necessary service in Steamships. The Certificates will be marked "For Steamships only," and will only entitle the holders to go to sea as Masters of *Steamships*.

94. The examination is open to all who are qualified to go up for a Master's Certificate for Foreign-going Steamships, or who have already obtained such a Certificate. It is open also to men who have failed in the examination for an Extra Master's Certificate to show the requisite knowledge of the management of square-rigged sailing vessels, provided they can prove the necessary amount of Officer's service in Steamships. (*See para. 132.*)

95. *Examination in Navigation.*—The examination in navigation for an Extra Master's Certificate for Steamships will be precisely the same as that prescribed for an Extra Master's Certificate.

96. *Examination in Seamanship.*—In addition to the qualifications required of a Master of a Foreign-going Steamship, the Extra Master will be expected to give satisfactory answers to any questions appertaining to the management of a steamship that the Examiner may think proper to put to him.

CERTIFICATES OF COMPETENCY AS MASTERS OF PLEASURE YACHTS

97. The examination is purely voluntary, and is to be confined to persons who command their own sea-going pleasure yachts. A Master of a yacht who is not also the sole owner, or who is under 21 years of age, is not eligible for examination.

98. Only one description of Certificate will be issued, whether the yacht is foreign-going or cruises within the home trade limits.

99. The Certificate will not entitle the holder to command any vessel except the pleasure yacht or yachts, of which he is at the time the sole registered owner.

100. Candidates are not required to have served any specified time afloat, as it is believed that their sea knowledge will be sufficiently tested by the examination they will have to pass in seamanship.

101. Testimonials of service need not be shown, but a candidate for examination will be required to produce a statutory declaration to the effect (1) that he is sole registered owner of the yacht; (2) that the yacht is sea-going, (3) that it is not to be used for trading purposes. He will also be required to fill up the form of application (Form F.N. 2), and pay the fee of Rs 24 at the Port office, as prescribed in paragraph 5 of the Regulations.

102. In all other respects the Regulations framed for the conduct of the examinations of Masters Ordinary will apply in these cases.

103. *Examination in Navigation, &c.*—He will be required to give in writing (*vide also supplementary viva voce test, paras. 171 to 173*) definitions of various astronomical and other terms used in navigation.* He must have a competent knowledge of the first five rules of arithmetic and the use of logarithms. He must be able to work a day's work complete, correcting the courses for deviation, leeway, and variation. He will be required to find the latitude by meridian altitude of the sun, and the difference of longitude from a given departure by parallel sailing, also to find the course and distance from one position to another by Mercator's method. He will be required to find the time of high water at a given port, to observe and calculate the amplitude of the sun, and to find the error of the ship's compass therefrom, and also the deviation, the variation being given. He must be able to find the daily rate of the chronometer from error observed, and to find the longitude from altitude of the sun by the usual methods. He will be required to find the true bearing of the sun, and the error of the ship's compass from an observed azimuth of the sun, both from an altitude and also from the "Time Azimuth Tables," and with the variation given compute the deviation; to find the latitude from a single altitude of the sun off the meridian, and also to ascertain the true bearing of the sun, &c., and the ship's position by Sumner's method by projection.† He must be able to compute the latitude from the meridian altitude of a star, he must be able to find the magnetic bearing from equidistant compass bearings of any fixed object when at sea, and compute the deviation therefrom. He must construct a deviation curve upon a "Napier's" diagram which will be furnished by the Examiner, and must understand the

* See Appendix B

† See Appendix N

practical application of the same, and give satisfactory written (*and oral*) answers to certain practical question on the effect of the ship's iron upon the compasses, and the method of determining the deviation, showing how to compensate same by magnets and soft iron, by aid of Beall's Compass Deviascope.* He will also be required to answer certain questions, in writing (*and orally*), relating to cyclones or revolving storms.† He must understand the use of the sextant with its adjustments, and be able to observe with it, and find the index error by the horizon, also by the sun, and read off and on the arc ‡ He must also be conversant with the use of Mercator's chart, and be able to find, on either a "true" or "magnetic" chart, § the course to steer and the distance from one given position to another; and find the ship's position on the chart from cross bearings of two objects, from two bearings of the same object, the course and distance run between taking the bearings being given; and the distance of ship from the object at the time of taking the second bearing. He will also be required to find the course to steer by compass in order to counteract the effect of a given current, and to find the distance the ship will make good towards a given point in a certain time, and to *work out practically* the correction to apply to soundings taken at a given time and place, to compare with the depth marked on the chart. He must also pass a satisfactory examination in the International Code of Signals."

104 *Examination in Seamanship, &c.*—He must give satisfactory answers as to his knowledge of making and taking in sail, and as to the management of a yacht under canvas in moderate and in stormy weather. He must have a thorough knowledge of the rule of the road at sea as regards both steamers and sailing vessels, ¶ their regulation lights, and fog and sound signals, and be able to describe the signals of distress, and the signals to be made by ships wanting a Pilot, and the liabilities and penalties incurred by the misuse of these signals.** He must also understand the use and management of the rocket apparatus in the event of his vessel being stranded. He must be able to mark and use the lead and log lines, to cast a vessel on a lee shore; to moor and unmoor a ship, to keep a clear anchor, and to carry out and anchor. He must know how to keep his vessel out of the trough of the sea in the event of accident, how to rig rafts and jury rudders, &c; and the steps to be taken if his vessel is disabled or unmanageable and drifting towards a lee shore, and as to his resources for the preservation of the crew in the event of wreck. He must also possess a knowledge of what he is required to do by the Merchant Shipping Acts, and a knowledge of the measures he should adopt for preventing and checking the outbreak of scurvy on board; and to answer any other questions relating to the management of a yacht (either steam or sailing) which the Examiner may think necessary to touch upon.

VOLUNTARY EXAMINATION IN THE LAWS OF THE DEVIATION OF THE COMPASSES OF IRON SHIPS.

105 Any person holding a Certificate of any grade, whether for the Foreign or Home Trade, or as Master of his own Pleasure Yacht, who wishes to pass a *voluntary* examination in the Syllabus†† of examination on the Laws of the Deviation of the Compasses of an Iron Ship, &c, can at any time be examined upon filling up the usual form of application, and paying to the Port Officer the fee of Rs. 12. If the Candidate passes the examination successfully, a note to that effect will be duly made upon the Certificate held by him.

* See Appendixes I and K.

† See Appendix H.

‡ See Appendix C.

§ See Appendix G.

¶ See Appendix D.

¶ See Appendix E.

** See Appendix F.

†† See Appendix L.

VOLUNTARY EXAMINATION IN STEAM.

106. These examinations are provided for the purpose of giving Masters and Mates who are possessed of Certificates of Competency an opportunity of undergoing a voluntary examination as to their practical knowledge of the use and working of the steam-engine. They are conducted on the premises, and under the superintendence, of the Port Officer at such times as he may appoint for the purpose; and the Examiners are selected by the Government from the Engineer Surveyors appointed under the Indian Steam Ships' Act, 1884.

107 Any person holding a certificate, of any grade, whether for the Foreign or Home Trade, or as Master of his own Pleasure Yacht, who desires to be examined in Steam must deliver to the Port Officer a statement in writing to that effect, upon the Form of Application (Exn 2), and the Applicant's Certificate of Competency must be delivered to the Port Officer along with his statement.

108 A fee of Rs 12 must be paid by the Applicant, and the Port Officer will thereupon inform him of the time and place at which he is to attend to be examined, and the examination will then and there proceed in the same manner as the other examinations. If the Applicant fails, his certificate will be at once returned to him.

109 If the Applicant passes, the Report (Exn. 14) and the Certificate of Competency, together with the Form (Exn 2), will be sent to the Government, the words "*Passed in Steam,*" with the date and place of examination, will then be entered on the Certificate and its counterpart, and the Certificate will be sent to the Port Officer and be delivered to the Applicant in the usual manner.

110 If the Applicant fails he may not present himself for re examination until the expiration of three months from the date of failure.

111 The examination is for the most part *ad vocem*, and extends to a general knowledge of the practical use and working of the steam-engine, and of the various valves, fittings, and pieces of machinery connected with it. Intricate theoretical questions on calculations of horsepower or areas of cylinders and valves, or any of the more difficult questions which appertain to steam-engines and boilers, will not be asked. The examination will in fact be confined to the duties which a Master of a steam-vessel may be called upon to perform in the case of the death, incapacity, or delinquency of the Engineer.

112 Examiners are to be careful in their examinations to satisfy themselves that Applicants really do know the names and uses of the various parts of engines and boilers and their connecting pipes, valves, cocks, &c. Practical knowledge, as distinguished from theories, abstruse calculations, and book learning, is to be the test of the Applicant's fitness to have his Certificate endorsed.

113 The Examiner should arrange to conduct part of the examination in the engine-room of a Steamship, unless from circumstances he finds it impossible to do so, and if an opportunity offer, the Applicant should be permitted, under the guidance of the Examiner, to start and stop the engine of some vessel which may have her steam up.

114 The Examiner, in sending in his report of examinations of Masters and Mates in steam, should state where the examination has been held.

115 Candidates will be required to give written answers to sixteen out of twenty questions taken from a book of Elementary Questions published by the Government.* These questions will be altered from time to time without notice. The twenty questions are not to be difficult, theoretical, or book questions, but are to be such as any man of ordinary capacity who has any *practical knowledge of the use and working of the steam-engine* ought to answer.

* See Appendix O.

116. These questions, with the Candidates' answers should be sent to the Government, with the reports, after each examination.

117. These answers will also assist in enabling the Government to decide any question that may hereafter arise in cases where it is alleged that Applicants have been improperly passed, or improperly rejected.

118. If a Candidate refers to any book or paper or memorandum, or obtains information from another Candidate during the examination, he will be treated as having failed, will forfeit his fee, and will not be allowed to be re-examined for a period of three months.

119. The Examiners will report, in the case of failure, the nature of the question or questions that decided the failure, or the point in the management of the engine in which the Candidate was deficient.

120. There is nothing in the Regulations requiring that Applicants for the voluntary examination shall have served on board Steamships; all that is required is that they shall have a "practical knowledge." Examiners will of course not fail to appreciate the fact, when passing Applicants, that practical knowledge is best gained in the engine-room; and the examination of an Officer who does not produce official evidence of service in Steamships, and of experience of engines, must necessarily be more searching than in the case of one who produces evidence of such service and experience.

PROVISIONAL CERTIFICATES AS FIRST MATE AND MASTER FOR ROYAL NAVAL RESERVE PURPOSES ONLY

121. Provisional Certificates (either Ordinary, or for Foreign-going Steamships, according to the Applicant's qualifications) are granted on the conditions stated below to any officer of the Mercantile Marine who may require such a Certificate to qualify him for appointment to or promotion in the Royal Naval Reserve. They are only available for purposes of the Royal Naval Reserve, and do not authorise the holders to go to sea as First Mate or Master.

122. Candidates for these Certificates must apply to the Port Officer of Calcutta, fill up the form of application (Exn. 2), and pay the usual fee. They must also produce their First or Second Mate's Certificate of Competency, and an authority from the Government or the Admiral Superintendent of Royal Naval Reserves before they can be examined. This authority should be obtained through the Port Officer.

123. *Provisional Certificates as First Mate.*—Provisional Certificates as First Mate are granted to Candidates who can prove that they have served five years at sea, and that during one year of this period they have served in a capacity not lower than Fourth Mate while holding a Second Mate's Certificate. They must pass the usual examination for First Mate and pay the usual fee. These Certificates are exchangeable for the proper formal Certificate as First Mate, without further payment or examination, on production to the Port Officer of satisfactory proofs that the holder has served at sea not less than 12 months in a Foreign-going Vessel in a capacity not lower than Fourth Mate, and that during the whole of that period he has been in regular charge of a Watch and in possession of a proper formal Certificate of Competency as Second Mate.

124. *Provisional Certificates as Master.*—Provisional Certificates as Master are granted to Candidates who can prove not less than six and-a-half years' service at sea, and who pass the usual examination for Master, and pay the usual fee. Of this service two and-a-half years must have been served in a capacity not lower than Fourth Mate of an Ocean-going Steamship, during the last 12 months of which the Applicant must have been in possession of a proper

formal First Mate's Certificate of Competency (*not* a Provisional Certificate) authorising the holder to go to sea as First Mate. These Certificates are exchangeable for the proper formal Certificate as Master, without further payment or examination, on production to the Port Officer of satisfactory proofs that the holder has served at sea not less than two and-a-half years in a Foreign-going Vessel *in charge of a Watch* in a capacity not lower than Fourth Mate, and that during 12 months of this period he has served as Second Mate while in possession of a proper formal Certificate of Competency as First Mate.

FAILURE IN EXAMINATION.

125 In all cases of failure the Candidate must be examined anew. If a Candidate fails in Seamanship he will not be re-examined until after a lapse of six months. Whether the whole or part of this period must be served at sea must depend upon the subjects in Seamanship in which the Candidate failed, but the amount of further sea service to be required will be left to the discretion of the Port Officer, Calcutta.

126 The Examiner, in making his Report on Form Exn. 14, should state what amount, if any, of further sea service the Candidate must perform, and he should also insert this information under Division H in Form Exn. 2.

127 If a Candidate fails three times in Navigation within three months, he will not be re-examined until after a lapse of THREE MONTHS from the date of the last failure.

128 *Candidates for an Extra Master's Certificate, or for an Extra Master's Certificate for Steamships, will not be allowed to present themselves for examination more than three times within a period of twelve months.*

129 If a Candidate has failed in his examination, but the subjects in which he has failed are not included in the subjects required for a Certificate of a lower grade, he may, if he desires it, receive a Certificate of such lower grade.

130 No part, however, of the fee he has paid will be returned to him, and on presenting himself, when qualified, for re-examination for the higher grade of Certificate, he will be required to pay a further full fee.

131 If a Candidate fails for bad spelling or writing, he will not be re-examined until after a lapse of at least three months. If he fails for ignorance of the English language, he will not be re-examined until after a lapse of six months.

132. If a Candidate fails in Seamanship so far as regards the management of square-rigged Sailing Vessels, in his examination for an Ordinary Certificate, he may, if qualified as to service, without further formal application or further payment of fee, proceed with the examination for a Certificate of Competency for Foreign-going Steamships, or for Fore and Aft-rigged Vessels. And if a Candidate fails in the same manner in his examination for an Extra Master's Certificate, he may, under the same conditions as above, proceed with the examination for an Extra Certificate for Steamships.

FEEES FOR EXAMINATION

133. Candidates for examination, in making their application on Form Exn. 2, will be required to pay the examination fee before any step is taken in the way of inquiring into their services or testing their qualifications, &c. Should it be found that their service is not sufficient to entitle them to be examined, or should their testimonials be unsatisfactory, or should they from any other cause, except failure to pass the Colour Vision test (*see* Appendix T) not be examined, no part of the fee will be returned to them, but when they have fulfilled the requisite service, or are able to produce satisfactory testimonials, as the case may be, they will be allowed to again present themselves for examination for a Certificate of the same grade without paying any further fee.

134. The fee for examination must be paid to the Port Officer in the cash office. In any case in which a Candidate offers money to any other officer than the Port Officer or in any place but in the cash office, the Candidate so offering money will be regarded as having committed an act of misconduct, and will be rejected, and not allowed to be again examined for twelve months either at the port where the offence was committed, or at any other port.

135. If a Candidate fails in his examination, no part of the fee will be returned to him.

The fees are as follows:—

FOR "FOREIGN-GOING SHIPS"

	Rs.
Second Mate . . .	12
* First and Only Mate, if previously possessing an inferior Certificate, either granted by the Board of Trade, or by the Government of a British possession under section 8 of the <i>Merchant Shipping (Colonial) Act, 1869</i> . . .	6
If not . . .	12
Master . . .	24
Where a Candidate is in possession of a Certificate for Fore and Aft-rigged Vessels, and requires an Ordinary or a Steamship Certificate of the same grade; or where a Candidate is in possession of a Steamship Certificate, and requires an Ordinary Certificate of the same grade . . .	Half the usual fee
Master Extra, if possessing an Ordinary Master's Certificate, or Master Extra for Steamships only, if possessing a Master's Certificate for Steamships only; first attempt . . .	Nil
Master Extra, or Master Extra for Steamships only, for every subsequent attempt . . .	Rs. 12*
Where a Candidate is in possession of a Certificate for Foreign-going Ships, not granted under the <i>Merchant Shipping (Colonial) Act, 1869</i> , or section 102 of the <i>Merchant Shipping Act, 1894</i> , or of a Provisional Certificate of qualification obtained after examination on board one of Her Majesty's Ships; for an Imperial Certificate of same grade, for first attempt . . .	No fee.
Every subsequent attempt . . .	Usual fee.

FOR "HOME TRADE PASSENGER SHIPS."

	Rs.
Mate . . .	6
Master . . .	12

FOR VOLUNTARY EXAMINATION IN STEAM.

Any Master or Mate holding a Certificate of any grade, whether for the Foreign or Home Trade, or as Master of his own Pleasure Yacht . . . 12

* If the examination for the Extra Master's Certificate takes place at the same time as the examination for the Ordinary Master's Certificate, the usual fee for the Ordinary Master's Certificate must be paid, though no fee will be charged for the Extra Master's Examination on the first attempt. On all subsequent attempts the fee of Rs. 12 will be charged for the Extra Master's examination in addition to any further charge which may have been incurred through failure to pass the Ordinary Master's examination. The same rule as to fees also applies to the examination for Extra Master for Steamships only when taking place at the same time as that for Master for Steamships only.

FOR VOLUNTARY EXAMINATION IN DEVIATION
OF THE COMPASS.

	Rs.
Any Master or Mate holding a Certificate of any grade, whether for the Foreign or Home Trade, or as Master of his own Pleasure Yacht ...	12

FOR "PLEASURE YACHTS."

Master	24
------------	-----	----

NOTE.—No abatement will be made in the fee charged to a Candidate for a Certificate for Foreign-going Ships in consequence of his possessing a Master's or Mate's Certificate for Home Trade Passenger Ships

GENERAL INSTRUCTIONS TO EXAMINERS AND
CANDIDATES

136 All instruments necessary for use in the examinations are supplied by the Government.

137. The examination papers of Candidates must in all cases be sent to the Port Officer, Calcutta, for his approval, together with the Report of the Examination on the Form Exn. 14. Should the envelope containing the examination papers appear to have been opened or in any way tampered with, the Examiner should, if he thinks it necessary, defer the examination until the following day. In the event of any case of this kind occurring, a full report of the circumstances, and of the steps taken in the matter, should be immediately forwarded to the Port Officer, Calcutta.

138 A Candidate will not be allowed to undergo Examination twice in the same week, unless, under very special and urgent circumstances, the Port Officer should see fit to relax this rule. In that case a special set of problems should be supplied to the Candidate.

139. Before commencing the examination, the tables or desks must be cleared of all scraps of paper or books that are not used in the examination, and care should be taken that the Candidates do not bring into the examination room any book or paper of any description whatever. No person should be allowed in the room during the time of the examination, other than those whose duties require them to be present.

140 No instructors will be allowed on the premises.

141. Candidates will under no pretence whatever be allowed to leave the premises while the examination is proceeding. If a Candidate has occasion to visit the retiring room, he will only be allowed to do so on the completion of the paper on which he may be engaged.

142. Candidates should be so placed as to prevent one copying from the other, and no communication whatever between the Candidates should be allowed.

143. A sheet of blotting paper should be issued to each Candidate with the first examination paper, and it must be returned to the Examiner when the last paper is completed each day. The Examiner will be careful to see that the blotting paper has not been used by the Candidate in solving his problems, or for conveying information to other Candidates.

144. The examination papers should be issued to the Candidates in half sheets only and one at a time. This will prevent a Candidate from spreading out the sheets on the table so as to enable his nearest neighbour to look over the problems. It will also enable the Examiner to look over and report upon the work on one half sheet, while the Candidate is at work upon another, and so on. When the errors are not too numerous, the incorrect problems may be returned to the Candidate for correction, but in no case should the errors be pointed out by the Examiner, neither should any marks be made which would indicate how far or to what extent the work is correct. *The incorrect problems should not, however, be returned to the Candidate for correction a second time, and should more than one of the problems—or two if the errors are only slight—be still incorrect, this would involve a*

failure. It must be understood, however, that the day's work, latitude by meridian altitude of sun and star, chronometer problem by sun and star, and the Summer problem must always be correct.

145. When, from the large number of the Candidates, it may sometimes be found impossible to look over the work on the day of examination during the office hours, an hour in the morning of the following day may be allotted for the purpose of correcting the problems, but in no case should a Candidate have his problem returned to him for correction after he has made the second attempt.

146. In the examinations for Certificates as Extra Master and Extra Master of a Steamship the Candidate will be required to complete the whole of his problems and other papers, and they will then be dealt with by the Examiner on their merits as a whole on the mark system. If the Candidate does not obtain 85 per cent. of the total number of marks allotted for the papers, he will be declared to have failed. See Appendix V.

147. The vivâ voce part of the examination for the Extra Certificates will be conducted on the same principle as at present.

148. The examination will commence with a quarter of an hour's dictation to test handwriting and spelling. This, however, is only to be given to those Candidates who present themselves for examination for the first time for a Foreign-going Certificate. The spelling must be reasonably and fairly good, and the writing clear and legible. The spelling and writing of all Candidates must be satisfactory, and in cases where there is any doubt about the ability of a Candidate to spell correctly he should be specially tested by dictation as at present.

149. The paper of definitions (see Appendix B) is only for those Candidates who present themselves for examination for the first time for a Foreign-going Certificate.

150. In using this paper, the Examiner will place a mark against the questions which he wishes to be answered, not less than ten questions being so selected. The Candidate will then write against the questions so marked his definition of the terms in a clear and legible hand, so as to prevent the possibility of any letter being mistaken, and also draw a rough sketch or diagram opposite to each of the questions to which he has given written answers, in further illustration of its meaning. The supplementary vivâ voce test should also be applied as usual.

151. In the questions on the Deviation of the Compass (see Appendix G), the Examiner will mark at least twelve of the questions, including the problems. The selected questions will be varied frequently, and no two Candidates will have precisely the same questions. The Candidate will be furnished with sheets of the blank ruled paper which is supplied for the purpose, with instructions that he is to write only on one side of the paper, and to answer in a clear and legible hand each of the question against which a mark is placed and to commence each answer by writing down the number of the question to which it relates in the margin. In answering Question 39 on the tentative method of compass adjustment, the Candidate will be tested by Beall's Compass Deviascope, and it will not therefore be necessary for him to give the written answer and sketches. A Candidate for an Extra Master's Certificate will not be required to answer the questions on the Deviation of the Compass on Form Exn. 7, but will be examined by the Syllabus (see Appendix E) and "Compass Deviascope."

152. The examination on the Barometer, Thermometer, and Hydrometer, Prevailing winds and currents of the globe, Trade routes and Tides, will for the present be conducted orally, and the questions asked by the Examiner, which will be constantly varied, will be confined to and based on the information given in the text-books mentioned in Appendix U, and Candidates will be required to have a fair and intelligent knowledge of the contents of those books.

153. Particular attention should be paid to the adjustments of the sextant, the examination in which subject will be conducted orally and practically. Every Candidate will be examined practically as to his knowledge of the adjustments, and the use

of the various screws; he must be able to read correctly off the arc, a supposed index error being given by the Examiner on additive, as well as reading on the arc in the usual way; he must also be able to find the index error both by the horizon and by the sun.

154. All outstanding or minor corrections should appear in the margin of each problem paper, and on the chart papers, and the papers of the Candidate will not be considered complete without these corrections.

155. In the *vis à vis* examination a reasonable time should be allowed for the Candidate to give his answers. No assistance should be given or leading question put.

156. Examiners should bear in mind that the problems to be solved are required as tests, and for the purposes of an examination, and not for sea-going or practical purposes alone.

157. The Candidates will be allowed to work out the various problems according to the method and the tables they have been accustomed to use.

158. All the problems given in the examinations, both for the Ordinary and Extra Candidates, will be constantly varied; and the mode of stating the times in the astronomical problems, and the mode of wording and setting these and all other problems will be varied in every possible way, so as to ensure that the Candidate has a proper knowledge of the subject.

Time allowed for the Papers

159. Candidates for Second Mates' Ordinary Certificates of Competency must complete the whole of their Examination in Navigation in *nine hours*, including the time allowed for writing the definitions on Form Exn 4a, the paper on the chart, and the correction of all errors and oversights, but *the quarter of an hour's dictation and all the nautical problems (excepting chart)* must be completed within six hours, and without the Candidates leaving the premises during that period.

160. Candidates for Only and First Mates' Ordinary Certificates must complete the whole of their Examination in Navigation in *twelve hours*,* including the time allowed for the papers on the chart; cyclones or revolving storms; and for the correction of all errors and oversights, but the nautical problems *up to and including (k) of the syllabus*, prescribed for Only and First Mate, must be completed within six hours, and without the Candidates leaving the premises during that period.

161. Candidates for Ordinary Certificates as Masters must complete the whole of their Examination in Navigation in fifteen hours including the time allowed for the papers on the chart; compass deviation; cyclones or revolving storms, and for the correction of all errors and oversights; but the problems *up to and including (k) of the syllabus prescribed for Only and First Mate*, must be completed within six hours, and without the Candidates leaving the premises during that period.

162. Candidates, after finishing the problems required in the various grades on the first day of examination, should proceed, until the end of that day, with such subjects as the definition, chart, *questions relating to cyclones, compass deviation, &c*

163. The Sumner Problem must on no account be given out to any of the Candidates on the first day of the examination, but should form the commencement of the Candidates' work on the second day, and on completion of this problem the Candidates for Masters' Certificates should proceed with the problems (a) (b) (c) of the *Syllabus for that Grade*.

164. Candidates for Foreign-going Steamships Certificates of Competency will be allowed the same amount of time to complete their navigation work as is allowed in the case of Ordinary Certificates.

* A Candidate who is not applying for a Second Mate's Certificate and who has not previously passed an examination may be allowed the time allotted to dictation and writing the definitions on Form Exn. 4a, in addition to the above.

165. Candidates for Certificates as Masters of Pleasure Yachts will be allowed the same amount of time for completing their Examination as the Candidates for Ordinary Masters' Certificates.

166. *Extra Masters' Certificates.*—The time allowed to Candidates for Certificates as Extra Master and Extra Master of a Steamship to complete the whole of the problems and writings, including the compass syllabus, must not exceed 26 hours.

167. *Deviation of the Compass.*—A period not exceeding eleven hours will be allowed to Candidates for the completion of the whole of the examination in the Syllabus, including the correction of all errors and oversights in both the problems and writings.

168. Punctually at the expiration of the prescribed time all papers will be collected whether completed or not. If the papers are not completed, the Candidate will be declared to have failed, unless the Port Officer should see fit to lengthen the period in any special case. Where such an extension of time is granted, the case must be fully reported to the Government on the Form Exn. 14. It should be noted that the periods prescribed in the foregoing paragraphs are not intended to include the time occupied by the *viva voce* part of the examination:

169. It is anticipated that but few of the Candidates for Certificates of Competency will require the whole of the time herein allowed for completing their examination in Navigation, but ample time has been allowed, so that Candidates may perform their work in a careful, clear, and legible manner.

170. Degree of precision required in the solution of the problems:—

- (a) Candidates are expected to work out their answers to all problems where the answer required is a latitude, longitude, or distance within $1\frac{1}{2}'$ of position from a correct result: in finding the ship's position by Sumner's method a margin of $2\frac{1}{2}'$ will be allowed.
- (b) In such problems as the "Amplitude" and "Alt-Azimuth," where the bearing, deviations, &c., only are required, a margin of $3'$ or $4'$ from a correct result will be sufficiently accurate.
- (c) In no problem is the Candidate for an Ordinary Certificate required by the Regulations to correct for *second differences* in taking out the quantities from the Nautical Almanac.
- (d) In solving the Time Azimuth problems an answer not exceeding half a degree from the exact result will be sufficiently near. But in all cases the actual latitude, declination, and time used, together with the exact bearing from the North or South as given in the tables, must be clearly shown by the Candidate on his papers.
- (e) In computing the time at which a given star will be on the observer's meridian, and the name of the stars near the meridian (paragraphs (b) and (c) of Syllabus for Only and First Mates' examination), and approximation only is required, and it will be sufficiently precise if the Candidate works throughout with the nearest minute of time. In computing the approximate meridian altitude of a star, paragraph (g), working throughout with the nearest minute of arc will also be sufficiently close.
- (f) In interpolating for the correct deviation to be applied in solving the Chart questions, it will usually be sufficient if the Candidate works throughout with the nearest degree of deviation taken from the Deviation Card; and even in cases where the deviations may vary but little, the nearest half degree used throughout will be sufficiently precise. It is not necessary that the

Candidate should waste his time in solving the course to odd minutes, as is sometimes done.

(g.) In calculating the correction to apply to Soundings, the Candidate is not required to work to the exact inch, as is sometimes done. It will be sufficient if he brings his answer within half a foot or so of a precise result.

(h.) In the Lunar problem a difference of 3' in the longitude from the correct answer as deduced by a rigorous method by spherical trigonometry will be allowed.

It must be clearly understood in reading the foregoing Instructions as to the precision required, that they only apply when the work of the Candidate is correct in principle.

Supplementary and voco Examination on the Written Papers.

171 Candidates for Certificates of Competency are not only expected to give correct written answers to the questions set in the papers, but are also expected to possess an intelligent knowledge of the various subjects prescribed in the Regulations.

172. The Examiner will therefore put a few *and voco* questions to the Candidate as the papers are brought up for inspection or during the course of the examination. The questions, which will be based on the papers set, will be such that the Examiner may satisfy himself that the Candidate possesses a real knowledge of what he has written.

173 When an Examiner finds it necessary to fail a Candidate in this supplementary *and voco* tests, a statement to that effect will be made on the Candidate's examination papers before they are forwarded to the Port Officer, Calcutta.

SPECIAL NOTICE TO CANDIDATES.

174. Candidates are required to appear at the examination room punctually at the time appointed.

175. Candidates are prohibited from bringing into the examination room, books or papers of any kind whatever. The slightest infringement of this regulation will subject the offender to all the penalties of a failure, and he will not be allowed to present himself for re-examination for a period of three months.

176. In the event of any Candidate being detected in defacing, blotting, writing in, or otherwise injuring any book or books or any of the forms belonging to the Board, the papers of such Candidate will be detained until the book or books so defaced are replaced by him. He will not, however, be at liberty to remove the damaged book, which will still remain the property of the Board. He will further subject himself to all the penalties of a failure.

177. In the event of any Candidate being discovered referring to any book or paper, or copying from another, or affording any assistance or giving any information to another, or communicating in any way with another, during the time of examination, or copying any part of the problem for the purpose of taking them out of the examination room, he will subject himself to all the penalties of a failure, and will not be allowed to be examined for a period of six months.

178. No Candidate will be allowed to work out his problems on a slate or on waste paper, or to write on the blotting paper supplied for his use in the examination. Violation of this rule will subject the Candidate to all the penalties of a failure.

179 No Candidate will be permitted to leave the examination room without permission and until he has given up the

paper on which he is engaged. Violation of this rule will subject the Candidate to all the penalties of a failure.

180 Candidates will find it more convenient, both during the examination and at sea, to correct the declination and other elements from the Nautical Almanac by the hourly differences which have been given in that work; they will thereby render themselves independent of any proportional or logarithmic table for that purpose.

181 The corrections by inspection of tables given in some of the works on navigation, *e.g.*, Tables IX, XI, and XXI in Norie's Epitome, will not be allowed; every correction must appear on the papers of the Candidates.

182. Perfect silence is to be preserved in the examination room.

183 Any Candidate violating any of the regulations, or being guilty of insolence to the Examiner, or of disorderly or improper conduct in or about the room, will render himself liable to the postponement of his examination, or if he has passed, to the detention of his Certificate for such period as the Government may direct.

VOLUNTARY EXAMINATION IN STEAM AND ELECTRICITY.

184 *On and after the 1st January 1898, Candidates for the voluntary examination in steam will be required to show a practical knowledge of electricity as applied on board ship*

* * * * *

CERTIFICATE OF SERVICE.

186. An officer who has served as either Master or Mate in a British Merchant Ship before the 1st January 1851; also an Officer who has attained or attains the rank of Lieutenant, Master, Passed Mate, or Second Master, or any higher rank in the service of Her Majesty or of the late East India Company, is entitled to a Certificate of Service as Master or Mate, and to serve as Master or Mate of a British Merchant Ship, not being a Home Trade Passenger Ship.

By an Order in Council of the 16th April 1861 the rank of Sub-Lieutenant was substituted for that of Passed Mate, and by Order in Council of the 25th June 1867 the title of Master and Second Master were altered to those of Navigating Lieutenant and Navigating Sub-Lieutenant respectively.

187 An Officer who has served as Master or Mate in a Home Trade Passenger Ship before the 1st January 1854, is entitled to a Certificate of Service as Master or Mate, and to serve in those capacities again.

188 Applications for Certificates of Service must be made on a printed form to be obtained free of charge of the Registrar-General of Seamen, Custom House, London, E.C., or of the Superintendent of any Mercantile Marine Office.

189 Applications for Certificates of Service by Officers of the Royal Navy can only be entertained on the conditions stated in paragraphs 42 to 49.

190 The holder of a Certificate for Foreign-going Ships, not granted under the "Merchant Shipping (Colonial) Act," 1869, or section 102 of the Merchant Shipping Act, 1894, desirous of being examined for an Imperial Certificate of the same grade, must prove that he has performed the amount of service required by the Regulations to entitle him to hold such a certificate. He must also produce satisfactory testimonials as to character for at least the last 12 months immediately preceding his application to be examined.

APPENDIX B.

The Candidate is expected to write a short definition or answer accompanied by a rough sketch or diagram in the case of so many of the following questions as may be marked with a cross by the Examiner. The Examiner will mark not less than ten. The writing should be clear, and the spelling must not be disregarded.

- | | |
|--|--|
| 1 Great circles | 47. Polar distance |
| 2 Vertex of a great circle. | 48 Right ascension. |
| 3 Small circles | 49 Dip or depression of the horizon |
| 4 Vertical circles | 50 Refraction |
| 5 Right angle | 51 Parallax |
| 6 Oblique angle | 52 Semi diameter |
| 7 Obtuse angle | 53 Augmentation of moon's semi diameter |
| 8 Spherical angle | 54 Magnetic Meridian |
| 9 Arc | 55 True course of a ship |
| 10 Complement of an arc or angle | 56 Magnetic course |
| 11 Supplement of ditto | 57 Compass course |
| 12 The equator | 58 Variation of the compass |
| 13 The poles | 59 Deviation of the compass, and how it is caused |
| 14 A meridian | 60 The error of the compass. |
| 15 The ecliptic | 61 Leeway |
| 16 The tropics | 62 Does the variation change with time? |
| 17 Equinoctial | 63 Is the variation the same all over the world? |
| 18 The visible horizon | 64 Where do you find the variation? |
| 19 The sensible horizon | 65 Does the deviation change; if so, when? |
| 20 The rational horizon | 66 Where is the North magnetic pole situated? |
| 21 Artificial horizon and its use | 67 Where is the South magnetic pole situated? |
| 22 Parallels of latitude | 68 Should the compass needle point to the magnetic or the true pole of the earth? |
| 23 Difference of latitude | 69 When is the altitude of an object most seriously affected by refraction? |
| 24 Meridional parts | 70 Where is the Pole star situated? |
| 25 Longitude | 71 Which is the most favourable time for determining the hour angle of a celestial body, and thence the longitude, and state the reason why? |
| 26 Difference of longitude | 72 Describe the construction of a mariner's compass |
| 27 Departure | 73 Describe an Azimuth compass. |
| 28 Nautical mile. | 74 Describe a Pelorus, and its use |
| 29 Rhumb line | 75 Describe a Chronometer, and its use. |
| 30 Prime meridian | |
| 31 First point of Aries | |
| 32. Prime vertical | |
| 33. Civil time | |
| 34 Astronomical time | |
| 35 Sidereal time | |
| 36 Mean time | |
| 37 Apparent time | |
| 38. Equation of time, why it is used, and when it is at a maximum, and when at a minimum | |
| 39. Hour angle of a celestial object | |
| 40 Observed altitude. | |
| 41 Apparent altitude | |
| 42 True altitude. | |
| 43 Zenith distance | |
| 44 Azimuth | |
| 45 Amplitude | |
| 46 Declination | |

APPENDIX U

TEXT-BOOKS to be used in the examinations.—

For Barometer — "A Barometer Manual for the use of Seamen" (published by the authority of the Meteorological Council)

For Thermometer and Hydrometer —

(The preparation of a Manual is at present under consideration)

For Prevailing Winds and Currents of the Globe — "The Principal Winds and Currents of the Globe, &c," compiled from the various Admiralty sailing directions and weather charts, for use in the instruction of Naval Officers (now under revision)

For Trade Routes — "Ocean Passages," compiled from the various Admiralty Sailing Directions, by the Hydrographic Office (will be shortly issued)

For Tides — "Tide Tables for the British and Irish Ports," published annually by the Admiralty.

APPENDIX V

LIST OF MARKS obtainable in the Extra Examinations

- (a.) Marks will be awarded according to the degree of precision with which a Candidate does his work, no marks being given for any problem, &c., in which the Candidate is wrong in principle.

APPENDIX V—concluded.

- (b) An incorrect figure, or incorrect formula, will involve the loss of one-third of the marks allotted for the problem in question.
- (c) Marks, at the discretion of the Examiner, but not in any case to exceed 50, will be given for orderly working and general method, &c
- (d) Marks at the discretion of the Examiner, but not in any case to exceed 50, will be given for the supplementary *vide voce* test on problems and written answers.
- (e) Thirty marks are allotted to each of the following "Ordinary" problems. Only four will be set —

Multiplication by logarithms.
 Division by logarithms.
 Day's work
 Latitude by meridian altitude of sun.
 Parallel sailing.
 Mercator's sailing
 Time of high water.
 Amplitude by sun
 Longitude by chronometer and altitude azimuth by sun
 Time azimuth by sun
 Finding meridian passage of star
 Tables for finding stars' meridian passage.
 Meridian passage and altitude of planets
 Where meridian passage of planets can be found.
 Finding name of stars near the meridian
 Maps, &c, for finding stars
 Computing approximate meridian altitude of star.
 Latitude by meridian altitude of star
 Longitude by chronometer by a star.
 Time azimuth by a star
 Latitude by ex-meridian altitude of sun or star.
 Sumner problem by sun
 Latitude by altitude of Polar star
 Latitude by meridian altitude of moon.
 Chart paper Exn 9C
 Chart paper Exn 9D.

- (f) The numbers opposite the following problems represent the full marks obtainable —

Lunar problem by sun, star, or planet	..	50
Latitude by double altitudes sun or star	..	30
Finding position, &c, by simultaneous altitudes of two stars	..	40
Error of chronometer with artificial horizon, &c	..	25
Explanation in writing re great circle sailing	...	20
Showing great circle track, &c, by globe	...	40
Problem in great circle sailing	..	50
Drawing figure and giving trigonometrical ratios	..	25

The 22nd December 1896.

No. 150 Marine.—In exercise of the powers conferred by section 5 of the Indian Explosives Act, 1884, and in supersession of clause (b) of the definition of "Explosive," and of rule 6 of the rules for regulating the transport and importation of explosives in the port of Calcutta, sanctioned under the notification of this Government, No. 227 Marine, dated the 3rd September 1890, which was published in Part I, page 939 of the *Calcutta Gazette* of the 24th idem, the Lieutenant-Governor proposes to issue the following revised definition and rule. The definition and rule will be taken into consideration on the expiry of a month from the date of their publication in the Gazette, and the Lieutenant-Governor will be glad to consider any suggestions or observations which may be made by any person concerning them within that period.

A. D. MCARTHUR, Colonel, R.E.

Secy. to the Govt. of Bengal.

N.B.—"Explosive" as defined in section 4, Act IV of 1884, and as used in these rules:—

- (a) * * * * *
- (b) includes fog signals, fireworks, fuzes, rockets, percussion caps, detonators, cartridges, ammunition of all descriptions and every adaptation or preparation of an explosive as above defined. It also includes any dangerous substance which may have been ordered by the Governor General in Council under section 17 of the Indian Explosives Act, 1884, to be deemed an explosive.

* * * * *

6. Explosives specified in the first division, class 6 of the rules, published under Government of India's notification No 1417, dated the 21st June 1887, viz., safety cartridges, safety fuzes for blasting railway fog signals, percussion caps and, under certain conditions, fuzes for shells and tubes friction for guns brought as part of a general cargo, and which have been placed on board the vessels while lying in dock at ports of shipment, may be brought into port and landed at the docks or jetties in accordance with the regulations prescribed in that behalf in the Port Commissioners' byelaws.

Total			19,500	19,500	39,000

The following are the conditions of sale:—

1.—The opium will be sold for exportation by sea only, and no certificate will be granted except to cover such export.

2.—The opium will be ordinarily offered for sale at an upset price of Rs. 800 per chest, and sold to the highest bidder above that price, except under the circumstances for which provision is made by clause 13 of these conditions of sale. The bids must advance by Rs. 5 at a time.

3.—The sale shall commence at the hour of 11 A.M. of the day fixed by previous notification, and shall not be continued after the hour of 5 P.M.; but if at that hour any of the lots advertised for sale shall remain unsold, the sale may, at the discretion of the Board of Revenue, be resumed on the next day following (not being Sunday or a public holiday), at the hour of 11 A.M., and so on until the whole of the remaining lots are disposed of; or, if the whole quantity advertised shall not be sold on the day appointed, the Board of Revenue may dispose of the lots which remain on hand at a future sale.

4.—Each lot shall contain five chests.

5.—A Promissory Note for a sum, calculated according to the scale, noted in the margin,

DEPOSIT.

When the amount bid is less than Rs. 1,200 per chest, Rs. 200 per chest.

On bids of Rs. 1,200 and upwards, but less than Rs. 1,600 per chest, Rs. 300 per chest.

On bids of Rs. 1,600 and upwards, but less than Rs. 2,000 per chest, Rs. 400 per chest.

And so on, Rs. 100 being added to the deposit for every bid additional, to the extent of Rs. 400.

shall be taken as a deposit on each lot from the purchaser in the sale-room and before the lot is registered in the sale-book, and all such Promissory Notes shall be redeemed on the part of the purchasers at this Office by Bank of Bengal receipts or by substitution of other public securities of the Government of India, on or before 3-30 P.M., in the afternoon of the fifth day after the sale, provided it does not fall on a Saturday; if it falls on a Saturday, the said notes must be redeemed by 1-30 P.M., or, on the other hand, failing such redemption by the time aforesaid, then the lot or lots for which no Bank

of Bengal receipts or deposit of other public securities as aforesaid shall have been delivered in, shall be re-sold at such time or times and under such conditions of re-sale as the Board of Revenue shall see fit; and all losses and expenses whatsoever attending such re-sale shall be borne and paid by the defaulters, whilst any profit accruing from such re-sale shall be forfeited to Government.

6.—The said Promissory Notes shall be absolutely payable in any event, and the amount thereof shall be absolutely forfeited upon such default as before mentioned, and the amount thereof shall not go or be credited in reduction of any loss on re-sale or expenses thereby incurred, but shall be recoverable whether such re-sale shall be had or not, or whether there shall be a loss on such re-sale or not.

7.—The Promissory Notes taken on the day of sale under the fifth condition, if remaining unredeemed at 3-30 P.M. of the fifth day following the day of sale, or 1-30 P.M., if the last day falls on a Saturday, will be placed in the hands of the Solicitor to the Government for realization in such manner as to him shall seem fit.

8.—No tender of money, Bank of Bengal Receipts, or public securities, on account of opium upon which the prescribed deposit may not have been made before the prescribed time in clause 5 on the fifth day following the day of sale will be afterwards accepted. Provided always that money so subsequently tendered may be taken in payment of the said Promissory Note, but such acceptance of money shall in no way entitle the payer thereof to any right to delivery of the lot or lots in respect whereof the said note was given, or to any of the rights of a purchaser thereof, or release the payer from liability for any unpaid balance of such notes or from the additional liability for the loss and expenses of such re-sale as provided for in clauses No 5 and No 6.

9.—The opium advertised for sale shall be paid for not later than by 3-30 P.M. of the fifteenth day from the day of sale, provided it does not fall on a Saturday; if it falls on a Saturday, the opium must be paid for by 1-30 P.M.; and in case any lots of such opium shall not be so paid for and adjusted, then the cash deposit made under the fifth condition, or any public securities that may have been deposited on account of such lots or chests, shall be forfeited, and the opium shall be disposed of on account of Government at such time and in such manner as the Board of Revenue shall think fit; and the first purchaser shall further be required to make good all expenses and any loss or difference of price between that obtained at the re-sale and the amount at which the opium was first purchased, forfeiting all advantages that may arise from such re-sale, and the liability for the loss or difference of price and expenses shall be in addition to, and wholly independent of, the amount of the deposit so forfeited.

10.—Purchasers taking out certificates or orders for the delivery of opium, after making full payment as above prescribed, shall have the option of naming the number of lots of their purchase, which they may desire to be included in each certificate or order; and it is to be clearly understood that the certificates or orders so taken out shall be considered final, and not afterwards changeable for other certificates or orders authorizing the delivery of single lots, or of a different number of lots or chests, whether more or less, than the number of lots or chests originally required to be included in each certificate or order.

11.—No deposit of public securities under the fifth of the present conditions will be received in this office except from the party recorded as the purchaser in the sale-book, or his authorized agent. The receipt for deposit of public securities will be granted only in the

name of such purchaser, and the securities so deposited will be returned when payment in full has been made by the said purchaser or his order.

12.—The officer superintending the sale on the part of the Government is empowered to reject, at his discretion, the bid of any individual, unless such individual shall on demand render at the time a deposit either in Government of India Notes, Bank of Bengal Receipts, or Government Securities, a sum equal to the amount for which a promissory Note would otherwise be taken under the fifth of these conditions.

13.—With a view to prevent fictitious biddings designed to obstruct the sale, it is hereby notified that the officer of Government superintending the sale shall be competent, at any time during the sale, to withdraw any unsold lot, and immediately to put it up again for sale at a maximum upset price diminishing the same gradually by Rs 5 at a time until a bid is obtained; and the first *bond fide* bidder for a lot after it has been offered for sale in the mode here described shall be held and declared to be the purchaser of the said lot, and the officer of Government Superintending the sale shall also be competent to dispose, in the same manner, of as many of the subsequent lots as he may think proper, provided always that no lot shall be sold below the minimum price of Rs. 800 specified in the second of these conditions.

14.—The purchaser of any lot shall have the option of naming and purchasing in immediate succession, at the same price and under the same conditions, any number of lots of the same Agency opium not exceeding altogether twenty-five lots, provided always that there remain a sufficient number of lots of the opium to complete the said twenty-five.

15.—In the event of any dispute or difference touching or concerning any matter or question arising out of the sale of the opium included in this notification, or adjustment of the account thereof, the same shall and may be tried and decided in the High Court of Judicature at Fort William in Bengal.

16.—The following papers will be exhibited for inspection on the day of sale, or may be seen previously to that date by personal application at the Office of the Board of Revenue:—No. 1, certificate of the opium advertised for sale; No. 2, report of the examination of such opium.

17.—The public are hereby informed that in providing the investment of the opium manufactured at the Patna Factory and the opium manufactured at the Ghazipur Factory for the year 1895-96, the same precautions have been taken as those which have been observed during past years to have the drug procured and sent down in a pure state, to have only the prescribed quantity of leaves used in forming the cakes, and to have the due proportion of opium put into each cake. An account of the weight of the drug when packed at the Patna and Ghazipur Factories, and a statement of the average weight of the chests, indiscriminately taken, for the purpose of comparison, from the despatches on arrival at Calcutta, may be seen on personal application at the Office of the Board of Revenue.

18.—Any further information respecting weight or quality of the opium advertised for sale, that may be desired by parties connected with the trade, will, as heretofore, be furnished to them on personal application at the Office of the Board of Revenue. But, in accordance with established usage, under no circumstances will the Board of Revenue entertain or recognize any claim to compensation for loss from any alleged deficiency of weight, abstraction of opium, or adulteration of the drug, which may be preferred on reference to chests after the sale and delivery of the opium for shipment.

By order of the Board of Revenue, L. P.,

E. H. WALSH,
Secretary.

FORT WILLIAM, the 28th November 1896.

No. 2193B.

NOTICE is hereby given that the First Sale of Opium, the Provision of 1895-96, will be held at the Government Opium Sale-room, No. 2, Bankshall Street, on Monday, the 4th January 1897, at 11 A.M., and will comprise 3,250 chests, viz:—

				Chests.
Opium manufactured at the Patna Factory	1,625
Ditto ditto at the Ghazipur Factory	1,625
Total				3,250

2nd.—The general conditions of the sale now advertised will be the same as usual. They may be ascertained by reference to the Notification issued on the 28th November 1896, and published in the *Government and Exchange Gazettes*, or on personal application at the Office of the Board of Revenue.

3rd.—The latest dates for deposit and clearance will be the 9th and 19th January 1897, respectively, that is to say, no Bank of Bengal Receipts, Government Promissory Notes, or other public securities that may be tendered for deposit in redemption of Promissory Notes given by purchasers in the sale-room will be received after 1-30 P.M. of Saturday, the 9th January 1897, and no Bank of Bengal Receipts in full payment of lots will be accepted after 3-30 P.M. of Tuesday, the 19th January 1897.

4th.—In addition to the quantity above advertised for sale, the following quantities, more or less, of the Opium manufactured at the Patna and Ghazipur Factories will be brought to sale down to December 1897 about the dates specified below. The Board of Revenue, however, reserve to themselves the right of altering these dates, should circumstances render it expedient to do so :—

„ Hamiduddin Ahmed.

2. Under section 23 of the Act, the Lieutenant-Governor is pleased to appoint Maulvi Mahmed Azhar, Subdivisional Officer, to be the Chairman of the Municipality.

H. H. RISLEY,
Secy. to the Govt. of Bengal.

NOTIFICATION.

No. 4923M.—The 19th December 1896.—It is hereby notified for general information that the Lieutenant-Governor intends, in the exercise of the power vested in the Local Government by section 221 of the Bengal Municipal Act III of 1884, as amended by Act IV of 1894, and in accordance with the recommendation of the Commissioners of the Gobardanga Municipality, in the district of the 24-Parganas, made at a meeting, to extend the provisions of sections 256A, 256B, 258 and 260A of the said Act to the above Municipality, unless good reasons are shown to the contrary within one month from the date of the publication of this notification within the Municipality.

H. H. RISLEY,
Secy. to the Govt. of Bengal.

NOTIFICATION

No. 4925L S.-G.—The 19th December 1896—It is hereby notified that, under section 19 of the Bengal Local Self-Government Act III of 1885, the Lieutenant-Governor is pleased to appoint Mr M. Lines to be a member of the Hajipur Local Board, in the district of Muzaffarpur, *vice* Mr J. Smith, resigned

H. H. RISLEY,
Secy. to the Govt. of Bengal.

NOTIFICATION.

No. 4927L S.-G.—The 19th December 1896—It is hereby notified that under section 24 of the Bengal Local Self-Government Act III of 1885, the Lieutenant-Governor is pleased to reappoint the Magistrate of Darbhanga to be the Chairman of the Darbhanga District Board, with effect from the 8th January 1897.

H. H. RISLEY,
Secy. to the Govt. of Bengal.

NOTIFICATION

No. 4936M.—The 19th December 1896.—Whereas a notification No. 8270M., dated the 31st July 1896, was published at page 152, Part IB of the *Calcutta Gazette* of the 5th August 1896, declaring the intention of the Lieutenant-Governor to revise the existing

boundaries of the Siwan Municipality, in the district of Saran, so as to exclude from its limits the tolas and villages named in the margin, and whereas no objection has been raised to the proposal, it is hereby notified for general information that, in exercise of the powers vested in the Local Government by section 9A (2) of the Bengal Municipal Act III of 1884, as amended by Bengal Act

IV of 1894, the Lieutenant-Governor is pleased to exclude the said tolas and villages from the Siwan Municipality.

2. This notification shall take effect from the 1st April 1897, after which date the boundaries of the Municipality will be as follows.—

North.—The southern limits of Bidhurtí Hata and Mohadeva.

South.—The southern boundary of Bengal and North-Western Railway line.

East.—The eastern boundary of Fatehpur or Pakri-Fatehulla and Mukhdum Serai.

West.—The eastern boundaries of Pakalia Abu-chaprah, Khurmabad and Lakhroun.

H. H. RISLEY,
Secy. to the Govt. of Bengal.

NOTIFICATION.

No 4954M.—The 21st December 1896.—Whereas a Notification dated the 30th April 1885 was published at page 384 of the *Calcutta Gazette* of the 6th May 1885, sanctioning the extension of the provisions of Part IX of the Bengal Municipal Act III of 1884 to the entire area of the Jamalpur Municipality, in the district of Monghyr, and whereas the Municipal Commissioners did not take action under section 222 of the Act to bring the provisions of Part IX into operation within 15 days of the publication of the notification in the *Calcutta Gazette*, it is therefore necessary to renew the sanction then accorded. It is accordingly hereby notified for general information that, in the exercise of the power conferred on the Local Government by section 221 of Act III (B.O.) of 1884, as amended by Act IV of 1894, and in accordance with the recommendation of the Commissioners of the Jamalpur Municipality, in the district of Monghyr, made at a meeting, the Lieutenant-Governor has been pleased to sanction the extension of the said provisions of the Municipal Act to mohallas Jamalpur Dih, Sikanderpur, and Munghraura of the said Municipality, and the levy under section 86 (f) of fees for the cleansing of latrines within the aforesaid wards of the Municipality.

H. H. RISLEY,
Secy. to the Govt. of Bengal.

NOTIFICATION.

No 4957M.—The 21st December 1896.—In exercise of the powers conferred by section 17 of the Cantonments Act (XIII of 1889) and with the previous sanction of the Governor-General in Council, the Lieutenant-Governor is pleased, in supersession of the Notification of the Government of Bengal in the Municipal Department, dated the 14th March 1881, published at page 340 of Part I of the *Calcutta Gazette* of the 2nd idem, to impose in the cantonments mentioned in the first column of the first schedule, hereto annexed, the taxes specified opposite each in the second column thereof, and further to direct that the provisions of Part IV of the Bengal Municipal Act III of 1884, as amended by Bengal Acts IV of 1894 and II of 1896, shall, so far as they can be made applicable and subject to the modifications set forth in the second schedule hereto annexed, apply to the assessment and recovery of the taxes hereby imposed

THE FIRST SCHEDULE.

Name of cantonment	Taxes imposed
	(a) A tax not exceeding eighty four rupees per annum, upon persons occupying holdings within the cantonment according to their circumstances and property therein
	(b) A tax upon carriages with wheels of not less than 24-inches in diameter, horses and other animals, at rates not exceeding the following, namely:—
	Rs A

and	By one horse or a pair of
5. Dum-Dum	ponies under 13 hands ... 3 0 " "
	By one pony under 13 hands 2 8 " "
	For every 2-wheeled carriage . 2 8 " "
	" " horse ... 2 0 " "
	" " pony under 13 hands, mule or donkey .. 0 12 " "
	" " elephant .. 6 0 " "
	" " camel ... 2 0 " "

THE SECOND SCHEDULE.

In lieu of the provisions of sections 92, 95 and 110 of the Bengal Municipal Act III of 1884, the following rules shall apply, namely:—

(1) When any holding has remained unoccupied and unproductive of rent throughout the year or the period in respect of which any instalment is payable, the said tax or instalment for the said year or period, as the case may be, shall not be levied in respect of such holding.

(2) When any holding has not been occupied or productive of rent for any period of not less than thirty consecutive days, so much of the said tax or instalment as is proportionate to the number of days during which such holding has not been occupied or productive of rent shall not be levied in respect of such holding.

(3) No relief under these rules shall be granted unless notice in writing of the circumstances under which it is claimed has been given to the cantonment authority within the first fourteen days of the period in respect of which it is so claimed.

(4) The burden of proving the facts entitling any person to claim relief under these rules shall lie upon him.

(5) For the purposes of these rules—

(a) neither the presence of a care-taker nor the mere retention in an otherwise unoccupied dwelling-house of the furniture habitually used in it shall constitute occupation of the house, and

(b) a holding shall be deemed to be productive of rent if let to a tenant who has a continuing right of occupation thereof, whether it is actually occupied by such tenant or not.

H. H. RISLEY,
Secy. to the Govt. of Bengal.

NOTIFICATION.

No 5000M.—The 22nd December 1896.—It is hereby notified for general information that the Lieutenant-Governor intends, in the exercise of the power vested in the Local Government by section 221 of the Bengal Municipal Act III of 1884, as amended by Act IV of 1894, and in accordance with the recommendation of the Commissioners of the South Barrackpore Municipality, in the district of the 24-Parganas, made at a meeting, to extend the provisions of sections 256A, 256B and 260A of the said Act to the above Municipality, unless good reasons are shown to the contrary within one month from the date of the publication of this notification within the Municipality.

H. H. RISLEY,
Secy. to the Govt. of Bengal.

DECLARATION.

No 4901M.—The 18th December 1896.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up by Government at the expense of the Calcutta Municipality for a public purpose, viz., for widening Beltola Lane at its junction with Hazra Road, it is hereby declared that for the above purpose pieces of land Nos., 9 and 11, Hazra Road in Beltola, Kalighat, Dihi Puuchannogram, district of 24-Parganas, measuring, more or less, 6 chitaks and 36 square feet only of standard measurement, are required.

as boundaries of the lands are as follow:—

Portion marked A on the plan.—On the North and on the West the remaining portion No. 9, Hazra Road, on the South Hazra Road, and on the East Beltola Lane.

Portion marked B on the plan.—On the North and on the East the remaining portion of No. 11, Hazra Road, on the South Hazra Road, and on the West Beltola Lane.

The plan and specification of the lands are filed in the office of the Commissioners for public inspection.

This declaration is made, under the provisions of section 6 of Act I of 1894, to all whom it may concern.

H. H. RISLEY,
Secy. to the Govt. of Bengal.

DECLARATION.

No. 4910M.—The 18th December 1896.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up by Government at the expense of the Nasirabad Municipality for a public purpose, viz., for a trenching ground in the village of Ohukaitala, pargana Alapsingh, zilla Mymensingh, it is hereby declared that for the above purpose a piece of land measuring, more or less, 9 bighas 18 cottahs and 1 chitak of standard measurement, is required. The land is bounded on the North by the land of Laronia Ohand Lambary, Rafik Khansama and Beni Madhab Ray, on the East by the land of Ohand Lambary, Janoo Sheik and Beni Madhab Ray, on the South by the land of Gobinda Kunda, and on the West by the land of Halanga Sheik.

This declaration is made, under the provisions of section 6 of Act I of 1894, to all whom it may concern.

H. H. RISLEY,
Secy. to the Govt. of Bengal.

DECLARATION.

No. 4989M.—The 22nd December 1896.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up by Government at the expense of the Patna Municipality for a public purpose, viz., for extending the trenching ground in mauza Muortasiganj, pargana Azimabad, zilla Patna, it is hereby declared that for the above purpose a piece of land measuring, more or less, 4 bighas 18 cottahs 12½ chitaks of standard measurement, is required. The land is bounded on the North by the cultivated land of Etwari Koiri; on the East by the old trenching ground, nala and the amrud garden of Kaloo Koiri; on the South by the amrud gardens of Poonai and Kaloo Koiri and the cultivated land of Mannu Koiri; and on the West by the cultivated lands of Soona, Khemchand, Chamru, Jhagru and Chattri Koiri and the amrud garden of Bhageru Koiri.

The plan and specification of the land are filed in the office of the Collector of Patna for public inspection.

This declaration is made, under the provisions of section 6 of Act I of 1894, to all whom it may concern.

D. B. ALLEN, Collector.

Advertisement of Sale.

NOTICE is hereby given that the proprietary right of Government, as specified in the conditions of sale below, to the undermentioned estate situate in the district of Puri will be put up to sale at the Puri Collectorate on the 28th of April 1897, corresponding with 17th Bysack 1894 Umh —

Conditions of Sale.

1st.—The estate to be sold to the highest bidder above the upset price which will be fixed by Collector at the time of sale. The purchaser of this estate will be considered as the proprietor of the estate, and the entire proprietary right of Government in such estate will be transferred to him subject to the revenue fixed in perpetuity.

2nd.—The sale to be subject to existing leases and to the rights conferred by the settlement proceedings and by the laws in force, and purchasers to be bound to respect the rights of resident cultivators who have signed the schedule of assessment prepared by the revenue authorities.

3rd.—If the amount of purchase-money do not exceed Rs. 100, the whole amount to be paid down at once.

4th.—If the amount of purchase money exceed Rs 100, one fourth of the amount bid to be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or, if that day be a close holiday, then by noon of the first succeeding office day, the sale is to be cancelled (the sum deposited being forfeited to Government), and the estate to be again put up to sale at the risk of the defaulting purchaser after issue of advertisement as in the case of original sale.

(a) Some separate accounts have been opened under section 21, Act XI of 1859, and section 70 of Act VII (B.O.) of 1878. The extent of share of the share in arrears not be given.

Alipore, the 14th December 1896

POORNO CHANDRA CHATTERJEE, for Collector

NOTICE is hereby given, under sections 6 and 13, Act XI of 1859, that the undermentioned estates and shares of estates in the district of Shahabad will be put up for sale at the office of the Collector of that district on the 11th January 1897 at 11 A.M. for arrears of revenue and other demands which by law are realizable as arrears of land revenue.

When in columns 5, 7 and 9 of the statement it is stated that only a share is to be sold, it is to be understood that a separate account is kept for that share, and that the other share or shares in the estate are excluded from the sale.

Patna Collectorate, the 18th December 1896

ILLEGIBLE, for Collector

Advertisement of Sale.

NOTICE is hereby given that the right and interest of Government, as specified in the conditions of sale below to the undermentioned property situate in the district of Bankura, will be put up to sale on the spot by the Sub-Deputy Collector of Vishnupur on the 23rd January 1897, corresponding with the 11th Magh 1303 B S

The purchasers will be subject to the following conditions of sale—

Conditions of Sale.

- 1st.—The property to be sold to the highest bidder above the upset price, which will be fixed by the Sub-Deputy Collector at the time of the sale. The purchaser of the property will be considered to have acquired the right and title of Government in the property, and they will be transferred to him, subject to the rent fixed in perpetuity.
- 2nd.—The sale to be subject to existing leases and to the rights conferred by settlement proceedings and by the laws in force.
- 3rd.—If the amount of purchase-money do not exceed Rs 100, the whole amount to be paid down at once.
- 4th.—If the amount of purchase-money exceed Rs 100, one-fourth of the amount bid to be immediately deposited. If the balance is not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or, if that day is a close holiday, then by noon of the first succeeding office day, the sale is to be cancelled (the sum deposited being forfeited to Government), and the property to be again put up to sale at the risk of the defaulting purchaser after issue of advertisement, as in the case of original sale.

Number on the district roll.	Description of property and pargana	Approximate area in acres	Government revenue assessed	REMARKS

Pure Sulphate of Quinine

MANUFACTURED AT THE BENGAL GOVERNMENT
CINCHONA PLANTATION

From 1st April 1896 the price of this Quinine will be as follows—

1 Pound tin Rs 19 or, post free, Rs 18-12
 1/2 " " " 9 " " " " 9 8
 1/4 " " " 4-8 " " " " 6

Analysis shows this Quinine to be of the purest manufacture, and it is guaranteed to be free from wilful mixture with the inferior alkaloids, Cinchonine and Cinchonidine. It is for sale only to Government officers, and only for cash and may be had from the Superintendent, Botanic Garden, Sibpur, near Calcutta.

Cinchona Febrifuge.

Cinchona Febrifuge can be purchased by all Government officers and by any one taking six pounds at a time from the Superintendent, Botanic Garden, Calcutta, at the following rates—per four ounce tin, Rs 2, and 8, per eight-ounce tin Rs 5, per pound tin, Rs 10. The general public can be supplied by the Superintendent, Botanic Garden, for cash only at the undernoted rates—per four ounce tin, Rs 1, per eight ounce tin Rs 6, per pound tin, Rs 12. This medicine is also sold by the principal European and native druggists in Calcutta, at postage four annas per 1/2 oz tin, eight annas per 8oz tin, and twelve annas per pound tin, in addition to the foregoing rates.

NOTICE TO SUBSCRIBERS

SUBSCRIBERS to the *Calcutta and Bengal Gazettes* and *Indian Law Reports* are hereby informed that unless the amount of their subscription for 1897 is received before the 31st December 1896, it will be concluded that the *Gazettes* and *Reports* are no longer required, and the supply will accordingly be discontinued from 1st January 1897.

All remittances should be made direct to the Accountant and Treasurer, Bengal Secretariat, Calcutta, by means of money-orders. No postage stamps or stamps of any other kind will be received in payment of subscriptions.

The correct address of the subscriber should be legibly written on the money-order coupon, and the period for which the subscription is paid should also be stated. Omission to note these particulars will involve considerable delay.

B FOLLY,

Under-Secy. to the Govt of Bengal

The 24th November 1896.

The Indian Law Reports.

Published under Authority.

THE Indian Law Reports, published under the authority of the Governor General in Council, appear in monthly parts, published as soon as possible after the first of each month at Calcutta, Madras, Bombay, and Allahabad and comprise four series—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat Book Depot, and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad respectively.

In supersession of the previous advertisements, on and from the 1st January 1897 the terms of subscription and sale will be as follows for current issues as well as for back numbers of the Reports from 1876—

Terms of subscription payable annually in advance

	Without postage		With postage.	
	Rs	A P	Rs	A P
For the complete series including postage	Rs 22-8		10 0 0	12 8 0

" each of the Madras, Bombay, and Allahabad Series	6 0 0		7 0 0	
" a part of the Calcutta Series purchased separately (exclusive of postage in India)			2 0 0	
" part of each of the Madras, Bombay, and Allahabad Series purchased separately (exclusive of postage in India)			1 0 0	

The following is the rate at which deductions will be made for parts out of print and at which duplicate copies will be supplied to subscribers when required in place of copies lost in transit.—

	For town		For mufassal	
	Rs	A P	Rs	A P
For the Calcutta Series, per copy	0 8 9		0 10 4	
" each of the Madras, Bombay, and Allahabad Series, per copy	0 5 3		0 5 0	
" the Calcutta Series For the year	7 2 0		8 6 3	
" each of the Madras, Bombay and Allahabad Series For the year	4 4 6		4 11 8	

Persons desiring to subscribe for or purchase the Report should apply to—

Superintendent, Government Press, Madras.
The Superintendent, Government Central Press, Bombay.
" Curator of Government Books, North Western Provinces and Oudh.
" Officer in charge, Bengal Secretariat Book Depot.

Orders and subscriptions for 1897 shall be at once registered and remitted by money order payable to the Accountant and Treasurer, Bengal Secretariat, Calcutta.

ADVERTISEMENTS will be received for publication on the wrappers of the Indian Law Reports, Calcutta Series, at the following rates, payable in advance—

	One page	Half page	Quarter page
For one issue	Rs 20	Rs 11	Rs 9
" three issues	" 55	" 36	" 21
" six "	" 100	" 64	" 45
" nine "	" 135	" 96	" 63
" twelve "	" 180	" 121	" 80

Several volumes of the *BENGAL LAW REPORTS*, from August 1-68 to December 1875, and *FULL BENCH RULINGS*, Parts I and II, are available at the following rates—

	Without postage		With postage	
	Rs	A P	Rs	A P
Bengal Law Reports for one year	20 0 0		22 8 0	
single copy, Rs 2 per copy				
Full Bench Rulings, Parts I and II	20 0 0		22 8 0	

Obtainable at the Bengal Secretariat Book Depot, Writers' Buildings, Calcutta.

Remittances to be forwarded to the Accountant and Treasurer, Bengal Secretariat, Writers' Buildings, Calcutta.

All the wanting parts of the *INDIAN LAW REPORTS* (complete series) having now been reprinted, the complete Reports from 1876 to 1893 may be purchased for all the years, or for any particular year, on application to the Officer in charge of the Bengal Secretariat Book Depot.

The subscription, Rs. 22-8 per annum, should be remitted in advance to the Accountant and Treasurer, Bengal Secretariat.

Notice

It is hereby notified, for general information, that subscription to the complete series of the Indian Law Reports should be registered during the first three months of each calendar year. Subscribers are therefore requested to send in their subscriptions of the complete series before the 31st March in each year. Those who register their names after that date will understand that copies will be supplied only if available.

Catalogue of Books procurable from Thomason College Book Depot.

Application to be made to Curator. Cash must accompany order. Articles will be sent by Value-payable Post to persons in Government employment only. It is advised that letters containing remittances be registered.

N B—The Revised Prices herein entered cover the cost of packing, postage and other incidental charges (except commission for value payable supplies), and are for all purchasers other than resident College Students.

Drawing Instruments (electrum) are available at the College Book Depot at Rs 02 per box. Drawing Instruments, drawing materials, &c. are also obtainable from the Roorkee Workshops, and application should be made to the Superintendent.

Acts of the Governor General's Council assented to by the Governor General.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Act of the Governor General of India in Council received the assent of His Excellency the Governor General on the 17th December, 1896, and is hereby promulgated for general information —

ACT NO. XXI OF 1896.

An Act to amend the Indian Paper Currency Act, 1882.

WHEREAS it is expedient to authorise an increase of the amount which may be invested in securities of the Government of India out of the coin and bullion received for currency notes under the law relating to the Government

paper currency; It is hereby enacted as follows:—

1. (1) This Act may be called the Indian Paper Currency Act Amendment Act, 1896, and

(2) It shall come into force at once.

2 Section 19 of the Indian Paper Currency Act, 1882, as amended by Amendment of section 19, Act XX, 1892. Act No XV of 1890 (*an Act to amend the Indian Paper Currency Act, 1882*), shall be read as if for the words "eighty millions" the words "one hundred millions" were substituted.

3 Act No XV of 1890 (*an Act to amend the Indian Paper Currency Act, 1882*) is repealed, but not so as to affect the validity of anything heretofore done in pursuance of the provisions of that enactment

PART VI.

Bills introduced into the Council of the Governor General for making
Laws and Regulations, or published under Rule 22.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Bill was introduced in the Council of the Governor General of India for the purpose of making Laws and Regulations on the 17th December, 1896 —

NO. 27 OF 1896.

A Bill to provide for the compulsory registration of certain transfers and dispositions of goods in order to prevent debtors from defeating the claims of their creditors by secret assignments of such goods.

WHEREAS it is expedient to provide for the compulsory registration of certain transfers and dispositions of goods in order to prevent debtors from defeating the claims of their creditors by secret assignments of such goods, It is hereby enacted as follows —

Short title, extent, application and commencement. I (1) This Act may be called the Indian Bills of Sale Act, 1896,

(2) It extends to the whole of British India; and

(3) It shall come into force only in such local areas and with effect from such dates as the Local Government may, by notification in the official Gazette, direct.

2. In this Act, unless there is anything repugnant in the subject or context,—

(1) "bill of sale" means any document recording the sale, mortgage or other transfer of

goods, or creating any charge thereon, and includes a license to seize goods,

(2) "goods" mean all corporeal moveable property other than money, and

(3) "assignee in bankruptcy" includes any person in whom the estate of an insolvent or bankrupt is vested by any law for the time being in force.

3 Subject to the provisions of section 4, Avoidance of certain transactions unless registered where the owner of goods (hereinafter called the grantor) sells, mortgages or otherwise transfers the property therein, or creates any charge thereon, or gives a license to seize the goods, and such grantor remains in the apparent possession of the goods, such sale or other disposition as above-mentioned shall be void as against an execution-creditor or the assignee in bankruptcy of such grantor unless the following conditions are complied with, namely —

(1) the sale or other disposition must be recorded in a bill of sale,

(2) the bill of sale must be registered within seven days of the completion of such sale or other disposition.

Explanation.—Goods shall be deemed to be in the "apparent possession" of a grantor so long as they remain or are in or upon any house, warehouse, building, works, land or other premises occupied by him, or are used or enjoyed by him in any place whatsoever, notwithstanding that formal possession thereof may have been taken by, or given to, any other person

Illustration

A and B are husband and wife. A by an unregistered instrument transfers his household furniture to B. As long as A and B are living together, the furniture remains in A's apparent possession, and can be taken in execution for his debts

Sec. 41 & 42
Act, G. 31,
4]

Saving for mercan-
tile transactions, etc.

4. Nothing in this Act shall apply to or affect the operation of—

- (1) any mercantile document of title to goods, that is to say, any bill of lading, dock-warrant, warehouse-keeper's certificate, warrant or order for the delivery of goods, or any other document used in the ordinary course of business as proof of the possession or control of goods or authorizing or purporting to authorize, either by endorsement or delivery, the possessor of the document to transfer or receive goods thereby represented,
- (2) any ante-nuptial marriage settlement,
- (3) any bill of sale executed outside British India,
- (4) any right of distress for rent, revenue or otherwise, or any right of priority given by law.

nor shall anything in this Act apply to or affect the transfer or other disposition of any

ship or share therein, which is required to be registered under any Merchant Shipping Act for the time being in force.

5. (1) The Governor General in Council may, Power to make rules. by notification in the Gazette of India, make rules—

- (a) for the publication of registered bills of sale, or such particulars thereof as it may be expedient to publish;
- (b) for applying, with any necessary modifications, the provisions of the Indian Registration Act, 1877, in regard to bills of sale, and for fixing fees for the registration and publication thereof, III of 1877.
- (c) for extending, under special circumstances, the time for registration; and,
- (d) generally, for carrying out the objects of this Act.

(2) Any rule so made may from time to time be in like manner varied or rescinded.

STATEMENT OF OBJECTS AND REASONS

THE attention of the Government of India was in 1894 directed to the case of a merchant who had given to his bankers by way of security a bill of sale over his entire stock in trade, the bill, which had apparently run for years without the knowledge of the grantor's other creditors, never having been registered by him. The "reputed ownership clause" (section 23) of the Indian Insolvency Act, 1848 (11 & 12 Vict., c. 21), which applies only to the Presidency-towns and to creditors in insolvency, contains a provision inserted with but little variation in every English Bankruptcy Act since the reign of James I, but technical and somewhat narrow interpretations have been placed upon it by the Courts at home, and it has been found necessary in England to supplement it by the Bills of Sale Acts and other legislation. In India sections 108 and 178 of the Indian Contract Act (IX of 1872), in so far as they are relevant, merely enable the apparent owner of goods to sell or pledge them, although he has not obtained the consent of the true owner, while they do not touch the case of creditors, who, it follows, are, save for the very limited and rather uncertain protection afforded by section 23 of the Indian Insolvency Act of 1848, entirely left out in the cold in this country. It seemed, therefore, to the Government of India that a *prima facie* case for legislation had been made out, and the whole question has since formed the subject of correspondence with the Secretary of State and the various Local Governments and Administrations, who have been consulted upon it, with the result that there appears to be a general consensus of opinion that a law is required in India to safeguard execution-creditors and creditors in insolvency against such secret assignments of property as that referred to above. The form which legislation should take has been carefully considered, and it is thought that the Bill which it is now proposed to introduce in Council will be found to proceed on sound lines and to accomplish the object in view. Its main provision is to the effect that, where a person sells or charges his moveable property, but remains in ostensible possession under such circumstances as to be the apparent owner thereof, such property shall be liable to be taken in execution or by the assignee in bankruptcy unless the assignment or charge is in writing and is duly registered, but the Bill in no wise interferes with the validity of any transaction, as between grantor and grantee. In order to avoid interference with the ordinary course of trade, mercantile documents of title, such as bills of lading, dock warrants, etc., must continue to be exempt from registration and are, therefore, removed from the operation of the proposed enactment along with ante-nuptial marriage settlements, bills of sale executed outside British India, rights of distress and rights of priority specially conferred by law. Power is at the same time taken by clause 5 of the Bill for the Governor General in Council to make rules to supplement its provisions where necessary.

M. D. CHALMERS.

The 15th December, 1896

J. M. MACPHERSON,
Secretary to the Government of India.

NOTICES TO MARINERS.

GOVERNMENT OF BENGAL—MARINE DEPARTMENT.

NOTICE TO MARINERS—No. 252

[First Publication.]

AUSTRALIA—ST. VINCENT GULF.

Port Adelaide river—Erection of new beacons.

WITH reference to Notice to Mariners, No. 188, dated 15th September 1896, issued by this office, the President, Marine Board, Port Adelaide, has given further notice (No. 5 of 1896) that pursuant to Notice to Mariners, No. 3 of 1896, in connection with the scheme for lighting the river by electricity, that the new beacon referred to therein has been erected on the edge of the deep-water cutting, about 600 feet in a north-easterly direction from the site of No. 10 light beacon. A white light is now shown from the new beacon, and that on No. 10 beacon, which has been removed, discontinued.

A new beacon is being erected between Nos. 10 and 11 beacons, near the position of the red perch buoy, and opposite the red pile beacon with diamond-shaped head. During the erection of this beacon a white riding light will be exhibited from a barge moored alongside of the structure.

Charts affected, Nos. 2389 A and B, plan 1750.

H. LINDQUIST,
for Port Officer of Calcutta.

NOTICE TO MARINERS—No. 253

[First Publication.]

AUSTRALIA, EAST COAST—INNER ROUTE

Amended particular of Tannadice rock.

THE British Admiralty has given notice (No. 666 of 1896), with reference to Notice to Mariners, No. 320 of 1892, and previous Notices, on Tannadice rock, originally reported by the Master of the steam-vessel *Tannadice* in 1833, that an examination of the locality has recently been made by Lieutenant and Commander W. V. Howard, H.M. Surveying Vessel *Dart*, with the undermentioned result:—

Tannadice rock has a least depth of 5 feet on it at low water ordinary springs, and is steep-to on its northern side; whilst in a S.E. direction, a coral shoal, 4 cables broad, with depths of 3 to 7 fathoms on it and 10 to 16 fathoms close around, stretches from the rock for a distance of 6½ cables.

From the rock, Restoration island, eastward of cape Weymouth, bears N. 59° W., distant 4½ miles; and south extreme Lloyd island S. 38° W.

Approximate position, lat. 12° 39' 56" S., long. 143° 31' 15" E.

(2) *Extension of shoal ground northward of Cape Direction.*

Also, that Lansdown reef extends nearly a mile further northward than previously shown on the charts:—

From its northern extreme, where the depth is 2 fathoms, with 9 to 10 fathoms close to the northward, Cape Direction summit (500) bears S. 12° W., distant 4 miles; and Wye (y) reef beacon S. 85° E.

From the northern extreme, the eastern edge of the reef trends S. 42° E., for a distance of 6 cables, and then S. 31° E. for a distance of $1\frac{1}{2}$ miles.

Approximate position, northern extreme Lansdown reef, lat. $12^{\circ} 48' 10''$ S., long. $143^{\circ} 38' 25''$ E.

AUSTRALIA, SOUTH COAST—SPENCER GULF

Shoals reported near Thistle island

THE British Admiralty has given notice (No. 670 of 1896) that information has been received from Captain F. W. Fisher, H.M.S. *Orlando*, dated 1st October 1896, that a fisherman at Port Lincoln has reported that he often fishes on the undermentioned dangers, which only break in southerly gales:—

1. A shoal, with a depth of about 12 feet on it, situated about S.S.E., distant $2\frac{1}{2}$ miles, from Dangerous reef, or approximately in lat. $34^{\circ} 51\frac{1}{2}'$ S., long. $136^{\circ} 13\frac{1}{2}'$ E.
2. A shoal with a depth of about 4 fathoms on it, situated about S.S.E., distant 2 miles, from Hopkins island, or approximately in lat. $35^{\circ} 0'$ S., long. $136^{\circ} 4\frac{1}{2}'$ E.

Both these shoals have been marked *P D* on the Admiralty Charts

[Second Publication.]

AUSTRALIA, SOUTH WEST COAST—CAPE LEEUWIN.

Regarding establishment of a light on the Cape.

WITH reference to Notice to Mariners No. 20, dated 18th January 1896, issued by this office, the British Admiralty has given further notice (No. 665 of 1896) that only one light will be established at Cape Leeuwin, instead of a main light and an auxiliary light; and also that the light will be exhibited for the first time on 10th December 1896:—

Cape Leeuwin light will be a first order, dioptric, flashing white light every five seconds, thus.—flash, a fifth of a second; eclipse, four and four fifths seconds; it will be elevated 185 feet above high water, (illuminating power 145,000 candles), and visible from a distance of 20 miles in clear weather.

The lighthouse is a cylindrical, stone tower, 135 feet high, situated on the southern summit (48) of Cape Leeuwin.

Approximate position on Chart No. 413, lat. $34^{\circ} 21' 51''$ S., long. $115^{\circ} 8' 0''$ E.

CAUTION.—Mariners are reminded that the dangerous Geographic reef lies 8 miles to the N.W. by W. $\frac{1}{2}$ W. of this light, and that, powerful as the light is, it will be unsafe, with the weather at all thick, to stand in with the intention of making it. Mist also may hang about the land when clear to seaward.

FINAL REPORT ON THE WINTER RICE CROP

THE following is published for general information.

M. FINUCANF,

The 18th December 1896.

Secretary to the Govt. of Bengal.

DEPARTMENT OF LAND RECORDS AND AGRICULTURE, BENGAL.

Final Report on the Winter Rice Crop of Bengal, 1896.

THE final forecast of the winter rice crop has been received from all districts except Palamau. For Palamau, the latest estimate is contained in a telegram from the Deputy Commissioner, dated 10th November 1896. The date of despatch of each forecast from the district office is shown in the appended returns.

2. *Conditions of season most favourable to the winter rice crop.*—The following paragraph reproduced from Bengal Government letter No. 4549Agri., dated 18th November 1896, explains the conditions of season most favourable to the winter rice crop.—

The distribution of rainfall most favourable to the winter rice crop is when premonitory showers fall in May or early in June. The rain in the latter half of June and in July should be heavy, then should come an interval of comparatively fine weather, so as to permit of weeding operations being successfully carried on. The September rains should be heavy, shading off into fine weather with showers in October. On the sufficiency of the rainfall in September, more than in any other month, depends the character of the outturn of this crop. The preparation of rice land commences much earlier in East and North Bengal, and in the eastern districts of South West Bengal, than in the rest of the Lower Provinces. The ante-monsoon showers, which fall in April, May and the first part of June, are, in consequence, of more importance in these parts than in other places, where lands are usually prepared after the commencement of the monsoon rains.

3 *Character of the present season.*—The rainfall of the year 1896 from June to November may be briefly described as follows.—

The month of June was marked by excessive rain, due to a series of cyclonic storms, in all districts lying to the south of the Ganges, viz., in Orissa, Chota Nagpur, South Bihar, and the districts of the Burdwan and Presidency Divisions. The rainfall during June was normal or nearly so in East Bengal and the southern districts of North Bengal, namely, Rajshahi, Pabna, and Bogra, while the remaining districts of North Bengal and the whole of North Bihar received very little.

In July, rainfall was deficient over great part of these Provinces, especially in Bihar; it was in excess in Orissa and in some districts of the Burdwan and Chota Nagpur Divisions. In August rain was everywhere deficient, except in Orissa and Singhbhum. In September, the rainfall was irregular; it was in excess of the normal in Eastern Bengal and some districts of Northern Bengal, but it was again extremely deficient in the Patna Division. After the middle of September, rainfall became much scattered, and in Bihar almost entirely ceased. In October, the rainfall was everywhere deficient; no district received as much as an inch of rain except Jalpaiguri, Duijeeling, Rangpur and Chittagong.

Briefly speaking, the prospects of the winter rice crop, which had been injured by the deficient rainfall of July and August, were in many parts ruined by the early cessation of the monsoon in the middle of September. The slight showers of November came too late to do any appreciable

good to the winter rice crop. The absence of rain in October was further aggravated in the riparian districts of East and North Bengal by the unusually low level of the rivers which did not rise high enough to inundate the *bhils* where much of the winter rice crop is grown.

4. *Area cultivated*—The total area cropped with winter rice this year is estimated at 29,341,600 acres against 30,402,300 acres last year. The decrease amounts to 1,060,700 acres, or 3·48 per cent. on the area cropped last year. The decrease is most noticeable in the Rajshahi and Bhagalpur Divisions and in Mymensingh, and is attributed solely to the insufficient rainfall during the transplanting season. In Cuttack also, there was a large falling off due to the crop having been destroyed by flood in July and August. On the other hand, the area brought under cultivation this year showed a considerable increase over that of last year in every district of the Burdwan Division and in the 24 Parganas, where there was a recovery due to a more favourable opening season over the diminished areas cropped last year. Comparison was made in the preliminary forecast issued on the 4th October last between this year's areas and those of 1894, when the full normal area is believed to have been brought under cultivation. It showed a decrease in area sown this year, amounting to 1,800,000 acres, or nearly 6 per cent. on the estimated area of 1894.

5. *Character of the crop*.—It will be seen from the district returns appended hereto that of the 45 districts in these Provinces, no district returns the crop to be above 12 annas; only one district, Bogra, estimates the outturn at 12 annas; only eight districts, 24 Parganas, Dinajpur, Rangpur, Backergunge, Chittagong, Patna, Angul and Singhbhum, estimate 10 annas and over, but less than 12 annas, 15 districts, viz., Birbhum, Bankura, Midnapore, Hooghly, Darjeeling, Dacca, Tippera, Noakhali, Gaya, Moughyr, Bhagalpur, Purnea, Sonthal Parganas, Puri and Lohardaga, estimate at 8 annas and over, but less than 10 annas, 12 districts, viz., Burdwan, Murshidabad, Khulna, Rajshahi, Jalpaiguri, Mymensingh, Faridpur, Cuttack, Balasore, Hazaribagh, Palamau and Manbhum, estimate at 6 annas and over, but less than 8 annas, four districts, viz., Pabna, Shahabad, Daibhanga and Malda, estimate at 4 to 6 annas, and the remaining districts report an outturn less than 4 annas, viz., Nadia 2½, Jessore 3, Saran 1½, Champaran 3½, Muzaffarpur 3.

Taking the Province as a whole, the outturn of the winter rice crop may be estimated at 7½ annas, or slightly below half the average crop. It will be seen that the estimates of outturn returned in the first forecast have been reduced in almost every district of Bengal, the deterioration caused by the failure of the October rain amounting to nearly 5½ annas for the Province as a whole.

6. *Gross outturn*.—Appended to the district returns is a statement showing the estimated yield in cwts. of winter

rice for Bengal as a whole. The total yield of clean rice this year is estimated to amount to about 150 million cwts. against 272 millions produced last year.* It will be remembered that the crop of last year was estimated at 13 annas.

B. C. BASU,

*Assistant Director of the Dept. of Land
Records and Agriculture, Bengal.*

The 8th December 1896.

(Countersigned.)

W. C. MACPHERSON,

*Director of the Dept. of Land
Records and Agriculture, Bengal.*

CALCUTTA,

The 8th December 1896.

* As in former years the outturn of rice in cwts has been obtained for the Province, as a whole, by multiplying, the total area cultivated by 15 maunds, or by $15 \times 82\frac{1}{2}$ lbs, which has been assumed to be the average yield of winter rice (cleaned) to the acre, and then by reducing the outturn obtained by $\frac{7\frac{3}{4}}{10}$, which is the estimate in annas of the outturn for the year.

	District Total	1,573,440	985,500	312,200	271,800	298,500	8	7
Jessore 12-11-96	Sadar Jhenda Magura Narail Bangson	566,960 394,600 272,000 311,680 415,360	304,000 264,800 171,500 192,000 246,000	169,400 64,000 169,600 126,000 136,000	150,000 64,000 80,600 126,000 79,000	130,000 44,000 56,000 126,000 68,000	6 3 10 14 8	2 1 2 8 2
	District Total	1,673,000	1,116,800	675,000	583,600	466,600	2½	3

The Collector speaks of the southern half of the Sadar subdivision as growing two-thirds of the rice of the district. Perhaps the southern half of the district is meant.

The continued drought has injured the crop on high lands. The drought has done most injury in the northern half of the Sadar subdivision, whereas in the southern half (where two-thirds of the rice of the district is grown) the crop is estimated at 10 and 12 annas; hence the district total is 10½ annas. The crop in Barasat was over-estimated in the telegraphic report recently submitted. Some good was done in Barasat by a fall of rain on the 2nd November. In my opinion the crops, especially in the south, are better than last year's, when they were over-estimated in the report.

Insufficient rain during the ploughing and sowing seasons is the cause of decrease in the area under cultivation, and continued cessation of rain thereafter retarded the growth and development of young plants. The *dhos* ears are empty for want of moisture, and hence this unfavourable outturn.

The decrease in the outturn as compared with that shown in the preliminary forecast (Sadar 10 annas, Kandi 12 annas, Jangipur 5 annas and whole district 11 annas) is due to want of rain since October.

The present report is more hopeful than the Collector's telegraphic report of October, in which the outturn was returned as 4 annas in Narail and 2½ in Bangson.

Want of rainfall during the year is the cause of this poor outturn. There is doubt about the accuracy of the figures returned. They are approximate.

Approximate normal area under winter rice in acres.	Approximate area under winter price last year in acres.	Estimated area under winter rice this year in acres.	Taking 16 annas to represent the average outturn, how many annas represented the outturn last year?	Taking 16 annas to represent the average outturn, how many annas will represent this year's outturn?	Remarks by District Officers.	Remarks by the Department of Land Records and Agriculture, Bengal.
Burdwan 28-11-96	Sadar	794,680	635,500	434,300	217,100	247,900	Annas 6	Annas 8	The prospects of the crop were fair until the end of September, when the rains suddenly ceased, the crops on high lands withered in consequence. The crop commanded by the Canal water is an average one. Owing to insufficient rainfall in the latter part of the current year the outturn is estimated by the Subdivisional Officer to be about the same as that of last year. This is probably too low, as there is no reason why the Kalna outturn should be only 8 annas, while the Katiwa outturn is 10 annas. The preliminary forecast for Kalna subdivision was 10 annas.	
	Kalna	276,450	231,000	128,000	98,000	98,000	5	6		
	Katiwa	225,300	198,000	140,800	105,000	123,500	6	10	This year's outturn is much better than that of the last year. Owing, however, to insufficient rainfall at the sowing time, some lands could not be planted out, while the cessation of the rains from the latter half of September has affected the outturn.	
	Rangpur	423,440	354,760	225,800	123,000	290,000	14	6 to 8	The outturn would have been well up to the average had not the rains ceased totally in the middle of September.	
	District Total	1,735,060	1,333,500	988,400	587,700	667,100	7	73		
Brhbum 27-11-96	Sadar	704,120	590,000	413,000	300,300	340,000	12	9	The early cessation of the rain in September has caused the diminished outturn which, taken as a whole, will reach 9 annas. The condition of the crop varies considerably even in the same thana.	
	Rangpur Hat	412,800	340,000	231,000	150,000	200,000	13	10

	District Total	1,677,440	642,800	550,400	371,700	536,300	8½	8½		
Maldahore 2-11-96	Sadar Tamluk Contai	2,130,960 390,400 543,360	1,283,140 279,600 453,360	760,400 230,500 368,700	700,000 179,600 364,400	759,500 285,500 595,300	12 10 16	8 8 10	The cause of increase in the area brought under cultivation in the Sadar subdivision has been explained in the preliminary forecast but the outturn is likely to be less than what was then anticipated owing to want of rain.	
	Ghatol	203,000	194,500	131,800	86,800	131,300	6	10	The Tamluk estimate is given as reported by the Subdivisional Officer. It is, however, too low. A fair but by no means excessive estimate would be 10 or 11 annas.	
	District Total	3,992,900	2,111,500	1,501,000	1,389,900	1,468,100	12	8½		
Hooghly 16-11-96.	Sadar Serampore Jabarabad Howrah Ulubaria	923,880 210,580 458,500 110,720 215,680	176,300 160,000 167,700 68,400 123,000	141,400 108,500 83,800 61,400 106,800	13,900 46,000 75,300 32,700 67,000	52,500 100,000 80,700 37,500 80,000	10 10 6 9 8	6 7 9 11 7	The cause of the meagre outturn is well known. Owing to the cessation of rain since the beginning of October last the winter rice crop which promised so well from the beginning, has been greatly affected at the time it was in ear. The crop is withering in places for want of moisture.	
	District Total	1,067,960	702,300	465,300	276,900	360,300	8	8		

Dinajpur-- 18-11-96.	Sadar Thakurgaon	2,483,940 2,483,940	1,377,400 3,067,400	1,000,400 513,000	1,005,400 216,100	754,100 190,800	30 18	10 12	The September rains did some good to the crops transplanted in July and August, and allowed further transplantation on the area lying fallow before September, but there being no further rain, the crop has not come on and the plants on high land have been destroyed. The crop will be quite a 10-anna one, and may be more.
	District Total	2,483,940	1,745,900	1,308,500	1,253,500	944,900	17½	10½

Northal 18-11-06.	Sadar	830,730	640,000	498,300	498,000	498,000	In 10 annas 10	Annas 8	Owing to premature cessation of monsoon rains the outturn is expected to be materially less than that of last year. There has been no rain to speak of in the district during the whole of October 1906.	The Collector has decreed the area in columns 6 and 7 against Sadar by 200 acres.

Districts 12-11-96.	Sadar	782,080	694,600	376,000	251,300	300,000	13	44	The decrease in outturn is due to failure of rain
	Samastipur	484,800	397,000	186,800	135,000	150,000	10	6	The figures returned here do not agree with those reported by the Subdivisional Officers, who gave 4 for Samastipur and 3 for Madhubani. Both are, the Collector thinks, low, and do not make sufficient allowance for tracts where there is fair to good paddy. The Collector has accordingly raised the estimates. He thinks the Sedar and Madhubani are very much alike.
	Madhubani	803,350	431,800	651,700	630,000	630,000	13	44

AL REPORT ON THE BHADOI CROPS.

the following is published for general information.

M. FINUCANE,

the 18th December 1896.

Secy. to the Govt. of Bengal.

DEPARTMENT OF LAND RECORDS AND AGRICULTURE, BENGAL.

Final Report on the Bhadoi Crops in Bengal, 1896.

Explanatory—The crops dealt with in this report are (1) *bhadoi* food crops, the chief among which are *bhadoi* paddy, Indian-corn and *mundua*, and (2) *bhadoi* non-food crops, including, among other, jute, cotton and indigo. The chief *bhadoi* non-food crops are reported on in special forecasts, it will be unnecessary, therefore, to deal with them specially in this report. Among the *bhadoi* food crops, *bhadoi* paddy (or *aus* paddy, as it is called in Bengal Proper) holds the chief place, occupying an estimated area of a little over 7 million acres, and about 45 per cent. of the total *bhadoi* area; it is practically the only *bhadoi* cereal grown in the districts of Bengal Proper. In Bihar and Chota Nagpur, Indian-corn or maize is the most important food crop grown in the *bhadoi* season, and next to it rank *mandua* and *bhadoi* paddy. The *bhadoi* paddy of Bihar is, unlike the *aus* of Bengal, a low land paddy which comes to maturity in October or early in November. In Orissa, *bhadoi* paddy, locally known as *beali*, occupies the first place among the *bhadoi* cereals, and next to it is *mandua*.

The requirements with regard to rainfall are somewhat different for the different *bhadoi* crops. In Bengal Proper, where *aus* paddy is very largely grown, the preparation of land for this crop commences with the anti-monsoon showers which fall in March and April. The crop is sown in May, some weeks before the regular monsoon rains commence. For a successful *aus* crop, the monsoon should commence in June with moderate showers with frequent intervals of fine weather to permit of weeding operations, and to enable the young seedlings to put forth a vigorous growth before the heavy rainfall, which usually follows in July. Excessive rain in May and June are extremely injurious to the young *aus* crop. During July and August, the rainfall should be heavy, but with intervals of fine weather. The crop flowers in August, and stands in need of rain at this time in order that it may be enabled to throw out shoots, and in order

that the grain may fill out. Want of rain in August is on this account very harmful to the prospects of the crop. The *aus* paddy crop is mostly reaped by the middle of September, and except where it is sown late, it is not influenced by the character of the rainfall after the middle of September. The cultivation of Indian-corn and the lesser millets is chiefly confined to Bihar and Chota Nagpur, where the *bhadoi* sowings do not commence before the regular rains set in about the middle of June. Heavy rain in June and July are detrimental to the prospects of these crops. On the other hand, want of rain in July and August is equally injurious. A moderate amount of rain, falling in frequent showers, is most favourable to Indian-corn and the lesser millets. The *bhadoi* paddy of Bihar, being a low land crop, is, like winter rice, highly susceptible to injury from deficient rain, especially during September and the first half of October, when moisture is required to fill out and mature the grain. *Mandua* is reaped about the end of October or early in November, and is liable to be injured by want of rain in September and October.

2. *Character of the season of 1896*—The character of the present season, up to the middle of September was described in the first forecast issued by this Department on the 26th September 1896. The rainfall during September was chiefly confined to a few days about the middle of the month, after which there was little or no rain in these Provinces during the rest of the *bhadoi* season, which may be said to close with the end of October. The most prominent feature of the season was the great lack of rain in every month, since July, in all parts of these Provinces, except in Orissa. In Orissa, the rainfall was excessive in July, and again in August, causing repeated floods which destroyed the standing crops over a large area.

3. *Area cultivated*.—The total area cultivated with *bhadoi* crops of all kinds this year is estimated at 15,931,600 acres against 15,710,900 acres last year. The increase is nominal.

4. *Character of the crop*.—The injurious effects of the insufficient rainfall during July and August were not perhaps sufficiently realised when the first forecasts were being prepared. The outturn of *bhadoi* crops now reported is much lower than what was reported in September last for many districts. Taking all the *bhadoi* crops together, it would appear from the district returns appended hereto, that out of 43 districts, from which the final report has been received, only 1 (Tippera) reports a full average, or 16-anna crop, only 8 districts (namely, Burdwan, Bankura, 24-Parganas, Dacca, Fandpur, Backergunge, Chittagong and Gaya) report the crop to be from 12 to 14 annas, 27 districts estimate the crops at 8 annas and over, but less than 12 annas, and 7

districts (namely, Nadia, Rajshahi, Shahabad, Saran, Muzaffarpur, Cuttack and Puri) at less than 8 annas. The final *bhadoi* report has not been received from Jessore and Palamau.

Looking to the poor yield of the *aus* or *bhadoi* paddy crop in the Presidency and Rajshahi Divisions, which contain the most important areas under this crop, and looking also to the worse yield of Indian-corn and millets in Bihar and Chota Nagpur, it seems improbable that the yield of the *bhadoi* crops generally for the Province has exceeded $10\frac{1}{2}$ annas; the yield of the *bhadoi* food crops alone has not perhaps exceeded $9\frac{1}{2}$ annas of a full average crop.

B. C. BASU,

*Assistant Director of the
Department of Land Records
and Agriculture, Bengal.*

(Countersigned.)

W. C. MACPHERSON,

*Director of the Department of Land
Records and Agriculture, Bengal.*

CALCUTTA,
The 8th December 1896.

Final Report on the Bhados Crops of Bengal, 1896.

RESOLUTION REVIEWING THE REPORTS ON THE WORKING OF
MUNICIPALITIES IN BENGAL DURING 1895-96.

MUNICIPAL DEPARTMENT—MUNICIPAL.

Calcutta, the 21st December 1896.

RESOLUTION—No 429M.

READ—

The Reports from the several Commissioners of Divisions on the working of Municipalities in the Lower Provinces of Bengal (except Calcutta) during the year 1895-96.

Read again—

The Resolution reviewing the Divisional Commissioners' reports on the working of Municipalities during the year 1894-95

THE following Resolution reviews the reports submitted by Commissioners of Divisions on the working of municipalities in Bengal during the year ending with the 31st March 1896. There was again great delay in the submission of these reports, and the last was received about two months after the prescribed date. Commissioners of Divisions must insist upon Municipal reports being submitted in good time

2 *Number of municipalities, population, and rate-payers.*—The total number of municipalities in existence at the close of the year was 116. The question of separating the Titagarh ward from the South Barrackpore Municipality, which had been under discussion since 1893-94, was finally settled during the year, and Titagarh was constituted a separate municipality with effect from the 1st April 1895. The municipality of Jamun, in the district of Bhagalpur, was abolished under Government notification No 4101 M., dated the 12th September 1895. The total number of municipalities was thus the same as in the previous year. Although in fact the number of municipalities was unchanged, the statistics annexed to this Resolution show only 145, as no report or returns have been received from the petty Municipality of Chanduria in Khulna, which was abolished on the 29th April 1896.

The table in Appendix A shows the date of establishment of each municipality, the population within municipal limits, and the number of rate-payers. The total population under municipal administration in Bengal, excluding Calcutta, amounted to 2,704,900, as against 2,725,434 in the previous year, the decrease being due to the readjustment of the limits of certain municipalities and to the exclusion of Chanduria from the operation of the Act.

The number of rate payers was 456,050, or 3,700 less than in 1894-95, being 16·8 per cent of the municipal population. The percentage varies from 20·2 in the Presidency Division to 13·58 in the Bhagalpur Division. The falling off in the number of rate-payers was most marked in the Presidency and Bhagalpur Divisions

3. *Results of elections held during the year.*—General elections were held in the municipalities of Cossipore-Chitpur and Maniktola in the district of the 24-Parganas. The elections were keenly contested in two out of four wards of the former and two out of three of the latter Municipality, the percentage of voters who attended ranging from 43 to 61 per cent. of the number entitled to vote. There were also 58 bye-elections, of which only 14 were contested. The percentage of attendance of voters varied from 78·9 at Uttarpara to 10·6 at Tamruk, both in the Burdwan Division. Four of the bye-elections held during the year failed, and the vacancies were filled by the appointment of Commissioners under section 16 of the Act.

4. *Constitution of Committees*—The following table illustrates the composition of the Municipal bodies in each Division:—

NAME OF DIVISION	NUMBER OF MEMBERS.				RACE.		OCCUPATION OR PROFESSION.									
	Ex-officio	Nominated	Elected	Total	European	Native	Government servants.	Zamindars and land holders.	Peasants and mukhtars.	Planters.	Merchants, traders, and money lenders.	School-master, (other than Government employes).	Medical practi- tioners.	Government pensioners.	Unemployed.	
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	
Burdwan	3	138	224	365	24	341	48	78	80		57	13	44	9	37	
Presidency		230	334	537	21	526	79	178	76		72	45	16	31	63	
Majshahi	2	85	98	185	38	147	44	58	44	10	18	13	3	6	17	
Dacca	3	111	112	223	8	218	35	51	71		14	8	11	3	29	
Chittagong	6	27	40	73	8	65	15	11	26		6	9		1	9	
Patna	13	165	173	371	44	327	61	117	98	2	46	4	10	2	33	
Bhagalpur	2	61	94	156	24	131	24	94	21	1	16	2	4	3	44	
Orissa		41	34	75	5	70	24	13	25		1	4		3	6	
Chota Nagpur	18	61	42	118	20	94	55	12	57		15	3	1	6	11	
Total	44	912	1,170	2,126	191	1,935	367	526	477	13	246	94	88	67	250	
Percentage on total	2.07	42.9	55.3		8.9	91.1	17.2	24.7	22.4	6	11.4	4.4	4.1	3.1	11.7	
Percentage for 1894-95	1	45.1	54.7		9.0	90.9	1.3	24.0	22.3	6	11.7	4.6	4.3	3.2	11.4	

As in the previous year, the lawyer element preponderated in the Chota Nagpur, Orissa, Chittagong and Dacca Divisions. The landed interest was most largely represented in the Presidency and Patna, and the trading element was strongest in Burdwan, Chota Nagpur, the Presidency and Patna, and weakest in Orissa.

5. *Attendance at meetings.*—There were in all 2,665 meetings held during the year, against 2,663 in 1894-95. Of these, 260, or 9.7 per cent., were unsuccessful or adjourned, as against 225, or 8.4 per cent., in the previous year. The Sherpur Municipality in the Mymensingh district again held the largest number of meetings, viz., 40, of which only 3 had to be adjourned, Nasirabad comes next with 35, of which 4 were unsuccessful. In five other municipalities, viz., Tangail, Baidyabati, Howrah, Cossipore-Chitpur, and Bihar, the number of meetings reached or exceeded 30. During the year under review 37 municipalities held more than 20 meetings, while only 9 failed to hold at least one meeting a month. Among these was the important municipality of Bhagalpur, where the number of meetings fell from 23 to 11. The Chairman explains that "there was a lot of business in connection with the extension of water-works in 1894-95, but not much business in 1895-96, hence the decrease." As the work of the municipality is reported to be "heavily and seriously in arrears," this explanation cannot be accepted as satisfactory.

In 75 towns, as against 96 in 1894-95, more than one half the number of Commissioners on the average attended each meeting. The highest percentage of attendance was 78.1 in Damhat (Burdwan), where the Commissioners held 15 successful meetings, while Chapra (Saran) stands second with a percentage of 76.8 at 15 meetings, of which only one was unsuccessful. Less than one-third of the Commissioners attended the meetings in eight towns, including the important municipalities of Rangpur, Purnea, and Ranaghat. Kumarkhali shows the worst results in the province in this respect, the attendance falling as low as 20.8 at 24 meetings.

6. *Ward Committees.*—There were Ward Committees in 17 towns, against 20 of the previous year, and opinion generally is still unfavourable to the formation of these Committees, as tending to weaken the executive power of the Chairman. Mr. Collin, the Magistrate of the 24-Parganas, is of opinion that Ward Committees are unnecessary complications of municipal administration, that when the local Commissioners interest themselves in the affairs of their ward no Committees are required, and that when they do not do so, they are useless. The Commissioner of the Presidency Division does not, however, agree in this view, as he has always found such Committees useful in their way. He observes that "in a municipality like Krishnagar, where both the Chairman and the Vice-Chairman are pleaders with a large practice, and devote very little time to municipal matters, it is much to be desired that either Ward Committees or Sub-Committees should be formed for the supervision of all branches of municipal work, the deplorable state of affairs in this

municipality being mainly due to want of supervision on the part of its executive officers." He adds that the system of putting Municipal Commissioners in executive charge of the wards for which they have been elected, was discontinued in Ranaghat and Santipur, although neither of these municipalities is working well. Mr Westmacott goes on to suggest that in every ward a single Commissioner or a small Sub-Committee should inquire into all cases of default in the payment of rates, and a system of this kind is stated to have been adopted by the Municipal Commissioners of Serampore and to be actually in force in Dinajpur, Jalpaiguri, Rangpur and Darjeeling, where Ward Committees appear generally to have done well. In order to make it work effectively, the rule should be that demands should only be written off on the certificate of the Ward Commissioners that they had been found after personal inquiry to be really irrecoverable. The point will be considered in connexion with the account rules which are now undergoing revision. It is satisfactory to notice that during the year under review, the Howrah Municipality has established a standing Sub-Committee for each ward of the town, and those are reported to have worked with remarkable success. In the Chittagong Division Ward Committees exist only in the town of Chittagong, and it is reported by the Commissioner that "the system was a total failure, none of the Commissioners taking the slightest interest in the sanitary condition of their wards, or using the power delegated to them under section 53 of the Bengal Municipal Act." In the Orissa Division there were no Ward Committees, the experiment of forming them in Balasore having proved a failure. The system of reporting irregularities by means of check notes, which was tried in the Kendrapara Municipality, is also stated not to have worked well. In Balasore the Ward Commissioners were placed in general executive charge of the wards they represented, and all bills for works were certified by them to be correct before any payment was made. Sub-Committees were also formed for the purpose of dealing with specific subjects, *e.g.*, assessments, finance, sanitation, &c, and for working out the details of important questions before their submission to special or general meetings for final decision. It is stated that some of the Commissioners took great interest in their work and brought to notice wants and irregularities in their wards.

7. *Assessment and taxation.*—The rate on holdings was in force in 36 towns, and a tax on persons according to their circumstances and property was levied in the remaining 110. In 22 of the former the rate on holdings was assessed at the maximum rate allowed by the law, and in the remaining 14 at the rates

Name of Municipality	Rate of tax Rs	Name of Municipality	Rate of tax Rs
Hooghly and Chinsura	6½	Dacca	8*
Howrah	7½*	Narainganj	6½
Baranagar	6½	Pitna	7½*
Krishnagar	6	Jamulpur	7
Santipur	6½	Bhagatpur	7
Ranaghat	6½	Purnea	6
Darjeeling	6*	Salubganj	5

* The legal maximum in the 6 places is 10 per cent. on the annual value of holdings and for the rest of the municipalities in the province it is 7½ per cent.

shown in the margin. The Commissioners of the Howrah Municipality are said to be unwilling to levy the full rate of 10 per cent for fear it should press too heavily on the rate-payers, since lighting and conservancy rates are already in force in the Municipality, and the water-rate will shortly be imposed. It is further stated that in Howrah and Bally the existing rate is too lightly assessed. In both places extensive sanitary reforms will have to be undertaken during the next few years, and in Howrah particularly the question of increasing the resources of the Municipality must soon be seriously faced. The Lieutenant-Governor regrets to notice that the Municipal Commissioners of Krishnagar have not yet given effect to the resolution passed by them at a meeting at the close of the last year, raising the rate of taxation to 7½ per cent. The case of Dacca is more serious. The conservancy of the town is reported to be in a deplorable condition; the water-supply is insufficient, the drainage is bad; the funds of the Municipality are exhausted, and it is essential that a higher rate should be imposed to meet the primary needs of the town. During the year under report the Baranagar Municipality adopted the rate on holdings for the first time, and levied it as a tentative measure at 6½ per cent. This has enabled the Commissioners to impose a proper assessment on the factories and large residential and garden-houses within the Municipality, and has yielded an income of Rs. 6,618 from house-property. The sudden increase of taxation was at once opposed by the persons affected. The Magistrate prevailed upon the Municipal Commissioners

and the objectors to agree to the appointment of an arbitration committee, consisting of three gentlemen unconnected with the Municipality. This committee disposed of the objections and reduced the rate in many cases. Some of the parties did not accept the decision of the Committee and instituted civil suits, some of which are still pending. At Patna the Municipal Commissioners proposed to enhance the rate of taxation from $7\frac{1}{2}$ to 10 per cent., but the proposal was rejected by a majority of 10 to 4 votes. The Commissioner rightly observes that "it is essential to the financial success of any water-works scheme that the rate should be raised to the authorised limit of 10 per cent., and I am sanguine that as soon as a good scheme is laid before the Commissioners, their opposition to increasing taxation will be withdrawn."

8 The average incidence of taxation throughout the municipalities of Bengal (except Calcutta) rose from As. 13 7 in the previous year to As. 14-1, inclusive of the tax paid on Government buildings. This is considerably below the average incidence for all municipalities in India, which during 1894-95 was Re. 1-1-5, the figure varying in different Provinces from Re. 1-6-6 in Bombay to annas 9-10 in the Hyderabad Assigned Districts. If the tax on Government buildings were deducted, the apparent incidence on the people would in many places be greatly reduced. In 37 towns as against 31 in the previous year, the incidence of taxation exceeded one rupee per head of the population. Almost all of these are in Bengal Proper; in the other divisions of the Province, Muzaffarpur and Jamalpur are the only places where the incidence exceeded one rupee during the year under report, while in the Orissa and Chota Nagpur Divisions not a single town has reached this standard of taxation. The Rajshahi Division shows the highest average incidence as the taxation is nowhere less than one rupee a head except in Sirajganj, where the rate is As. 12-6. In 53 towns, as against 62 in the previous year, the incidence of taxation was less than 8 annas per head. It was highest in Darjeeling (Rs. 4-14-10) and lowest in Ramjibanpur and Chandiakona (As. 3-9) in the Midnapore district. The following important towns, which form the head-quarters of districts, continue to be lightly taxed:—

Name of Municipality	Incidence of taxation		Name of Municipality.	Incidence of taxation.	
	1894-95.			1894-95.	
	As	p.		As	p.
Bankura	7	3	Puri	12	8
Gaya	9	10	Hazaribagh	5	1
Ariah	7	2	Ranoni	8	7
Chapra	7	3	Daltonganj	6	1
Motihari	8	0	Purulia	12	3
Darbhanga	5	3	Chaubassa	6	2
Balasoie	9	5		6	0

The Lieutenant-Governor notices with satisfaction that the incidence has increased in all the districts of the Patna Division, except Darbhanga, where it fell off owing, it is alleged, to heavy remissions granted during the year. The average incidence for the Division has risen from As. 8-6 to As. 9-0, which is still far below the average of the province.

	Increase.	Rs.	
Howrah	...	2,510	towns, which resulted in an increase of the demand in all but 24 cases. The results were most satisfactory from a financial point of view in the towns mentioned in the margin. Although the general revision of taxes in the South Suburban Municipality shows an increase, the Commissioner of the Presidency Division holds that it was badly done, as the assessment gave rise to a large number of appeals, many reductions had to be made, and it is stated that further revisions will take place in the course of collection. The Commissioner of the Presidency Division reports that "in South Barrackpore, cases have come to light in which the assessment has been reduced without any application from 6 annas per quarter to 5 annas 6 pies. This was apparently done to deprive certain rate payers of their

franchise, and efforts have been made to induce the Commissioners to rectify the error."

In Patna there was a partial revision of assessments, which increased the demand by Rs. 8,918. This was reduced on appeal to Rs. 6,900. On this subject the Commissioner of the Division observes.—

"In the first place," the Magistrate reports, "on repeated occasions no quorum was formed and the parties had to leave the office, time after time, without their business being disposed of. Again, this Committee, as a rule, gave no grounds for their decisions, which are final. Many curious decisions were given, and considerable hostility shown to the assessor who, one Municipal Commissioner openly said, could not be trusted because he was a paid servant."

In Bihar the assessment made prior to the opening of the year could not be completed in time to give effect to it during the year. As regards Barh, the Magistrate reports as follows —

"In Barh my inspection brought to light the fact that the current assessments were made by the Municipal Commissioners in the wards for which they were elected, and they also disposed of appeals against their assessment. In consequence, we have the local country-spirit vendor taxed at the maximum, followed at a long interval by the leading local *rews*. The Municipal Commissioners, some of whom are traders, got off with a very light impost."

In Dinapore, Gaya, Arrah, and Chapra the assessments were revised by paid assessors. In Dinapore the revision of the assessments resulted in an increase of Rs. 609, and the objections were heard by Committees. In Gaya the increase amounted to Rs. 8,200. The revision of assessment of the Arrah Municipality is likely to cause an increase of Rs. 3,000 in the income. The result of the assessment of the Chapra Municipality has not yet been reported. Mr. Slack on inspecting the Municipality at the latter end of March last made the following remarks.—

"The paid assessor, who began his work on the 4th December, and was engaged for six months, has now completed his assessment, with the result that the assessment has been nominally raised by Rs. 6,000. So far 783 objections have been filed, and nearly a month remains in which others may be made. The sub-committee held five sittings, and it has since disposed of about 100 petitions. I saw some of the cases disposed of in which the assessor's assessment has been reduced. It would be very beneficial if the sub-committee stated clearly their reasons in each case where they do not confirm the assessor's figures. A mere order of reduction has, in itself, no convincing power."

The Commissioners of the Motihari Municipality changed their mode of taxation from the tax on persons to a rate on holdings, in the hope of raising their income, and appointed a salaried assessor to make the assessment. The assessor completed the work, and there was an increase of Rs. 800, after allowing for reductions on objection. The revised assessment does not, however, take effect until the current year. In the Darbhanga Municipality there was neither material increase nor decrease in the income, the revised assessment not having been introduced, and the Magistrate reports thus on the subject:—

"A paid assessor was appointed by the Municipality in January 1895, and was required to revise the assessment within four months. Instead of completing the revision of assessment within the time allowed, he applied for an extension more than once. Extensions were granted, but, notwithstanding this, the result was very unsatisfactory. Some of the assessment lists having been tested by Mr. Oldham, the late Officiating Chairman, he discovered cases of both under and over-assessments. The revision of assessment having been considered by the Commissioners and the then Chairman to be defective in certain respects, the lists of assessment of one ward, prepared by the said assessor, were given to the Commissioners of another ward to check and revise where necessary; but notwithstanding the two months' time given to the Ward Commissioners for the purpose, the result remained unsatisfactory. In consequence of the errors noticed in the lists, both as prepared by the assessor originally and as revised by the different Ward Commissioners, the assessment was finally set aside on reference to the Commissioner. The Municipal Commissioners have resolved to have the assessment revised this year by a paid assessor."

On the general question of municipal taxation and assessment, the Commissioner of the Presidency Division observes that "the municipalities exist not because the people want municipal administration, but because certain persons wish to be Municipal Commissioners. The Commissioners are afraid to offend the electors by assessing the taxes equitably or by taking proper measures to levy them punctually. No sanitary reform involving taxation is ever introduced without most virulent opposition."

10. *Demands, collections, remissions, and outstandings on account of taxes.*— Under these heads the following statement compares the totals for the three years 1893-94, 1894-95, and 1895-96:—

YEAR	DEMAND			COLLECTIONS						REMISSIONS.				
	Arrear.	Current	Total.	Arrear.	Current	Total.	Percentage of column 5 on column 2	Percentage of column 6 on column 3	Percentage of column 7 on column 4	Arrear.	Current.	Total.	Percentage of column 13 on column 4	Out-standing balance
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
1893-94	Rs 4,27,089	Rs 22,51,270	Rs 27,08,359	Rs 2,43,143	Rs 18,00,629	Rs 21,03,772	56.4	81.5	77.6	Rs 59,613	Rs 59,372	Rs 1,18,985	4.3	Rs 4,96,212
1894-95	4,03,568	21,71,583	25,75,151	2,74,510	19,70,277	22,44,787	55.6	83.3	78.9	50,083	58,144	1,08,227	5.4	4,59,319
1895-96	4,63,780	20,27,826	24,91,606	2,47,899	20,80,234	23,28,133	53.4	84.0	78.1	73,814	57,480	1,31,294	5.0	5,10,238

With an increase in the total demand there has been a decrease in the percentage of collections of both the arrear and current demands. The collection of arrears has fallen off by 2.2 per cent. as compared with the previous year, and by 3.4 per cent. as compared with the results of the year 1893-94. The outstanding balance has risen by Rs 59,910. The record is altogether unsatisfactory except that there has been a small decrease in the percentage of remissions.

11. The table below shows the percentages of collection attained by the municipalities in each Division as compared with the previous year.—

PERCENTAGE OF TOTAL COLLECTIONS ON TOTAL DEMAND.	NUMBER OF MUNICIPALITIES																			
	Burdwan		Presidency		Rajshahi		Dacca		Chittagong		Patna		Bhagalpur.		Orissa.		Chota Nagpur.		Total.

Total number of municipalities	26	26	37	37	11	11	17	17	5	5	23	27	11	10	5	5	9	9	116	116

The Dacca Division has the best result, and shows a creditable advance on last year's collections. All the municipalities in this Division collected over 90 per cent. of their demands, except Dacca and Madaripur, where also the collections were over 80 per cent. In the Rajshahi, Chittagong, and Orissa Divisions the comparatively good record of the previous year was maintained. There was a slight improvement in the Patna Division also, but in the important Divisions of Burdwan and the Presidency the results were again bad, the average percentage of collections on the total demand being 69.2 and 69.4, and the remissions 4.5 and 6.4 per cent. respectively. In the former Division Bhadreswar (57.5) and in the latter South Suburban (48.4) occupy the lowest places in the table. As regards the South Suburban Municipality, the decrease is reported to be due to the revision of the assessment, which was badly done. The percentage of collections in the Maniktala Municipality (56.8) shows some improvement as compared with previous years. The results, however, compare unfavourably with those attained in the adjacent municipality of Cossipore-Chitpur, where the percentage has been nearly 80 per cent., and the Commissioner complains of defective supervision on the part of the official Chairman, the Deputy Magistrate of Sealdah. In North Barrackpore the percentage of collections was only 63.4, and the Commissioner remarks that the Chairman and Vice-Chairman neglect the collection department. In Krishnagar the collections were only 56.3, and there is said to have been great delay in disposing of appeals.

12. In 37 towns more than 95 per cent. of the demands was collected, and

Vishnupur	98.68
Sonamukhi	98.63
Tamluk	98.8
Narainigunge	98.67
Bazitpur	98.7
Jhulokati	99.1
Cox's Bazar	99.8
Jagdispur	99.3
Sirona	99
Hajipur	99.03
Silamarkhi	98.5
Madhubani	98.1
Roserdh	99.07
Dougha	99.8
Kendrapara	99

among them the results of the 15 municipalities named in the margin reflect great credit on the municipal authorities, the collections in each case having exceeded 98 per cent. This result was obtained without recourse being had to large remissions, and in nine cases there was no arrear at the close of the year. The Lieutenant-Governor congratulates these municipalities on their successful management. The good results attained by the municipalities in the Mymensingh and Backergunge districts in the Dacca Division and in the Saran and Muzaffarpur districts in the Patna Division

deserve special notice, as the collection has in all cases exceeded 90 per cent.

13. In the matter of remissions, the average percentage for the whole Province has fallen off from 54 in 1894-95 to 45. The decrease is most marked in the Presidency and the Bhagalpur Divisions. In the former, it declined to 64, against 69 in 1894-95, and in the latter to 25, against 59 in the previous year. In the Rajshahi Division, however, there was a slight increase in the percentage from 27 to 41. Only in the six towns

Maniktala	12.8
South Suburban	13.4
Gobardanga	12.5
Rangpur	13.5
English Bazar	13.3
Balasore	16.79

named in the margin as against eleven in 1894-95 did the remissions exceed 10 per cent. The first three towns on the list, all of which are in the Presidency Division, have, for the past few years, made large remissions, and it seems probable that the assessments are inequitable, and that a paid

assessor should be appointed to revise them, as provided in section 46 of the amended Act. The Lieutenant-Governor agrees with the Commissioner of the Presidency Division in thinking that if prompt enquiries are made into statements of balances every quarter, the amounts remitted will be considerably reduced.

14. Several municipalities show heavy outstanding balances. In Howrah the balance rose from Rs. 87,673 to Rs. 1,16,640. The system of collecting taxes by contract under the system in force in Calcutta was introduced in Howrah on the 1st October 1895, but for various reasons did not work well during the year. The outstanding balance of Rs. 30,571 in Patna is attributed to delay in disposing of appeals, petitions, and objections, and to the presence of the auditor during the fourth quarter, which interfered with the collecting staff. In the Arrah and Darbhanga Municipalities the outstanding arrears were Rs. 7,325 and Rs. 5,052 respectively. The former sum includes Rs. 4,550, due on account of water rate and latrine tax. Under pressure from the Chairman the Commissioners are said to be making serious efforts to improve their administration. In Darbhanga the arrears are reported by the Magistrate to be due to laxity on the part of the collecting staff, the whole of which has since been dismissed. The Bhagalpur Municipality has a large outstanding balance, viz., Rs. 21,542, and it is stated that these arrears have accumulated for the last four years. The Magistrate observes:—"The figures of collection do not reflect credit on the Municipal Commissioners; the receipts on account of taxes on houses and lands show a very serious falling off; the decrease in the water-rate collections is also serious. The reasons assigned for the decrease in these two cases can scarcely be called reasons at all."

On the occasion of an inspection of the Muzaffarpur Municipality, the Commissioner of the Patna Division found the collections to be most satisfactory. This was reported to be due to the practice at present followed in the realisation of the taxes, viz., of receiving money both at the houses of the assesses if voluntarily paid there or at the Municipal office.

On the subject of the collection of municipal taxes, the Lieutenant-Governor desires to draw attention to the remarks recorded by Sir Charles Elliott in last year's Resolution.

"Municipal incomes everywhere are made up of a large number of petty sums collected from a population which comprises a large number of poor people. Delay in collecting necessarily results in the accumulation of irrecoverable arrears, and for this reason the law

makes municipal dues payable at the beginning of the quarter to which they relate and provides an effective procedure for realising them. The whole question is one of method and administration; and where the collections are bad the fault rests with the Chairman and Vice-Chairman, who have either failed to work out, or to carry into effect, an effective system of serving bills and notices of demand, and to compel their subordinates to carry out orders with regularity and despatch, and above all to account for their collections at the shortest possible intervals, if not every day."

15. *Fresh imposts levied during the year.*—The latrine-tax was levied for the first time in Kalna, Balasore, Arrah, and in parts of Naihati, and license fees for offensive and dangerous trades under section 261 of the Act in Kalna, Vishnupur, Sonamukhi, Chagdah, Meherpur, Narayanganj, Jhalokati, and Faridpur. A water-rate of 3 per cent. on the annual value of holdings situated within a radius of one thousand feet from the nearest hydrant was imposed in the Cossipore-Chitpur Municipality. Collections were made in the South Suburban Municipality under the Licensed Warehouse and Fire Brigade Act. In Meherpur fees were levied under section 263 of the Act from milkmen, cartmen, and keepers of hackney carriages. The conservancy cess and cart-tax were imposed within the Bihar Municipality, and the tax on the registration of carts was introduced in Roserah. The horse and carriage-tax was levied in the Chaibassa and Daltonganj Municipalities, but owing to a strong protest by the rate-payers of the latter place against this new impost, the Municipal Commissioners resolved to discontinue it altogether from the beginning of 1897-98, and in order to make up for the loss of revenue, the personal tax was raised from As. 10 to As. 12 per cent. The Lieutenant-Governor agrees with the Commissioner of the Chota Nagpur Division in thinking that "this action on the part of the Municipal Commissioners in raising the standard of general taxation affords them no reasonable ground for discontinuing the special tax upon horses and carriages, and the position they have taken up in this matter seems to be illogical as well as open to the imputation of selfish motives."

16. *Income and expenditure.*—The following table shows separately for each Division the opening and closing balances, the income, and the expenditure of its municipalities during 1894-95 and 1895-96:—

NAME OF DIVISION	Opening balance.		Income during the year		Total fund available for expenditure.		Total expenditure.		Closing balance	
	1894-95.	1895-96	1894-95	1895-96	1894-95.	1895-96.	1894-95	1895-96.	1894-95	1895-96.
1	2	3	4	5	6	7	8	9	10	11
	Rs	Rs	Rs	Rs.	Rs.	Rs	Rs	Rs.	Rs.	Rs
Burdwan	39,468	45,276	13,61,306	16,60,685	19,06,772	10,95,981	12,85,404	10,95,694	45,278	62,997
Presidency	1,75,458	1,19,741	6,32,961	6,14,179	8,08,820	7,81,980	6,66,084	6,83,044	1,10,726	1,00,376
Rajshahi	39,189	38,535	4,05,689	3,50,322	4,45,028	4,47,767	3,66,463	4,02,026	38,535	44,641
Dacca	36,016	35,452	3,46,252	3,40,575	3,74,108	3,76,028	3,40,889	3,50,873	37,170	35,025
Chittagong	55,800	19,022	83,900	69,108	1,05,106	1,09,185	1,74,788	82,690	19,021	25,025
Palna	1,16,833	1,45,719	9,04,445	9,36,921	10,20,279	7,60,710	8,76,680	9,87,663	1,43,719	1,45,037
Bhagalpur	40,008	25,315	2,59,873	2,39,421	3,73,561	2,62,020	2,46,043	2,81,757	25,318	30,876
Orissa	7,160	8,063	1,11,097	1,11,761	1,18,265	1,18,214	1,14,130	1,14,906	8,063	6,906
Chota Nagpur	17,262	12,500	69,621	67,918	85,873	80,718	71,073	69,604	12,500	11,114
Total	5,09,036	4,85,924	40,45,346	41,10,885	48,54,390	44,02,679	40,67,711	41,31,808	4,86,009	6,71,117

There was a satisfactory increase both in income and expenditure. The difference between the closing balance of 1894-95 and the opening balance of 1895-96 is slight, and is due to revised figures having been shown in the present accounts.

17. The closing balances in some municipalities appear to have been again unnecessarily large. Except in the few cases in which money has been allowed to accumulate for the purpose of carrying out schemes of permanent improvement, the existence of a large balance indicates inefficient control over works and expenditure, and the Lieutenant-Governor trusts that in future Municipal Commissioners will make full use of the income of the year. As a rule, the closing balance need not exceed the average charges for two months. The following municipalities fell into an error of the opposite kind and were

left at the close of the year without sufficient funds to pay their staff and meet current expenses during the month of April 1896:—

Name of Municipality.	Total income of year. Rs.	Closing balance Rs.	Name of Municipality.	Total income of year. Rs.	Closing balance Rs.
Raniganj ..	17,376	27	Muktagacha ..	5,055	28

Satkhura ..	4,521	31			

INCOME.

13. The table in paragraph 16 shows a total increase in the income of municipalities in Bengal of Rs. 71,510 of which only Rs. 3,397, occurred under debt and suspense heads. The following table shows the revenue derived from taxation proper in each Division in 1895-96 and in each of the four preceding years:—

YEAR.	NAMES OF DIVISIONS									
	Burdwan	Presidency	Rajshahi	Dacca.	Chittagong	Patna.	Bhagalpur.	Orissa.	Chota Nagpur.	Total.
1	2	3	4	5	6	7	8	9	10	11
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
1891-92 ...	5,43,885	4,56,046	1,76,379	2,39,153	55,398	2,33,543	1,45,381	68,911	40,797	20,99,161
1892-93 ..	5,86,287	4,36,448	2,03,564	2,39,403	51,169	2,51,008	1,59,345	76,310	38,865	21,75,324
1893-94 ...	5,71,793	4,43,654	2,04,781	2,42,967	50,206	2,92,136	1,52,909	82,010	39,445	21,79,901
1894-95 ..	5,84,323	4,74,507	2,13,813	2,62,646	55,478	4,27,672	1,71,573	82,479	40,825	23,12,484
1895-96 ..	6,00,851	4,84,143	2,26,726	2,68,498	53,446	4,53,276	1,71,532	80,315	41,810	23,87,604
Increase since 1891-92	56,966	27,106	53,347	29,345	5,148	69,734	26,251	14,402	1,019	2,91,439
Percentage of increase	10·4	5·9	30·4	12·1	9·3	18·1	18·06	21·3	2·4	13·9

19. The total income from taxation shows an increase of Rs. 74,115, or 3·2 per cent. over that of 1894-95. The increase occurred in all divisions except Bhagalpur and Orissa, and was largest in Patna, Burdwan, and Rajshahi where it came to Rs. 25,604, Rs. 16,598, and Rs. 15,913 respectively. The increase in the Patna Division was shared by all districts except Patna and Darbhanga. During the period of five years covered by the table, municipal taxation in Bengal has risen by 13·9 per cent. In different divisions the proportion of increase varies from 30·4 in Rajshahi to 2·4 in Chota Nagpur; while in the Presidency and Burdwan Divisions where Municipal administration is most highly developed, and there is the greatest need for improvements in conservancy, drainage and water-supply, the income from taxation has risen by only 5·9 and 10·4 respectively.

20. The statement in Appendix E shows the details of income under each head separately for each division during the years 1894-95 and 1895-96,

and the following figures give the difference between the receipts of the two years for the whole Province:—

HEADS OF REVENUE.	Total receipts (1895-96)	COMPARISON WITH 1894-95.		
		Increase	Decrease	Percentage of variation.
1	2	3	4	5
	Rs	Rs	Rs.	
1 Municipal rates and taxes—				
(a) Tax on houses and lands ...	8,34,269	17,357	2.1
(b) „ on animals and vehicles ...	1,92,419	4,154	2.2
(c) „ on professions and trades ...	42,134	5,817	16.0
(d) Tolls on roads and at ferries ...	1,51,561	12,674	9.1
(e) Water-rate ...	74,489	29,569	65.8
(f) Lighting rate ...	35,807	809	2.3
(g) Conservancy (including scavenging and latrine rates).	4,67,610	10,863	3.7
(h) Tax on persons according to circumstances and property	5,75,697	...	13,682	2.3
(i) Miscellaneous (penalties, &c.)	13,614	554	...	4.2
2. Realizations under special Acts	95,508	5,962	5.8
3 Revenue derived from municipal property and powers apart from taxation.	2,78,595	19,550	6.5
4. Grants and contributions (for general and special purposes).	1,30,636	7,708	6.2
5. Miscellaneous	80,143	18,596	30.2
6 Extraordinary and debt—				
(a) Sale proceeds of Government securities and withdrawals from Savings Bank.	7,356	1,503	16.9
(b) Loans	9,02,000	47,000	5.4
(c) Realisations of sinking fund for repayment of loans.	2,386	5,924	71.2
(d) Advances	1,45,077	...	12,490	7.9
(e) Deposits	87,554	30,480	25.8
Total	41,16,855	1,61,101	89,591
Net increase	...	71,510	...	1.7

21. *Rate on the annual value of holdings.*—The rate on holdings yielded a revenue of Rs. 8,34,269, which is Rs. 17,357, or 2.1 per cent. more than in the previous year. There was an increase in the Burdwan, Presidency, Rajshahi, Patna and Chittagong Divisions, and a decrease in the other Divisions except Chota Nagpur, where the tax is not levied. In the Burdwan Division there was an increase in all the municipalities except in Burdwan itself, where the decrease is attributed to the delay in disposing of objections against the revised assessment. In the Presidency Division the increase was in the 24-Parganas only, and was largest in Baranagar, viz., Rs. 17,502, where it was due to the substitution of this rate for the tax on persons, hitherto in force there. There was a large decrease of Rs. 7,141 in the South Suburban Municipality, which is attributed to bad assessment and general mal-administration. In the Patna Division the increase was due to revision of assessments and better collections in the districts of Gaya, Saran, and Muzaffarpur, whilst in Patna town there was a falling off, which has not been explained. In the Bhagalpur Division there was an increase of Rs. 2,863 in Monghyr town, due to the enhancement of the rate of house-tax from $6\frac{1}{2}$ to the maximum limit of $7\frac{1}{2}$ per cent. The Municipality of Bhagalpur shows a large falling off of Rs. 4,743, in regard to which the Commissioner observes:—

Out of a total demand of Rs. 35,906, only Rs. 24,157 were collected. My predecessor had several times urged the Municipal Commissioners of Bhagalpur to pay much more attention to the subject, and to try and attain better and regular collections of taxes, so that

they might be able to carry out successfully their great scheme of the extension of water-works. I had also drawn the attention of the Municipal Commissioners to the backward state of collections, when reviewing their budget for the current year. The Municipal Commissioners promised improvement, but the results are very disappointing. It seems plain that if the voluntary executive will not, or cannot, undertake the duties of detail, the establishment must be strengthened.

There was a decrease in the municipalities of Cuttack and Puri. In the latter, it is said to be due to the revision of assessment and the laxity of collecting staff.

22. *Tax on animals and vehicles*.—The increase under this head was shared by all Divisions except Burdwan and Orissa, in both of which the decrease is ascribed to the interpretation put by the High Court on the word “habitually” in section 142 of the Act. In the Presidency Division the increase of Rs. 1,220 in Santipur was due to the abolition of the farming system. In the small municipalities round Calcutta, carts are said to be taxed by the first municipality that can catch them, and to this cause is attributed the large income raised under this head by Barasat, which is nearly equal to its receipts from the personal tax and increased by Rs. 684 during the past year. Baranagar, on the other hand, shows a decline of Rs. 2,118, which is said to be due to the amended section 147A of the Municipal Act restricting the levy of fees to one municipality. In the Rajshahi Division there was an increase of Rs. 1,562, owing partly to the increase in the number of carriages and carts registered, and partly to the enhancement of the rate of the cart registration fees in the Dindajpur Municipality. To the last-named cause is also attributed the increase in the Chittagong Division. The increase of Rs. 3,663 in the Patna Division was shared by the districts of Patna, Shahabad, Saran, and Champaran. The increase in Patna was almost entirely confined to the Patna Municipality. The falling off in the fees in previous years was found, on enquiry, to be due to the payment by the carters of a small fee to the collector, for permission to postpone payment. This has been put a stop to and the collector punished for his offence. This tax was for the first time levied in the Daltonganj Municipality, where it yielded an income of Rs. 246. In Hazaribagh and Purulia the tax seems in past years to have been laxly administered and of the former place the Commissioner writes:—

In the Hazaribagh Municipality the income from this source has been increased by Rs. 778, which is said to be due to the registration of a large number of horses, carts, and carriages which had previously escaped registration. Such a state of things simply means that Municipal Commissioners have not the public spirit to enforce a tax which falls principally on themselves and the richer and more influential residents of the town. It is satisfactory to notice that steps have been taken to remove this blot on the administration.

23. *Tax on professions and trades*.—The revenue from this source increased by Rs. 5,817, owing to extensions and revisions of the tax. The increase was distributed over all the Divisions, except Dacca and Bhagalpur. In the Dacca Division, the decrease was for the most part in Nasirabad, where the tax on jute godowns was not realised pending a proposed revision. In Dacca town also there was a falling off, owing to the Commissioners having given the owners of the hide godowns notice to remove outside the town. In the Bhagalpur Division the decrease was chiefly in the Sahibganj Municipality.

24. *Tolls and Ferries*.—Nowhere in the province are tolls levied on roads, and in the Chota Nagpur Division there is only one municipal ferry over the river Koil in Daltonganj, the acquisition of which has recently been sanctioned by Government. All the other Divisions except Chittagong show an increase, the largest being in the Patna Division, where it amounted to Rs. 7,880, nearly all of which was due to more favourable settlements of the Municipal ferries at Patna.

25. *Water-rate*.—This rate was levied for the first time in the Cossipore-Chitpur Municipality, where the total receipts amounted to Rs. 17,855. The provisions of Part VII of the Municipal Act were extended to the Howrah Municipality towards the close of the year under review, but the water-rate could not under the law be levied before the first quarter of the current year. The only other municipalities, where the tax is in force, are Burdwan, Darjeeling, Nasirabad, Arrah, and Bhagalpur. In Burdwan the receipts show a falling off of Rs. 754, due to the non-disposal of several objections against assessment. In Nasirabad and Arrah the receipts show an increase of Rs. 372 and Rs. 9,834

respectively, while in Bhagalpur there was a falling off of Rs. 1,741 or over 20 per cent. for which no intelligible reason is given.

26. *Lighting rate.*—This rate is levied only in Howrah, where the receipts show an increase of Rs. 809 over the figures of 1894-95.

27. *Conservancy, including scavenging and latrine rates.*—The increase of income under this head, viz, Rs. 16,863, was shared by all the Divisions except Patna, where there was a falling off of Rs. 2,207, said to be due to the non-disposal of objections and to the collections being hindered by the local auditor's inspection of the accounts towards the close of the year. The Burdwan Division shows an advance of Rs. 6,018. In Berhampore the decline of Rs. 3,234 was due mainly to the exemption from the tax of shops with no latrines attached to them. The Bhagalpur, Rajshahi, and Dacca Divisions show an increase of Rs. 3,685, Rs. 3,512, and Rs. 3,270 respectively. The increase in the Rajshahi Division is due to the extension of Part IX of the Municipal Act to three more wards of the Nator Municipality, and to stricter supervision in Rangpur.

28. *Tax on persons according to their circumstances and property.*—Of the 111 municipalities in which this tax is in force, 61 show an increase and 50 a falling off of income. The increase was most marked in the following municipalities.—

					Rs
Katwa	1,507
Bansbaria	1,111
Kumarkhali	1,241
Rangpur	2,222
Sirajganj	1,037
Barisal	1,163
Bettiah	1,689
Puri		1,889

For the whole Province the receipts from this source declined by Rs. 13,682, which is more than accounted for by the substitution of the house tax for the personal tax in the Municipality of Baranagar.

29. *Other sources of revenue.*—Of the other sources of revenue the rate levied in the Maniktala, Cossipore-Chitpur, South Suburban and Howrah Municipalities for the maintenance of the Fire Brigade, yielded an income of Rs. 21,882 against Rs. 29,649 in the previous year. Revenue from pounds shows a falling off from Rs. 59,085 to Rs. 58,032, while the amount of fines rose from Rs. 39,092 to Rs. 39,908.

30. *Grants from Provincial and Local Funds.*—The contributions received by municipalities from Provincial and Local Funds and from other sources rose from Rs. 1,17,323 to Rs. 1,20,645. They are classified as follows:—

PURPOSE FOR WHICH MADE			Provincial	District Fund.	Other funds and public charity	Total.
1	2	3	4	5	6	7
			Rs	Rs	Rs	Rs.
Medical	2,494	35,911	34,129	72,534
Education	1,947	200	495	2,642
Public Works	10,534	9,576	20,110
Other purposes	1,633	23,726	25,359
Total	.		14,975	37,744	67,926	1,20,645

In the 24 Parganas the Jute and Paper Mills at Titaghar contributed Rs. 2,676 towards the construction of pukka surface drains, and advanced Rs. 600 to enable the municipality to be started. The zamindars of Gouripur in Mymensingh gave Rs. 1,300 for the construction of pukka drains in the Netrokona Bazar, and Rs. 9,700 was contributed by private persons towards the cost of a drainage project in the Muzaffarpur Municipality. The District Boards in the Patna Division made the following grants towards the maintenance of municipal dispensaries:—Patna Rs. 4,800; Gaya 1,500; Shahabad Rs. 3,470; Saran Rs. 2,700; Champaran Rs. 1,900; Muzaffarpur Rs. 2,590, and Darbhanga Rs. 1,500.

31. *Gifts by private individuals.*—Besides the contributions included in the statement above, the following instances of private liberality deserve mention—A sum of Rs. 1,220 was subscribed by the Bepin Behari Dutt Memorial Committee for the purpose of laying out a public garden in Midnapore. In the town of Bhaddieswar a burning ghat, with a road leading to it, was constructed by Messrs Kilburn and Company at a cost of Rs. 1,200. In Baranagar Rs. 3,500 was spent by Babu Madhusudan Roy on the construction of a bathing ghat on the river Hooghly. A tank belonging to a local zamindar in Barasat was re-excavated by the late Babu Baroda Charan Banerji, and the re-excavation of another tank in the same place was commenced by Rai Nanda Lal Bose; a small building was constructed at the burning ghat for the convenience of the public by the Chairman of the Jessore Municipality at his own expense. In the Patna Division the principal contributors were—Babu Rameshwar Pershad Mahtha Rs. 5,000, Babu Bishnath Persad Mahtha Rs. 2,500, and Mahant Deva Das Rs. 1,000. Babu Dirgopal Lal of Hisua paid Rs. 300 for the construction of a moribund ward in the Gaya Pilgrim Hospital, and Babu Ramnath Singh made a donation of Rs. 1,500 for the purchase of surgical instruments. A Municipal Commissioner of Tikari, Babu Shiva Golam Misra, completed the excavation of a tank at a cost of Rs. 4,000 and made it over to the municipality. In Arrah, the Maharani of Dumraon contributed Rs. 5,000 for converting a jheel into a tank, and Babu Mahabir Pershad constructed a dharmshala in Bettiah at a cost of Rs. 4,000.

EXPENDITURE.

32. The total expenditure in the municipalities of the province (excluding Calcutta) amounted during the year to Rs. 41,31,562 against Rs. 40,67,711 in 1894-95, being an increase of Rs. 63,851. The year closed with a balance of Rs. 4,71,117, against Rs. 4,86,669 of the preceding year. The statement in Appendix F shows the percentage that the expenditure in each Municipality under each of the principal heads bears to the total outlay (excluding debt and suspense heads). For the whole province the percentages for the two years are as follows:—

Y ^r . YEAR.	General estab- lishment.	Lighting.	Water-supply.	Drainage.	Conservancy.	Medical.	Vaccination.	Public Works.	Education.	
1	2	3	4	5	6	7	8	9	10	
1894-95	...	8.8	4.2	21.8	7.2	23.4	8.7	49	15.5	3.6
1895-96	...	8.7	4.4	25.9	8.9	23.3	7.9	51	13.1	3.5

33. The following statement shows the expenditure of 1895-96 under its main heads, and also shows how these totals have varied from those of the previous year :—

HEADS OF EXPENDITURE	Total expenditure in 1895-96	COMPARISON WITH 1894-95.		
		Increase	Decrease.	Percentage of variation
1	2	3	4	5
1. General Administration—	Rs.	Rs.	Rs.	
(a) Office establishment, &c. ..	1,89,995	3,730	...	2·0

Total ...	41,31,562	3,22,797	2,58,946	...
Net increase	63,851	...	1·5

34. *Office and collection establishment.*—The total expenditure on office establishment shows an increase of Rs. 3,730, and that on collecting establishment of Rs. 372. In six small municipalities, as compared with three in

1894-95, the cost of office and collecting establishment exceeded one quarter of the whole expenditure of the year. The system of paying the collecting staff by commission was introduced for the first time in the municipalities of Baranagore, Bhagalpur, Patna and in some of the municipalities in the Dacca Division. It seems to have worked well, and the Lieutenant-Governor hopes that it will be adopted wherever local circumstances permit.

35. *The prevention of fire.*—The expenditure under this head fell from Rs. 20,552 to Rs. 20,969, the decrease being mainly in Cossipur-Chitpur (Rs. 10,292), due to the fact that the charges of 1894-95 included arrear payments. It is reported that some parts of the Dacca and Nasirabad towns and a greater part of the towns of Barisal and Jamalpur were destroyed by fire during the year. In Barisal the opportunity was taken to introduce building regulations, and the Lieutenant-Governor hopes this will be done in similar cases. The suggestion of the Magistrate of Dacca that hand fire-engines should be purchased also deserves consideration.

36. *Lighting.*—The expenditure increased from Rs. 1,60,596 in 1894-95 to Rs. 1,72,610. The increase was shared by all the Divisions except Chittagong, and was due chiefly to the increase of lights. In 18 towns against 23 in 1894-95 there was no expenditure under this head, including North Barrackpore with a population of 20,980, Jamalpur (18,089) and Barh (12,363). In South Barrackpore the streets were not lighted, but

North Barrackpore
Barh,
Jamalpur

Rs. 76 was spent on supplying oil to the patrolling police.

37. *Water-supply.*—Under this head Rs. 9,96,441 was spent against Rs. 7,97,303 in the previous year, of which Rs. 8,96,583 was applied to original works and Rs. 99,858 to maintenance. The increase in capital expenditure was due to the completion of the water-works in Howrah, which were opened by the Lieutenant-Governor on the 8th February 1896. Since then filtered water has been regularly supplied to the people of the town through 197 hydrants. There has been a decrease of expenditure under this head in all the Divisions except Burdwan, Dacca and Chittagong. In the Presidency Division it occurred principally in Cossipur-Chitpur (Rs. 5,228) and Maniktola (Rs. 7,630). In the former town, the main portion of the scheme for the supply of filtered water had been carried out and paid for in the previous year, while in Maniktola the fact that nothing was done to extend the provision of filtered water is ascribed by the Commissioner to want of energy on the part of the official Chairman. The decrease in the Rajshahi Division was shared by almost all the municipalities and was due to a smaller number of works having been taken in hand during the year. In the Patna Division the falling off is due to the large expenditure incurred on account of the construction of the Airah water-works in 1894-95, and in the Bhagalpur Division to reductions of pay.

The negotiations between the Municipal Commissioners of Raniganj and the East Indian Railway Company regarding the supply of the town with water from the Damodar river have fallen through, since the Railway Company have selected Ondal as the place to draw their water from. No progress has been made in the scheme for supplying the town of Midnapore with water from a storage reservoir and an alternative project for pumping water from wells in the bed of the Kalganj river is now under the consideration of the Commissioners. A comprehensive scheme drawn up by Mr. Kimber, the Engineer to the Corporation of Calcutta, for supplying filtered water to the small municipalities on the left bank of the Hooghly north of Calcutta had to be abandoned, as the cost was found to be prohibitive. The South Dum-Dum Municipality are negotiating with the authorities of the Dum-Dum Cantonment to secure a supply of water from the cantonment supply. Attempts are also being made by both the South Suburban and the North Dum-Dum Municipality to obtain a similar supply from the Calcutta mains. The Titagarh Paper Mills Company have constructed a pukka well and put up hydrants for the supply of filtered water to the public. Similar hydrants have been provided by the jute factory at the same place. At Berhampore, the Maharani Sarnomoyi, &c., has given the town more than two lakhs of rupees for the supply of filtered water. The supply of water in most of the municipalities in the Presidency Division is reported to be

inadequate, especially in North Barrackpore, Barasat, Naihati, Gobardanga, Basirhat, Taki, and Jessore. In all these places steps should be taken for the re-excavation of some of the existing tanks or for the excavation of new ones. The tank from which the people of Kanaghat receive their supply is reported to be contaminated by a number of filthy well privies situated close to it. The municipality have been directed to cause these to be filled up and to introduce a proper system of conservancy. In Darjeeling two large settling tanks were completed at Senchal, three new hydrants were erected, the dimensions of the existing pipes were altered, two pukka tanks were constructed, new lines of pipes were laid in some places and a piece of land was purchased for a second reservoir. A contract was also entered into for the introduction of the Pasteur filter. In Kurseong the laying of a new line of pipes was completed, thus making the supply of water sufficient throughout the year. The number of house connections has also been increased, and the tanks have been guarded against pollution. In the municipalities situated in the Dacca Division the water-supply in most cases is obtained either from tanks or from rivers. It is satisfactory to notice that in almost all of them the tanks have been or are about to be re-excavated or wells are being sunk to increase the supply. At Faridpur the experiment of constructing a large filter for the supply of filtered water from a tank is now being tried, and if it succeeds will no doubt be adopted in other places which cannot afford regular filter beds and pumps. The water-supply of the towns of Comilla, Brahmanbaria, and Noakhali is from tanks set apart for the purpose. The supply is sufficient except in Brahmanbaria, where the people also use the river Titas. In Chittagong the upper classes are said to use springs polluted by filtration from numerous cemeteries and fecal matter deposited in the dhils and nalas, while poorer people have recourse to filthy tanks. A comprehensive water-supply scheme is now under consideration. Regarding the supply of water in the Patna Division, the Commissioner writes as follows.—

“Pure water, both for drinking and for flushing purposes, is the great and crying want of Patna, and the health of the city can never be good till this want is supplied. The deplorable outbreak of cholera, which has occurred since the year closed, has gone far to persuade the Municipal Commissioners that it is, after all, worth while to raise the rate of taxation, in order to obtain a sufficient supply of good water; and if it can be shown that the scheme sketched by Mr Mills has a reasonable chance of success, I have little doubt that the necessary funds will be found, and that the municipality will apply for a loan. The bulk of the expenditure in Gaya was incurred in the Gaya Municipality, and this amount (Rs. 1,921) represents the salary of the surveyor and the cost of printing the report on the water-works experiments. As the scheme has now been approved, and it is hoped that the funds will soon be available, this money was well expended. In the Arrah Municipality the water-works supply pure and filtered water from the Sone river, but the cost of maintenance, with that of repayment of the loan, are a heavy drain on the municipality, which is not met by receipts from the water-rate. The water-works have been an expensive luxury in this town, and they may yet immerse the Municipal Commissioners in insolvency.”

A pure water supply is also badly needed in Darbhanga, and a scheme based on that which has been accepted for Gaya is about to be drawn up. A project suggested for Cuttack has been abandoned on the ground of expense, and an attempt is now being made to sink Norton's tube wells in the municipality. The state of things in Puri is thus described by the Chairman:—

“The inhabitants of the town generally take their water for drinking and culinary purposes from numerous wells situated in the municipality. Besides these, there are a few good wells in the sea beach, from which the European population and a few others obtain their water supply. Five wells in the compound of Gaudichia Mandir were cleaned and two wells outside the compound were kept closed to prevent the people from using water from them during the last Rathjatra festival, 12 municipal wells were cleaned and 9 wells were disinfected on the Hankin's principle whenever cases of cholera cropped up. All private wells in the town were cleaned out by their respective owners. Raghab Das and Lakhindra Math wells are still closed. Judging from the manner in which we escape epidemics except during pilgrim seasons, I think we may reasonably conclude that the water-supply is as good as can be expected until such time that proper coverings, pump, &c., are supplied.”

In the Chota Nagpur Division the municipalities receive their supply of drinking water mostly from wells and tanks, which are fairly plentiful. The Elliott well constructed by three leading jagirdars of Palamau in honour of the late Lieutenant Governor's visit to the place was made over to the Daltonganj Municipality during the year under review.

38. *Drainage.*—The expenditure under this head fell from Rs. 2,73,651 in 1894-95 to Rs. 1,49,559. The capital expenditure amounted to Rs. 75,569 and the cost of maintenance to Rs. 73,990. The decrease was most marked in the Patna Division, where the expenditure declined from Rs. 1,78,946 to Rs. 38,169. In the Patna town alone there was a falling off of Rs. 1,03,585, owing to the Patna drainage scheme having been completed in 1894-95. Muzaffarpur also shows a decrease of Rs. 43,110 on capital charges and an increase of Rs. 7,533 on maintenance. Capital expenditure rose in the Burdwan Division owing to the Serampur Municipality spending Rs. 9,467 against Rs. 857 in the previous year, and also in the Rajshahi Division by reason of the Jalpaiguri Municipality devoting Rs. 12,775 to the completion of a drainage scheme. Besides Serampur and Jalpaiguri, the municipalities noted in the margin incurred considerable expenditure on original works.

Cossipur-Chitpur	Rs. 4,364
Titagarh	2,672
Bhagalpur	4,414

Attention is again invited to the instructions issued in paragraph 43 of last year's resolution in regard to the drainage scheme of the Burdwan Municipality. A report should be submitted to Government stating how the proposal has advanced. A scheme for the drainage of the town of Dainhat has been completed, but for want of funds nothing has yet been done. The Municipal Commissioners of Hooghly-Chinsura have rejected the drainage project which they had under consideration as being expensive, and desire first to provide themselves with a supply of filtered water. The Commissioners of Uttarpara have spent Rs. 1,064 on the preliminaries of a drainage scheme, and the Bhadreswar Municipality has laid by Rs. 800 for the same purpose.

In Howrah the question of drainage is one of considerable difficulty, and the scheme prepared by the Resident Engineer is now under the consideration of the Sanitary Board. In the neighbouring municipality of Bally nothing was done to carry out the project completed in 1894-95. The drainage of Cossipur-Chitpur is estimated to cost Rs. 15,000, and this the Municipal Commissioners intend to spend gradually. The municipalities of Maniktola, North Barrackpore, and Baranagore are reported to have drainage projects under consideration, but no action has been taken by the South Suburban Municipality where the drainage is said to be very defective. An excellent effect has been produced in Barasat by the clearing of part of the Sunti nadi. The Lieutenant-Governor regrets to notice that the Municipal Commissioners of Krishnagar have done nothing to give effect to the Anjona drainage scheme. In the Darjeeling Municipality almost all the drains have been remodelled, and the owners of houses have been compelled to treat their drains in the same way. In the Dacca Division projects for the drainage of the towns of Nasirabad, Jamalpur, Sherpur, Kishorganj, Netrokona, and Tangail are now being discussed by the Municipal Commissioners, while the Muktagacha Municipality has completed its scheme. A scheme prepared for the drainage and sewerage of the town of Dacca has been found to be financially impracticable and undesirable on other grounds. The drainage system of Patna, which cost the municipality Rs. 2,68,000, is reported on as follows by the Magistrate.—

"Recent experience shows that the drains, as they at present stand, instead of being a source of comfort to the people, and conducive to the cleanliness of the town, have brought discomfort and sickness to the inhabitants. The result is, however, attributable more to the uncleanness of the drains than to the drains themselves. Every house is connected with them, and they are constantly being fed with a supply of dirty water, which gradually dries up. The levels have not been carefully taken, and the fall in many parts of the town is slight. To keep them clean, without a water-supply to flush them, would require an army of coolies, which cannot be collected in Patna. We do what we can, but find, as a result, that a drain, which is thoroughly cleaned to-day, is as dirty as ever to-morrow."

The Sanitary Commissioner has been directed to report fully in consultation with the Sanitary Engineer on this and similar questions affecting the condition of Patna. A comprehensive scheme for draining the town of Gaya has been prepared, but has not yet been sanctioned. In Tikari, Motihari, and Bettiah schemes are in contemplation, and the necessary surveys have been made and levels taken. Arrah urgently needs a system of drainage, but this cannot be undertaken for want of funds. In Darbhanga the system is defective, and the Sanitary Commissioner suggests that it will be sufficient if the

levels of the existing drains are set right. The municipality of Monghyr is having a complete drainage scheme drawn up by an Engineer recommended by the Sanitary Board, and in connexion with this an attempt is being made to remove the existing encroachments on the municipal drains which render it impossible to clean them. As regards Bhagalpur, the Magistrate observes that "the drainage system of the town should be thoroughly overhauled as soon as the water-works are completed and funds are available."

39. *Conservancy (including road watering) and latrines.*—The expenditure under this head amounted to Rs. 8,94,066 as compared with Rs. 8,84,861 in 1894-95. There was an increase of expenditure in all the Divisions except Burdwan, Presidency, Chittagong, and Bhagalpur, but the variation in each case was unimportant save for the decrease of Rs. 7,644 in the first-named Division, and an increase of Rs. 10,523 in that of Patna. In the following towns less than 10 per cent. of income has been devoted to this important purpose:—

	Rs.
Rajshahi	6,342
Dacca	2,557
Patna	10,523
Orissa	2,182
Chota Nagpur	81

Barnipur	...	7.5	Chakdaha	...	9.8
Goverdanga	...	9.9	Moheulpur	...	7.06
Baduria	...	7.9	Satkhira	...	8.2
Taki	...	3.5	Debhatta	...	4.3
Maherpur	...	8.6	Bazimpur	...	8.4
Patuakhali	...	6.4			

The trenching ground at Burdwan which was converted into a garden brought an income of Rs. 400 to the Municipal Commissioners as rent, and Rs. 150 were realised by them from the owners of private lands for night-soil deposited thereon. Serious complaints have been received from the Magistrate of Midnapore of the neglect of conservancy on the part of all the municipalities in that district. Even in the town itself the arrangements are not good, and steps are being taken to acquire a new site for the trenching ground. In Howrah the greater portion of the night-soil is removed by a train of 12 trucks making three trips a day to the Belgachia trenching ground. Some portion of the night-soil is also carried in buckets and carts to the 13 trenching grounds in the possession of the Municipal Commissioners. Nothing has yet been done as regards the disposal of the contents of cesspools and drains. There are at present 80 carts employed for the removal of the sullage, and they make only three trips a day and can thus remove only a sixth of the whole quantity of sullage. The Lieutenant-Governor is glad to notice that the Municipal Commissioners have realised the gravity of the situation, and hopes that they will lose no time in remedying the present state of affairs. In Bally a portion of the trenching ground has been leased out for cultivation. In the South Suburban Municipality the conservancy arrangements are described by the Commissioner as disgraceful. In the Presidency Division, Part IX of the Municipal Act is in force wholly in 12 municipalities, partly in 4, and not at all in 21. It has been extended to one municipality since the close of the year, and another has applied for its extension. The conservancy arrangements are reported to be good in the Rajshahi Division, except in the Serajganj Municipality. The Commissioner of the Division says—

"I have observed more improvement during the last three years in the trenching of night-soil than in any other sanitary matter. When inspecting I always visit the trenches. At first I had always much to find fault with, but now I generally find that the arrangements are satisfactory."

In Dacca itself the conservancy system is still most defective but the other municipalities in the Division show a great improvement. In Barisal the Commissioners have given effect to the suggestion of the Deputy Sanitary Commissioner by raising a part of the trenching ground above the highest flood level by artificial means. In Chittagong the conservancy is said to

be grossly neglected and the condition of the public latrines extremely unsatisfactory. Comilla is the only municipality in the Chittagong Division where Part IX of the Act is in force.

40. *Hospitals and dispensaries.*—Rupees 3,02,792 were spent from municipal funds on hospitals and dispensaries, against Rs. 3,31,052 spent in 1894-95.

	Increase Rs.		Decrease. Rs.
Midnapore ...	806	Santipur ..	944
Uttarpara ..	1,049	Dinajpur ...	1,030
Cossipur-Chitpur	1,696	Patna ..	2,329
Lalbagh ..	888	Arrah ...	1,089
Jessore ..	1,297	Sitamarhi ..	2,149
Nalkhira ..	621		
Rampur Boalia	776		
Barisal ..	1,003		
Comilla ..	667		
Brahmanbaria	649		
Chapra ...	3,247		
Balassore ..	794		
Hazaribagh ..	608		

The decrease was nominal and occurred mainly in the Chittagong Municipality, where the municipality had contributed the sum of Rs. 30,711 in 1894-95 towards the construction of a building for the new General Hospital. The towns noted in the margin show the most considerable fluctuations, as compared with the expenditure of the previous year. A new dispensary was opened at Nalchiti with the aid of the District Board, and the

Municipal Commissioners of Jainagar have provided Rs. 300 in their budget for the current year for the maintenance of a dispensary in that town.

A lady doctor was employed at the Burdwan Dispensary, and the District Board contributed Rs. 25 per mensem towards her pay. The Uttarpara Municipality granted Rs. 210 towards the pay of the female hospital assistant attached to the dispensary. The Rampur Boalia Municipality paid an allowance of Rs. 20 a month to the female doctor practising within its jurisdiction, and Darjeeling spent Rs. 210 on the education of two hill girls at the Sealdah school. In Jalpaiguri a passed midwife was employed on a salary of Rs. 30 a month with free quarters. The Barisal Municipality entertained a lady doctor, towards whose salary the Countess of Dufferin's Fund contributed Rs. 80 per mensem, and a midwife was employed by the Noakhali Municipality. Lady doctors were also employed at the cost of the municipality in the lying-in hospital attached to the Bankipur Dispensary and at the Behar Dispensary and in Arrah and Dumraon partly at the cost of the District Board.

41. *Vaccination.*—The statement in Appendix H gives full information in regard to vaccination. Two hundred and two vaccinators were entertained at a cost of Rs. 19,688. They performed 105,294 operations, of which 87,743 were primary and 17,551 revaccinations; of the primary operations, 86·3 per cent. are reported to have been successful, against 87·6 of the previous year. Each operator vaccinated on an average 521 persons, and the average cost of each

Sunamukhi ...	81	Arrah ..	55
Darjeeling ..	105	Bhabhua ...	58
Kurseong ..	145	Muzaffarpur	73
Jamulpur ..	63	Jamulpur ...	66
Madaripur ...	83	Cuttack ...	56
Barisal ..	56	Jajpur ..	63
Pirojpur ...	56	Lohardaga ..	64

operation was 3 annas 5 pies. The proportion of persons primarily vaccinated reached 4·3 in the Orissa Division and exceeded 5 per cent. in the 14 towns named in the margin.

The provisions of the Compulsory Vaccination Act are in force in all municipalities.

42. *Public Works.*—The expenditure on Public Works decreased from Rs. 5,86,247 in 1894-95 to Rs. 5,03,741 in the year under review. The following table compares the expenditure under the several sub-heads during the two years:—

YEAR.	Establishment.	Buildings.	Roads.	Stores.	Total.
1	2	3	4	5	6
	Rs.	Rs.	Rs.	Rs.	Rs.
1894-95 ...	65,736	60,458	4,52,097	7,956	5,86,247
1895-96	64,652	49,960	3,86,529	2,600	5,03,741
Decrease ...	1,084	10,498	65,568	5,356	82,506

The reduction in expenditure on roads was most marked in the Burdwan Division (Rs. 20,822) and the Presidency (Rs. 27,632). The tendency to neglect this branch of municipal business requires to be carefully watched.

43. *Public Instruction.*—The total expenditure under this head as shown in Form III is Rs. 1,37,627, against Rs. 1,36,524 in 1894-95. The figures given in Appendix I amount to Rs. 1,37,685, the difference of Rs. 58 being probably due to fractions of a rupee being excluded from one account and included in the other. The expenditure on primary education rose from Rs. 57,337 in 1894-95 to Rs. 69,153, showing an increase of Rs. 11,816, or 20·6 per cent., on the previous year's expenditure. The following table shows that the increase was shared by every Division of Bengal.—

NAME OF DIVISION.	Cost of teaching half the boys of a school-going age in each municipality at 10 annas per head.	TOTAL EXPENDITURE ON PRIMARY EDUCATION.		Variation between columns 2 and 4	Increase of expenditure as compared with previous year (column 4 on column 3)	Ratio of expenditure on primary education to total ordinary income	
		1894-95	1895-96			1894-95	1895-96
1	2	3	4	5	6	7	8
	Rs.	Rs.	Rs.	Rs.	Rs.		
Burdwan	12,015	9,171	11,389	—626	2,218	2·5	1·8
Presidency	14,084	14,128	14,734	+650	606	3·8	2·6
Rajshahi	8,610	4,143	5,891	+2,281	1,748	1·9	1·9
Dacca	6,752	4,864	6,858	—1,191	684	2·2	1·7
Chittagong	1,763	1,962	2,259	+491	297	3·04	2·9
Patna	18,776	12,656	17,381	—1,395	4,725	2·7	3·2
Bhagalpur	5,293	2,717	5,329	+46	612	2·9	2·6
Orissa	3,098	3,894	4,376	+1,278	652	4·6	4·6
Chota Nagpur	2,174	2,002	2,236	+62	234	3·6	3·6
Total	67,565	57,837	69,153	+1,588	11,816	2·6	3·2

The increase was highest in the Burdwan, Rajshahi, and Patna Divisions. The prescribed standard of expenditure, viz., 3·2 per cent. of the ordinary income of municipalities, was attained or exceeded only by the Patna, Orissa, and Chota Nagpur Divisions. The Divisions where higher education has made most progress show the lowest proportionate expenditure on primary education. The suggestion made by the Commissioner of the Rajshahi Division that the unspent balances of municipal grants to education in any year should be made available for expenditure during the following year, instead of being merged in the municipal balance, will be dealt with separately.

44. *Loans.*—The Howrah Municipality drew Rs. 9,00,000, being the second instalment of the loan of Rs. 15,00,000, sanctioned for the construction of water-works in that town. The only new loan sanctioned during the year was Rs. 2,000 to the Dobhata Municipality in Khulna for the improvement of water-supply. The Narainganj Municipality asked for a loan of Rs. 25,000 for the construction of a municipal market, and this has since been sanctioned by Government. The total loan liability of municipalities at the close of the year was Rs. 24,49,638.

45. *Accounts, audit, and embezzlements.*—Embezzlements of municipal funds occurred in Baidyabati, Bansberia, Midnapore, Santipur, Kushtia, Darbhanga, Roserah, and Daltonganj. The accounts of the Burdwan Municipality have been thoroughly overhauled by the special auditor, appointed under section 82 of the Act, and the defects and irregularities pointed out by him are receiving the careful attention of the Municipal Commissioners. The Lieutenant-Governor hopes that now that the accounts have been set right at a considerable expense to the municipality, the Chairman and Vice-Chairman will not allow them to fall into confusion again.

46. *Working of the Porters and Dandimallah's Act in Darjeeling*—The Act is in force in the Darjeeling Municipality only. The number of porters and dandimallahs registered was 726, against 1,203 in the previous year. The prosecutions under the Act numbered 29, and the fines amounted to Rs. 117, against Rs. 91-8 imposed in 1894-95. On the whole, the law is reported to have been worked carefully.

47. *Inspections*.—Most of the municipalities were inspected during the year either by the Commissioners of Divisions or by the District Magistrates. Special attention was paid to the arrangements for collecting taxes and the state of the accounts, and many useful suggestions were made.

48. *General working of the Act during the year*.—Mr. C. E. Buckland, Commissioner of the Burdwan Division, recorded the following remarks in the General Administration Report of the Division:—

"Burdwan stands next in importance to Howrah. The accounts of this municipality were in a most unsatisfactory condition, and a special auditor was appointed by Government for their due adjustment, the Municipal Commissioners having failed to set them in proper order within the time allowed. My predecessor discovered that the municipality had spent for other purposes Rs. 22,500 (corrected by the Accountant-General, Bengal, to Rs. 23,000), which should have been set aside as a sinking fund for the repayment of the three loans contracted for the execution and extension of water-works. In the opinion of Mr. Windsor the executive are not strong, and some of the Municipal Commissioners are more of a hindrance than a help in deliberations. Raniganj suffered somewhat from the transfer of the Subdivisional Officers; Mr. J. E. Webster and Mr. F. E. Jackson, who were also Chairmen of this municipality, and the work was almost at a standstill during the interregnum that followed the resignation of one Chairman and the appointment of his successor. Kalna with a non-official Chairman continued to be well managed, and Dainhat did tolerably well under the guidance of the Subdivisional Officer of Katwa as Chairman. On the other hand, the municipal administration of Katwa has been stagnating for want of energy on the part of the Municipal Commissioners, including the Chairman and Vice-Chairman."

49. Mr. E. V. Westmacott, Commissioner of the Presidency Division, observes:—

"I may say generally that municipal administration has not deteriorated during the year, and here and there improvements have been effected. Payment for collections by results, instead of by fixed salaries, will at least ensure that servants are not paid for work which they do not do, but no great improvement can be expected in collections while the executive officers of a municipality are too much afraid of the rate-payers to take proper measures against defaulters. I do not think that there is any wish for sanitation among the people, or the native Commissioners, in any municipality, and, in so far as it involves taxation, it is heartily disliked. Nothing is done in this direction except under pressure from controlling authorities. If the residents in a municipality all belonged to the same class as the Municipal Commissioners, the latter might be left more to their own guidance than they can be under existing circumstances, when the bulk of the people require the protection of Government officials. There is never any objection to taxation on carters or tradesmen or on the really poor, but when any tax touches the "bhadrak lok" and especially the pleaders, there is at once furious opposition. Municipal administration at present is distinctly not the Local Self-Government of the people by themselves, through their own representatives, but Government by a limited class, which has no sympathy with the bulk of the people."

50. Mr. Luttmann-Johnson, Commissioner of the Dacca Division, says:—

I can only repeat what I have often said before, that our municipal administration weak and faulty as it doubtless is in many cases, is better than nothing, that when we have such an administration, roads are better, water is better, sanitation is more cared for than elsewhere. So much am I impressed with this fact that I have always been a strong advocate for extending municipal administration over the whole of the mufassal—a measure which now seems within measurable distance of accomplishment. Though I may seem to denigrate municipal administration generally with faint praise, there can be no doubt that in some cases, as, for instance, at Narayanganj, under an energetic and experienced Chairman, it is the blessing we are so often told it is.

Mr. Shirres reiterates the story of the shortcomings of the Dacca Municipal Board. The roads are still bad, the water-works incomplete. These faults are largely due to want of funds. In the case of conservancy, however, I agree that it was not worth while spending money on the bucket system while the sewage drainage scheme held the field.

In the report for the year 1897-98, Mr. Commissioner Larmie remarked as follows about the fierce party struggle then existing between the Commissioners of the Dacca Municipality—"A great deal might be written about the proceedings of the Dacca Municipality, but I think it is wise not to discuss, in a general report of this kind, matters which have given rise to considerable discussion, not to say ill-feeling, and which have interfered considerably with the proper conduct of public business."

A similar struggle is again agitating the Municipal Board. In February last, 14 of the Commissioners signed a requisition and asked the Chairman to call a special meeting to consider the question of his deposition without making charges against him. This the Chairman did not do until July, and then did not put the question to the vote because there were no definite charges against him. On this 12 of the opposing party have resigned. Mr. Shitras adds:—"It is, however, difficult to get any work out of the municipality at present, as their whole attention is taken up with a fierce party struggle."

51. Mr. F. H. B. Skrine, Commissioner of the Chittagong Division, has recorded the following remarks:—

"On the whole, I am satisfied that too great precipitancy has been employed in extending the Act, especially its provisions for electing Commissioners and officers in these parts. The elected Commissioners are mostly unfit by education and social position to stand forth as representatives of the population, and are equally deficient in moral courage and in public spirit. Hence the condition of the head-quarters of the Division is, in most respects, most unsatisfactory; and no permanent improvement can be effected while the composition of the municipal body remain as it is. The same remarks apply to other towns, except, perhaps, to Comilla, which is more enlightened than the rest."

52. Mr. J. A. Bourdillon, Commissioner of the Patna Division, makes the following remarks:—

"Out of the seven municipalities at the head-quarters of districts, four* are in an unsatisfactory condition, and demand close and continuous attention, before the restoration of order and good administration can be hoped for. Their faults are, hesitation to impose a rate of taxation adequate to the admitted needs of the town, slackness in collection, and an inability or unwillingness to grasp the details of administration, and these can only be cured by time and patience. To these remarks it is only fair, however, to add, that in the larger municipalities the public mind is awakening to the necessity of sanitary improvements, and this is a satisfactory symptom of improvement."

53. Mr. W. B. Oldham, Commissioner of the Bhagalpur Division, observes as follows:—

"My observation, after only 3½ months' connection with these municipalities, are these. In Moughyr where the Magistrate is Chairman and the Vice-Chairman is a very competent and energetic young man, municipal matters receive adequate attention, but there is a strong conservative party in the Committee. The town is large, important and wealthy."

In the great Bhagalpur Municipality, it looks as if the efforts made to carry out such schemes on a grand scale, as the water-works, have left no strength for maintaining in efficiency the ordinary routine. The other municipalities are tiny institutions, and depend each on the energy of two or three individuals, or sometimes only one individual. In Malda, the debates are keen, and this part of the business is enjoyed. The most silent, and by far the most efficient Municipality is, no doubt, that of Jamalpur, where the discipline of the East Indian Railway pervades the whole administration. On the other hand, no municipality has been so unpunctual, and so little alive to its legal obligations as regards punctuality."

54. The Commissioner of the Orissa Division recorded the following remarks:—

"On the whole, the Municipal Act seems to have worked smoothly and satisfactorily in all the municipalities of this Division. I am able to state from my own observation that the Municipal Commissioners of Cuttack and other towns take much interest in their work, and some of them devote much of their time to it. In Puri the Chairman makes specially favourable mention of Babu Harish Chandra Ghosh, but the majority of the members there are not yet sufficiently impressed with the urgent necessity of sanitary improvements. It is fortunate they have for their Chairman Dr. Banks, who is striving to improve the town with commendable zeal and energy amidst many difficulties. In Balasore the Municipal Commissioners seem to be performing their duty smoothly and well, but the collections were not satisfactory last year. The collections of Cuttack and Puri were good, and those at Kendrapara were remarkably good, being cent per cent."

55. Mr. C. R. Maundin, Officiating Commissioner of the Chota Nagpur Division, says:—

"The Ranchi Municipality seems to have got into a groove of bad collections, bad roads and defective sanitation, out of which it requires lifting, and I think that, owing to the interest in it taken by my predecessor, Mr. Grimley, and to some changes in the *personnel* of the staff, it has received an impetus in the direction of improvement. Mr. Morhead remarks that the Municipal Commissioners in this district are as a rule inactive if left to themselves, but are generally ready to adopt suggestions. Out-door supervision is, he says, the weak point in the administration. Mr. Herald thinks Hazaribagh, considering its large area and moderate

income, is as well managed as any municipality in Bengal, and he gives the credit of this to the Vice-Chairman, Rai Jadu Nath Mukerjee Bahadur, and the excellent overseer, Sargeant Burns. Certainly this little town has a refreshingly bright and clean appearance, and the condition of its roads is almost unimpeachable, and points to a considerable amount of interest and care on the part of the executive. As remarked in last year's report by Mr. Grimley, the administration, good or otherwise of the municipalities in this Division, depends upon the energy and strength of their respective Chairmen and Vice-Chairmen, and the interest of the Commissioners is mostly confined to routine matters.

56. The results of the past year have added no new features to municipal administration in Bengal. The difficulty of the work which has to be done consists, as has been often pointed out, in the mass of petty detail which must be controlled and the constant watchfulness which is needed to prevent indolence or corruption on the part of the subordinate staff. The assessment and collection of rates and taxes, the daily examination of accounts, the checking of work done and the maintenance of efficient conservancy make heavy demands on the time and energy of the Chairman and Vice-Chairman; and it is only the larger municipalities which can afford to employ a paid Secretary to give his whole time to the work of supervision. Municipal bodies must, however, realise that they must be judged by their success or failure in carrying on the ordinary business of the towns entrusted to their charge; not merely by their adoption of larger schemes of water supply or drainage; and it is for them to consider whether some means cannot be devised for enabling every Commissioner in his own quarter of the town to take a larger share in the work of practical administration than is now believed to be the case. If every Commissioner made himself responsible for looking after the management of all branches of work in a particular area, the burden of supervision would be lightened, and the condition of municipalities which cannot pay a whole-time executive officer would, the Lieutenant-Governor believes, in course of time be very greatly improved.

By order of the Lieutenant-Governor of Bengal,

H. H. RISLEY,

Secretary to the Government of Bengal.

FORM No. I.

STATEMENT SHOWING THE CONSTITUTION OF THE
MUNICIPALITIES IN BENGAL

DURING

1895-96.

REMARKS.

REMARKS.

SCARCITY IN THE PATNA AND OTHER DIVISIONS OF BENGAL.

No 5389 Agri., the 22nd December 1896.—The following papers are published for general information.

M. FINUCANE,
Secy. to the Govt. of Bengal.

No 5259 Agri., dated Calcutta, the 16th December 1896.

From—M. FINUCANE, Esq., Secy to the Govt. of Bengal, Revenue Department,
To—The Secretary to the Govt. of India, Revenue and Agricultural Department.

IN continuation of this office letter No. 4549 Agri., dated the 18th November 1896, submitting, with the remarks of His Honour the Lieutenant-Governor, the report drawn up by the Commissioner of Patna under section 9 of the Famine Code, and of this office letter No. 4868 Agri., dated 30th November 1896, submitting Mr. Bourdillon's report under section 13 of the Famine Code for the first fortnight of November, I am now directed to lay before the Government of India Mr. Bourdillon's report for the second fortnight of November, together with the reports of the District Officers, upon which the Commissioner's fortnightly reports are based, as well as a memorandum prepared by Mr. Bourdillon, in which he estimates the numbers likely to need relief and the probable expenditure upon relief works in the Patna Division. I am also to submit the following general report upon the prospects of the crops and the probability of distress, and the measures which are being taken to combat distress, both in that division and in the rest of Bengal.

2. Since the report of the 18th November was submitted, His Honour the Lieutenant-Governor has taken the opportunity afforded by the assemblage of non-official and official gentlemen at the Sonapore Fair to hold a conference, at which the outlook in Bihar was discussed, the Hon'ble Mr. Finucane has more recently been on tour in North Bihar, and was present at an official conference at Muzaffarpur. His Honour has recorded a Resolution upon the notes of the tour

1 Letter No 4748 Agri., dated the 26th November 1896

2 Letter No 5131 Agri., dated the 10th December 1896

and of both conferences; and these documents have been submitted to the Government of India with the communications noted on the margin. Further, the orders of the Government of India on certain

financial and other matters have been asked for in my letter No. 5183^A dated the 11th December.

3 In paragraph 15 of my letter of the 18th November, the Lieutenant-Governor expressed the hope that the outturn of this year's crops and the amount of the stocks in hand had at first been under-estimated and the area likely to be affected over-estimated by Mr. Bourdillon and the District Officers. The number of persons likely to require relief had also, it was thought, been under-estimated. The reports now before His Honour show that, taking the Division as a whole, this surmise was a correct one, but as regards the estimates of numbers who will require relief, Mr. Bourdillon explains that the number (174,000) previously given by him was intended to cover only those who will require relief during the few months following the date of his report, namely, December, January and February, and not the much greater numbers who will need relief from March to September. The rain which fell in the districts of South Bihar (Patna, Gaya, and Shahabad) on the 22nd and 23rd November made the *rahi* crops in those districts practically safe; and assuming that the similarity between the meteorological phenomena of the present year and those of 1873-74, to which Mr. Bourdillon directed attention in his report of the 11th November, will continue, and that, as in that year,

each district may expect to receive in the months of December, January, February, and March from 1·44 to 1·80 inches of rain, the Commissioner now estimates the outturn at 16 annas in all three districts. With regard to the districts of North Bihar, he adheres to his original estimate of a 10-anna *rabi* crop in Muzaffarpur and an 8-anna *rabi* crop in Champaran, Saran and Darbhanga.

The rainfall has had little or no effect in lowering the prices of food-grains, which are still at famine rates in the whole of Bihar, and indeed throughout Bengal.

4. Besides rendering the *rabi* crop practically safe in South Bihar, the rain to some extent benefited the rice crop in that part of the Division; and the irrigation operations of the Sone Canals have been unprecedentedly successful, the area irrigated having exceeded the previous maximum by 11 per cent., so that for Shahabad Mr. Bourdillon is now able to estimate an outturn of 50,35,000 maunds in place of the 24,06,000 maunds estimated in his report of the 11th November. These facts have, it may be said, practically removed from the danger of distress the whole of the Patna Division south of the Ganges, excepting only an area of 229 square miles in the Patna district, with a population (including that of three towns) of 420,092, and possibly an area in the Bhabhun subdivision, which is now being visited by Mr. Bourdillon. In North Bihar the rainfall was very slight, except only in those tracts lying along the left bank of the Ganges, in which the *rabi* crop was already practically safe. The Lieutenant-Governor considers, however, that the whole district of Saran, with the exception of a rice-growing tract of 766 square miles in the Siwan and Gopalganj subdivisions, may be excluded from the area likely to be seriously affected by distress; and that it is very doubtful whether relief works will be required in the rest of the district. It is also possible to exclude from the area likely to be affected large portions of the Hajipur subdivision of Muzaffarpur and the Samastipur subdivision of Darbhanga, or 700 square miles in the former district and 414 square miles in the latter. On the other hand, in the zone which runs along the Nepal frontier throughout the Darbhanga, Muzaffarpur, and Champaran districts which is mainly a rice-growing tract, the failure of the rice crop is now found to be even greater than was at first supposed. The general condition of this tract causes the gravest anxiety.

5. I am now to summarise the information available with regard to the particular tracts in which distress is anticipated, both in the Patna and other divisions.

Patna district.—An area of 229 square miles with a population of 420,092 is all that is now reported as affected in this district. This includes the towns of Patna, Dinapore and Bihar with an aggregate population of 257,331; and the whole of the Islampur thana, and two-thirds of the Dinapore and Maner thanas. These are rural tracts, having a population of 162,758 and an area of 210 square miles. They have been described as “affected” because of the failure to a large

tent of the rice crop; but the prospects of this crop were to a certain extent saved by the rainfall of 22nd November, which also facilitated further sowing. The outturn of the rice crop is estimated at 6 annas in Chana Islampur. The most relief works were opened at six places in this rural area. None of them was largely attended, although the wages given appear to have been higher than is allowed by the Famine Code, and they have therefore been closed. Altogether it is very doubtful whether relief measures on a considerable scale will be required in this district; and certainly they will not be required until May or June. The Collector is convinced that the stocks of food-grain are sufficient, and the communications in the district which is served throughout its length by the main line of the East Indian Railway leave nothing to be desired.

6. *Saran district.*—The area affected in this district may now be reduced to a tract of about 766 square miles in the north-east, with a population of 665,830, namely, the whole of the Gopalganj subdivision, excluding the *diara* lands on the Gandak river, and the almost adjacent pargana Chowbar in the Siwan subdivision. This is a rice-growing country, and it is owing to the failure of that crop that distress is apprehended. The outturn is estimated at 2 to 3 annas. Taking 8 per cent. of the population of this tract as being likely to require relief, the Commissioner estimates the number at 53,266. The *rabi* crop is one of little importance, and distress is likely to continue until a good *bhadon*

harvest is reaped; that cannot be until the September of next year, and nine months may therefore be taken as the period during which the above number will require relief.

Test relief works have been opened at two places in the Gopalganj subdivision, but they have not been conducted in strict accordance with the provisions of the Famine Code, the task exacted being much too low, and they have consequently little value as a test of future requirements. Loans and advances are being freely given both by the district authorities and the Hutwa Raj, on behalf of which the Court of Wards has recently sanctioned the purchase of 50,000 maunds of grain. Information as to the stocks of grain is not at present available, but imports are increasing, and as Saran is a district which imports largely in ordinary years, it should be better able than other districts to provide for its own requirements in the present year.

7. *Champaran district*—The condition of this district is at present most serious. The three tracts noted in the margin which are now reported as requiring immediate relief have an aggregate area of 570 square miles and an aggregate population of 271,415. They grow almost nothing but rice, and in the Ramnagar tract the soil is for the most part hard clay and unsuited for *rabi* cultivation, unless heavily irrigated. Both the *bhadoi* and *aghani* rice crops have proved an almost entire failure, and the Collector forecasts that distress will continue in all three tracts until the next *bhadoi* harvest is gathered, but will be mitigated in the Araraj and Madhuban tracts if there are fair cold-weather rains to help on the *rabi* crop. Unfortunately these latter tracts together extend over 165 square miles only, considerably less than one-third of the entire area that is acutely distressed. In the Ramnagar tract there is no hope of improvement until the next *bhadoi* harvest, special endeavours have, however, been made to encourage cultivators in sowing *rabi*. Besides these tracts, an area of 2,022 square miles—practically the whole district, except hills and jungles—has to be placed in the “loss seriously affected” class; and the Collector considers that a large portion of it will require relief within a very few weeks. The Commissioner calculates that only 5 per cent of the whole population of the 2,592 square miles is likely to be affected, and that the following numbers will require relief—13,570 persons for 10 months (in the three acutely distressed tracts), and in addition 39,466 for nine months, 13,082 for eight months, and 7,345 for six months. The information regarding food-stocks is still incomplete; importation has indeed begun, but on a very trifling scale. The communications of the district are fairly adequate, except in the north-east of the Ramnagar tract, which is 50 miles removed from the Bettiah Railway terminus.

The scarcity has as yet had no decided effect upon the public health, but the north of Bettiah subdivision (the Ramnagar tract) is always unhealthy, and here the physique of the poorer classes is beginning to deteriorate. A further indication of scarcity is found in the increase of thefts and burglaries reported during the month of November, when 209 cases were reported against 144 in November 1895.

Eight test relief works have been opened, and all but one (the site of which was ill-chosen) have been continued as permanent relief works. During the second fortnight of November a daily average of 1,330 male units was employed on these works; the wage given was not at first calculated according to the provisions of the Famine Code, but the mistake has now been corrected. A number of works have been undertaken specially to provide employment for the needy by loading indigo-planters and by the Bettiah Raj. Advances have been made for the digging of wells, in order, as already stated, to facilitate the sowing of the *rabi* crop and to secure the *rabi* crops already sown.

8. *Muzaffarpur district*.—The area of this district is 3,005 square miles; and of this only 700 square miles can be regarded as quite safe. Of the remainder, an area of 1,851 square miles with a population of 1,660,000 is considered to require relief works from 1st January, and an area of 454 square miles with a population of 352,857 is expected to require them from the 1st April. The portion of the district that is held to be safe consists of the Hajipur thana (the very fertile tract which lies along the bank of the united Ganges and Gandak) and of scattered areas mostly in the neighbourhood of the lesser rivers. The parts most affected by distress are the Sitamarhi subdivision and the Katra

Thana of the Sadar subdivision. These are mainly, the Sitamarhi subdivision almost entirely, rice-producing tracts, and it is to the failure of this crop that distress is due. *Alu* (yams) have been cultivated in the Sitamarhi subdivision to a far greater extent than is usual, and a commendable effort made with much success by Mr. Russell, C.S., the Subdivisional Officer, to encourage the cultivation of *rabi* by means of temporary wells. The Lieutenant Governor has sanctioned for this purpose a reward of Re. 1 to be paid by Government for each well that is made. No considerable improvement in the condition of the district can, however, be expected before the next *bhadoi* harvest; and taking 8 per cent. of the population in the tracts affected, Mr. Bourdillon estimates that 132,800 persons will require relief for nine months, and 28,228 persons more for six months. Two test relief works were opened in November, but the numbers which attended them were very small, as employment was at the time to be found in cutting the rice crop and in preparing indigo lands, but these openings for employment have either been already closed or will be closed very soon. Scarcity does not appear as yet to have had any appreciable effect on the death-rate; and the condition of the people in this district is clearly better than in those of Champaran and Darbhanga which adjoin it on either side. It has not yet been found possible to estimate the amount of the food-stocks, but the railway statistics show that as regards such slight external traffic as exists, the imports exceed the exports.

9. *Darbhanga district*.—The crops of this district present characteristics similar to those of the adjoining district of Muzaffarpur. The northern portion, including the Madhubani subdivision, is a purely rice-producing tract, the south is a fertile *rabi* country, and the central portion unites both conditions. As in Muzaffarpur, the *rabi* crop has been benefited by the recent rain to some extent, and Mr. Carlyle, the Collector, now sees no reason why an average *rabi* crop should not be expected over the whole district south of Darbhanga town. Even in the north, the *rabi* crop is germinating better than was expected. Acute distress is expected in an area of 2,044 square miles at the end of December; this tract has a population of 1,720,000 approximately and covers generally the purely rice-growing country in the centre and north of the district. In an area of 674 square miles with a population of 545,000, relief works will not probably be required before the 1st March, and in an area of 203 square miles before the 1st May; but in portions of the former area, and throughout the latter, there has been a good rice crop, and possibly there may be no distress. The outturn of rice of the whole district is not estimated at more than five annas, and the failure has been most complete in the tracts in which rice is the principal crop. Distress cannot therefore be expected to diminish until the next rice harvest. Taking 8 per cent. of the population as requiring relief from the dates above given until the next *bhadoi* harvest, the Commissioner estimates that 37,600 persons may be expected to require relief for nine months, 43,600 more for seven months, and 14,800 for five months. Three test works only have been opened so far, but relief works are now being actively organized.

A considerable excess of exports over imports still continues from the Darbhanga district, and it is feared that the people have been induced to part with much of their reserves from the *bhadoi* harvest. The information available regarding the food-stocks generally is very scanty. An indication of distress is afforded by the jail observations of the physique of convicts admitted during the month of November; 56 per cent. of the whole number were admitted in bad health, against 43 per cent. in November of 1895.

10. The three districts in which distress is most serious border on Nepal; and the tracts of those districts most acutely affected immediately adjoin the boundary. The Nepal authorities have recently forbidden exports of grain and prohibited British subjects from crossing the frontier, whether to reap the rice harvest or to cut and sell jungle produce, and it is feared that grazing may be forbidden also. If this should be so, the consequences cannot fail to be serious, for it is reported that 60 per cent. of the cattle from the northern thanas of Muzaffarpur are taken across the frontier to graze even in ordinary years; and the custom in North Darbhanga in this respect is much the same. The Lieutenant-Governor would invite the attention of the Government of India to this action on the part of the Nepal Darbar.

11. In the foregoing paragraphs Mr. Bourdillon's estimates of the relief required in each district have been given. Sir Alexander Mackenzie has accepted them in their entirety, and considers that, far from being in any way exaggerated, they have been prepared with great care and moderation. The estimated cost has been calculated, by taking what, according to the Famine Commissioners, is a very moderate percentage of the population in the areas affected, as being likely to require relief by reducing all the figures of persons employed on relief works and on receipt of charitable relief to terms of one day and by calculating that one anna will cover the expenses of relief for one unit per one day. This rate of wage and of relief ration has been calculated at even less than the present prices of grain, but it must be remembered that if these prices rise instead of falling (as it is far from unlikely that they may do), the averagedaily cost will be considerably more than one anna. It was much higher in 1873-74, as the subjoined table shows, and was also higher in all scarcities that have occurred since that time. This table shows the estimated expenditure to be incurred on famine relief in the Patna Division up to the end of September next (the period of the *bhadoi* harvest) calculated on the principle above described. The cost of the relief works which may possibly be required in parts of the Patna and Shahabad districts has been left out of account.

DISTRICT	NUMBER TO BE RELIEVED FOR ONE DAY		COST.		RATE PER HEAD PER DIEM	
	1873-74.	1896-97	1873-74	1896-97	1873-74.	1896-97.
1	2	3	4	5	6	7
Saran	35,647,284	14,381,830	Rs. 31,53,939	Rs. 8,98,863	A. P. 1 5	A. P. 1 0
Champanan	17,187,600	14,188,600	16,30,966	11,99,287	1 6	1 0
Muzaffarpur	28,970,772	40,987,040	26,81,372	25,48,565	1 12	1 0
Darbhanga	74,743,804	48,548,000	61,64,819	30,83,000	1 8	1 0
Total	170,548,980	123,085,460	1,36,30,596	76,89,715

It will be noticed that with similar meteorological conditions and similar reported crop outturns, the estimated expenditure is only about half of what was incurred in 1873-74, and does not take into consideration the loss sustained by sale of grain imported by Government in that year.

12. The following statement shows that the expenditure which it is anticipated by the Commissioner will have to be incurred on famine relief before the close of the present financial year amounts to about twenty-two lakhs of rupees:—

DISTRICT	Number of persons to be relieved for one day during the first year, 1896-97.	Cost during 1896-97.	Rate per head per diem.
1	2	3	4
Saran	4,793,940	Rs. 2,99,621	A. P. 1 0
Champanan	5,965,260	3,72,825	1 0
Muzaffarpur	11,952,000	7,47,000	1 0
Darbhanga	13,692,000	8,55,750	1 0
Total	36,403,200	22,75,196	1 0

These estimates do not include cost of establishment, tents, implements, and various other items of famine relief administration, but on the other hand they take no account of assistance which it is expected will be rendered by zamindars, substantial village headmen, and other private individuals in opening up relief works in their estates and villages, thus reducing the numbers to be maintained at the expense of the State.

The Lieutenant-Governor has received assurance of help of this kind, on a large scale, from the Maharaja of Darbhanga and other great landed proprietors in Bihar. His Honour has no doubt that such aid will be forthcoming, but with every desire to avoid unfounded alarm and unnecessary expenditure, Sir Alexander Mackenzie still feels that it would not be safe to say that the total amount estimated for by the Commissioner may not have to be incurred. As has been already pointed out in the Resolution referred to in paragraph 2 above, the failure of the rice crop in purely rice-growing tracts entails more severe and protracted distress than the failure of any other single harvest can do in areas which largely grow *rahi* and *bhadai* crops. Though this Government will make every possible effort to avoid, and has taken every precaution to guard against, waste, His Honour cannot feel assured that the Commissioner's estimates, high as they are, may not have to be exceeded.

13. I am now briefly to notice the prospects in the other divisions.

Orissa Division.—As in the Patna Division, there was some slight rain in parts of Orissa on the 24th and 25th November 1896, but not enough to do any good to the standing crops. There is, however, an easier feeling in the rice market now than before, owing to the new rice coming in, and labourers are finding employment in the fields and on railway and District Board works. Although there is no actual distress, yet in Orissa the outlook in parts of the division, like Deogan in Cuttack and Mallool in Puri, is reported to be gloomy, and it is, according to the Commissioner, certain that relief works on an extensive scale will have to be provided in the months of March, April, and May. The budgets of the District Boards for this and the next year will be revised accordingly, but it is of great importance that the earthwork on the railway in Cuttack, Puri, and Balasore should, if possible, be continued till the beginning of the next rains.

14. *Rajshahi, Chittagong, and Dacca Divisions.*—In the Rajshahi Division certain parts of the districts of Rajshahi and Pabna are giving anxiety. The Commissioner is now on a visit to these tracts, and His Honour awaits a full report from him under section 9 of the Famine Code. The Commissioner of the Chittagong Division anticipates a high range of prices till the next autumn crop comes into the market, which may cause some distress among the landless labourers, but no actual scarcity is apprehended in any of the districts in that Division. As regards the Dacca Division, the position remains practically unchanged since the date of my last report.

15. *Presidency Division.*—The worst tract in the Presidency Division is an area of 477 square miles with a population of 262,000, in the Satkhira subdivision of the district of Khulna. Winter rice is the only crop grown in this area, and owing to an influx of salt water in the preceding year and shortness of rainfall in this, the outturn of the crop during the current year is estimated at only two annas, while last year there was not more than a six-anna crop. It is reported that rice is being imported from Calcutta by small local dealers, and the Commissioner, who was directed to visit the tract, found the selling price of rice to be Rs. 4-8 a maund, or about 9 seers the rupee. Sanction has been accorded to test works being opened in strict accordance with the provisions of the Famine Code, but the local officers have been directed to make a further careful enquiry, the results of which have not yet been reported to the Lieutenant-Governor. Certain areas, aggregating 379 square miles, with a total population of 168,571 persons, in the Sadar and Meherpur subdivisions of the Nadia district, are also reported to have a very short rice crop. The outturn of the *aus* or autumn rice crop is reported to have been not more than 6 annas, and that of winter rice is said to be only one anna. These estimates appeared to the Lieutenant-Governor to be too low, and the local officers have been asked to make further enquiries and to submit fuller information. In Jessore also the outturn of the winter rice crop has been very poor, and distress is likely to be felt in parts of the district. But no report under

section 9 of the Famine Code has yet been received, and this Government is not now in a position to furnish more precise information.

16. *Bhagalpur Division*.—There is at present no distress in any part of the Bhagalpur Division, but the Commissioner writes that although the agricultural position of the Division is infinitely better than it was at a corresponding period in 1873-74, and although there is no reason to despair of the *rabi* harvest, and money and work are still plentiful, it cannot be hoped that it will escape the distress which is impending over so many other parts of India, because of the drain on its resources and the high prices prevailing.

17. *Chota Nagpur Division*.—The outturn of the winter rice crop in the district of Hazaribagh, previously reported at from 5 to 6 annas, is now estimated at 7 annas. Prices still continue to be very high, although they are reported to be slightly easier. Some distress is, however, apprehended, and orders have been issued for test works to be opened and charitable relief to be given where necessary. Of the other districts in the Chota Nagpur Division, Manbhum and Palamau give cause for anxiety, and as a means of relief, the reserved and protected forests in the Chota Nagpur Division, and also in the Sonthal Parganas and in Puri and Angul, have been thrown open to the public to collect *mahua* and other edible forest produce free of charge.

18. The tabular statements required under section 29 of the Code are herewith submitted.

A map of the affected areas in the Patna Division is also annexed.

Monthly Famine Statement A for the four weeks ending Saturday evening, the 28th November 1896

District	Area of the district.	Population in thousands	Affected area.	Estimated population in thousands of area in column 4.	NUMBERS ON RELIEF WORKS ON LAST DAY OF MONTH					Numbers on gratuitous relief	PRICES OF PRINCIPAL FOOD-GRAINS.						MONTHLY DEATH-RATE—			Deaths to starvation.

N.B.—The statement for Gaya is blank.
* Including railways.

No. 671G., dated Bankipore, the 8th December 1896.

From—J. A. BOURDILLON, Esq., Offg. Commissioner of the Patna Division,
To—The Secretary to the Government of Bengal, Revenue Department.

I HAVE the honour, in accordance with section 13 of the Famine Code, to forward herewith my scarcity report for the two weeks ending the 21st and 28th November 1896.

PART I.—INTRODUCTION.

2. This report was due to Government on the 5th instant, but is unavoidably a few days late, as three of my Collectors (those of Champaran, Muzaffarpur and Darbhanga) and myself were engaged on the 4th and 5th instant at a Conference at Muzaffarpur at which you also were present. Moreover, Mr. Macpherson of Champaran had been so busy touring through his district with yourself that he found no time to write his report till the Conference was over.

3. In accordance with the permission conveyed in your letter No. 4866, of the 28th ultimo, the district narratives are now sent in original with their enclosures, and with the following brief comments upon them.

4. Before turning to them, however, I desire to notice a point referred to in paragraph 12 of your letter to the Government of India, No. 4549, of the 18th ultimo. It was therein stated that my estimate of the population to be affected was 3,400,000, and the forecast was pronounced extremely sanguine. I regret much that I did not make my meaning more clear. The figures I gave were merely those of persons dwelling in the tracts which I supposed would require relief within a short time, and they were in no way intended to be an estimate covering the whole operations. This was pointed out in the previous paragraphs which dealt with district statistics, but I unfortunately did not repeat the qualification when reproducing the figures in paragraph 104 of my report.

5. Most District Officers have now supplied me with fuller and more reliable information, both as to the outturn of the harvests, the area and population likely to be affected at different times during the next nine months, the means proposed to combat scarcity, and the probable cost of the operations. I propose in a separate letter to submit a revised estimate on these points in a few days, but I do not delay this report in order to include these statistics, as it is already overdue.

6. I hope also before long to submit a full report on the stocks in hand, the exports and imports, the food demand of the people in ordinary years and in 1896-97, as well as on the amount required to supply the local deficiency. But some of these statistics cannot be easily or quickly collected, and in particular the utmost difficulty is being felt in obtaining reliable information as to stocks in hand. The subject has my constant and assiduous attention.

PART II.—DISTRICT REPORTS.

7. *Patna*.—The Collector's report is satisfactory and reassuring. The rain which fell on the 22nd ultimo has been of some benefit to the rice, and has benefited the *rabi* still more. The area affected by the scarcity is said to be 229 square miles with a population of 420,092, including that of the towns, against 250 square miles and 715,263 persons previously reported, for the Collector has eliminated altogether a tract along the north of the district, where the rice crop has been much better than he at first thought. It is calculated that with a fair *rabi* there will be no want of employment, and that the people will do well enough till the end of April, so that relief works will only be required in May and June, if at all. For the present none are necessary, and the test works opened are patronised only by professional earthworkers: they will be closed until there are clearer signs that they are required. A very significant indication of the comparatively prosperous condition of the cultivators is the fact that they were able to buy bullocks at the Sonpore Fair.

8. Mr. Inglis' information as to food-stocks is not complete, and enquiries are progressing. To enable Government to judge of the value of the estimates which he gives, it is essential to know how they were prepared, and this I will

ascertain. But it is satisfactory to learn that from enquiries made the Collector is able to repeat his conviction that sufficient stocks exist.

9. I make no comments on the imports and exports, because I propose to submit a separate report on the subject as soon as my materials are fairly complete. A comparison of the statistics of one fortnight with those of another during the present season is not so instructive as a comparison between the figures of the present and the past year. It will be enough to say that exports largely exceeded imports (by 85,033 maunds), but that the figures are not so high as in the previous month.

10. The necessary statements are appended as well as a map of the district which I have obtained from the Collector. According to his present report the tract coloured blue should be eliminated. Some of the statements are up to the 30th November instead of being confined to the fortnight ending the 28th idem. This will be pointed out to Mr. Inglis.

11. *Gaya*.—After the rainfall of the 22nd and after making further enquiries into the condition of the district, the Collector considers that no part of his district is affected. He believes that, barring accidents, the district is certain of a 12-anna *rabi* crop, and suitable rain during the remainder of the cold weather will secure a 16-anna, or even a bumper, crop.

12. Of the three tracts reported previously as likely to be affected, the Collector strikes out the Sherghati tract as quite safe, and, with rather less confidence, he eliminates, for the present, the remaining two in the vicinity of Jahanabad and Rafiganj.

13. Mr. Savage reports that stocks are everywhere sufficient. His reply to the Government Circular of the 3rd November on the subject will doubtless explain further the grounds on which this conviction is founded.

14. Prices still rule high, and this circumstance must cause distress among those who have no reserves and are obliged to purchase grain for their daily consumption. In noting the comparative prosperity of the agriculturists, Mr. Savage is in danger, I think, of overlooking the wants of the artisans and the poor middle class, and his attention will again be invited to the necessity of remaining on the alert for distress among them.

15. *Shahabad*.—This district perhaps benefited from the rainfall of the 22nd and 23rd November to a greater degree than any other in Bihar, because in the first place the rain was more plentiful here than elsewhere, and, secondly, because the district required rain more than other district of South Bihar. Moreover, the rain fell most plentifully exactly where it was most required. Every inch of available land is being sown with *rabi*, and the *rabi* already sown has greatly improved.

16. Of the test relief works two are to be closed at once, but a new one has been opened to the south-east of Bhabua. The services of the Circle Officer will shortly be dispensed with. As a proof of the prosperity of the relief workers Mr. Egerton reports that after getting their wage for Sunday, the 22nd November, the recipients stayed away for Monday also.

17. Enquiries into food-stocks are not yet complete.

18. The Collector has omitted to give the comparative statement of prices required by section 26 (IV) of the Code, but from the weekly reports and paragraph 2 of his present report it appears that there is little or no change, the tendency, if any, being towards easier rates.

19. The number of persons on daily wages, irrespective of task work, is again very large, especially for the week ending the 21st November, but the Collector has explained the cause. The same explanation applies to the similar phenomenon noticed in my last report.

20. Exports still greatly exceed imports, the figures being 28,520 maunds to 6,753. Buxar was the largest exporting station, the grain being chiefly millets, and the destination almost exclusively stations in the North-Western Provinces. Arrah comes second with similar details. The character of the grain exported would seem to suggest a better *bhadai* crop than the Collector has estimated, and the magnitude of the operations implies considerable confidence in the outturn of the rice and the *rabi*.

21. I am disposed to think that the Collector's estimate of 4 annas for the rice crop which now holds the field is too low. The figures given in the memorandum recorded by the Superintending Engineer, Sone Circle, on the

kharif operations of 1896, dated the 6th November last, justify an estimate of 6 annas for the whole district, which means an outturn of 50,35,000 maunds against that of 24,06,000 maunds published in Appendix D of my report of the 11th November. The efforts of Mr. Buckley and his subordinates have been unremitting and have been crowned with unexampled success: they have practically secured a full crop over more than one-fifth of the rice area of the district, and have gone far to protect three of its subdivisions from scarcity.

22. *Saran*—Little change in the position of affairs is disclosed by the Collector's report, but he is able to give a somewhat better report of the crops, and he has slightly altered the limits of the area in which he anticipates that relief will be wanted at an early date. Mr. Earle and his Subdivisional Officers have been revising their estimates, and the following figures represent their present expectations in regard to early relief:—

Subdivision	Area	Population.
Sadar ...	Nil	Nil.
Siwan ..	93	87,000
Gopalganj ...	673	578,830
Total ...	766	665,830

23. The rest of the district is coloured blue in the Collector's map, as he still considers that it is "affected;" but, as I have already stated in previous reports, though this is technically correct owing to the high prices of food-grains, yet relief works are certainly not required there at present, and I am very doubtful whether they will be. I do not comment further on this subject, nor upon Mr. Earle's proposals for charges and circles for reasons stated in paragraph 5 of this letter.

24. Prices show little variation. In Chapra they are practically stationary: in Siwan they are a little easier, and in Gopalganj a little higher than in the previous fortnight.

25. Imports continue to exceed exports, but their volume was a little less than in the preceding fortnight: the exports were a good deal less. The net figures are these.—Imports 95,499 maunds against 1,10,039 maunds, and exports 8,703 maunds against 19,593 maunds; the total gain of the district during the fortnight being thus 86,796 maunds against 90,446 maunds, but the earlier figures include traffic within the district. It is hardly necessary to repeat that Saran always imports even in ordinary years. The registration of boat traffic at Revilganj shows that this mart is practically a mere changing depôt, but it is remarkable that whereas in ordinary years most of its grain comes from the west down the Gogra and Ganges, most of it now comes up-stream from the eastward.

26. In this district as in others of North Bihar the rainfall of the 22nd November was extremely slight, and fell only in the tracts which were already practically safe. However, even there it will materially improve the outturn of the *rabi* crop.

27. The opening of test relief works appears to have been attended with some confusion and misunderstanding of orders, but this has now been set right. The task exacted was much too low: there was also some laxity in the distribution of charitable relief.

28. Loans and advances are being vigorously pushed by the district authorities and the Hutwa Raj, and though the Collector does not refer to it, the Court of Wards have lately sanctioned the purchase, on behalf of the Hutwa Raj, of 50,000 maunds of grain for the relief of the raiyats of the estate and others, should occasion arise.

29. Meetings have been held, and arranged for, to consider the question of charitable relief. At the Chapra meeting it was decided that the labouring classes at present required no help, but that a sub-committee should be appointed to consider the needs of the indigent gentry, widows and other dependants. No orders will be passed on this point till I have learned the mind of the Lieutenant-Governor and heard what, if anything, is to be done in Calcutta.

30. The required statements and a map are appended. It will be noticed that the railway figures in forms 8 and 9 are for the half-month ending 15th

November, and not up to the 28th idem, as they should be. An explanation will be called for.

31. *Champaran*.—The Collector submits his report with commendable punctuality considering that up till the afternoon of the 5th he was engaged at the Muzaffarpur Conference after having spent the previous week in travelling through his district with Mr. Finucane.

32. The tracts now reported as requiring immediate relief are three in number with a total area of 570 square miles and a population of 271,415.

33. The rain of the 22nd November was extremely light in Champaran, nowhere exceeding two-tenths of an inch except in a tract near the foot hills which has already been classed as safe. Practically the rainfall has been of no benefit to the crops of the district.

34. Mr. Macpherson reports that his enquiries as to food-stocks are incomplete. It is to be observed that exportation still remains very small—only 6,330 maunds in all, while imports have begun, but only aggregated 1,217 maunds. Much is hoped from the heavy rice crops in the irrigated tracts and a broad belt of country along the north of the district which is protected by hill streams.

35. Prices are about the same as they were at the time of my last report and about twice as high as the normal rate.

36. The reported death-rate so far does not indicate any deterioration of the public health, but the Collector's personal observations in the north of Bettiah (always an unhealthy tract) lead him to believe that the physique of the people is beginning to deteriorate.

37. Six new relief works were started during the period under report, of which only one was closed. The average number of male units per diem for the whole fortnight was 1,429 as against 625 in the preceding fortnight. The outturn of work is very low (56 cubic feet) and the earnings and rate per 1,000 cubic feet small also. Several mistakes were made at first, but the Collector has corrected these, and I trust they will not recur. The number of persons relieved without task work is only 7·4 of the workers, but the proportion of B and C class labourers is much larger here than in other districts. All these facts point to the conclusion that Champaran is more in want of immediate assistance than the other districts of Bihar.

38. Preparations for the distribution of charitable relief are well in train.

39. The required statements and a map are appended.

40. *Muzaffarpur*.—The rainfall of the 22nd November hardly extended to this district, and Mr. Hare's estimate of the crops remains the same. Hajipur, which is the most prosperous subdivision in the district, was the only one which had an appreciable rainfall. The Collector now estimates that the affected area of his district is 1,851 square miles and the population 1,660,000. One circumstance which he reports as very regrettable, namely, that the Nepalese authorities have prohibited the immigration of residents in British territory, whether to reap the rice harvest, or to cut and sell jungle produce: it is feared that grazing may be forbidden also, and if this is the case, the consequence to the cattle of the northern thanas all along the frontier will be serious. I fear that no representation to the Darbar would be successful, but it is for the Lieutenant-Governor to consider whether the attempt should be made. I have spoken to the Resident, Colonel Wylie, on the subject, and he agrees with me.

41. Railway traffic in food-grains is in favour of the district, the imports being 14,979 maunds as against 6,579 maunds of exports. The chief imports are "Other food-grains," for they represent more than 50 per cent. of the total. Out of exports rice contributes the largest proportion, namely, 3,697 maunds out of 6,579.

42. Prices are a little easier at all three subdivisions.

43. The numbers on relief works in two places are very small, as shown by Statements D and E (Forms 5 and 6), and the outturn is low. These are admittedly only test works, and the statistics prove that they are not yet required.

44. The statement of reported deaths shows that the scarcity has not yet had any appreciable effect on the death-rate of the district and the people are clearly better off than in Darbhanga and Champaran.

45. Mr. Hare's report is accompanied by a careful note on the probable extent of distress in his district and on its requirements which I withhold for the present till I can obtain similar statistics from other districts and submit them together. The usual statements are appended, but there is no map. This will be called for and submitted later.

46. *Darbhanga* —The Collector's report is slightly more favourable. He announces that in spite of the small quantity of rain which fell on the 22nd November, viz., three or four-tenths in the centre and south of the district and only a tenth or so in the north, yet it has done much to freshen up the *rabi*, and with favourable weather he expects an average crop over the southern half of the district.

47. The excess of exports which still continues is remarkable, and unless much more is surreptitiously imported from Nepal than we know of, the figures show that, as in Shahabad, the people have been encouraged by the better prospects of the *rabi* to part with some more of their reserves from the *bhadoi* harvest. It will be seen that out of a total export of 43,964 maunds, as much as 35,812 were "Other grains," i.e., millets, and 970 Indian-corn, the imports of those cereals being 17,905 and 5,378, so that the amount drawn from reserves was apparently 13,499 maunds.

48. No relief works have yet been opened, but the comparatively poor condition of the persons admitted to jail is a sign that relief is wanted without delay. Many moot points were cleared up at the Muzaffarpur Conference on the 4th and 5th, including the distribution of circles, and Mr. Carlyle hastened back to Darbhanga to open relief works at once.

49. I trust that the alleged death from starvation may prove to be incorrect. At any rate it is clear that house-to-house enquiries by Circle Officers should be pushed on. Mr. Carlyle's 19th paragraph explains what has already been done in this direction.

50. The prescribed map is appended as well as the required statements of the Famine Code.

PART III.—CONCLUSION.

51. The foregoing paragraphs show that there has not been much change in the situation in North Bihar during the past fortnight, but that the condition of the districts in South Bihar is a good deal better.

52. The rain which fell on the 22nd November was most plentiful in Shahabad where it was most needed, and it has, I believe, made the *rabi* crop in that district fairly secure. In Patna the Collector has excluded his diara lands from the category of affected areas, and from Gaya the Collector has reported that no tract can now be considered distressed. In North Bihar the rain was appreciable in amount only along the bank of the Ganges, and over the greater part of the distressed area it has done but little good. With the ordinary rains which usually fall during the cold season in Bihar, and which average about $1\frac{1}{2}$ inches in the four months, December to March, and with the aid of the incessant irrigation which is going on almost everywhere, I believe that we shall secure very nearly an average crop of *rabi*, and certainly not less than the outturn of 1873-74.

53. Distress is reported from no quarter, but, both in Bettiah and in Madhubani, there is no doubt that the physique of the people is deteriorating. The figures supplied by the Civil Surgeon of Darbhanga are instructive, and similar statistics will be called for from other districts.

54. Charitable relief has not yet been completely organised anywhere, as some uncertainty was felt as to the agency by which it was to be administered, and also as to the necessity for it at this stage. The preparation of lists of dependants and other persons likely to require charitable relief has been in hand for some time, and at the Muzaffarpur Conference on the 4th instant, where the partition of the three districts first to be affected into suitable relief areas was settled, it was decided that in several circles in each district Circle Officers were to be appointed forthwith, whose first duty would be the examination of these lists, and the institution of further enquiries in the villages. The high prices prevailing cause this operation to be necessary at a much earlier stage than in previous times of scarcity.

55. Relief works are in full working order only in Shahabad and Cham-

DISTRICT	1st week	2nd week
1	2	3
Patna	129	123
Gaya		
Shahabad	223	329
Saran		79
Champanan	1,236	1,423
Muzaffarpur	243	318
Darbhanga	68	312
Total	1,897	2,484

paran, and in Shahabad two have been closed as unnecessary. In Gaya none have been attempted even as test works. In Patna they were commenced and closed, and in Saran, Muzaffarpur and Darbhanga, although there was some confusion about their first inception, it was made clear enough that they were not yet a necessity. The average number of male units employed on relief work during each day of the two weeks under report is exhibited in the margin.

56. No reliable information has yet been obtained as to stocks in hand, but,

except in Champaran, District Officers are still confident that the supply is sufficient for the present

57. The movement of food-grains during the fortnight as shown by the statistics of railway traffic is summarised as follows—

DISTRICT	Imports	Exports.	Excess
1	2	3	4
Patna	11,836	96,869	E. 85,033
Gaya	6,153	2,641	I. 3,512
Shahabad	6,753	28,520	E. 21,767
Saran	95,499	8,703	I. 86,796
Champanan	1,270	6,330	E. 5,113
Muzaffarpur	15,034	6,579	I. 8,455
Darbhanga	19,212	43,964	E. 24,742

58. Prices are practically stationary. The marginal abstract will show the price of common rice at each district head-quarters on the 14th and 28th November. It is reported that at inland stations prices show a tendency to fall with the incoming of the new rice crop.

DISTRICT.	November 14th	November 28th
1	2	3
Patna	10	9
Gaya	9	9½
Shahabad	9	9
Saran	9	9
Champanan	9	9
Muzaffarpur	8½	8½
Darbhanga	10	10

59. The public health remains good, there is no wandering, the cattle are in unusually good condition, and water for men and cattle is still sufficient.

60. A prominent event of the fortnight under report was the visit of the Lieutenant-Governor to Sonapur and the Famine Conference held there on the 20th ultimo. The proceedings of that Con-

ference have already been published and need no further notice here. I need only say that it is a matter of extreme satisfaction to myself, and all the District Officers of this Division, to learn that the Lieutenant-Governor, after personal consultation, was able to say that he accepted our appraisement of the situation, and was satisfied that proper steps were being taken to meet the approaching scarcity. The fall of rain which immediately succeeded the Lieutenant-Governor's visit has created a profound impression upon the minds of the superstitious.

61. Another important incident to be noted is your tour through the districts of Darbhanga, Muzaffarpur and Champaran with the Collector of the district in each case. Starting from Sonapur on the 23rd November, you completed your circuit, and reached Muzaffarpur on the 4th December in time to take part in the Conference on that and the following day. It is understood

that the result of your tour has been to satisfy you that the estimates of the Collectors are sound and judicious, and that they have correctly appreciated the position. It is a matter of great regret to me that an injury to my foot prevented me from accompanying you.

62. The proceedings of the Conference have already been submitted to Government with my letter No. 665G., of the 6th instant, and they, with the

The Hon'ble Mr. Finucane
The Hon'ble Mr. Glass, C. I. E.
Mr. Bourdillon, Officiating Commissioner

„ Macpherson, Collector of Champaran
„ Carlyle, Collector of Darbhanga
„ Stevenson-Moore, Settlement Officer.
„ Mills, Inspector of Works, Bihar
Division
„ Sealy, District Engineer, Champaran

orders of Government upon them, will be noted in my next fortnightly report. It is enough to say here that the gentlemen named in the margin were present and that they were of opinion that the condition of parts of Champaran was at the present time the most critical, but that eventually Darbhanga would require the greatest amount of help.

63. I have to report in conclusion that, as you have lately visited the worst tracts in the three northernmost districts in the Division, I now propose to make a short tour in the remaining two in which some distress has been, or is, anticipated. I have arranged to visit Sasaram and Bhabua between the 11th and the 18th instant, and shall proceed to Saran after my return, probably about the 21st or 22nd December after submitting my next report.

Memorandum on the numbers likely to need relief and the probable expenditure in each district of Bihar.

It is clear from the reports received up to date and from the information laid before the Conference at Munaffarpur on the 4th and 5th instant that District Officers are now in possession of materials sufficient for the formation of some sort of estimate of the numbers to be relieved, and the expense of relieving them between the present time and the end of September when the *bhados* crops of 1897 will be in the market, and all relief may be expected to cease. In the following paragraphs I shall attempt to set down, as clearly as may be, the requirements of each district, but it is first necessary to state a few general principles which will apply to all districts.

2. In the first place, it is necessary to say that I proceed on the assumption that the meteorological phenomena of 1873-74 will be repeated to the end of the scarcity, as they have been repeated hitherto. I have already in my report to Government of the 11th November shown how closely the features of the two years resembled each other up to that date, and I fully believe that this correspondence will be maintained. I give below for each district the rainfall during the four months (December to March) in 1873-74 and the normal rainfall.

District.	December.		January.		February.		March.		TOTAL.	
	Normal.	1873-74.	Normal.	1873-74.	Normal.	1873-74.	Normal.	1873-74.	Normal.	1873-74.
1	2	3	4	5	6	7	8	9	10.	11.
Patna	0.16	0.7	0.57	0.41	0.41	0.87	0.30	0.61	1.44	2.06
Gaya	0.20	0.11	0.08	0.78	0.42	1.04	0.39	0.29	1.73	2.21
Shahabad	0.23	0.06	0.66	0.43	0.40	0.99	0.41	0.28	1.80	1.91
Saran	0.17	0.04	0.75	0.13	0.46	0.83	0.31	0.40	1.88	1.38
Champana	0.21	0.22	0.67	0.05	0.38	1.05	0.27	0.15	1.68	1.47
Munaffarpur	0.12	0.24	0.60	0.14	0.39	0.71	0.48	0.21	1.68	1.38
Darbhanga	0.11	0.15	0.64	0.29	0.40	0.74	0.20	0.15	1.48	1.33

3. These figures show that every district may expect to receive, during the four months in question, from 1.44 to 1.80 inches of rain. They also show that in 1873-74, while the districts of South Bihar received more than their normal rainfall, those north of the Ganges suffered from some deficiency. As the experience of them all as regards the autumn rains in 1873 was about the same, the above differences go far to explain why it was that the *rabi* outturn was as follows in 1874, viz, Patna, 12 annas; Gaya and Shahabad, 16 annas; Saran, 7 annas; Champaran, 8 annas; Munaffarpur, 10 annas; and Darbhanga, 8 annas. If we assume that we shall everywhere receive the normal fall, we shall get crops a little better than those of 1873-74; but if we only estimate rain such as fell in that year, we shall still hardly fail to obtain a fair outturn. But the rain which fell in November has already improved the estimate of the crops in South Bihar, and therefore in modification of the estimates given in paragraph 102 of my report of the 11th November, I propound the following forecast of the *rabi* which is based on what has happened up to date and on what is likely to occur during the next four months:—Patna, Gaya, and Shahabad, 16 annas; Saran, Champaran and Darbhanga, 8 annas each; and Munaffarpur, 10 annas. This estimate, added to the ascertained outturn in annas of the *bhados* and *aghani* crops, is the basis of the calculations which follow, and will so remain unless and until a failure of the winter rains necessitates a review of the situation.

4. Next as to the proportion of the population to be relieved, it is stated in the Famine Commission's Report (Part I, paragraph 75) that in times of famine about 7 or 8 per cent. of the population may be expected to require relief for a long period, but that in particular places, and for a short period, the proportion may run up to 15 per cent. In the same passage it is stated that in 1873-74 the proportion of the population on relief works in Bihar was about 10 per cent. for nine months, and as high as 20 per cent. for a short time; but I do not propose to accept the administration of that famine as a perfect example, since it is well known that expenditure was very lavish, and that relief was not always judiciously given. I believe that the people started on the present scarcity in better condition than they did in 1873-74; but, on the other hand, prices have risen to famine rates at a much earlier date. After full consideration, I am disposed to think that we shall get a fair estimate of the number to be relieved if we take 8 per cent. as the general average proportion of the population to be maintained, and bear in mind that charitable relief will be wanted a little earlier than usual.

5. This conclusion leads to my next point, which is that it is important to remember that there are two ways in which relief is given, viz., (a) by relief works, and (b) in charitable relief. Relief works are already open in Champaran; they have been tried as test works elsewhere, and they will be wanted in Munaffarpur and Darbhanga (and to a smaller extent in Saran) from the 1st January. It was the experience of 1873-74 that relief works were

needed long before charitable relief; but the high prices this year led to the conclusion that charitable relief-works have to be given much earlier, and that it will last longer. In 1873-74 charitable relief was first distributed in Saran at the end of February, in Gaya and Shahabad during the first week in March, and in Muzaffarpur and Darbhanga from the 25th of the same month. No information is available for Champaran. I am disposed to think that in that district and Darbhanga charitable relief will be required to some extent from the 1st January and in Saran and Muzaffarpur from the 1st February. I hope that in other districts it may perhaps not be necessary to give charitable relief on an extended scale till May.

6 All the District Officers of the northern districts have divided their districts into zones of distress the population on which will require relief in instalments or stages. This greatly facilitates the work of computation.

7 Lastly, I propose to reduce all the figures to terms of one day, and to calculate that one anna a day will cover all the expenses of relief, excluding of course the charge for ordinary establishment, which, under article 194 of the Famine Code, is not debitable to famine relief. This is the rate accepted for purposes of calculation in the Report of the Famine Commission, and paragraph 24 of the Resolution of the Government of the North-Western Provinces on the Bundelkhand relief operations at the beginning of the present year shows that the average cost per head per diem of the people relieved was 1½ pies. But the prices of grain are now extraordinarily high, and I think that a rate of one anna (or 12 pies) per head is most suitable. The average cost was much higher than this in 1873-74.

SARAN DISTRICT.

8. The Collector estimates that the whole of his district, which measures 2,651 square miles and has a population of 2,466,065 persons, will be affected; but he considers that an area will be at once affected, of which the area is 766 square miles and the population 665,830. I greatly doubt whether any other part of the district will require relief, and I therefore for the present assume that it will not. This leaves for consideration only the figures above. Eight per cent of 665,830 gives 53,266 persons to be relieved for 9 months, i.e., $53,266 \times 270 = 14,381,820$ for one day: at one anna a day, the cost of relief would be Rs 8,98,863.

9. In 1873-74 the number of persons employed on relief works amounted to 34,633,950 for one day, and those charitably relieved were the equivalent of 1,013,334, total 35,647,284, the cost of relieving whom at one anna a day would have been Rs. 22,27,955. As a fact, the cost was, as follows for wages and charitable relief:—Cash, Rs 17,99,075; grain (at 4 a maund); Rs 13,54,864; total, Rs 31,53,939; This total gives an average rate of nearly 1 anna 5 pies per head.

CHAMPARAN DISTRICT.

10 Excluding the hilly and jungly areas in his district and those tracts which are in his opinion practically safe from distress, the Collector, Mr. Macpherson, divides the affected area of his district into four grades, as follows:—

	Area. Sq. miles.	Population.	Date when relief will be required.
Class A	570	271,415	1st December.
" B	1,282	749,384	1st January.
" C	436	261,655	1st February.
" D	804	146,904	1st April.
	2,692	1,469,308	

11 If we take 8 per cent. of the above population, we get the following figures:—21,718 for ten months, 68,146 for nine months, 20,932 for eight months and 11,752 for six months.

21,718 × 300	=	6,515,300
68,146 × 270	=	17,499,420
20,932 × 240	=	5,023,680
11,752 × 180	=	2,115,360
Total for one day	=	30,702,360

If these figures are reduced to terms of one day, we get the results in the margin. The cost of relieving this multitude at one anna a head comes to Rs. 19,18,497.

12. The figures are enormous in themselves, and in respect of numbers are nearly double those of 1873-74.

The statistics given in the memoranda circulated by Government show that the attendance on relief works in that year comes to 14,871,030 persons for one day: adding those who received charitable relief according to Sir A. P. MacDonnell's estimate, viz., 2,316,570 for one day, we get a total of 17,187,600 persons relieved for one day, against the Collector's present estimate of 30,702,360. Turning next to cost, I find that cash was spent to the extent of Rs. 6,80,703, besides grain to the value of Rs. 9,50,208 (i.e., 8,484 tons at Rs. 4 a maund).

The total expenditure thus amounted to Rs. 16,30,900, or more than 1 anna 6 pie per head per diem.

13. In paragraph 94 of my report of the 11th November, I compared the crop estimates of 1895-96 and 1872-73, and showed that so far as the *bhadet* and *aghar*, so, the aggregate outturn was exactly the same in both years, being 12 annas out of 32. I have already assumed that the *rabt* crop this year will be what it was in 1873-74, and all the conditions

therefore are identical. I am thus driven to the conclusion that Mr. Macpherson's estimates are too gloomy, because under exactly the same condition as existed in 1873-74 he now expects to have to assist 30 million persons instead of 17 millions. The shortest way to correct the overestimate is to reduce the percentage of persons to be relieved, and therefore instead of 8 per cent. of the population of the affected area I propound a percentage of 5.

13,570 × 300 =	4,071,000
39,466 × 370 =	10,855,820
13,082 × 340 =	8,189,680
7,345 × 190 =	1,322,100
	19,188,600

14. This percentage will give the figures in the margin as the number to be relieved for one day, and the cost at one anna a head will be Rs. 11,99,287, say, 12 lakhs.

MUZAFFARPUR DISTRICT.

15. For the Muzaffarpur district the Collector has unfortunately not divided his area into zones, as has been done in Darbhanga and Champaran. But I understand that out of the whole area and population of his district, which are respectively 3,005 square miles and 2,712,857 persons, he estimates that about 700 square miles and a population of 700,000 persons are quite safe. The remainder I believe may be divided into two classes as far as he can at present say.

		Area. Sq. miles.	Population.	Date when relief works will be required.
Class A	...	1,851	1,660,000	1st January.
" B	...	454	352,857	1st April
		2,305	2,012,857	

16. Treating these figures in the usual way and taking 8 per cent. of the population as likely to require relief, we get the figures in the margin, a total of 40,937,040 persons to be relieved for one day; and taking the cost of doing so at one anna per head, the result is Rs. 40,937,040.

132,800 × 270 =	25,856,000
28,228 × 180 =	5,081,040
For one day	40,937,040

17. Comparing these figures with those for 1873-74, I am inclined to think that they are on the side of moderation. In that year the number of persons on relief works gives a total for one day of 33,709,050, and the number of receipt of charitable relief works amount to 5,261,722; the grand total is, therefore, 38,970,772. The actual expenditure on relief works and charitable relief appears to have been as follows:—Cash, Rs. 12,42,396; grain (at Rs. 4 the maund), Rs. 14,38,976; total, Rs. 26,81,372. These figures come to a daily rate of about 1 anna 1½ pies per head.

18. But I fear that the crops in 1896 have been a good deal worse than they were in 1873-74. I have explained in my report of the 11th November that the proportion of the various crops in Muzaffarpur is as follows, taking 100 as the full crop of the district: *bhadoi* 24.21, *aghani* 48.65 and *rabi* 30.21. I assume that the *rabi* will be the same in both years; but whereas in 1873-74 the *bhadoi* was 12 annas in 1896, it was only 5 annas, and *aghani* has now been only 3 annas instead of 5 as in the earlier year. Working these figures together, we find that, instead of the figure 100 which three good crops ought to yield, the harvest of Muzaffarpur in the two years under comparison are as in the margin. In other words, whereas in 1873-74 the district after all got a little more than half a full crop, we cannot now expect much more than one-third of a full crop, and the people are by so much the worse off.

	1873-74.	1896 97.
Bhadoi	12 08	7 22
Aghani	24 26	15 64
Rabi	18 88	18 88
	55 22	31 97

19. Looking at these facts, I am disposed to think that 8 per cent. of the population is too small a number to take, and that a safer estimate would be 12 per cent., which would give a day's total of 61,405,560 and an expenditure of Rs. 61,405,560. However, I let the Collector's estimate stand for the present.

DARBHANGA DISTRICT.

20. The Collector has divided the parts of his district which are likely to be affected into three classes, of which the area and population are as follows:—

		Area. Sq. miles.	Population.	Date when relief will be required
Class A	...	2,044	1,720,000	1st January.
" B	...	674	545,000	1st March.
" C	...	208	185,000	1st May.

If we take 8 per cent. of the above population as likely to need relief, we get the following figures:—137,600 for nine months, 43,600 more for seven months, and 14,800 more for five months. In other words, to reduce them all to terms of one day, we obtain the results given in the margin. To feed 48,628,000 persons for one day at 1 anna a head will cost Rs. 48,628,000 in all.

87,600 × 270 =	23,552,000
43,600 × 210 =	9,156,000
14,800 × 150 =	2,220,000
	48,628,000

21. In 1873-74, the figures reduced as before to terms of one day were as follows:—

	Rs.
Persons on relief work	55,365,660
Do. charitable relief	23,877,704
Total	79,243,364

to feed whom would, at one anna a day, cost Rs. 49,21,456. As a matter of fact, the expenditure in cash and grain (taking the latter at Rs. 4 a maund) was Rs. 53,62,079 and Rs. 26,02,240, total Rs. 61,64,319. The result is a little more than one anna three pies per head.

22. It will be observed that the estimate of persons likely to need relief is much below that of those actually relieved in 1873-74; but it is well known that in Darbhanga, as in other districts of North Bihar, relief was given on a very lavish scale and often without much discrimination.

23. I do not think that any relief will be required in South Bihar, and I have now to give an abstract of the foregoing paragraphs which I do in the following form:—

District.	NUMBER TO BE RELIEVED FOR ONE DAY.		Cost.		RATE PER HEAD PER DIEM.	
	1873-74.	1896-97.	1873-74.	1896-97.	1873-74.	1896-97.
I	2	3	4	5	6	7
Saran	35,647,284	14,281,820	Rs. 31,63,939	Rs. 8,95,869	1 5	1 0
Champaran	17,147,600	19,188,600	17,30,306	17,29,287	1 3	1 0
Muzaffarpur	38,970,772	40,937,040	24,81,372	25,58,566	1 1½	1 0
Darbhanga	78,742,304	48,523,000	61,64,319	30,37,000	1 3	1 0
Total	170,548,960	1,23,035,460	1,36,30,596	76,89,716

24. In conclusion, I would add two remarks. The first is that these figures are confessedly only approximate, because they are based on estimates. Moreover, in order to get the number of persons for one day, I have always multiplied by multiples of 30. In the next place, with grain at the rates it has now reached, one anna a day will perhaps prove too small an allowance. However such as they are, I present the above figures as a first estimate of the magnitude of our impending operations.

J. A. BOURDILLON,

Commissioner of the Patna Division.

The 9th December 1896.

APPREHENDED DISTRESS IN THE DISTRICT OF HAZARIBAGH.

No. 327T —M R., dated Camp Purulia, the 7th December 1896

From—C R. MARINDIN, Esq., Offg. Commissioner of the Chota Nagpur Division,
To—The Secretary to the Government of Bengal, Revenue Department.

IN continuation of my letter No. 606M.R., dated the 12th November 1896, I have the honour to forward the enclosed copy of a note and instructions issued to the Deputy Commissioner of Hazaribagh. The Deputy Commissioner is utilizing a great many sources of information, and, so far, has received no really alarming reports of the condition of the people, and does not himself consider that any necessity has yet arisen for opening test relief works; but for the reasons given in my note, I am of opinion that it will be safer to open some at once in selected tracts, to enable the Deputy Commissioner to determine with more precision whether scarcity should be declared in his district, than he can do with merely the information afforded him by the reports of the zamindars, police, and others. I think that the movement of people in search of work, and the increased number of wanderers on the roads and in the town of Hazaribagh, indicates that the pinch of high prices is beginning to be severely felt by those who have no grain of their own and are not regular agricultural labourers, and that relief works may become necessary sooner than was anticipated. I have also thought it desirable that small sums of money should be given to the police to relieve destitute travellers on the Grand Trunk Road and other pilgrim routes, as the number of such persons is said to be unusually large, and also to relieve stray cases of distress in villages; and to put in motion the sources of private charity in the town of Hazaribagh for the relief of destitute wanderers who are said to be gathering there. If the test relief works show that scarcity prevails, the Deputy Commissioner has been instructed to submit the required report under section 10, chapter II of the Famine Code. I am also writing to the Deputy Commissioner of Manbhum to take similar measures for the relief of destitute travellers on that portion of the Grand Trunk Road that passes through his district.

MEMORANDUM.

I RECEIVED a further demi-official report, dated the 26th November, from Mr Herald, the Deputy Commissioner of Hazaribagh, on the prospects of his district, in which in some respects he takes a more hopeful view of affairs than in his former report.

He has found some villages where the outturn of rice will not be less than 12 or 14 annas, and on the whole he expects a 7-anna outturn for the entire district. The late rain has improved the prospects of the *rali* crops, and though these are not an important item in the food-supply of the district, still they will, if further rain falls and the yield is fair, have a considerable effect in enabling people to tide over till next September. Much help is also expected from the mahua crop, though it is too early to say what this will be like. Altogether, Mr. Herald says that there is undoubtedly enough food in the district to give full rations until March or April, which, if supplemented by a good crop of pulses and mahua, will suffice the people till September and October. The Deputy Commissioner is collecting information about stocks of grain, and until he has obtained all the statistics, it would be premature to say whether there will be sufficient food-supply to carry on the people through the hot weather and rains, but no doubt the estimate may be so far accepted as showing that there is no want of food-supplies in the district at present. Mr. Herald thinks that under these circumstances he will be quite safe in refraining from active measures for another three or four weeks.

In some other respects his report is not so reassuring. Prices, though slightly easier, continue very high. Rice is selling at 9 and 10 seers at the sadar and 8 and 9 seers at Giridih. The cultivators are holding their stocks, which of course contributes to send up prices and is an indication that they themselves anticipate distress.

Though some villages will have a fair outturn of rice, others will have little or none, and, as Mr. Herald says, owing to the general holding up of stocks, the bad villages will get little or no advantage from the better crops reaped in neighbouring ones. The movements of the population, moreover, are indicative of some present symptoms of distress. Many people, Mr. Herald says, are leaving for the Giridih and Jheria mines.

2. On the whole, I considered it best to come at once to Giridih and meet Mr. Herald and confer with him personally as to the state of things, and this morning have discussed matters with him and the Subdivisional Officer, Mr. Martin. Besides the movements of the population referred to above, I have learnt from Mr. Herald that many of the people who

went to the Jhoria mines have returned from there, failing apparently to get employment. On the Grand Trunk Road there is an unusual number of indigent travellers, some of whom, in a more or less destitute condition, have been sent into the head-quarters dispensary by the Sub-Inspector of Burhi.

Dr. Nott, the Civil Surgeon, in a demi-official letter just received by Mr Herald, says that the number of wanderers in the town of Hazaribagh is perceptibly increasing, that these show unmistakeable signs of want, and that some of the coolies he has examined for emigration are much emaciated. Dr. Nott adds that he is keeping patients in the dispensary who have practically recovered from their sickness, because, if he turned them out, they would starve. Mr Martin, the Subdivisional Officer of Giridih, informs us that the police had reported six cases of families destitute of any means of subsistence, whom they had had to relieve through the assistance of the local zamindars. In my opinion these signs of distress are rather ominous and should not be neglected, and show that though there may be plenty of grain in the district, the poorest classes, including labourers who are not Kamias or regular agricultural servants, are beginning to feel the pinch of high prices and to suffer from want of food, especially as the rice harvest in many places is over, and therefore, though Mr Herald thinks that no action is yet required, I consider that the time has come when test relief works should be started in certain areas to gauge the extent to which distress exists, and that some measures must be taken to relieve wandering and destitute people on the main roads and in the town of Hazaribagh.

3. The following measures have therefore been agreed upon —

Mr Herald has produced a map in which he has marked off the outturn of the present crop as he estimates it. The worst portion of the district, according to this map, is the thana of Kasmar, but this thana contains a good many large villages with well-to-do cultivators where the labouring classes are probably for the most part Kamias who will be supported at present by their employers. Dr. Nott is shortly to visit this thana on vaccination work, and it will be safe to defer any action there till Mr. Herald gets reliable information from him of the actual state of things.

The next bad area is a strip of country running across the district from north to south, between the Hazaribagh and Giridih plateau. This is high land: there are no *bundhs* for irrigation, and the outturn will not be more than five annas. This tract is traversed by the Grand Trunk Road. It comprises the following thanas —

	Area.	Population.
Koderma ...	442	77,686, 176 per square mile.
Burhi	353	51,693, 146 " "
Bagodar . . .	442	64,722, 146 " "
Dhumri	509	80,277, 158 " "

Only the Sadar thana of Dhumri is included in this tract, and not its outposts. Test relief works will be started at once in the above area under section 11 of the Famine Code, and the Deputy Commissioner will be strictly guided by the provisions of the Code in fixing and regulating the rates of wages, quantity of work, &c. As the labouring classes are in the habit of consuming the coarser food-grains, the standard for the wage rate will be *makai*, which is said to be easily procurable and cheaper than rice. The calculation of the wage should be by a grain equivalent under section 104 at the current price of *makai* in the neighbourhood of the work. Daily rates of wage are not to be given. One test work will be opened on a road which it is proposed to open out from Utka to Maskucha, which is about the middle of the above tract of country. There is a track at present, and no difficulty is anticipated about the land required for the road. In the north of the tract about Burhi and Koderma and in the south in the Dhumri thana, villages will be selected and *bundhs* started on the same principles as regards wages.

The services of Mr. Gantzer and his staff will be utilised in opening and supervising these works, and I have asked the Deputy Commissioner to depute Babu Suresh Chundra Das, the Excise and Income-tax Deputy Collector, who is now on tour about the neighbourhood of Koderma, to select the sites for the *bundhs* in that part and to watch the opening and progress of the works, and to depute Mr. Martin, the Subdivisional Officer of Giridih, to do the same in the Dhumri thana. The District Road Committee will supply the necessary funds for these test works, and those started in the Koderma Government estate can be paid for from the money in the hands of the Deputy Commissioner for works of improvement in Government estates. The above test works seem likely to suffice for the present, but it might be advisable now or a little later to start some in the Hazaribagh thana, where the outturn is estimated at six annas, and where wanderers seem to be coming into the Sadar station.

4. The next point considered was the relief of travellers. The roads which are said to demand attention are the Grand Trunk Road, which runs for about 80 miles through the district, the Deoghar-Gaya Road, a pilgrim route across the north-east corner of it, and the Lohardaga-Shergotti Road, another pilgrim route on the north-west corner. On the Grand Trunk Road there are the following thanas and outposts —

Thana Chauparan	Outpost Barkatta.
" Burhi.	Thana Bagodar.
Thana Dhumri.	

These are about from 8 to 17 miles apart. A small sum, say Rs. 10, should be advanced to the police officer in charge of each of these stations, with instructions that he is to spend it in relieving any really destitute travellers by a meal of cooked food, and he should also be ordered to direct persons travelling in search of employment to the nearest relief work.

At Burhi thana the Deputy Commissioner proposes to put this relief in the hands of the Rural Sub-Registrar, who has already, it is believed, started a fund for the purpose. There is no objection to this. Similar arrangements with the police should be made on the Lohardaga-Shergutti Road and at all thanas to relieve stray cases of want. The Deputy Commissioner informs me that he has already called upon zamindars to relieve any cases of destitution that come to light in their estates. On the Gaya-Deoghar Road, a route for Baidyanath, help is said to be given already at two places by the Thakot of Gawan and the zamindars of Satgaon. This covers about the first 20 miles of the road. The Subdivisional Officer of Giridih should enquire and report if any other arrangements are wanted to meet the case of travellers on the further length of road to be covered before the borders of the Monghyr district are reached.

5 The case of wanderers in the town of Hazaribagh remains to be considered. Judging from Dr. Nott's information, I certainly think that the sources of private charity should now be indented on to relieve these cases, and the Deputy Commissioner is requested to arrange for this. As it is important that he should continue his present tour, and thus will not allow of his returning to Hazaribagh to initiate this measure of relief, it would be best for him to ask the Civil Surgeon or senior Deputy Magistrate, Mr. Warde-Jones, to act on his behalf

* A fund is being raised in Giridih town, but Mr. Martin assures us that no help is wanted at present by the beggars who still get their alms in the ordinary way. in communication with Rai Bahadur Jadu Nath Mukerjee and other leading inhabitants of the town. A supply of cooked food will be the form of relief most applicable to this case, and the Committee should be guided by the rules* of the Famine Code in the distribution of this relief

6 Mr. Herald is requested to report the result of the test relief works to be undertaken in due course. I hope that his anticipations that they are not yet wanted may be fulfilled, but by opening them we shall be able to diagnose the situation more accurately than it is possible to do at present. The Deputy Commissioner is also requested to map out relief circles for his district, so as to be ready for more extended relief measures if they are wanted. If the test works show that distress exists in consequence of the scarcity and high prices, a report under section 10, chapter II of the Famine Code, should be submitted.

C. R. MARINDIN,

Offg. Commissioner of Chota Nagpur.

RESOLUTION—No 6241. P

READ—

The Report of the Board of Revenue on the Road and Public Works Cess Operations for the year 1895-96.

The delay of two months and-a-half in submitting the report is stated by the Board to be due to the difficulty which many collectorate establishments experienced in understanding correctly the details of the new tauzi procedure, in consequence of which the returns had to be referred back more than once for revision. Even now the statistics attached to the report are not absolutely correct, as only approximate figures have been furnished by the Collector of Patna.

2. The Road and Public Works Cesses were levied at the maximum rate of one anna in the rupee during the year under review in all the districts where the Bengal Cess Act, IX of 1880, is in force. The following statement shows the main results of the working of the Act during the past two years.—

		1894-95	1895-96
(1)	Current demand	Rs 83,21,993	Rs. 84,88,612
(2)	Arrear „	„ 14,85,984	„ 11,80,123
(3)	Total „	„ 98,07,977	„ 96,68,735
(4)	Total collections	„ 82,58,755	„ 82,58,761
(5)	Remissions	„ 27,571	„ 84,859
(6)	Net balance	„ 15,17,286	„ 17,27,671
(7)	Percentage of total collections on current demand	99.2	97.3
(8)	Percentage of current collections on current demand	84.8	82.1
(9)	Percentage of arrear collections on arrear demand	77.9	78.0
(10)	Number of revenue paying estates assessed	222,130	230,637
(11)	Number of revenue-free estates and rent-free tenures assessed	158,012	129,373
(12)	Number of tenures assessed	1,348,002	1,451,837
(13)	Number of recorded share-holders in estates	1,394,559	1,410,487
(14)	Number of recorded share holders in tenures	2,417,364	2,535,943
(15)	Current demand of land revenue ..	Rs 3,81,98,931	Rs. 3,82,73,908

The total collections in the two years remained almost the same; but owing to the enhanced demand in the year under review, the balance outstanding at the end of 1895-96 was greater by Rs 2,10,385.

3. The following districts succeeded in attaining the accepted standard of cess administration for the first class, and showed a percentage of current collections above 90, and of arrear collections above 80, during the year —

DISTRICT	Percentage of current collections on current demand.			Percentage of arrear collections on arrear demand.		
	1895-96.	1894-95	1893-94.	1895-96.	1894-95	1893-94
1	2	3	4	5	6	7
Jalpaiguri ..	99.7	99.3	91.6	88.2	100	99
Singhbhum ..	94.6	99.14	98	83.3	11.8	97.1
Malda ..	97.3	94.8	97.4	99.5	99.3	99.7
Puri ..	97.3	98	97.9	90.6	90.4	93.1
Dinajpur ...	95.3	92.6	92.3	99.6	99.7	99.6
Bogra ...	93.9	94.74	91.9	98	100	100
Hazaribagh .	93.4	97.44	96	99.8	100	99.7
Rajshahi .	93.2	87.1	84.2	90.2	97	89.1
Mymensingh ..	93.3	93.5	93.1	95.7	96.8	95.6
Bubbhum .	93.1	92.7	95	96.8	89.3	95.1
Noakhali ..	92.5	93.27	90.8	91.7	92.4	84.8
Khulna ...	91.7	91.2	90.5	90.8	90.2	85.5
Darjeeling .	91	99.6	99.9	100	100	100
Dacca ...	90.9	90.6	87.3	80.2	92.4	90.4
Rangpur ...	90.5	93.02	93	96.7	94.6	94.9
Patna ...	90.4	86.4	87.1	84	88.2	95

All of these, except Singhbhum, Rajshahi and Pabna, showed equally good results in the previous year. In arrear collections the standard has been attained by all the districts mentioned in the foregoing list, except Singhbhum, during each of the past three years, but in current collections Rajshahi and Pabna failed to attain the standard in two years, and Dacca in one year. The results are creditable to the officers concerned.

4. Burdwan and Balasore are the only two districts which fall into the second class, i.e., collected more than 90 per cent. of the current demand and less than 80 per cent. of the arrear* demand. The short collections in Burdwan are ascribed to the heavy arrears due from rent-free tenures and revenue-free estates, but it is not explained why these large arrears were allowed to accumulate. The Board report that certificates have since issued for the realization of these sums. The explanation of the local officers that the falling off in arrear collections in Balasore was entirely due to the amalgamation of the Land Revenue and Cess *tauzis* from the beginning of the year, and to the introduction of many changes in the accounts of the *Tauzi* Department, has not been accepted by the Board.

5. In the districts of the third class mentioned below, the current collections fell short of 90 per cent., but the arrear collections rose above 80 per cent.:—

DISTRICT.	Percentage of current collections on current demand.			Percentage of arrear collections on arrear demand.		
	1895-96.	1894-95.	1893-94.	1895-96.	1894-95.	1893-94.

Bhagalpur .. 92·7	86·3	92·	89·2	93·5	89·5	80·7
Tippera .. 89·4	87·5	88·6	83·4	91·1	90·6	87·8
Purnea ... 96·8	88·1	88·7	86·4	83·1	73·2	99·1

* Figures not submitted by the Collector

† There is no March kist

The figures in the first column of the above statement represent the percentages of collections on the net current demand of the districts against which they are noted, after eliminating the sums affected by the period of grace which ended after the close of the year, and for the realization of which no coercive measures could be taken within the year. The balance thus arrived at is the true arrear for the collection of which the District Officer is held responsible. Muzaffarpur, Cuttack, and Purnea are the only districts which have not invariably reached the standard for arrear collections in the three years; but in current collections all the districts show short percentages, except Chittagong and Nadia for two years and Manbhum, Palamau and Bhagalpur for one year. Eliminating, however, the amounts affected by the 15 days' grace, Lohardaga, Champaran, Faridpur, Backergunge, Palamau, Bhagalpur, and Purnea reached the prescribed standard in the case of current collections during the year under review. The short collections in Manbhum are ascribed to the fact that the *Pachete Estado*, which was lately brought under the *Encumbered Estates Act*, was unable to pay up its dues within the year, and in Lohardaga and Palamau to the fact that the last kist fell due on the 28th March, and no coercive measures could be adopted till after the close of the year. Poor harvests, the cadastral survey, but more especially the stoppage of sales owing to the amendment of the *Certificate Act*,

whereby estates sold can be redeemed by the tender of the purchase money within 80 days, are the causes assigned for the bad results in Muzaffarpur. In Champaran collections were retarded by the default of some of the principal landholders and zamindars, and by delay in the filing of certificates, due to the difficulty experienced in making out the arrear lists under the new tauzi procedure. The latter cause also contributed to the short collections in Midnapore, Chittagong, and several other districts. In Faizpur, the explanation given is that most of the estates are petty and contain numerous share-holders, each of whom tries to evade payment and throw the burden of payment on his co-sharers till final steps are taken under the certificate procedure. In Backergunge the increase in the demand, the reduction of the rate of interest on arrears and the low price of rice throughout the year are put forward in explanation of the short collections. In Cuttack and Purnea certain proprietors deliberately withheld payment. The difficulty in realizing cesses from holders of rent free tenures in Jessore is said still to continue, though to a less extent. In Nadia a larger number of cess-payers than in previous years took advantage of the statutory allowance of 15 days' grace. In the 24 Parganas the poor results are attributed to failure of crops, and in Tippera to the introduction of the system of post-card warnings in lieu of notices under the certificate procedure, to delays in the preparation of arrear lists in consequence of the new tauzi system, and to the failure of certain of the chief zamindars to pay in time. The last two causes also operated in Bhagalpur, where the bad outturn of the *rabi* crops further affected the collections.

6. The districts of the fourth or lowest class, in which both the current and arrear collections fell short of the standards prescribed, were—

DISTRICT	Percentage of current collections on current demand			Percentage of arrear collections on arrear demand		
	1895-96.	1894-95	1893-94.	1895-96	1894-95	1893-94
1	2	3	4	5	6	7
Gaya .. .	62.6	77.4	75.7	69.4	54.8	53.
Saran .. 75.5	65.2	62.5	70.7	78.8	71.8	82.9
Hooghly ... 71.5	65.6	65.6	70.5	50.0	72.6	83.6
Patna ...	74.4	79.5	78.9	79.7	89.8	94
Monghyr ... 48.5	79.7	82.1	81.8	70.1	8.6	87.1
Darbhanga 89.2	79.8	87.3	86.7	76.3	76.6	78.2
Shahabad . 91.5	81.6	89.5	89.2	70.1	52.1	67.6
Murshidabad 83.3	83.1	86.5	85.3	59.6	60.6	53.9
Bankura 91.8	88.2	82.5	78.2	51.1	54.4	48.4

* Figures not submitted by the Collector.

The figures in the first column give the same information as those in the statement for third-class districts. Except for two years in Patna and Monghyr, and one year in Saran and Hooghly in the case of arrear collections, all these districts have, during the three years, failed to collect up to the standards fixed. At the same time, if the amounts affected by the 15 days' grace are eliminated, Shahabad and Bankura reached the prescribed standard in the case of current collections. The short current collections in Gaya are said to be entirely due to the failure of the 7-anna share of the Tikari estate to pay within the year; and in Saran to the contumacy of the petty share-holders, the general indebtedness of the zamindars, and the heavy arrear balance which had to be collected during the year. The reasons assigned in Hooghly are the inability of the cess office to issue notices in due time, the inclusion of rent-free holdings in estates to which they did not belong, and the failure of the certificate procedure, for various reasons. No explanation is given of the short collections in Patna. The falling off in Monghyr is attributed to the introduction of the new tauzi system, which is said to have increased the work and also to the action of the co-parceners of petty estates, each of whom tries to shirk payment in the hope that his co-sharers will pay. In

Darbhanga the reasons given are the disinclination of the proprietors to pay cesses until they are forced to do so, and the bad working of the nizarat staff in not realizing promptly arrears covered by warrants. The collections suffered in Shahabad in consequence of the non-payment of cesses by the chief zamindars of the district, especially those of Dumraon and Surajpura, while the bad results in Murshidabad appear to have been due mainly to the difficulty of tracing rent-free holdings and to family dissensions between two leading zamindars. Heavy arrears due from rent-free tenures, many of which cannot be traced, account for the poor collections in Bankura.

7. Arrears amounting to Rs. 11,149 became barred by limitation in thirteen districts, Monghyr heading the list with Rs. 4,506, followed by Gaya with Rs. 2,615. In Monghyr Rs. 1,617 have since been realized, and it is explained that in the case of revenue-paying estates the certificates could not be enforced owing to the defective nature of the records, while many revenue-free estates were not traceable. In regard to Gaya it is stated that the defaulting jagirdars are either dead or have transferred their jagirs to others whom it is difficult to trace.

8. The following statement illustrates the working of the certificate procedure in the realization of the cesses during the last two years :—

		1894-95	1895-96
Certificates pending from the previous year	..	36,672	40,960
Filed during the year	85,914	66,671
Total for disposal	...	1,22,586	1,07,531
Cancelled on objection	1,042	1,258
Struck off	6,406	4,948
Fully discharged	74,521	63,318
Pending at close of year	40,960	36,022
Sales effected	1,105	1,626
Sales set aside	32	29

As compared with 1894-95, the decrease in the number of pending cases is satisfactory, but it is still 54 per cent. of the number of cases instituted during the year. The largest number of certificates was filed in the districts of Saran (9,085), Muzaffarpur (5,271), Hooghly (4,362), Dubhanga (4,083), Shahabad (3,959), Midnapore (3,770), Cuttack (3,740), Gaya (3,334), and Patna (3,280).

9. The complete revaluation of the district of Darbhanga, which was sanctioned in September 1890 and commenced in April 1891, was brought to a close during the year. The work occupied a Deputy Collector four years and nine months, and resulted in an addition of 21·4 per cent. to the valuation of the district and an increase of the cess demand from Rs. 4,13,326 to Rs. 5,07,729. The net cost after deducting fines and stamp receipts was Rs. 11,173, or less than 12 per cent. of the increase in the yearly demand. The Lieutenant Governor is glad to notice the good work done by the Cess Deputy Collector, Babu Heera Lall Sen, who was in charge from the 31st of July 1893 up to its completion on the 31st of December 1895. Partial valuations and revaluations were completed in the districts of Bankura, 24 Parganas, Jalpaiguri, Darjeeling, Dacca, Faridpur, Backergunge, Noakhali, Chittagong, Monghyr, and Manbhum. In Darjeeling and Chittagong the revaluation resulted in a slight decrease. Valuation and revaluation work was in progress in 17 districts when the year closed.

10. Statement VI, appended to the report, compares the gross rental in each district for 1895-96, calculated from the returns under the Cess Act, with the gross rental ascertained on the same basis when the road-cess was first introduced, and the gross rental of the preceding year. The results for the Province are as follow :—

			Rs.
Gross rental at first assessment	13,11,68,432
Ditto ditto in 1894-95	15,36,83,959
Ditto ditto in 1895-96	15,63,28,446

The increase up to date amounts to Rs. 2,51,60,014, or 19·1 per cent. on the rental when the road cess was introduced. Only five districts show a decrease of gross rental in 1895-96, as compared with the gross rental at the first assessment, the decrease being due in four cases to the transfer of portions of these districts to other, and in one case to diluvion.

11. The names of the Deputy Collectors whose work is favourably noticed by the Board will be communicated to the Appointment Department.

12. The Lieutenant-Governor's acknowledgments are due to the Board for their careful administration of the Department during the year.

By order of the Lieutenant-Governor of Bengal,

H. H. RISLÉY, '

Secretary to the Govt. of Bengal.

**RESOLUTION ON THE REPORT ON PUBLIC INSTRUCTION IN
BENGAL FOR THE YEAR 1895-96.**

GENERAL DEPARTMENT—EDUCATION.

Calcutta, the 15th December 1896.

RESOLUTION—No. 1119.

READ—

The Report on Public Instruction in Bengal for the year 1895-96.

Sir Alfred Croft, K.C.I.E., was in charge of the Education Department, as Director of Public Instruction, throughout the year, but the report was submitted on the 10th October 1896 by Dr. C. A. Martin, who officiated for him during his illness. In accordance with the orders of Government, directing that details should be entered into in alternate years, the present report is somewhat longer than its predecessor.

2. In the course of the last ten years there was an annual average increase of 1,332 schools and 31,897 pupils. In 1895-96 the number of pupils in public institutions rose by 36,651, *i.e.*, from 1,501,159 to 1,537,810, but the number of pupils in private institutions decreased by 1,168, *i.e.*, from 140,360 to 139,192, the net increase in the number of pupils under instruction thus being 35,483 pupils. There was an increase in the number of public institutions from 55,800 to 57,109, and a decrease in that of private or indigenous schools from 13,941 to 13,744, the net increase in the number of institutions being 1,112. All classes of public institutions, except Middle English and Special schools, gained in number and strength. The number of Middle English schools declined by 3, and their pupils by 509; while in special schools, in spite of a loss of 59 institutions, owing to the closing of a number of guru training classes, the number of pupils increased by 125. Private institutions not conforming to departmental standards show a loss of 197 schools, chiefly confined to the class of small elementary schools with less than 10 pupils each; while the number of "Advanced schools teaching Arabic or Persian" shows a fair increase of 42. The number of pupils receiving University and secondary education increased from 216,527 to 217,169. The number of pupils attending primary schools rose from 1,206,285 to 1,240,679, the development having taken place in both upper and lower primaries, but more particularly in the latter. The figures for the lower primary schools are given below for the last five years;—

			Schools.	Pupils.
1891-92	44,920	987,948
1892-93	43,829	983,271
1893-94	44,020	988,745
1894-95	45,897	1,055,253
1895-96	47,054	1,087,356

3. The population of Bengal, excluding Cooch Behar, Hill Tippera and the Tributary States of Chota Nagpur, of which the schools are not included in the educational returns, is 73,043,697, of whom 36,112,749 are males and 36,630,948 females. This gives, at the usual rate of 15 per cent., 5,461,912 male children and 5,494,642 female children of school-going age. Of the pupils on the educational returns, 1,562,748 are boys and 114,254 are girls. Thus of all boys of a school-going age, 28.6 per cent., and of all girls of a school-going age 2.0 per cent., are at school. The percentages in the previous year were 27.9 and 2.0 respectively. While it thus appears that one boy in every four of a school-going age throughout these Provinces is receiving instruction of some kind in schools, public or private, the table given in paragraph 13 of the Director's report shows that there is still a great disparity in educational progress between district and district and between division and division. Noakhali heads the list, as it did last year, with as many as 67.5 per cent. of the boys at school; while the adjoining district of Chittagong has 59.6 per cent. at school. But Chittagong, which was second in the list last year,

this year occupies the third place, having been surpassed by Calcutta, where 60·7 per cent. of the boys are at school. Purnea is in this respect the most backward of the more populous districts, and is little better than the Orissa Tributary Mahals and the Chittagong Hill Tracts, the percentages in these three areas being 12·1, 12·0, and 11·2 respectively. Palamau, Muzaffarpur, Darbhanga, Shahabad, and Bhagalpur return percentages of between 14 and 15.

The differences between the first and the last in this list are very great, and difficult to understand. It is not apparent why districts usually regarded as advanced, such as Jessore, Nadia and Khulna, which are close to the metropolis, should, as the statement shows, be more backward in education than remote districts, such as Noakhali, Balasore and Cuttack. It is clear that great and prolonged efforts will be required before the backward districts can be brought into line with the more advanced.

The following statement, taken from the Commissioners' Annual Administration Reports, shows the percentage of boys at school to the total number of boys of school-going age, division by division:—

DIVISION.				Percentage of boys at school to total number of boys of school-going age.
Burdwan	53·4
Presidency	31·1
Rajshahi	18·4
Dacca	35·2
Chittagong	46·1
Patna	15·3
Bhagalpur	14·7
Orissa	37·3
Chota Nagpur	22·3

Some explanation of the great disparity in educational progress between different districts and divisions should be sought for and given in future reports.

4. The total expenditure on education in Bengal, including receipts from fees and all other sources, amounted to Rs. 1,06,81,267 during 1895-96, as compared with Rs. 98,29,572 in the preceding year, there being thus an increase of Rs. 8,51,695. The net expenditure, excluding fees, from Provincial revenues increased from Rs. 22,76,285 to Rs. 26,35,572, or by Rs. 3,59,287—fully accounted for by large expenditure on educational buildings; that from District Funds by Rs. 76,979, and that from Municipal Funds by Rs. 4,343; the net result being an increase of Rs. 4,40,609 in the expenditure from public sources. In the previous year there had been a similar increase of Rs. 74,226 in the expenditure from District Funds, and of Rs. 4,023 in that from Municipal Funds; while the Provincial expenditure of that year showed a decrease of Rs. 56,893. In both years the District Funds were assisted by large subventions from Provincial revenues for the extension of primary education; the grants amounting to Rs. 62,000 in the former year and Rs. 31,750 in the latter. The expenditure from private sources in 1895-96 increased from Rs. 63,38,552 to Rs. 67,49,638, or by Rs. 4,11,086, including an increase of Rs. 2,78,518 in the receipts from fees.

The total expenditure on colleges increased by Rs. 17,951, though there was a decrease of Rs. 8,632 in the Government expenditure. Secondary education cost more than in the previous year by Rs. 1,42,713, primary education by Rs. 1,59,001, and female education by Rs. 11,264. Under primary education, District Boards contributed Rs. 39,250 more than in 1894-95, and for the inspection of primary schools Rs. 26,267 more. Under female education they contributed Rs. 4,181 more than in the previous year. Municipal funds contributed under these heads Rs. 3,977 more than in the preceding year.

The amount spent on education by the Calcutta Municipality was only Rs. 4,334. Dr. Martin supplies a table showing that the Bombay Municipality spent in the same year for the same purpose Rs. 67,103, chiefly on primary, girls' and technical schools. Trifling as the amount contributed by the Calcutta Municipality on primary education is, the Lieutenant-Governor is not, at present, inclined to recommend any increase of it, in view of the more pressing need for expenditure on sanitation.

5. The Director of Public Instruction was on tour for 32 days outside Calcutta, and visited the districts of Jalpaiguri, Patna, Muzaffarpur, Monghyr, Bhagalpur, Rajshahi (twice) and Dacca. The time spent on inspections by the inspecting staff of the Province throughout the year is exhibited in the following statement and compared with last year:—

	1894-95.		1895-96.	
	Number of officers.	Average number of days	Number of officers.	Average number of days.
1	2	3	4	5
Inspectors ...	5	158	5	171
Assistant and Joint-Inspectors ...	9	191	9	182
Inspector, European Schools ..	1	68	1	63
Deputy Inspectors ...	44	172	46	187
Sub-Inspectors ...	204	198	202	213

Rai Radhika Prasanna Mukerjee Bahadur spent 146 days on tour and visited 237 schools, Dr Martin as Inspector of Schools, Rajshahi and Burdwan Circle, spent 193 days and visited 237 schools; Mr Stack, Officiating Inspector of Schools, Bihar Circle, spent 151 days and visited 182 schools. Among Assistant Inspectors, Mr. E. A. LeFeuvre in the Rajshahi Division spent 217 days on tour; and Mr. J. A. Reuther spent 198 days as Assistant Inspector, besides 29 days when officiating as Inspector. Among the Deputy Inspectors, the prescribed minimum period of 150 days' touring in the year was attained in all the districts. The Sub-Inspectors have exceeded the prescribed minimum of 200 days' touring in all divisions but Orissa, where the average number of days during which the Sub-Inspectors were on tour was 196. The former standard of 400 visits to schools was attained only in the Burdwan, Presidency, Patna and Orissa Divisions. The reduced standard of 350 visits was, as in the previous year, exceeded in all the divisions, except Rajshahi and the Orissa Tributary Mahals. Some of the Sub-Inspectors, especially in the Patna Division, such as Babu Chandi Lal of Shahabad, Babu Jeet Lal of Saran, Babu Krishna Jiban Lal of Muzaffarpur, Maulvi Muhammad Ibrahim and Babu Hira Lal of Darbhanga, visited an excessive number of schools during the year; and their inspections must have been hurried and superficial. But the Lieutenant-Governor is glad to recognise the fact that in the last few years there has been, on the whole, a steady improvement in the amount and quality of the work done by inspecting officers of all classes. Under the orders of Government, all the departmental Sub-Inspectors of the districts in which there are District Boards were lately transferred to those bodies, provision being at the same time made that any assistance required by the Inspector or Deputy Inspector in compiling the returns should be furnished by the Sub-Inspectors under the Board.

There was an increase in the number of inspecting pandits from 483 to 486. The average number of visits paid by these officers rose from 499 in 1894-95 to 512 in 1895-96, the highest average of visits (684) having been attained by the inspecting pandits of the Patna Division. The average number of visits decreased in the Burdwan, Rajshahi and Chittagong Divisions, and increased in the other divisions.

6. Sir Alexander Mackenzie is glad to observe that the District Boards and the Education Department continued to work together without friction. With a few exceptions, the District Boards were guided by the advice of the Deputy Inspectors in all educational matters, the disposal of which required the knowledge and

experience of a specialist. In Malda the Deputy Inspector continued to be Vice-Chairman of the District Board. In Cuttack the Deputy Inspector continued to be the President of the Educational Sub-Committee of the District Board. Revised rules under clauses (j) and (g) of section 138 of the Local Self-Government Act, III (B.C.) of 1885, were issued in September 1895. These rules were generally acted upon by the District Boards, but complaints have been made that a few District Boards either failed altogether to send to the Inspectors the required periodical statements and the annual reports, or did not send them in proper time. These and other complaints against District Boards are gradually disappearing.

7. The number of colleges increased during the year from 37 to 39. Of these, 11 are supported by Government, 1 (at Midnapore) by Municipal funds, 8 are aided and 19 are unaided. Two new unaided colleges in the town of Calcutta were affiliated to the University up to the First Arts standard, and have been included in the departmental returns. They are the Arya Mission Institution and the Calcutta Boys' School, College Department. The total number of college students increased from 6,122 to 6,193. The Government and aided colleges gained 37 and 80 pupils respectively, while municipal and unaided colleges lost 10 and 36. The variation in the number of successful candidates at the University examinations during the last five years is shown in the following statement:—

		1892.	1893.	1894.	1895.	1896.
1		2	3	4	5	6
Entrance	{ Number of successful candidates.	1,643	2,915	1,863	2,194	2,308
	{ Percentage on whole number of candidates.	40	67	44	47	53
First Arts	{ Number of successful candidates.	1,011	830	826	1,162	1,015
	{ Percentage on whole number of candidates.	44	37	38	41	39
Bachelor of Arts	{ Number of successful candidates.	280	301	484	416	294
	{ Percentage on whole number of candidates.	24	25	36	32	23
Bachelor of Law	{ Number of successful candidates.	48	148	99	71	140
	{ Percentage on whole number of candidates.	27	47	32	24	40
Master of Arts	{ Number of successful candidates.	54	57	52	83	*
	{ Percentage on whole number of candidates.	46	44	36	47	*

* The examination is held in November.

8. Two thousand five hundred and twenty-three candidates appeared at the First Arts examination held in February 1896, as compared with 2,727 in 1894-95. The percentage of successful candidates decreased from 41 to 39. In Government colleges the percentage was 46, in aided colleges 44, and

Success at University examinations.

in unaided colleges 36. All Government colleges, with the exception of Hooghly, Patna, Ravenshaw, Rajshahi and the Calcutta Madrasa, passed more than half their candidates, the Presidency, Bethune, and Sanskrit colleges standing highest with 57 per cent. each. Among colleges under private management, the most successful, judged by the percentages of the candidates who passed the First Arts examination on the total number sent up, were Bishop's College (10 passed out of 11 or 91 per cent.), St. Paul's School, Darjeeling (5 passed out of 7 candidates or 72 per cent.), Braja Mohan Institution, Barisal (39 out of 72 or 54 per cent.), and the Free Church Institution (38 passed out of 72 or 52 per cent.). But these percentages cannot be accepted as the only test of efficiency. The actual number of candidates who passed must also be taken into consideration. Looked at from this point of view, the most successful private institutions, aided and unaided, were—(aided) the General Assembly's Institution, from which 70 passed, the Free Church Institution (38), St. Xavier's College (37); (unaided) the Jagannath College, Dacca (78), City College (76), Ripon College (55), and Metropolitan Institution (54). One candidate appeared from La Martinière College for girls, and was successful.

Among the candidates for the B.A. degree, the percentage of successful candidates in both courses together declined from 30 to 23 per cent. The number of candidates for the A and B courses fell from 905 to 865 and 447 to 412 respectively, and their percentages of success from 27 to 26 and from 40 to 25. Comparing the groups of colleges, the ratio of success was as follows:—

			A Course,	B Course	Total percentage
Government	34	34	34
Aided	27	25	26
Unaided	15	21	18

In the previous year greater success was achieved in the B course, and in the year before that in the A course. In the year under review the figures show that candidates taking the A course had again some advantage. These alternations are doubtless due to many causes, and do not necessarily imply fluctuations in the standard of examination. Indeed, the exact correspondence of the results for the two courses in Government colleges appears to show that practical equality in the two standards was attained in the year under report. Sir Alexander Mackenzie agrees, however, with Sir Charles Elliott that it is most desirable, in the interests of education, that the University should ensure, so far as possible, equal success to equal proficiency in successive years.

Of the 177 candidates for the M A. degree, 83 passed, i.e., 46 per cent., as compared with 36 per cent last year. The number of candidates rose from 144 to 177, and that of successful candidates from 52 to 83.

9. The total expenditure on collegiate education increased from Rs. 7,20,875 to Rs. 7,38,826, or by Rs. 17,951. This increase was mostly in unaided colleges, that under the department showing a decrease of Rs. 12,020. The expenditure from Provincial revenues declined from Rs. 2,90,872 to Rs. 2,82,240, while the receipts from fees and subscriptions respectively advanced from Rs. 7,10,498 and Rs. 1,19,505 to Rs. 3,22,671 and Rs. 1,33,915. The increased fee receipts are explained by the increase in the average monthly students in the colleges, which rose from 6,338 to 6,572. In Government colleges the expenditure from Provincial revenues declined from Rs. 2,61,028 to Rs. 2,55,647, owing chiefly to large reductions in the Patna and Sanskrit Colleges and the Calcutta Madrasah. The expenditure from Provincial revenues in aided colleges remained much the same as in the previous year, the small reduction being due to the payment of no grant to the La Martinière College for girls in 1895-96, to which a grant was made in 1894-95. The cost per student of collegiate education declined from Rs 113-11-9 to Rs 112 6 8, and the Government share from Rs. 45-14-3 to Rs. 42-15-2. The cost per head of the whole number of collegiate students for the past five years may be

exhibited as follows, showing that a small but steady reduction in the scale of expenditure has been effected:—

	1892.	1893.	1894.	1895.	1896.
1	2	3	4	5	6
Average cost of each student in a college in Bengal	Rs. 127	Rs. 124	Rs. 114	Rs. 114	Rs. 112
The Government share thereof ...	52	50	46	46	43

The following table shows the cost of collegiate, high, middle, and primary education on the aggregate and per head:—

Cost of Education.

Class of schools	Number of schools.	Number of pupils on rolls.	Cost					
			Provincial	District Board	Municipalities	Fees.	Other.	Total.
1	2	3	4	5	6	7	8	9
Collegiate	87	6,147	Rs. 2,82,240	Rs.	Rs.	Rs. 3,25,471	Rs. 1,35,915	Rs. 7,39,826
High	947	79,307	2,88,002	5,359	11,421	11,11,030	1,19,391	17,63,163
Middle	2,137	1,46,123	1,03,186	2,21,702	16,508	4,73,378	3,93,398	12,09,813
Primary	14,123	1,311,511	2,09,011	8,71,001	61,107	17,67,409	5,85,000	32,02,208
Special	201	8,131	2,18,303	10,310	2,000	75,753	1,10,705	4,50,808

Average cost of each pupil incurred by—

	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Collegiate	45					
High	36	17	14			
Middle	70	17	19			
Primary	16	44	39			
Special	26 4	2 01	32			

The outlay by Government on the collegiate education of 6,147 students amounts in the aggregate to Rs. 2,82,240, or Rs. 45 per student. This leaves only Rs. 2,09,939* available as the Government subsidy for the primary education of over a million and a quarter of pupils. Much has been done to render high education more self-supporting, and the sum spent on it by Government is not perhaps very great in itself. The Government would, however, be glad to do more and see more done for primary education: and Sir Alexander Mackenzie had hoped to raise considerably the grant on this account. It is to be regretted that the resources of Government will for some time to come be seriously hampered by the expenditure necessary to relieve famine.

10. In the Resolution on the Education Report for 1894-95 Sir Charles Elliott placed on record his sense of the valuable

Auxiliary societies

and afforded to Government in the education of the rising generation by two societies, viz., "The Indian Association for the Cultivation of Science" and "The Society for the Higher Training of Young Men." The Lieutenant-Governor desires to repeat the commendation bestowed upon these Associations, the latter of which has recently changed its name to the less ambitious one of the—"The Calcutta University Institute." Both of these institutions have done good work by lectures and discussions, by bringing the student into friendly intercourse with men of character and culture, and by the general encouragement afforded to independent study, in carrying on the education of young men outside the University curriculum and the class-teaching of the colleges. They are based on sound principles, and deserve cordial encouragement from Government and the public.

* This is exclusive of Rs. 5,73,172 spent on primary schools by District Boards, chiefly derived from funds transferred to them by Government.

11. The main statistics relating to secondary schools for the last five years are contained in the following statement:—

	Number of schools.	Number of pupils.	EXPENDITURE.		
			Public funds	Private funds.	Total.
1	2	3	4	5	6
			Rs	Rs.	Rs.
1891-92 ...	2,285	194,178	5,91,846	20,87,904	26,82,750
1892-93 ..	2,326	198,270	5,90,493	20,92,642	26,83,135
1893-94 ...	2,373	198,736	5,94,328	21,33,751	27,28,079
1894-95	2,397	206,989	6,09,740	21,85,658	27,95,398
1895-96 ...	2,422	207,542	6,07,983	22,61,106	28,69,089

Secondary schools of all classes taken together increased in the last year from 2,397 to 2,422, or by a little above 1 per cent, and the pupils attending them from 206,989 to 207,542, or by 2·7 per thousand. The total expenditure rose by Rs. 73,691. The expenditure from public funds decreased by Rs. 1,757, while that from private funds increased by Rs. 75,448.

12. The number of High schools maintained by the department and by Municipal Boards and Joint-Committees, respectively, remained the same as in the previous year. District Boards have no High schools under their exclusive control. The number of aided schools increased by 4, and that of unaided schools by 6. The number of pupils rose from 78,227 to 78,813—an increase of 586. At the University Entrance Examination 2,228 boys passed out of 4,131 candidates, or 53·9 per cent., against 2,194 out of 4,633 candidates, or 47·3 per cent., in 1894-95.

13. The Middle English schools decreased from 896 with 64,649 pupils to 893 with 64,132 pupils. In the Middle Scholarship Examination, the standard required is the full Middle Vernacular test, together with English language and composition taught in the middle classes of High English schools for those who aim at the Middle English certificate. 1,785 out of 3,109 candidates from Middle English schools were successful at this examination, the percentage of success being 57 against 63 last year. 1,029 gained the English and 756 the Vernacular certificate. The result is not so favourable as in the preceding year, and the decline is chiefly ascribed to the difficult paper set in Arithmetic at the last examination. The examination for all the Bengali-speaking districts was again held with the same set of question papers for the whole Province, but the Boards of Examiners for the different circles continued to examine the answer papers under the supervision of the Circle Inspectors. In the Hindi-speaking districts the practice of having one set of question papers for all districts has also been adopted. The Middle Vernacular schools have increased from 1,129 to 1,147, and the pupils from 64,113 to 64,597. In the examination, which was the same as in the preceding year, save for the omission of the papers in the English language, the percentage of success was 48·6 against 54·2 in the preceding year, 1,851 candidates out of 3,809 being successful. As to this apparent decline Dr. Martin writes:—

“If different sets of questions on the same subjects are given to the same set of boys, it is unreasonable to conclude that the two examinations would produce like results; and so also it is when different sets of boys are being examined in different years. The reports are valuable as showing that no startling differences are observable.”

14. In consequence of the orders of Government, that the marks gained at the Entrance Examination, in drawing, by candidates in 1897 and subsequent years should be taken into consideration in the award of junior scholarships, drawing-masters were appointed during the year for such of the Government schools (except Rangamati) as had been without them during the preceding year. Many schools

under private management are also reported to have engaged drawing-masters. Last year 72 pupils from 23 Government High schools took up drawing as a subject at the University Entrance Examination, and 11 passed. This year, out of 94 candidates, 26 from 17 Government schools passed. As remarked by the Director, the result, though meagre, is not discouraging. 122 candidates from private schools also were examined in drawing, of whom 23 were successful. The Lieutenant Governor approves of the practice adopted by Dr. Martin in the Burdwan and Rajshahi Division of appointing students of training schools to work both as drawing-masters and second pandits, and thinks it might be generally adopted with advantage.

15. The Lieutenant-Governor has perused with much regret the account given by Dr. Martin of the lack of discipline among the pupils in some of the schools and colleges. Discipline and moral training
Instances of flagrant breaches of discipline or gross immorality on the part of students were not perhaps very numerous, if the total number of schools and pupils is considered, but none of the divisions has been able to show a clean record in this respect. The behaviour of some of the boys of the Raniganj High School, of the Rajshahi College and Collegiate School, and of the Noakhali Zilla School was exceptionally bad. At the Raniganj School, a false telegram was sent to the head master's father, stating that his son had been attacked with cholera, and that his presence at Raniganj was needed at once. The offence was traced to the boys, and Dr. Martin inflicted on four of the culprits a fine of Rs. 50 each, from which a fund has been created for the establishment of an annual prize for good conduct. The students of the Rajshahi College and Collegiate School were implicated in a riot case in which a mob threw brickbats at a passenger steamer and its officers. This disgraceful incident occurred in September 1895. Two of the students of the second-year class and two of the Collegiate School were found guilty, and sentenced to undergo simple imprisonment for one day and a fine of Rs. 50 each, and another student of the school department was punished by a day's imprisonment. The Noakhali Zilla School, which has been noted for misbehaviour for some years past, broke out afresh in lawlessness of a serious nature. Some of the boys of the third class were punished for immoral conduct; two of them afterwards attempted violence on a boy who had helped the head-master to bring the offence home to them. They were publicly flogged in presence of the District Magistrate by order of the Inspector of Schools. This was followed by the burning down of the head master's house. Other scandalous instances of lawless and riotous conduct are given in the report. Equally serious and discreditable were the frauds in connection with the annual examinations noticed by the Officiating Director. Sir Alexander Mackenzie has already publicly expressed the strongest condemnation of the insubordinate and disorderly conduct and want of reverence which are displayed by a certain section of students of the present day. The Lieutenant-Governor fully acknowledges that such instances of misbehaviour are exceptional, and he believes that the masters in Government schools generally do their best to discourage and repress them; but he desires to repeat that he would rather see high schools and colleges closed altogether than permit them to discredit the Government and themselves by continuing to turn out a body of undisciplined and disorderly young men, entirely wanting in that courtesy and politeness for which their ancestors were deservedly celebrated. Meanwhile he earnestly trusts that the teachers of every grade, recognising the serious responsibilities of their position, will devote themselves to raising the moral tone and improving the discipline of their classes, and to impressing on those of their pupils who manifest a disorderly spirit the injustice and dishonesty of involving their well-conducted fellow-students in the discredit which the misconduct of some necessarily brings on the whole school. The Officiating Director suggests that the real remedy for the state of things described in paragraph 99 of his report is to be sought for in some kind of moral or religious instruction. This question is too large a one to be discussed in this place, but the Lieutenant-Governor is inclined to agree with Dr. Martin that if any system of moral instruction could be devised which would be acceptable to the native community, the effect would be beneficial to the rising generation of students. Sir Alexander Mackenzie fears, however, that it is Utopian to expect that any system of moral text books can be devised which would

be acceptable to all sections of the community, and he can only look for a remedy for the defects so strongly described in Dr. Martin's report to the extension of boarding-houses under Superintendents of high moral character, the encouragement of manly exercises, the strict enforcement of discipline by infliction of adequate punishment for violation of it, and to the influence and example of the teachers themselves. The frequent falsification of age in the case of Entrance candidates, to which Dr. Martin refers in paragraph 100 of the report, is under the separate consideration of Government.

16. Boarding-houses are, the Lieutenant Governor is glad to observe, growing gradually more popular throughout the country. The total present number of these excellent aids to discipline is 166, with 4,757 resident students.

Boarding houses.

They are thus distributed among the different Divisions.—Burdwan 20, Presidency 27, Calcutta 13, Rajshahi 12, Dacca 11, Chittagong 9, Patna 5, Bhagalpur 6, Orissa 28, the Tributary Mahals 1, and Chota Nagpur 34. The best are for the most part attached to schools and colleges managed by Government or by Missionary bodies, while a good many, especially those in Orissa and Chota Nagpur, are, properly speaking, students' messes under little or no control of the teachers. A boarding-house for the students of the Calcutta Madrasah has been erected mainly at Government expense. Hopes were held out to Sir Charles Elliott that private subscriptions, equal in amount to the Government contribution, would be forthcoming, and it was on that understanding that the grant was made by Government. These hopes have not yet been fulfilled. The Lieutenant-Governor trusts that the Muhammadan community will show their practical interest in the education of their co-religionists by now making good the deficit. The views of the Officiating Director, contained in paragraph 101 of his report, as to the advantages of boarding houses and the means of promoting the extension of them, appear to the Lieutenant-Governor to be sound.

17. With regard to physical training, the Lieutenant-Governor has little to add to what has already been declared to be the policy of Government, that all manly games should be encouraged, and that a reasonable amount of financial assistance will be afforded to provide gymnastic appliances and in aid of athletic clubs. The Marcus Square play-ground for the northern quarter of the town of Calcutta was opened by Sir Charles Elliott on the eve of his departure from this country. Sir Alexander Mackenzie notices with satisfaction that the popularity of cricket and football continues unabated. Peripatetic gymnastic teachers have been entertained by the Puri and Balasore District Boards to impart physical instruction in the Middle and Primary schools under their control, and gymnastic apparatus has also been supplied for their use. The example of Orissa might well be followed in other Divisions. Special teachers of gymnastics have also been appointed for the Cuttack and some other training schools.

18. The number of primary schools for native boys during the past five years is shown in the following statement.—

	UPPER PRIMARY		LOWER PRIMARY.	
	Number of schools	Pupils	Number of schools.	Pupils
1	2	3	4	5
1891-92	3,661	135,371	44,918	987,876
1892-93	3,697	137,726	43,828	983,201
1893-94	3,763	141,483	41,020	988,745
1894-95	3,901	150,878	43,897	1,055,253
1895-96	3,944	153,070	47,054	1,087,356

The number of schools of both classes increased by 1,200 and their pupils by 34,295, or 2·8 per cent. The average strength of a pathshala therefore increased very slightly, being 24·3 against 24·2 in the preceding year, namely

39 in an upper primary and 26 in a lower primary school. Upper primary schools and their pupils continued to exhibit a constant increase, the lower primary schools, in which there had been some fluctuations, seem to have taken a decided step in advance. There was a gain of schools in all Divisions, except the Presidency, Burdwan, Rajshahi and Chittagong Divisions. The variations depend on local causes, and the agricultural prosperity of the country with the improved state of public health are said to have been favourable to the growth of schools.

19. The expenditure incurred by the Department and by District Boards Cost of primary schools to together, on account of primary schools for native Government boys and girls, and of the subsidiary and subordinate inspecting agency; is compared for the last two years in the following statement:—

Description of Schools and Expenditure	From Provincial Revenues		From District Funds		Total	
	1894-95	1895-96	1894-95	1895-96	1894-95	1895-96
1	2	3	4	5	6	7
	Rs	Rs	Rs	Rs	Rs	Rs
Stipendiary schools	1,08,269	1,19,901	1,70,079	1,79,675	2,78,348	2,99,576
Non stipendiary schools	27,118	28,021	3,87,404	3,87,515	3,89,012	4,15,536
Subordinate inspecting agency	12,136	13,550	86,055	89,618	98,101	1,03,077
Lower primary scholarships	2,183	2,405	22,256	22,232	21,481	21,787
Buildings and furniture	5,22	5,845	2,137	2,387	5,00	7,778
Charges for abolished schools	1,028	2,792	11,168	8,464	14,371	11,300
Examinations prizes and rewards	6,109	7,760	31,100	34,611	41,819	41,393
Stipends to gurus under training	61	11	1,591	500	1,656	511
Miscellaneous	11,131	9,331	21,495	30,346	32,526	30,037
Total	1,73,437	1,89,135	7,07,760	7,57,314	8,82,197	9,46,819
Allotments	1,85,664	1,93,620	7,29,856	7,53,116	9,15,520	9,76,736
Savings	11,227	4,195	22,090	25,723	33,523	29,917

The above table does not include the expenditure on primary schools which are aided from the grant-in-aid and circle funds. The ordinary departmental budget grant for primary education was Rs 2,15,920. This was supplemented by an additional grant of Rs. 11,000, the savings of the preceding year, so that the total amount at the Director's disposal was Rs. 2,26,920. Of this, Rs. 1,31,340 was assigned to the non-Board districts, Rs. 15,273 to municipalities and cantonments, Rs 800 for schools for miners' children in the district of Burdwan, Rs. 500 for contribution to circle schools in Bankura and Midnapore, Rs. 1,020 for schools in the Sundarban tracts, of the 24-Parganas, Rs. 44,743 for schools in Government estates, and Rs. 31,750 to 16 District Boards (including a temporary grant of Rs. 750 to Dinajpur) to enable them to meet the increased demand for primary education in the areas under their charge. There was thus a small balance of Rs. 1,494 unallotted at the close of the year. The additional grant of Rs. 31,000 a year to the 16 District Boards has now been made permanent, the departmental provision for primary schools being reduced by an equal amount.

20. The expenditure on Upper and Lower Primary schools and the relative cost of both classes are shown in the following table, Division by Division:—

DIVISION	Allotment	EXPENDITURE		NUMBER OF SCHOOLS		NUMBER OF PUPILS		COST PER SCHOOL IN RUPEES		COST PER PUPIL IN ANNAS	
		Upper	Lower	Upper	Lower	Upper	Lower	Upper	Lower	Upper	Lower.
1	2	3	4	5	6	7	8	9	10	11	12
Burdwan	Rs 1,70,475	Rs 2,061	Rs 81,789	790	7,698	26,160	191,840	88 1	16 9	10 9	6 7
Presidency	1,30,461	17,779	5,178	390	3,925	15,936	114,560	46 5	16 2	17 8	8 4
Calcutta	81,000	1,374	5,970	17	179	1,140	7,808	80 8	34 1	19 1	12 0
Rajshahi	1,43,211	26,066	81,067	419	2,460	15,219	64,718	6 2	37 3	27 2	20 0

The annual cost of each pupil in an Upper Primary school has advanced from annas 20·8 to 22·2, and in a Lower Primary school from annas 9·3 to 10·2. The wide variation in cost in the different Divisions is attributed mainly to differences in the comparative advancement of different districts, and in Calcutta to charges for house-rent; but it also appears that there is considerable room for the exercise of economy in some district. It is difficult to understand, for example, why the cost per pupil in Lower Primary schools should be 28·8 annas in Rangpur against 9·1 in the neighbouring district of Bogra and 13·6 annas in Muzaffarpur against 4·1 in Daibhanga. The Director is requested to examine this question minutely and explain the variations in future reports.

21. In paragraph 115 of his report, the Director has given a table showing the number of pupils in each district and Division in the different stages of primary instruction, and comparing the relative positions with reference to the progress made in this respect. The principle of the table is that a merit-mark is given on each school by assigning values of 5, 3 and 1, respectively, to pupils in three stages—(1) upper primary, (2) lower primary, reading printed books, (3) lower primary, not reading printed books. The divisional figures showing the percentage of merit-marks to the male population of school-going age are reproduced in the margin. The order of the Divisions arranged by this standard remains the same as last year, except that Orissa now shows better results than the Presidency and Dacca. The Burdwan Division has had the advantage of an indigenous system of education from early days, and still occupies the first place. As in former years, the results are least satisfactory in the Patna and Bhagalpur Divisions. The increase in the percentage of pupils in proportion to the population of school-going age from 12·9 to 13·2 is satisfactory. Similarly, the increase in merit-marks, amounting to 3·1 per cent. for the year, though not yet equal to the increase of 7 per cent. in the cost of primary schools, nevertheless shows that the progress of primary education is chiefly a question of money. The difference between one district and another in these respects, is, according to the Director, attributable to two main causes viz., (1) the pre-existence of an indigenous system of mass education in tracts like Burdwan, Presidency, Dacca, Chittagong and Orissa Divisions, in which consequently the Department had its field of operation already prepared, and (2) the more or less economical way in which the primary grant is administered, some District Boards preferring quality to quantity.

22. The results of the Upper Primary Scholarship Examination for boys, including candidates from Upper Primary schools and private students, for the last five years, are shown in the following statement:—

YEAR	Number of competing schools	Number of successful schools.	Number of candidates	Number of successful candidates	Percentage of successful schools	Percentage of successful candidates
1	2	3	4	5	6	7
1891-92 ...	2,381	1,193	5,681	2,491	62·7	43·8
1892-93 ...	2,460	1,694	5,615	2,895	68·8	51·6
1893-94 ...	2,532	1,878	6,068	3,297	73·3	54·3
1894-95 ...	2,484	1,613	5,868	2,751	65·	46·8
1895-96 ...	2,637	1,942	6,162	3,160	73	56·2

More schools and candidates competed and were successful in 1895-96 than in any of the previous years. The temporary falling off during 1894-95, owing to exceptional circumstances, has now been retrieved.

The results of the Lower Primary Scholarship Examination show that the number of competing schools rose by 1,150, or 10·2 per cent.; of successful schools by 591, or 7·4 per cent.; of examinees by 3,915, or 10·9 per cent.; and of those who passed the examination by 2,109, or 10·7 per cent. The number of successful Muhammadan candidates has advanced from 3,611 to 3,947, or by 9·3 per cent. The aboriginal races have also shared in the general advancement of the year. The number of night-schools returned is 811, most of these being taught by the teachers of neighbouring day-schools.

23. The Lieutenant Governor has perused with much interest Dr. Martin's remarks on the system, introduced at the end of 1893, of giving a further extension to the village postal system by starting small post-offices at villages where lower primary and other schools were situated. Much success has attended this measure, and the number of post-offices under village school-masters in different parts of the Province is now 596, the great majority of them being attached to middle and primary schools, the school-master receiving from the Postal Department a few rupees monthly for his additional duties. As is not unnatural, difficulties have been encountered here and there at the outset, chiefly arising from complaints that school duties have sometimes been subordinated to postal work. But His Honour notes with satisfaction that the authorities of both departments have cordially co-operated in the promotion of this useful work; and he thoroughly commends the spirit in which the following remarks have, in a recent circular, been penned by Mr Stewart-Wilson, Postmaster-General of Bengal.—

"The Educational and Postal Departments are very closely allied. While the progress of the post-office depends on the spread of education, on the other hand the various facilities which the post-office brings to the door of educated men and women are among the best illustrations of the value of education, and form not the least of incentives to parents to educate their children. The Heads of the Educational Department have both directly and indirectly cordially assisted in the development of the post office. Without their aid such progress as has been made would, in large measure have been impossible. This constant and valued co-operation must be recognised by all postal officers. Each Superintendent and Inspector is bound to do all in his power to smooth over any little difficulties which may arise in connection with the combination of postal and school duties. There is need of much tact and judgment in dealing with the school teachers themselves, as well as in correspondence and interviews with educational officers of every grade. Care must be taken to subordinate postal duties to educational work, to avoid anything at all like bullying, to be liberal in permitting school teachers when going on leave to make their own arrangements as regards their postal *locum tenens*, and to avoid asking for school teachers to be transferred from one place to another for purely postal reasons."

24. The number of training schools for teachers of both sexes was 24 against 26 in the previous year, and the pupils decreased from 1,006 to 966. The Government training schools for masters declined from 15 to 13, owing to the closing of the schools at Purnea and Puri. The number of guru-training classes attached to middle schools and taught by the Head Pandit fell off from 149 to 90, these classes being now maintained in the Presidency and Chota Nagpur Divisions only. The expenditure from Provincial revenues on all these institutions decreased from Rs. 84,068 to Rs. 80,345, and the total expenditure from all sources from Rs. 1,19,572 to Rs. 1,09,187. The average cost to Government of each pupil in the Government training schools increased from Rs. 125·4 to Rs. 130·9, owing to the decrease in the average number on the rolls monthly during the year. The results of the Vernacular Masterhip Examination for pupils of first grade training schools, excluding private candidates (of whom 8 were successful), show 248 as having passed out of 407 candidates; in the previous year 256 (excluding 8 successful private candidates) passed out of 424. Drawing being compulsory for these examinees, all the 248 who obtained certificates as masters, passed in that subject, and five candidates obtained special certificates as teachers of drawing. The Lieutenant-Governor trusts that no efforts will be spared to make the teaching of this subject in training schools thoroughly effective. Those who obtain special certificates as teachers of drawing can be and are very usefully employed in high schools, where they can be entertained at a much lower rate of salary than is given to the more highly qualified candidates trained in the Calcutta school of Art—a class of which the supply is much lower than the demand.

25. The academical qualifications and certificates of previous training possessed by 96 professors in the Government colleges, the 4,084 teachers in the 387 High English schools, and the 12,662 employed in Middle English, Middle Vernacular and Primary schools are shown in the tables appended to paragraphs 73, 91, and 187 of the Director's report. Of the 96 professors, all but 11 possess University degrees, or titles conferred in the Sanskrit or Persian and Arabic Examinations. Of the 4,084 teachers in High schools, 1,411 hold University degrees (including the F.A.), and 1,108 hold no certificates; the rest have passed qualifying examinations of different kinds. In 893 English Middle schools, out of 3,683 teachers, 942 had passed the Entrance or some higher standard of the University, 802 the Vernacular Mastership Examination, 346 the Middle English, and 539 the Middle Vernacular test. Out of 3,264 teachers in Middle Vernacular schools, 155 had passed the University Entrance or higher examination, 1,081 the Vernacular Mastership test, and 1,133 the Middle Vernacular. In 4,120 Upper Primary schools, there are 5,715 teachers, of whom 2,587 had passed the Middle Vernacular test, and 1,343 had passed no test at all. These statistical tables should be continued from year to year, and will, it is hoped, show a regular advance in the number of those who possess University degrees, or have passed other examinations of a qualifying nature.

26. The statistics of the numbers and cost of all institutions, and departments of institutions, teaching law, medicine, or engineering, the Calcutta School of Art, industrial schools, and other schools of a special character, are exhibited in the following table:—

	Number of institutions.	Number of pupils on the rolls on the 31st March 1896	Average monthly roll.	EXPENDITURE—						AVERAGE ANNUAL COST OF EDUCATING EACH PUPIL.	
				From public funds			From private funds			Cost to public funds.	Total cost.

The variations in the numbers of the students of the learned professions and others are as follows:—

Year.	Law	Medicine.	Engineering.	Arts and Industry.	Other special schools	Total.
1	2	3	4	5	6	7
1891-92	563	1,290	661	853	559	3,926
1892-93	488	1,545	764	915	447	4,159
1893-94	509	1,747	933	1,034	586	4,809
1894-95	642	1,784	922	1,065	701	5,114
1895-96	1,114	1,854	944	1,096	442	5,480

The number of Law schools increased by one, owing to the pleadership classes at Chittagong having furnished returns. The pupils increased by 472, which was due to the inclusion for the first time in the returns of students reading for the Pleadership Examination; these returns having formerly been limited to candidates for University degrees in law. The increase was shared by all the colleges, except Hooghly and Berhampore. The increase in the number of students of Medicine, Engineering and Arts and Industry though comparatively small is steady and satisfactory. Of the 348 candidates who appeared at the last examination for the degree of Bachelor of Law, 140 passed, viz., 1 in the first and 139 in the second division. The number of successful candidates was 19, or 38 per cent., from Government colleges, and 121, or 40 per cent., from unaided colleges.

27. The total number of medical institutions increased from 9 to 12, owing to the inclusion in the returns of three new schools in Calcutta. The total number of medical students rose from 1,784 to 1,854. The total strength of the Medical College at the beginning of the session was 511, against 484, 419, 401, and 322 of the four preceding years; and at the end of the session (after the successful students had passed out after finishing their course) 375, against 311, 317, 285 and 255 of the said periods. Under the new rules passed in 1895, 20 students were referred back to the first year, 36 to the second year, 98 to the third year, and 27 to the fifth year.

The numbers attending the Campbell Medical School at Sealdah on the 31st March last were 273 pupils on the rolls, of whom 29 were females. A new lying-in ward having lately been constructed in this hospital, the necessity for female students to attend the Eden Hospital has ceased. The Lady Elliott Hostel for female students was built during the year at a cost of Rs. 1,07,830, on a site adjoining the hospital compound. The management of the hostel has been undertaken by the Bengal Branch of the Countess of Dufferin's Fund. The attendance at the beginning of the session in the Dacca Medical School was 211; but there remained only 197 at its close, of whom 4 were females. There is no dwelling-house or hostel for female students, who live with their relatives in the town. The number of students in the Licentiate class in the Temple Medical School at Patna was 159 at the opening of the session, and 146, including 8 females, at the close. The purchase of a house to serve the purpose of a hostel for the female students of the school was sanctioned during the year. The number of students in the Cuttack Medical School at the opening of the session was 163, and 135 at its close.

28. The Sibpur College consists of three departments, viz., the Engineer Department affiliated to the University, with 106 students, all Hindus except 3 Europeans and 3 Muhammadans; the Apprentice, or Foreman Mechanic Department, with 215 students, of whom 173 were Hindus, 39 Europeans, 3 Muhammadans; and the Artisan Class, with 13 students, 1 being Hindu, 7 Muhammadans and 5 Native Christians. The total strength of the college on the 31st

March last, excluding the Artisan Class and two special students sent by the East Indian Railway Company to learn the chemistry of iron and steel, was 321, against 304 (97 engineers and 207 apprentices) in the previous year. The year under review is the first year since the transfer of the practical training of the students from the Public Works to the Education Department. The transfer has been effected without any break of continuity in the instruction. It appears from the Director's report that the workshops are self supporting. The Mining and Electrical Classes were opened in the year under review. Government has sanctioned Rs. 80,000 for a complete electric installation, including various types of engines, dynamos, cells, &c., for the lighting of the college, and for the thorough training of the students in electrical engineering. The installation will shortly be completed and in working order.

The Lieutenant-Governor attaches the highest value to the maintenance of the Sibpur College in a thorough state of efficiency. The College affords a practical training, which not only puts its students in the way of obtaining profitable employment, but will be of the utmost use in the industrial development of the country. It appears from the Director's report that the work done was of a very varied kind. The manufacture of machine-tools, such as lathes, drilling machines, &c, was continued, and several machines were constructed at the cost of the raw material and the coal. There were also manufactured moulding boxes, moulder's tools, and a cupola for the foundry, a saw-bench, and two boats. The apprentices did a great portion of the carpenter's work involved in the furnishing of the new chemical and physical laboratories. An experimental engine is being fitted up for the sole purpose of valve-setting, which will be compulsory on all students. Experimental electric work was also carried on, and the use and management of dynamos and motors were taught. Instruction was further given in pattern-making, in testing cast-iron bars, in bending and fitting pipes for the gas and water-supply of the College, and in plumber's and other work of minor importance. A practical training of this order, combined with appropriate instruction in the class-room, is a very valuable possession to its recipients. The Lieutenant Governor is glad to learn that all the trained apprentices, whether native or European, find employment without difficulty in engineering firms, in steam companies, in railways and in tea-gardens, and he is not surprised to hear that two out of the last batch of European apprentices, after refusing the appointments guaranteed to the College as third grade overseers in the Railway Branch of the Public Works Department on Rs. 60 a month, subsequently gained employment in private engineering firms in Calcutta on Rs. 150 and Rs. 200 a month, respectively. It is to this College, and to the training therein given, that Sir Alexander Mackenzie looks with confidence as affording one practicable solution, at any rate, to the problem of European education in Bengal, and of providing employment for youths of European extraction. Their inherited aptitude for manual labour makes them peculiarly fitted for such a training as the Sibpur College gives; and Sir Alexander Mackenzie trusts that the false and injurious views, too commonly prevalent among that class, of the superior dignity of clerical over manual labour, will gradually disappear as it is found in which direction their true interests lie. It is satisfactory to learn that the applications for admission to the College, both in the Engineer and in the Apprentice Department, are steadily increasing, though unfortunately about half the number have to be refused for want of accommodation.

An agricultural class will soon be attached to the College. Six technical schools have already been affiliated to it and more will, it is hoped, as time goes on, be added, which will be able to act as feeders to it. Sir Alexander Mackenzie hopes that this is only the beginning of a great movement in favour of technical and scientific education which he will do all that lies in his power to foster and promote.

29. At the three Government Survey Schools at Dacca, Patna and Cuttack the total cost for 621 pupils (average monthly roll number) is Rs. 18,200, of which Rs. 10,811 are recovered from fees and fines, so that each pupil costs Rs. 29 on an average, of which Rs. 11 were debited to public funds. Practical training receives much attention at the Dacca Survey School, especially in cadastral survey with

plane-tables. Cadastral survey maps were prepared by the pupils for the whole tract of about 100 square miles surveyed. Captain Crichton, Superintendent of Settlement Surveys, inspected the work of the pupils in camp and expressed a high opinion of its thoroughness and accuracy.

The question of extending the usefulness of the different survey schools, and of the more direct attachment of these schools to Government offices, which was referred to in paragraph 29 of the last year's report, was settled after the close of the year under report.

30. The number of students on the rolls in the Government School of

School of Art.

Art was 273, against 270 in the preceding year.

The fee receipts came to Rs. 6,255 against Rs. 6,375; the total expenditure fell from Rs. 31,785 to Rs. 25,858, of which Rs. 6,255 were defrayed by fees and fines; and the average cost of each pupil was Rs. 101, of which Rs. 76 were paid from public funds. The character of the work done at the school is the same as the last year. The school appears to have obtained a worthy successor to the late Superintendent in Mr. E. B. Havell, formerly of the Madras School of Art.

31. The number of industrial schools remained nearly the same as in the last

Industrial Schools.

year. Those under public management decreased by two. The Board industrial schools declined

from 8 to 7, while the aided schools increased from 11 to 14. The number of unaided industrial schools (6) remained the same as in the preceding year.

Female Education.

32. The following table gives the main statistics of female education:—

CLASS OF SCHOOLS.	Number of schools.	Number on the rolls on the 31st March 1896.	Average monthly roll number.	Average daily attendance.	EXPENDITURE.					TOTAL.
					From public funds.			From private funds.		
					Provincial revenues.	District funds.	Municipal funds.	Fees.	Other sources.	
1	2	3	4	5	6	7	8	9	10	11
Managed by Government	2	251	240	179	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Done by District or Municipal Boards	3	139	134	76	"	...	835	3,200	395	26,207
Aided by Government or by District or Municipal Boards	3,80.	57,380	55,424	40,343	67,790	41,004	10,990	29,446	1,80,908	2,29,747
Unaided	646	8,195	7,672	5,858	1,595	10,537	12,495
Total for 1894-95 ..	5,858	65,974	61,444	46,460	90,511	41,004	11,825	33,008	1,97,980	2,79,409
					1,43,940			2,37,438		
Total for 1894-95 ..	5,858	64,567	59,608	45,096	97,931	37,130	11,821	34,908	2,33,051	4,06,476
					1,46,682			2,36,796		
Total for 1895-96	1,39,786			2,46,708		2,26,499
Total for 1895-96	1,55,706			2,16,027		2,31,736
Total for 1891-92	1,51,068			2,35,976		2,56,049

Besides the girls shown in this table, there are also 36,616 girls in boys' schools, against 37,553 in 1894-95, being a decrease of 937. The net result of the year is a gain of 140 schools and of 470 pupils, including the girls in boys' schools. The expenditure from public funds decreased from Rs. 1,46,682 to Rs. 143,940, while there was an increase in the expenditure under both District and Municipal funds. The decrease in the expenditure from Provincial revenues took place mainly in Calcutta and its neighbourhood; most of the girls' schools in these localities came under the operation of the revised rules for grants-in-aid, the effect of which was a saving of Rs. 9,530. The Bethune School sent up and passed three girls at the last Entrance Examination, one in the first division and two in the second. Mrs. Wheeler examined 154 schools (76 in Calcutta, 78 out of Calcutta), with 3,442 pupils, of whom 2,786 passed the examination. Regarding the question of unifying the standards

for girls' examinations over the whole Province referred to in paragraph 32 of the Government Resolution for 1894-95, Dr. Martin writes as follows:—

"On this subject I may be permitted to state that for many years to come it will be impossible to have *uniform* standards for the whole Province, since the lack of female teachers in the mufassal will act as an effectual bar to the introduction of the Calcutta or similar standards into the district schools. All that can be done at present is to attempt as far as possible to *approach* the standards which are regarded as best suited for girls' schools. In the Burdwan Division I have arranged that the Uttarpara Hitakari Sabha shall give up their former courses of study, and conform, as nearly as circumstances will permit, to the Calcutta standards. It must also be remembered that a large number of the girls at school are reading in boys' schools, and that if they are to read any departmental standards, these must be the standards fixed for boys' schools except in such places where facilities for teaching the alternative subjects may be procurable. The Calcutta standards will be regarded as the model standards, and attempts will be made year by year to approach to them more and more nearly. As regards 'a special system of scholarships,' I am personally in favour of a system of *prizes* to be given to the most successful girls, as it is so often the case that, owing to the customs of the country, scholarships earned are very frequently not taken up. A Rs. 20 prize would, I believe, be in most cases preferred to a scholarship of Re. 1-8 a month tenable for two years, since in the majority of instances female scholarship-holders are taken away from school long before the tenure of the scholarship has ceased, and the greater portion of the stipend is thus forfeited."

With regard to the unification of different standards, the Lieutenant-Governor accepts the above provisional solution of an admitted difficulty. With regard to the establishment of prizes instead of scholarships, definite proposals are awaited.

33. The total number of schools rose from 76 in 1894-95 to 78 in 1895-96. The total number of scholars attending these schools rose from 7,640 to 7,721. The following table for the decennial period is of interest:—

YEAR.	1887.	1888.	1889.	1890.	1891.	1892.	1893.	1894.	1895.	1896.
1	2	3	4	5	6	7	8	9	10	11
Number of pupils	6,391	6,541	6,682	6,710	6,820	7,098	7,444	7,777	7,640	7,721

The Government Boarding School at Kurseong had 101 students on 31st March 1896, against 96 on 31st March 1895.. The cost to Government for the maintenance of this school was Rs. 15,055, giving an average of Rs. 149 for each scholar. The corresponding figures for 1894-95 were Rs. 13,988 and Rs. 131. The new building at Kurseong, designed to accommodate 200 pupils, is on the point of completion. The 31 schools under Roman Catholic management afforded education to 4,083, and the 16 Church of England schools to 1,682 scholars, out of the 7,721 above mentioned, the remainder belonging to other denominations. The total cost of European education was Rs. 11,00,452, of which Government paid Rs. 1,97,152. The number of candidates from European schools for the University Entrance Examination was 119 against 117 in the previous year, and the number of successful candidates was 69 against 79. Of this number, 4 pupils gained scholarships against 3 last year. The percentage of successful candidates was 57.9 against 67.5 the year before. The Lieutenant-Governor notices with regret that there was a falling off in the number of efficient volunteer cadets, and hopes that there will be improvement in this respect during the present year.

The new Code for European Schools was revised in March 1896 by a Committee appointed for that purpose by the Government of India. A Resolution on the report has been issued by the Government of India since the close of the year under review.

Mr. H. A. Bamford was Inspector of European Schools throughout the year. He was on tour for 63 days, travelled 1,344 miles, and paid 152 visits to schools.

Muhammadian Education.

34. The total number of Muhammadian pupils varied during the last five years as follows:—

1891-92	448,847
1892-93	447,495
1893-94	446,130
1894-95	480,333
1895-96	494,294

The above shows an increase of 4,961 Muhamnadans attending all classes of schools. The number of Muhammadian pupils in public institutions advanced from 397,879 to 404,652, or by 6,773, while in private institutions it fell from 91,454 to 89,642, or by 1,812, but the percentage of Muhamnadan pupils on the total number at school fell slightly from 29·8 to 29·5. It is, however, gratifying to find that this community is represented by a greater number and a greater percentage of the whole number of students in the Arts colleges and High English schools than last year. An increase in this respect was observable in the previous year also. The number of Muhamnadan candidates successful at the University examinations for the last five years is compared in the following statement.—

	1891-92	1892-93.	1893-94	1894-95.	1895-96.
1	2	3	4	5	6
Entrance	85	172	134	153	141
First Arts	47	35	31	59	51
Bachelor of Arts	11	23	26	17	18
Master of Arts	2	2	...	5	4

The Lieutenant-Governor regrets to find that the improvement at the University Examinations does not as yet keep pace with the increase in the number of Muhammadian students attending colleges and high schools. The fluctuations in the success in other examinations hardly require special notice. It may, however, be mentioned that the number of successful Upper Primary candidates has advanced from 685 to 1,035, or by over 50 per cent.

In the general results of the common examination of Madrassas for the last two years (for which the papers were set by a Central Board), 146 candidates out of 281 passed this year, as compared with 169 out of 252 last year. These figures show that satisfactory progress was made during the year under report. The number of pupils in the Arabic Department of the Calcutta Madrassa advanced from 373 to 435. There were also 48 students in the College Department who attended lectures in the Presidency College, 311 in the Anglo-Persian Department, and 228 in the Collinga Branch School; 1,022 in all against 957 in the preceding year. The attendance in the English classes of the Arabic Department is voluntary, and only 77 students, against 163 in the previous year, availed themselves of the English instruction thus given. The Dacca Madrassa had on its rolls on the 31st March 1896, 429 pupils against 439 in the previous year; the Chittagong Madrassa, which is the largest of the Madrassas outside Calcutta, had on its rolls 669 against 624, in the previous year. There was little change in the number attending the Hooghly, Rajshahi, and Nawab of Murshidabad's Madrassas. The Cox's Bazar Madrassa was amalgamated with the local Middle English School. The total number of pupils in the Madrassas under Government management was 1,695 in 1896 against 1,617 in 1895. The total receipts and expenditure were Rs. 26,149 and Rs. 54,638, respectively, against Rs. 30,881 and Rs. 62,772, respectively, in 1895.

35. The number of pupils of aboriginal races was 38,971 in the year under report against 35,044 in 1895, showing an increase of 3,887 pupils, of whom 886 were Christians and 3,001 non-Christians. This increase is shared, more or less, by all classes of schools,

Education of Aborigines.

except Middle English and Middle Vernacular schools, where there was a loss of 218 and 43 pupils, respectively. Of the 38,971 pupils shown under instruction, 3,963 came from the Burdwan Division, 130 from the Presidency Division, 193 from Calcutta, 674 from Rajshahi; 1,095 from Dacca, 685 from Chittagong, 379 from Patna, 6,514 from Bhagalpur, 896 from Orissa, 1,429 from the Orissa Tributary Mahals, and 23,013 from Chota Nagpur. The five Missions in Chota Nagpur maintained 188 schools against 182 in 1894-95, with 5,406 pupils against 4,903 in 1894-95. The total expenditure on these schools was Rs. 47,222 in 1895-96 against Rs. 43,726 in the preceding year. The elementary schools near Giridih for the children of minors advanced from 33 to 34, but the pupils declined from 1,404 to 1,355. This loss is attributed to the migration of workmen to new collieries in search of higher wages. The schools are supervised by a Committee, and the cost of these schools during the year was Rs. 2,769, of which the share borne by the State was Rs. 1,359. Two aboriginal pupils passed the Entrance Examination in 1896 against 3 in the previous year, and 503 pupils of these races passed other departmental examinations, as compared with 518 in the previous year.

36. This section of the Report treats of private institutions, namely, institutions which do not conform to any particular departmental standard, but adhere to the indigenous modes of teaching. They include elementary schools for reading and writing, Sanskrit *shals*, and maktabas for teaching the Koran or Arabic and Persian. The figures for the last five years are as follows:—

	1891-92.	1892-93.	1893-94.	1894-95.	1895-96
1	2	3	4	5	6
Schools ..	13,868	13,473	13,602	13,941	13,744
Pupils ...	139,564	134,989	135,530	140,360	139,192

The above table shows a decline of 197 schools and 1,163 pupils.

37. The Sanskrit *shals* decreased by 23, but their pupils increased by 16. The total outlay during the year from Provincial revenues for the encouragement of Sanskrit learning in *shals* amounted to Rs. 24,913 against Rs. 17,998 in the previous year; the Government grant for the encouragement and improvement of these institutions having been increased from Rs. 18,000 to Rs. 25,000. At the Sanskrit first examination 408 passed in 1895 and 412 in 1896 at the second examination 196 passed in 1895, and 207 in the year under report.

38. The Central Text Book Committee now consists of 20 members, with the Hon'ble Mr. Justice Gurus Das Bannerjee as President, and the Inspector of Schools, P. C. Honey Cane, as *ex-officio* member and Secretary. All the members, with two exceptions, are Fellows of the University of Calcutta. The Committee received for examination during the year 250 books on different subjects. Of these, 99 were approved for various purposes, 98 were rejected, and upon the rest judgment had not been pronounced. The Committee undertook during the year the work of revising the authorised list of text-books, which is reported to have made good progress. Their task is, the Director reports, an arduous and thankless one, and is performed with assiduity and care. Besides the Central Committee sitting at Calcutta, there are Branch Committees for Bihar and Orissa. The Patna Branch Committee consists of 35 members, official and non official, and received 70 books for examination. The Orissa Branch Committee consists of 16 members, of whom 5 belong to the Education Department. Nine books were sent to them for examination; of these, 3 were rejected, 1 was approved, 1 was returned for revision, and 4 were still under examination at the close of the year.

29. Sir Alfred Croft has for many years been Head of the very important Department of Public Instruction in Bengal, and has managed it with great and conspicuous success, which was fully maintained during the year under report. His eminent services to the cause of education have been frequently acknowledged by successive Lieutenant Governors, and Sir Alexander Mackenzie will, on the present occasion, only say that he cordially endorses the encomiums bestowed on the Director by previous Governments, and regrets greatly that Bengal is so soon to lose him. The thanks of Government are due to Dr. C. A. Martin for the excellent report submitted by him, and to the Principals, Professors, Inspectors, Assistant Inspectors, and other officers specially mentioned in the report.

By order of the Lieutenant Governor of Bengal,

M. FINUCANE,

Secretary to the Government of Bengal.

STOCKS OF RICE IN AND AROUND CALCUTTA.

No 1029 *Stats.*—The following is published for general information.

M. FINUCANE,
Secy. to the Govt. of Bengal.

Statement showing the Stocks of Rice in and around Calcutta during December 1896.

M. FINUCANE,
Secy. to the Govt. of Bengal.

STATISTICAL DEPARTMENT.
The 21st December 1896

STATISTICS OF THE SEA-BORNE TRAFFIC OF CALCUTTA IN FOOD-GRAINS.

No 1028 Statistics.—The following memorandum and statements are published for general information.

STATISTICAL DEPARTMENT,
The 21st December 1896.

M. FINUCANE,
Secy. to the Govt. of Bengal.

Memorandum.

In the following statement the food-grain traffic of Calcutta carried by sea during the week ending the 7th December 1896 is compared with figures of the corresponding period of 1895:—

	1ST TO 7TH DECEMBER			
	1895		1896.	
1	2	3	4	5
	Cwts	Mds.	Cwts	Mds
<i>Imports</i>				
From Foreign Ports ...	3	4
„ Indian „ ...	3,326	4,527	31,279	42,574
Total ..	3,329	4,531	31,279	42,574
<i>Exports</i>				
To Foreign Ports ..	177,731	2,41,911	71,969	97,958
„ Indian „ ...	30,635	41,766	14,282	19,439
Total ...	208,416	2,83,677	86,251	1,17,397

Imports—The foregoing figures show a considerable advance of 839.57 per-cent in the import trade, due chiefly to heavy consignments of rice, as the following statement will show —

	1ST TO 7TH DECEMBER			
	1895		1896.	
1	2	3	4	5
	Cwts.	Mds.	Cwts.	Mds.
<i>Food-grains.</i>				
Rice	2,400	3,267	21,247	38,003
Paddy	929	1,264	4,069	5,538
Wheat
Gram and pulses	2,963	4,033
Other food-grains, such as jowar, barley, oats, &c
Total ..	3,329	4,531	31,279	42,574

The ports of Chandbali and Balasore continued to be the largest contributors. The total quantity of rice received from these ports jointly amounted to 18,219 cwts, against 2,397 cwts. in 1895, and that of paddy to 4,069 cwts. as compared with only 929 cwts. in the preceding year. Burma contributed 6,027 cwts. of rice; in 1895 nothing was received from there. Gram and pulses were for the most part obtained from Madras and Chandbali, against nil in the preceding year.

Exports—During the week under report the falling off in the exports to foreign ports was 59.51 per cent, and to Indian ports 53.45 per cent. The total traffic under each kind of grain is shown below and compared with the figures for the previous year.

1	1st to 7th DECEMBER			
	1895		1896.	
	2	3	4	5
	Cwts	Mds	Cwts	Mds.
<i>Food grains</i>				
Rice	169,837	2,31,167	72,678	9,923
Paddy	3,163	4,305	22	30
Wheat	30,586	41,631	371	509
Gram and pulses	4,830	6,674	8,983	12,827
Other food-grains, such as jowar, barley, oats, &c			4,197	5,712
Total ..	208,416	2,83,677	86,251	1,17,497

In the case of rice, the largest decrease is shown against Ceylon, which received 5,234 cwts, against 100,071 cwts in the previous year, and then the United Kingdom which received 6,030 cwts against 25,158 cwts in the preceding year. Among other importing ports, Reunion is credited with 17,782 cwts, against nil in the preceding year, while shipments to Cape Town showed an advance of 4,565 cwts. Of the Indian ports, the largest increase is shown under Bombay, and the largest decrease under Calcutta. As regards gram and pulses, the falling off to foreign ports is attributed to short shipments to Mauritius (6,592 cwts) and the United Kingdom (2,730 cwts), while to Madras shipments fell off from 13,088 cwts to only 681 cwts.

Detailed statements showing the sources of supply and the places of destination, both as regards Foreign and Indian ports, are given below—

Statement No. I showing the Imports of Food-grains into Calcutta from Foreign and Indian Ports from the 1st to 7th December, 1895 and 1896 (both days inclusive).

17. Babu Bijay Chandra Banerjee, of Shazadpur, Rs. 500, for masonry wells

their liberality and public spirit. His Honour hopes that in this season of high prices and impending distress the example set by these ladies and gentlemen of Pabna will be largely followed.

3. The correspondence will be published in the *Calcutta Gazette*.

the 8th December 1896, bringing to notice the liberality of the ladies and gentlemen of the district of Pabna named in the margin, who have made donations for beneficent objects and works of improvement in that district with the object of commemorating His Honour the Lieutenant-Governor's visit in July last.

2. In reply, I am desired to request that you will be so good as to convey to the donors an expression of the Lieutenant-Governor's thanks for

No 125P W, dated Jalpaiguri, the 8th December 1896

From—P NORTON, Esq, Commissioner of the Rajshahi Division,
To—The Chief Secretary to the Government of Bengal

At the suggestion of the Collector of Pabna, I have the honour to report that the following subscriptions have been made and works undertaken in that district with the object of commemorating His Honour's visit in July last.—

- I.—Rai Bonomali Roy Bahadur, Rs. 1,000 to the Lady Dufferin Fund, and Rs. 4,000 for the excavation of four tanks in Ullapara and Raiganj thanas. Rupees 1,000 have already been sent to the Lady Dufferin Fund, and sites have been fixed for the excavation of the tanks
- II.—Babu Sarat Chandra Chowdhuri, of Parsadanga, Rs. 15,000, for a tank in Pabna bazar. Rupees 5,000 have already been deposited for land acquisition proceedings, which are in hand
- III.—Srimati Krishna Kumari Chowdhurani, of Taras, Rs. 6,000, for founding a scholarship
- IV.—Srimati Sati Mukhi Chowdhurani, of Poyda, Rs. 4,000, for the re-excavation of a large tank at Poyda. This work will soon be commenced.
- V.—Chowdhuri Fasi Uddin and brothers, of Pabna, Rs. 2,000, for the construction of a Muhammadan boarding-house in connection with the Pabna zilla school. This sum has already been deposited.
- VI.—Raphikonnessa and Fukarennessa Chowdhuranis, of Pabna, Rs. 2,000, for a new tank in north-west of Pabna town. Land acquisition proceedings are in progress for this
- VII.—Babu Tarak Nath Pramanik, Rs. 2,000, for the re excavation of a large tank in the Pabna bazar, known as Amir Khan's tank.

- VIII.—Babu Hara Sundar Mazumdar, of Pengua, Rs. 2,000, for excavation of a tank at Pengua. Land acquisition proceedings have commenced.
- IX.—Babu Jogesh Prasanna Bhaduri, of Porjana, Rs. 1,000, for the excavation of a tank and the opening of a dispensary at Porjana. The site of the tank has been fixed.
- X.—Babu Durga Sundar Roy, of Haturia, Rs. 1,500, for the excavation of a tank in his village.
- XI.—Babu Robindra Nath Tagore, of Shazadpur, Rs. 1,000, for the excavation of masonry wells in his zamindari.
- XII.—Babu Sri Gobinda Chowdhuri, Rs. 1,000, for completion of a Natmandir of the Pabna Kahbari, and Rs. 300 to the Public Library.
- XIII.—Babu Bhobani Charan Chowdhuri, of Haripur, Rs. 1,000, for the re-excavation of a tank.
- XIV.—A. Chowdhuri, Esq., of Haripur, Rs. 800, for a Sanskrit tol-house.
- XV.—Babu Durga Kanta Chakrabarti, of Saidabad, Rs. 500, for the re-excavation of a tank in his village.
- XVI.—Babu Jnanoda Gobinda Chowdhuri, Rs. 200, to the Public Library.
- XVII.—Babu Bijoy Chandra Banerjee, of Shazadpur, Rs. 500, for masonry wells.

2. I request that the charitable gifts may be suitably acknowledged. It is desirable at the present season of scarcity to offer every encouragement to the liberality of the zamindars.

WEATHER AND CROP REPORT.

For the week ending the 21st December, 1896.

Burdwan.—Rainfall nil. Weather clear and cool. *Aman* harvest finished in parts of the district. Prospects of *rabi* crops fair except in Raniganj, where rain is required. Fodder and water sufficient at present. A few cases of cattle-disease reported. Common rice selling as follows:—

			Srs. o	Srs. c.	
Sadar	10	0 to 12	0
Kalna	9	8 to 10	0
Katwa	11	2 to 12	3
Raniganj	10	8

} per rupee.

Birbhum.—No rain. Weather fine and cold. Rice selling at 9½ to 12 seers per rupee.

Bankura.—No rain. Weather seasonably cold. Harvesting of *aman* still in progress. Prospects of *rabi* crops gloomy. Fodder and water sufficient except in portions of thanas Gangajalghati and Onda. Sporadic cases of cow-pox continue in Gangajalghati and Onda. Rice selling at Bankura 12 seers and Vishnupur 11½ seers per rupee.

Midnapore.—No rain. Harvesting of *aman* paddy continues. Prospects of *rabi* linseed, pulses, &c., are moderate, and of sugarcane and indigo good. Fodder and water sufficient. Cattle-disease reported from Naraingarh, Keshpur, and Garhbata. Common rice selling as follows:—

			Srs.	
Sadar	9 to 10	
Contai	12 to 15	
Tamluk	9 to 10½	
Ghatal	11½ to 12½	

} per rupee.

Hooghly.—No rain. *Rabi* crops and sugarcane are suffering for want of rain. Harvesting of *aman* continues. Common rice sells from 8 to 10 seers per rupee.

Howrah.—Rainfall nil. Weather seasonable. Rain wanted for *rabi* crops. Harvesting of *aman* paddy progressing. Fodder and water sufficient. Common rice sells from 8 to 10½ seers per rupee.

24-Parganas.—Rainfall nil. Cold weather has set in. Harvesting of *aman* paddy continues. It is estimated to yield 10½ annas. *Rabi* crops suffering for want of rain; prospects unfavourable. No cattle-disease. Fodder and water sufficient. Common rice (new) sells as follows:—

			Srs.	
Sadar	9 to 12	
Barasat	10	
Basirhat	10	
Diamond Harbour	11	

} per rupee.

Nadia.—No rain. Weather seasonable. Harvesting of *aman* continues. *Rabi* crops suffering for want of rain. Prospects of *til*, sugarcane, and *kala* are good in the Kushtia subdivision. *Mug*, *kala*, and *arhar* are still being gathered in the Meherpur subdivision. Common rice sells from 8 to 11 seers per rupee. Latest price of rice where test-works are open is 11 seers per rupee. Numbers attending test-works are as follows:—

14th "	485
15th "	577
16th "	695
17th "	751
18th "	777

Murshidabad.—No rain. Weather cold. Harvesting of *aman* continues. State of *rabi* crops not good; that of sugarcane, indigo, and mulberry appears to be good. Fodder sufficient. Common rice sells as follows:—

			Srs. c.	
Sadar	10	0
Jangipur	11	0
Kandi	11	8

} per rupee.

Jessore.—No rain. Weather seasonable. Harvesting of *aman* continues. Rain is urgently needed for *rabi* crops. Fodder and water available. No cattle-disease. Common rice sells as follows :—

				Srs.	c	
Jessore	9 to 10	0	} per rupee.
Jhenida	9	0	
Magura	9 to 10	0	
Narail	11	6	
Bongaon	10	0	

Khulna.—Rainfall nil. Weather fine. *Aman* paddy is being harvested; the crop is considerably below the average. No cattle-disease. Fodder and water available. Common rice sells as follows :—

				Srs.	
Khulna	8 to 10	} per rupee.
Bagerhat	12	
Satkhira	8	

Wages calculated at 9½ seers for staple food-grain. Numbers on test relief-works in the Satkhira subdivision—

9th December	176
10th "	...	"	"	"	118
11th "	"	...	117
12th "	"	...	129
13th "	75
14th "	...	"	71
15th "	"	66
16th "	90
17th "	108
18th "	...	"	129

Rajshahi.—No rain. Harvesting of winter rice in full progress. *Rabi* crops suffering for want of rain. No cattle-disease. Fodder and water available. Price of common rice ranges from 7 to 11½ seers per rupee.

Dinajpur.—No rain. Weather seasonable. Mustard is in flower in some places. Harvesting of winter rice still going on. Fodder and water sufficient. Common rice sells from 9 to 10 seers per rupee.

Jalpaiguri.—Rainfall nil. Weather cold. Harvesting of *haimanti* paddy going on. Sowing of *rabi* crops finished and standing *rabi* crops are doing well. No complaint of want of fodder and water. Average price of common rice 8½ seers per rupee.

Darjeeling.—Rainfall nil. Weather seasonable. Hills—*Bura muru* and *kalai* are being harvested, wheat, barley, and mustard are progressing favourably; *phaphur* ripening. Terai—Harvesting of *aghni* paddy going on, mustard in flower; *kalai* and tobacco doing well. Coarse rice selling :—

				Srs.	
Hills	8	} per rupee.
Terai	10	

Bhutia sells at 13 seers per rupee.

Rangpur.—No rain. Harvesting of *aman* progressing. Mustard in flower. Prospects fair. Fodder and water sufficient. Common rice selling at 8 to 10½ seers per rupee.

Bogra.—Rainfall nil. Weather clear and cold. Winter rice being harvested in the *pah* tracts. Ploughing for *aus* and jute cultivation in progress. Oilseeds and pulses doing well. Fodder and water sufficient. Common rice sells at head-quarters 10 seers 2 chitaks, and in the interior from 9 to 12 seers per rupee.

Pabna.—No rain. Prospects of *rabi* crops very fair except wheat, barley, gram and peas. Sugarcane, *ashar*, and *lul* are good. Water-supply very deficient. Fodder plentiful. Price of common rice 8 to 9½ seers per rupee.

Dacca.—Rainfall nil. Weather seasonable. Harvesting of *aman* nearly finished. Prospects continue unchanged. Fodder available. No cattle-disease. Common rice sells from 8 to 10 seers per rupee.

Mymensingh.—Rainfall nil. Weather fairly cold. Harvesting of *aman* progressing. *Rabi* crops doing well. Scarcity of water felt in some places. Common rice sells at 9 to 10 seers per rupee.

Faridpur.—No rain. Weather seasonable. Prospects slightly improved. Rain badly wanted for the *rabi* crops. Fodder and water available. Common rice selling from 8 to 11 seers per rupee.

Backergunge.—Rainfall nil. Weather clear. *Aman* harvest going on. Prospects of standing crops very fair. No cattle-disease. Prices of common rice—new *aman* 10 to 12 seers, old rice 7½ to 9 seers 3 chitaks, *aus* rice 9 to 13 seers per rupee.

Tippera.—No rain. Harvesting of *aman* and sowing of *rabi* nearly completed. Transplanting of *boro* going on. Fodder and water sufficient. Common rice sold at from 8 to 12 seers a rupee.

Noakhali.—No rain. Reaping of *aman* continues. Prospects not favourable. No cattle-disease. Fodder and water available. Price of rice ranges from 8 to 12 seers per rupee.

Chittagong.—Rainfall nil. Weather cold. *Aman* being reaped. *Rabi* crops suffering for want of rain. Prospects poor. Water and fodder sufficient. Rice selling at 8 to 10 seers per rupee.

Patna.—Paddy is being reaped. *Rabi* crops doing well. *Arhar*, gram, *khesari*, peas, mustard and wheat in flower. Sugarcane pressing continues. Poppy prospects favourable. Fodder and water for cattle sufficient. Green fodder scarce in Bihar. Prices stationary. Common rice (new) selling in Patna to-day (21st) at 10½ seers per rupee. Only two test-works are now open.

Gaya.—Harvesting of *agham* paddy nearly finished; outturn 8 annas. *Rabi* prospects good. Price of common rice 10 seers per rupee.

Shahabad.—No rain. *Aghani* harvest still in progress. *Rabi* sowings nearly over. Prospects so far good. Fodder for cattle sufficient. Prices are—common rice 9½ seers, pea 11 seers, *kharao* 13 seers per rupee. Numbers on relief-works on Saturday, 19th—men 287, women 270, and children 153.

Saran.—*Rabi* doing well in irrigated tracts. Poppy growing fairly. Sugarcane drying up fast in parts of the Siwan subdivision. Price of *maku* 11 seers 10 chitaks per rupee. Numbers on relief-works on Saturday, 19th—men 464, women 700, and children 683—total 1,852, gratuitous relief—men 77, women 170, and children 43—total 290.

Champanan.—No rain. Winter rice harvest approaching completion. *Rabi* and poppy sowings about over and coming on fairly well. Prices again risen. Common rice sells at 9½ seers, against average of 17½ seers per rupee. Staple food (maize) sells at 10½ seers per rupee. Numbers on relief-works on 19th—men 8,757, women 7,125, and children 4,763—total 20,645, gratuitously relieved—men 277, women 602, and children 299—total 1,178.

Muzaffarpur.—Prospects so far fair. Prices are—common rice 8 seers, wheat 8 seers, *maku* 11 seers, barley 11 seers, *arhar* 12 seers. *Maku* and *arhar* fix the relief price.

Darbhauga.—Harvesting of paddy approaches completion. Threshing in progress. Rain wanted for *rabi*. *Rahar* and mustard flourishing. Common rice selling at 9 seers per rupee. Numbers on relief-works on Saturday, 19th—men 2,430, women 1,708, and children 1,090—total 5,228, gratuitous relief—men 971, women 1,547, and children 790—total 3,308.

Monghyr.—No rain. Weather cold. Standing crops doing well. Paddy harvesting continues. *Rabi* crops want rain. Weeding of *rabi* commenced. Sugarcane doing well and pressing going on. Cattle-disease reported from Begusarai. Sufficient fodder and water. Prices fallen slightly. Common rice sells as follows—

				Srs.	} per rupee.
Monghyr	8 to 10	
Begusarai	10	
Jamui	10 to 11	

Bhagalpur.—Weather cold and bracing with westerly wind. Harvesting of paddy continues; estimate of outturn varies from 6 annas in Madhipura to 10 annas in Banka. *Rabi* crops are being damaged by insects. Water and fodder sufficient. Common rice sells as follows:—

				Srs. c.	} per rupee.
Sadar	10 12	
Banka	11 14	
Madhipura	10 0	
Supaul	11 0	

Purnea.—No rain. Harvesting of *agham* paddy in progress. Sowing of *rabi*, tobacco, and mustard continues. No cattle-disease. Fodder and water sufficient. Prices of common rice—

				Srs.	} per rupee.
Sadar	11	
Araria	11	
Kishanganj	10	

Malda.—Harvesting of paddy in full swing; 8 to 9-anna crop expected. Mustard promises a 12-anna crop, *kulm* a 12-anna crop, mulberry a 16-anna crop. *Rabi* crops very poor. Fodder sufficient. Coarse rice selling at 9 to 12 seers a rupee.

Sonthal Parganas.—Weather continues fine and colder. Dews insufficient. No signs of rain. Harvesting of winter rice going on. The prospect of *rabi* crops is worse. Cattle-disease still prevalent in Pakour. Price of common rice 9 to 12 seers, and of maize 12 to 14 seers per rupee.

Cuttack.—Rainfall nil. Weather seasonable. Harvesting of *sarab* continues. Condition of cattle generally good. Fodder sufficient. Food-grains generally procurable in small quantities. Common rice sells as under:—

			Sis o	
Cuttack	...	New rice	12 8	} per rupee
Jajpur	14 7	
Khudiapara	14 7	
Banki	...	New rice,	17 11	

Balasore.—Weather seasonable. No special change in prospect or condition of crops. Harvesting of winter rice going on. *Rabi* crops suffering for want of rain. *Dalua* being sown. Sugarcane doing well and pressing commenced. Coarse rice sells at 13 and 15 seers per rupee at Sadar and Bhadrak respectively. In the *mula-sa* prices vary from 12 to 18 seers per rupee. Fodder and water sufficient. Outbreak of cattle-disease in a few villages, but not of an epidemic or serious nature.

Angul.—Rice crops off the ground, outturn as previously reported. *Kulthi*, mustard, and *mug* promise well, but a limited area has been cultivated. Rice sells at Angul 20 seers and at Khoudimala 19 seers per rupee.

Puri.—No rain. Condition and prospects of rice crops much as before and of *rabi* crops also as before. Fodder sufficient. Price of common rice varies from 11 seers 13 chutaks to 15 seers 12 chutaks per rupee.

Hazaribagh.—No rain. Poppy fields are being irrigated. Outturn of paddy 4 to 8 annas. Prices of food-grains stationary.

Lohardaga.—Reaping of *don dhan* finished. Rice sells at head-quarters 10 to 11 seers, and in the interior 11 to 12 seers per rupee. Fodder and water sufficient. No report of cattle-disease.

Palamanu.—Rainfall nil. Weather seasonable. Prospects much the same as before. Rice selling at 8 to 10 seers per rupee. Fodder-supply already poor in Husanabad thana.

Manbhum.—No rain. Weather cold. Rice crop almost all cut. *Rabi* such as sown poor generally, but fair in places. Cattle disease reported from thana Raghunathpur. Fodder and water sufficient for the present. There is likely to be scarcity of water shortly. Price of common rice (old) 8 seers and (new) 11 seers per rupee at Sadar, and (old) 8½ seers and (new) 10½ seers per rupee at Gobindpur. Stock of food-grains sufficient at present.

Singhbhum.—Weather colder. No change to report.

General Summary.—There was no rain during the week. The harvesting of winter rice is proceeding, and is approaching completion in some districts. The outturn of winter rice as finally estimated is 7½ annas for the Province as a whole. Prospects of the *rabi* crops in some districts of the Patna and Rajshahi Divisions are so far fair, though more rain is of course wanted, but generally throughout the Province they are poor. In Bihar the prospects of the poppy crop are satisfactory. The pressing of sugarcane is going on in some districts. Cattle disease is reported from a few localities in Burdwan, Bankura, Malnapore, Monghyr, Sonthal Parganas, Balasore, and Manbhum. Prices continue high. In the distressed districts the prices of staple food-grains are—Nadua (common rice) 11 seers, Khulna (common rice) 9½ seers, Patna (common rice) 10½ seers, Shahabad (common rice) 9½ seers, Saran (Indian-corn) 11 seers 10 chutaks, Champaran (Indian-corn) 10½ seers, Muzaffarpur (Indian-corn) 11 seers, Darbhanga (common rice) 9 seers. The numbers on relief-works and in receipt of gratuitous relief on Saturday, the 19th December, were—

Relief-works—

Nadua (18th December),	...	777
Khulna (18th December),	..	129
Shahabad	..	710 (men 237, women 270, and children 153)
Saran	..	1,852 (men 464, women 700, and children 688).
Champaran	..	20,645 (men 8,757, women 7,125, and children 4,763).
Darbhanga	..	5,228 (men 2,130, women 1,703, and children 1,090)

Gratuitous relief—

Saran	...	290 (men 77, women 170, and children 43).
Champaran	...	1,178 (men 277, women 602, and children 299).
Darbhanga	...	3,308 (men 971, women 1,547, and children 790).

Only two test-works are now open in Patna.

By order of the Lieutenant-Governor of Bengal,

REVENUE DEPARTMENT,

The 22nd December, 1896.

M. FINUCANE,

Secy. to the Govt. of Bengal.

The mean pressure of the seven days	Inches.
The average pressure of the corresponding period for 24 years, Surveyor-General's Office	30.039
The total number of hours of bright sunshine	Hours.
The maximum possible number of hours of sunshine	53.5
				75.0
The mean temperature of the seven days	63.8
The average temperature of the corresponding period for 24 years, Surveyor-General's Office	67.5
The extreme variation of temperature	27.1
The maximum temperature	76.8
The highest velocity of the wind in one hour	Miles.
				8
The mean relative humidity	%
The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office	65
				71
The total fall of rain from 13th to 19th December 1896	Inches.
The average fall of the corresponding period for 24 years, Surveyor-General's Office	Nil
				0.01
The total fall from 1st January to 19th December 1896	53.22
The average fall of the corresponding period for 24 years, Surveyor-General's Office	65.23

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h, 10h., 16h., and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed, open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official Tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

a dew.

Results of the Barometrical and Thermometrical Observations taken at the Meteorological Office, Chowringhee, from 13th to 19th December 1896.

Orders and Notifications by the Lieutenant-Governor of Bengal, the High Court, Government Treasury, &c.

ORDERS BY THE LIEUT. GOVERNOR OF BENGAL.

No. 6945A.

GENERAL.—No. 6890A.—The 28th December 1896.—Mr. C. A. Bell, Officiating Joint-Magistrate and Deputy Collector, 24-Parganas, is appointed to have charge of the Salkhira subdivision of the district of Khulna.

No. 6892A.—The 29th December 1896.—Babu Gata Krishna Neogy, Deputy Magistrate and Deputy Collector, is posted to the Salkhira subdivision of the district of Khulna, on being relieved of the charge of that subdivision.

No. 6894A.—The 28th December 1896.—In modification of the order of the 24th November 1896, Mr. H. R. H. Ouse, District and Sessions Judge of Midnapore, is allowed leave for five days; under article 307 of the Civil Service Regulations, in extension of the leave granted to him under the order of the 29th August 1896.

No. 6896A.—The 28th December 1896.—In supersession of the order of the 24th November 1896, Mr. B. B. Karim, Deputy Magistrate and Deputy Collector, is posted to the head-quarters station of the district of Nadia.

This cancels the order of the 15th December 1896, transferring Babu Ashutosh Chatterjee, Officiating Deputy Magistrate and Deputy Collector, from Hooghly to Nadia.

No 6899A.—*The 28th December 1896.*—Babu Hara Chandra Ghose, Officiating Deputy Collector, Pabna, is vested with the powers of a Collector under Act I of 1894 in that district.

No 6911A.—*The 28th December 1896.*—In modification of the order of the 11th February 1896, Mr. F E Pargiter, District and Sessions Judge, Cuttack, is allowed leave for two months and fifteen days, under articles 307 and 308 of the Civil Service Regulations, with effect from the 5th March 1896.

No. 6931A.—*The 29th December 1896.*—Mr. W. H. H. Vincent, Joint-Magistrate and Deputy Collector, is posted to the head-quarters station of the district of Chittagong.

No. 6935A.—*The 29th December 1896.*—Mr. J. Lang, substantive *pro tempore* Joint-Magistrate and Deputy Collector, on special duty, is posted to the head-quarters station of the 24-Parganas district.

The following are republished from the *Assam Gazette* :—

No 8255G.—*The 18th December 1896.*—On the report of the Central Examination Committee, the Chief Commissioner directs the publication, for general information, of the results of the half-yearly examination of Assistant Commissioners, Extra Assistant Commissioners, and other Officers held on the 9th, 10th, 11th, 12th and 13th November 1896.—

M. FINUCANE,
Secy. to the Govt. of Bengal.

REVENUE DEPARTMENT, —(LAND REVENUE).

NOTIFICATION—No. 5548 L R.

The 29th December 1896 —Government Notification No 2010 L R., dated the 21st April 1896, published at page 462, Part I of the *Calcutta Gazette* of the 22nd idem, appointing Babu Debi Prasad, Deputy Magistrate and Deputy Collector, as an Assistant Settlement Officer, Paharia villages, in the Damin-i-Koh Government estates in the district of Sonthal Parganas, is hereby cancelled.

M. FINUCANE,
Secy. to the Govt. of Bengal.

NOTIFICATION —5549 L R.

The 29th December 1896 —Under the powers conferred upon him by section 101 (2) (a) of the Bengal Tenancy Act VIII of 1885, the Lieutenant-Governor is pleased to direct that a survey shall be made and a record of rights be prepared in respect of all lands included within the external boundaries of the undermentioned estates in the district of Mymensingh. —

Names of estates.	Tanai No.	District.
Ohakla Baraigaon ...	4735	Mymensingh.
Mauza Jatra Sadi with Beel Bethkura ...	10717 to 10728	

The particulars to be recorded in the survey and record of rights shall be the following:—

- (a) The name of each tenant
- (b) The class to which he belongs, that is to say, whether he is a tenure-holder, raiyat holding at fixed rates, occupancy raiyat, non-occupancy raiyat, or under-raiyat, and if he is a tenure-holder, whether he is a permanent tenure-holder or not, and whether his rent is liable to enhancement during the continuance of his tenure.
- (c) The situation, quantity and boundaries of the land held by him.
- (d) The name of his landlord.
- (e) The money-rent payable, or if a produce-rent, the fact that a produce-rent is paid
- (f) The mode in which that rent has been fixed, whether by contract, by order of a Court, or otherwise.
- (g) If the rent is a gradually increasing rent, the time at which, and the steps by which, it increases.
- (h) The special conditions and incidents, if any, of the tenancy.

- (i) The name of each proprietor (including rent-free owner), with the character and extent of his interest.
- (j) The situation, quantity and boundaries of proprietor's private lands, as defined in Chapter XI of the Act.
- (k) The name of each rent-free occupant, the situation, quantity and boundaries of the land held by him, and whether he holds rent-free by the permission of the proprietor of the land or of his predecessor in title or independently of such permission.

M. FINUCANE,
Secy. to the Govt. of Bengal.

GENERAL DEPARTMENT—(EDUCATION.)

NOTIFICATION—No 4236

The 29th December 1896 —The following revised rules for the award of Government stipends in the indigenous tols of Bengal, Bihar and Orissa are published for general information, in supersession of Government Notification No 634, dated the 16th February 1893

M. FINUCANE,
Secy. to the Govt. of Bengal.

Revised rules for the examinations of Sanskrit Tols in accordance with Government Resolution No. 857, dated the 21st March 1892.

IN and from the year 1897, the first and second Sanskrit examinations will be held in a uniform course of text-books prescribed by the Conference of representatives of the recognised Sanskrit Associations in Bengal, Bihar and Orissa, and the examinations will be conducted by the same examiners and the same sets of question papers.

2. On or before the 1st of December, each year, pandits of tols should send in applications of candidates desiring to appear at either of the examinations to any of the recognised Sanskrit Associations named below —

- | | |
|--|---|
| 1 The Sarasvat Samaj of Dacca. | 8 The Dharma Sabha of Boahia |
| 2 The Bihar Sanskrit Sanjivan | 9 The Dharma Sabha of Rangpur. |
| 3. The Sanskrit Samiti of Ghatal
(Midnapore) | 10 The Dharma Rakshini Sabha of
Birisal. |
| 4. The Vidagdha Janani Sabha of
Nadia | 11 The Arva Siksha Samiti of Kotalipara
(Faridpur) |
| 5 The Pandit Sabha of Calcutta | 12 The Orissa Sanskrit Samiti of
Cuttack |
| 6 The Pariksha Sabha of Bhatpara
(24-Parganas) | 13 The Sanskrit Samiti of Balasore. |
| 7 The Vatsahini Association of
Narail (Jessore) | 14 The Jagannath Sanskrit Samiti of
Puri |

The Director of Public Instruction may from time to time add to this list, or remove any name from it.

3. On or before the 15th of December, each year, the Secretary of each Association shall forward to the Principal of the Sanskrit College, Calcutta, lists of candidates showing the following particulars —

- (a) Name of teacher
- (b) Name of village or town where the tol is situated (including name of district and of the nearest post-office).
- (c) Name of candidate
- (d) Name of candidate's father
- (e) Name of candidate's residence (village, district and post-office).
- (f) The subjects and the particular alternative text-books taken up by each candidate
- (g) The period of continuous study in the tol from which the candidate presents himself
- (h) Name of examination (Sanskrit First or Second) at which he is to appear.
- (i) Name and address of the teacher with whom the candidate proposes to continue his studies
- (j) Name of any Sanskrit examination previously passed by the candidate.
- (k) Whether the candidate gained any stipend at any previous examination.

N.B.—Any expenses that may be incurred in meeting the above and other incidental charges in connection with the examinations will be borne by the Associations concerned

4. The examiners will, for the present, be selected from among the pandits of Bengal, Bihar and Orissa, by Mahamahopādhyāya Mahes Chandra Nayamatna, c i e , and the Principal of the Sanskrit College, after giving due consideration to any recommendations on that point which may be made by the different Associations.

5. The question-papers will be forwarded by the examiners to the Principal of the Sanskrit College, who will supply printed copies to the Secretaries of the different Associations.

6. The Principal of the Sanskrit College will also, in communication with the Inspectors of Schools in whose Circles the Associations are situated, make arrangements (1) for the appointment of Deputy Inspectors, Head Masters of high schools, or other educational officers, as Superintendents of the local examinations, and (2) in consultation with the Secretaries of the different Associations for the selection of places, conveniently situated for each Association, in which the examinations shall be held.

7. The examination will take place in the Bengali month Phalgun (February—March), but so as not to coincide with the University examinations or any Hindu festival. The Principal of the Sanskrit College will fix the date of the examinations and will in due course communicate it to the Secretaries of the different Associations.

8. The Associations in Bengal and Bihar must forward Rs 40 each and those in Orissa Rs. 20 each to the Principal of the Sanskrit College as their contributions towards the expenses of the examinations. If any Association fails to send in its contribution, the candidates applying for examination through such Association will not be allowed to appear.

9. Each Association will have to supply paper, ink, and other necessities to the candidates.

10. Within a week of the examinations each Association must forward packets of answer-papers duly sealed, direct to the examiners, who will forward the results of the examinations with the answer papers to the Principal of the Sanskrit College by the end of March.

11. On receiving from the examiners the lists of marks obtained by the candidates, the Principal of the Sanskrit College will communicate the result of the examination to the Secretaries of the different Associations, forwarding a copy of the marks obtained by each candidate, and will publish a list of successful candidates in the *Calcutta Gazette*.

Candidates obtaining 60 per cent. of the aggregate number of marks will be placed in the first division and those obtaining 40 per cent. in the second division. The Associations will grant certificates to their respective successful candidates.

12. Stipends to pupils and teachers will be awarded on the results of the examinations and will be confined to tols in Bengal, Bihar, and Orissa.

A list of stipend-holders will be published in the *Calcutta Gazette* by the Director of Public Instruction.

Rewards to Pupils

13. On the results of the first examination, stipends of Rs 2 a month each, tenable for two years, will be awarded to 60 pupils.

On the results of the second examination, stipends of Rs 3 a month for two years will be awarded to 20 pupils, of Rs 1 a month for two years to 15 pupils, and of Rs 3 a month for three years to four Nyaya pupils.

Not more than one-third of the total number of stipends will ordinarily be awarded to students of Grammar and Kavya.

14. Students may not compete for stipends at these examinations if they have already appeared at a higher examination in the same subject than that for which they present themselves. No student should hold more than one Government stipend at the same time.

15. Students who have not read in the tols from which they appear for at least twelve months immediately preceding the examination, though entitled to earn stipends for themselves, will not earn stipends for their teachers.

16. To retain his stipend for a second year (and in the case of students in Nyaya, for a third year), a student must annually produce a certificate from his pandit to the effect that he has made good progress in his Sanskrit studies during the preceding year, due allowance being made in cases of illness.

17. Stipends will be drawn and paid by the Deputy Inspector of Schools of the district in which the tol where the scholarship is made tenable is situated, the bill being submitted by the pandit of such tol, and countersigned by the Inspector of Schools. The amount of the bill must be paid to the pandit within two months of its submission to the Deputy Inspector.

18. The bill should be accompanied by a certificate from the pandit in charge of the tol stating for what period (if any) deductions are to be made at the specified rates on account of absence, the cause of absence being also stated.

19. Continuous absence of a student from his tol for more than three months will entail forfeiture of stipend, unless such absence be due to illness, when the period of absence may, with the approval of the Inspector of Schools concerned, be extended to six months.

20. Half stipend may be allowed to students who absent themselves owing to illness. No stipend will be allowed during periods of absence to those who absent themselves for any other cause.

21. When a stipend-holder is transferred from one district to another, or from one institution to another in the same district, a transfer certificate should be obtained from the Deputy Inspector of Schools concerned. But if a stipend is transferred to an institution

outside Bengal, it should be drawn by the principal teacher of such institution, deductions for absence being made according to the rules, a copy of which should be forwarded to him. The bill should be sent to the Inspector of Schools, who will remit the amount of stipend by money-order.

Rewards to Teachers.

22 To the teachers of pupils successful at the examinations, stipends tenable for one year will be awarded as follows —

On the results of the first examination—

25 stipends of Rs 6 a month each,
25 stipends of Rs 8 a month each;

And on the results of the second examination—

18 stipends of Rs 10 a month each,
16 stipends of Rs 12 a month each,

all tenable for one year

23 Two of the last-named stipends will be reserved for the teachers of successful pupils at the examination in Nyaya, subject to the condition that they shall not be awardable to the tols which obtain fixed Nyaya stipends under paragraph 7 (first head) of the Resolution.

One stipend of each kind (or four in all) will be reserved for award by the Dacca Sarasvat Samaj, and one of each kind for award by the Bihar Sanskrit Sanjivan, in addition to any stipends which the tols under their special cognisance may obtain in the general competition

Three stipends of Rs 2 a month to pupils and three of Rs 6 a month to teachers on the results of the first examination, and three stipends of Rs 3 a month to pupils and three of Rs 10 a month to teachers on the results of the second examination, will also be reserved for the Orissa Division, and these will be equally divided amongst its three Associations for award to their respective teachers and pupils, in addition to the stipends which the tols may gain in the general competition.

Should any of these reserved stipends not be taken up locally, they will be awarded on the results of the general competition

24 Should a teacher die after election to a stipend and before receiving it in full, the balance may be paid to his representatives

Should a pupil receiving a stipend die, the amount of the stipend or any portion thereof for any period up to the date of his death, if not drawn by such pupil, may be paid to his representatives

25. General rules for the conduct of the examinations and the award of the stipends will be made by the Director of Public Instruction, in communication with the Principal of the Sanskrit College, who will be styled "Registrar of the Examinations for Sanskrit tols"

NOTIFICATION—No. 4272.

The 29th December 1896.—The undermentioned gentlemen are appointed to the Committee of Management of the Bethune College, Calcutta —

C. W. BOLTON,

Chief Secy. to the Govt. of Bengal.

NOTIFICATION—No. 6248J

The 22nd December 1896—The Lieutenant-Governor sanctions the following alterations in the districts of Dinajpur, Bogra, and Rajshahi, with effect from the 1st January 1897—

1st.—The transfer of thana Mahadebpur, the boundaries of which were defined by the Notification dated the 31st July 1879, published in the *Calcutta Gazette* of the 6th August 1879, from the Sadar sub-division and Balughat Munsifi in the district of Dinajpur to the Naugaon sub-division and munsifi in the district of Rajshahi.

2nd—The abolition of thana Nawabganj in the district of Bogra, and the division of its jurisdiction between thana Adamdighi of that district, and thanas Mahadebpur and Naugaon in the district of Rajshahi.

3rd.—The establishment of an outpost at Badalgachi, subordinate to thana Mahadebpur in the district of Rajshahi.

4th.—The transfer of a portion of thana Adamdighi in the district of Bogra, which lies to the west of the villages through which the Northern Bengal State Railway line passes, to thana Naugaon, in the district of Rajshahi.

In consequence of the above alterations, the following are declared to be the revised northern boundary of the district of Rajshahi, the revised southern and western boundaries of the district of Bogra, and the revised southern boundary of the district of Dinajpur, in modification of the boundaries previously defined.

The descriptions of the boundaries of thanas Mahadebpur, Manda, Naugaon, and Panchapur, district Rajshahi, of thanas Panchbibi and Adamdighi, district Bogra, and of thana Patnitala, district Dinajpur, as previously notified, having been affected by the above alterations, the revised descriptions of the boundaries of those thanas are also given below.—

REVISED NORTHERN BOUNDARY OF THE DISTRICT OF RAJSHAHI

Commencing from the village of Gulpur on the west, the northern boundary of the district runs eastward along the revenue survey boundary of pargana Jeasindh to the village of Suranandpur, thence it runs northward along the Kharu Khal to the north-west corner of

village Sagrun-Bindara; thence it turns eastward and follows the boundaries of the following villages, viz —Sagrun-Bindara, Mirzapur, Chak Raghu, &c., Shampur, Kistopur, Paddopukhur, Nahata, Bahajet, Selimpur, Harakrishtopur, &c., Dewanpur, Nosibpur, Dewanpur for the second time, and Goysepur to the Atrai river, thence along the left bank of the Atrai river southward to the village of Sultanpur, where it crosses the river and follows the boundaries of the following villages, viz —Nurpur, Nurpur or Mynagar, Sujail, Mohokhuri, Khojahar, Rahimapur, Chak Raghu, Binchara, Debarpur, Deshkhirson, Mulla chak, Deshkhirson for the second time, Shohorai, Bad-Bahuti, Chaura, Rambhodipur, Bad-Baramgram, Jagannathpur, Hamtouri, Manjora, Nauran, Chhilimpur, Abadpur, Shaietgachi, Chanchampur, Raghunathpur, Chanchampur for the second time, Panishail, and Rajapur to the Jabuna river, thence along the right bank of the Jabuna river northward to the village of Mathurapur, thence it runs along the limits of the following villages, viz —Jhanbari, Periyur, Goyeshpur, Jalal chak, Goyeshpur, and Gobind chak till it again meets the Jabuna river, thence along the Jabuna river southward to the village of Parslapla, where it crosses the river and passes along the boundaries of the following villages, viz —Narsingpur-Arazi, Panipara, Narsingpur-Arazi for the second time, Kakribari, Syampur, Lakhukolo-Buzurg, Kashtogari, Nohela, Jagannathpur, Sarangpara-Kismat, Sadipur, Dwarisoon, &c., Rassulpur, Phoyra, Dhakandi, Debiel, Bamanpara, Natshar, Rampur, Kismat Jagdispur, Chengha, Chapadal, Kalachit, Nuna, Srirampur, Gandarbopur, Gobind chak, Bila chak, Kandha, Khadal, Jhargharia, Taher chak, Bangaon, Bharutoamunpur, Sukdeb chak, Devakuri, and Ramnath chak, &c., thence across the Tulsiganga Nadi the boundary follows that of the following villages, viz —Bushnai, Inaetpur-Buzurg, Maluncha, Dhobakuri, Kathra, Walipur, Sindharpur, Rauejhore, Dakuhar, Mirzapur, Sangrampur, Durgapur, Mangalpur, Khagurkuri, Chak Ganesh, Khyrabad, Bagunkuri, Khyrabad for the second time, Chak Ganesh for the second time, Enaetpur, Dhamkuri, Sahapur, Bagha, Dogachi, Pharoosa, Khitri-Simulia, Esabari, Chak Bolaki, Chak Ujir, and Chak Mahadi, thence the boundary remains the same as defined by the Notification dated the 24th February 1875, published in the *Calcutta Gazette* of the 10th March 1875, eastward to the village of Dolasingia.

REVISED SOUTHERN AND WESTERN BOUNDARIES OF THE DISTRICT OF BOGRA

The southern boundary shall be, as defined by the notification, dated the 7th December 1874, published in the *Calcutta Gazette* of the 23rd idem, from the village of Naodha-Brumhagacha on the east to that of Dariapur on the west.

The western boundary runs continuous with the northern boundary of the district of Rajshahi as above described, from the village of Dariapur northward to that of Tekala, thence the boundary remains the same as defined by the above Notification up to the village of Mereator or Artoir, &c.

REVISED SOUTHERN BOUNDARY OF THE DISTRICT OF DINAJPUR

The southern boundary of the district shall remain the same as defined by the Notification dated the 6th November 1874, published in the *Calcutta Gazette* of the 18th idem, from the village of Sahibganj on the Kurutia river on the east to that of Arael on the Jabuna river on the west; thence it runs continuous with the northern boundary of the district of Rajshahi, as above described, as far west as the village of Nankuhar, thence it passes along the boundaries of the following villages, viz —Nankuhar, Betrobhag, Kamardha, and Dhapgram, thence the boundary remains unaltered westward to the village of Ananhat, on the Mahanada river.

NOTE.—In the above descriptions, the pargana and the villages named as situated on the boundaries are included within the limits of the districts to which reference is made.

THANA MAHADEBPUR, DISTRICT RAJSHAH

On the North.—The boundary of the district from the village of Sagrun-Bindara on the west to that of Kismat Jagdispur on the east.

On the East.—The boundary of the district from the village of Kismat Jagdispur on the north to that of Ramnath chak on the south; thence the Tulsiganga nadi southward to the village of Khalisakuri on the said nadi.

On the South.—The boundaries of the following villages, viz.—Khalisakuri, Sibpur, Abir chak, Goni chak, Balookarpara, Inaetpur, Hazartpur, Balubhara, Pakuria, Gobindpur, Shaikul, Archa, Naksha, Mohidipur, Kusharmuri, Bhanjkola, Nujanpur, Bangtal, Solana, Prodhanakundi, Chuarpur, Kesabpur, Balubohra, Bosail, Jhakra, Lakhipur, Anautpur, Saruppur, Pocha-Kandore, Gonigachi, Sonakandore, Kutubpur, Dogachi, Bahadurpur, Dogachi for the second time, Kutubpur for the second time, Chak Bikram, Madyoghori, Horisye, Dafole, Horisye for the second time, Patal, Barunkandi, Rajoypur, Jharina, Chandanpur, Tejpal, Ganeshpur, Sikarpur, Bhimpur, Chak Roja, Chak Dasra, Bamansala, Sripur, Roypur, Latibpur, Baddopur, Etakhor, Esabpur, Rampur, Manjilam, Bangalpara, Srirampur, Manjilam for the second time, Baddopur for the second time, Raypur for the second time, Bil-Doobla, Hatimondola, Bindrampur, Gopalpur, Kistopur, Dudkuri, Kochkuri, Pobatore, Lakhipur, Gheseera, Binodpur, Jayrampur, Binodpur for the second time, Patakata, Srinagar, Sheally, &c., Bakhrabad, Gobindpur, Mothurapur, Kistopur, Antopur, Ramraypur, Chak Kandarapur, Raripara, Madabpara, Chandas, Patha, Raypur-Hazrapukuri, Patha for the second time, and Lowdanga.

On the West—The boundaries of the following villages, viz :—Lowdanga, Jantole Kancham, Bachra, Khurd-Joypur, Notwapara, Ranali, Joypur, Mirzanagar, Joypur for the second time, Moukhore, Tajbhoya, Kaleopara, Nezampur, Sankarpur, Mirzapur, Joul, and Amraye; thence the boundary of the district up to the village of Sagrun Bindara.

THANA MANDA, DISTRICT RAJSHAHI.

On the North and North-East—The boundary of the district from the village of Ganpur on the west to that of Suranandpur on the east; thence the thana of Mahadebpur.

On the East and South—The boundary remains the same as defined by the notification dated the 24th February 1875, published in the *Calcutta Gazette* of the 10th March 1875.

On the West—The boundary of the district from the village of Gaudanal on the south to that of Ganpur on the north.

THANA NAUGAON, DISTRICT RAJSHAHI.

On the West and North—Thanas Manda and Mahadebpur.

On the East—The boundary of the district from the village of Bhushnai on the north to that of Chak Ujeor on the south; thence the boundaries of the following villages, viz. — Chak Ujeer, Gangakandi oorf Chandipur, and Buzurg-Kandra, thence the left bank of the Jabuna Nadi southward to the village of Raipur.

On the South—The boundary remains the same as defined by the notification dated the 24th February 1875, published in the *Calcutta Gazette* of the 10th March 1875.

THANA PANCHUPUR, DISTRICT RAJSHAHI.

On the North.—The boundary of the district from the village of Chak Mahedi on the west to that of Ghatgaon on the east.

On the East and South.—The boundary remains the same as defined by the Notification, dated the 27th August 1879, published in the *Calcutta Gazette* of the 3rd September 1879.

On the West—Thanas Bagmara and Naugaon.

THANA PANCHIBIBI, DISTRICT BOGRA.

On the North and West—The boundary remains the same as defined by the Notification dated the 7th December 1874, published in the *Calcutta Gazette* of the 23rd idem.

On the South—The boundary of the district as above described from the village of Tokala on the west to that of Shahapur on the east, thence the boundaries of the following villages, viz. — Dalikata, Shahapur, Jagatsing chak, Jamalpur-Buzurg, and Berael.

On the East—The boundary remains unchanged.

THANA ADAMDIGHI, DISTRICT BOGRA.

On the North.—Thanas Panchibibi and Khetla.

On the East—Thanas Sibganj and Bogra, and the boundary of the district as defined by the Notification dated the 7th December 1874, published in the *Calcutta Gazette* of the 23rd idem, from the village of Kundogaon southward to that of Gobindpur.

On the South—The boundary of the district from the village of Gobindpur westward to that of Dariapur.

On the West.—The boundary of the district as above defined from the village Dariapur on the south to that of Rukandipur on the north.

THANA PATNITOLA, DISTRICT DINAJPUR.

On the North—Thana Patiram, the boundaries of which were defined by the notification dated the 6th November 1874, published in the *Calcutta Gazette* of the 18th idem.

On the East and South—The boundary of the district as above described.

On the West—Thanas Parsa and Gangarampur, the boundaries of which were defined by the notification of 6th November 1874.

NOTE.—In the above descriptions the villages named as situated on the boundaries are included in the limits of the thanas to which reference is made.

O. W. BOLTON,
Chief Secy. to the Govt of Bengal

REVISED WATER-RATE RULES FOR THE MIDNAPORE CANAL

No. 248 Notification.—His Honour the Lieutenant-Governor of Bengal is pleased to propose the following modifications in the Water-rate Rules for the Midnapore Canal passed

by him under the provisions of sections 99 and 78 of Act III (B.C.) of 1876 in notification No. 162 of the 19th June 1893.

A. D. McARTHUR, *Col., R.E.,*
Secy. to the Govt. of Bengal

1. The Divisional Canal Officer is responsible for maintaining the canal in an efficient state of repair, for providing drainage channels where necessary, and generally for all engineering work involved in its management, as well as for the distribution of water to lessees. The word "canal" is here used as defined in section 3 of the Act.

2. The Deputy Collector is responsible for the assessment and collection of water-rates accruing to Government from the canal.

3. Water shall not be distributed otherwise than on the application of a lessee, or to a person in whose favour a provisional license under Rule 15 has been issued. Such application may be made verbally or in writing to any subordinate in charge of that part of the canal from which water is required.

4. If any lessee apply for water to the Deputy Collector or one of his subordinates verbally, he shall be directed to address himself to an irrigation officer or subordinate. If he makes such an application in writing, his petition shall be forwarded direct by the zilladar, to whom it is addressed, to the Sub-divisional Canal Officer in charge of that part of the canal from which the petitioner's village is supplied.

5. The Divisional Canal Officer shall map out the irrigable area into blocks in accordance with the natural features of the ground, and so determine that the whole block shall be irrigable from one outlet or from one set of outlets. So far as may be practicable, the blocks shall be separated by drainage lines.

6. Each block determined as above shall be numbered and recorded with its irrigable area in registers to be maintained by the Divisional Canal Officers and Deputy Collector. The blocks shall also be marked on maps to be maintained by the same officers.

7. Leases for not more than five years may be granted for the whole irrigable area of a block, or, subject to the provisions of Rule 13, for definite parts of a block, under the following conditions:—

I.—Ordinarily the whole irrigable area of any village, so far as situated within the block, must be included in the lease.

II.—All leases within one block shall be granted so that they shall expire on the same date.

III.—In order to equalise the areas to be dealt with in each year, the date of expiry of the leases in each block shall be determined by the Divisional Canal Officer in consultation with the Deputy Collector, so that, as far as practicable, one-fifth of the total area usually irrigated may fall out of lease in each year.

IV.—No permit shall be granted, when the supply of water must of necessity be delivered across an unleased area, unless a village channel exists, which, in the opinion of the Sub-divisional Canal Officer, will deliver water without waste across the unleased area.

8. The rates to be charged for water supplied between 16th June and 30th November, whether by flow or lift, to lessees on application shall be—

For a term of five years—Rs. 1-8 per acre for each season.

For one year or for water supplied on a provisional license for which a permit for a term of years is not subsequently issued, Rs. 3 per acre.

Provided that the leases, whether new or renewals, required for shorter terms than five years in order to develop the system of blocks as explained above, shall be charged Rs. 1-8 per acre only.

9. For the supply of water, when available, for winter crops, a rate of Rs. 2-8 per acre per season shall be charged.

10. For the unauthorized use of canal water a rate of Rs. 5 per acre, or such less rate as may be sanctioned by the Deputy Collector, shall be charged.

11. Application for water-leases under section 71 of the Act shall be presented to the Sub-divisional Officer through the zilladar in whose charge the land lies.

12. Every application for a water-lease shall contain the following particulars:—

1.—Name and residence of applicant.

2.—Name of pargana, mahal and village in which the land to be irrigated is situated.

3.—Total area for the irrigation of which the application is made and its boundaries, and if the lands to be irrigated be in separate *chaks*, the name of each *chak*.

4.—Names of the riyats whose lands are to be irrigated, and the quantity of land held by each.

5.—Name of the canal and number of distributary from which water is required.

6.—Signatures of the applicants.

13. A separate application must be presented for lands in each village, but *tehsildar* or other lands lying within the village boundary at the time of survey may be included.

14. Before a permit for a term of years is granted, the written consent of the Divisional Canal Officer shall be obtained, but permits for one year only and provisional licenses may be issued with the written assent of the Sub-divisional Canal Officer. The Deputy Collector

shall on the day of issue forward a copy of all permits granted to the Divisional Canal Officer.

Existing leases may, with the written consent of the Divisional Canal Officer, be extended for not more than three years, without enquiry or re-measurement, payments being made in accordance with the existing assessment.

15. When a water-lease is granted, a *kabuliyat* shall be taken in a form approved by Government, and a "permit" shall be given to the lessee or leasees in a form similar to that prescribed in Schedule C of the Act. Pending the completion of a lease, the zilladar may issue a provisional license for the supply of water to an area covered by an application.

16. On the issue of a permit or provisional license, the zilladar shall forward to the Sub-divisional Canal Officer direct a requisition requesting him to supply water to the lessee on application. This requisition shall be kept by the Canal Officer till January 1st next following, and shall then be returned to the Deputy Collector. On the back should be noted the several dates on which the village was supplied with water. A fresh requisition shall be issued on or before June 1st, and returned on or before January 1st each year, till the lease expires.

17. When it comes to the knowledge of the Sub-divisional Canal Officer that canal water has been taken without authority, he shall hold a local investigation and transmit the record thereof to the Divisional Officer, who shall, if he is of opinion that the fields should be assessed, forward the case with his remarks to the Deputy Collector. Separate proceedings shall be taken in the case of each village irrigated without authority.

18. On receipt of the record mentioned in Rule 17, and after hearing any objection which may be raised, the Deputy Collector shall determine whether water-rates can be legally charged, and if so, he shall proceed to assess, at the rate provided in Rule 10, the land irrigated without authority. Water-rates shall not be charged where the unauthorized irrigation has occurred through the act, neglect or default of a Canal Officer or subordinate.

19. The statements of the amounts demandable for water-rates leviable under the rules in force shall be prepared under the supervision and signature of the Deputy Collector in such form as shall from time to time be sanctioned by the Lieutenant-Governor. Persons charged under Rule 10 or 18 shall be served, by post or otherwise, with a statement showing the amounts charged to enable them to lodge an appeal to the Collector under section 91 of the Act, if they desire to do so.

20. Should it be proved, after due enquiry, that the supply of water given to any leased area is habitually wasted, or used for the irrigation of lands not under lease, it shall be competent for the Superintending Canal Officer to direct that the lease shall be cancelled with effect from the 1st of June next following.

21. The rates for water supplied from June to November shall in each season fall due on the 1st January and 15th February following, but all sums of Rs. 5 and under shall become due on the 1st January and be payable in one instalment. The Deputy Collector may, however, require one-half of the rates due on applications filed after the 1st of September to be paid in advance, and may refuse to issue a permit for more than one year. The rates for water supplied for winter crops shall fall due on the 1st April following.

22. Water-rates imposed under Rule 10 or 18 shall fall due as soon as the assessment is made, and shall be realized at once.

23. The Superintending Canal Officer, with the concurrence of the Collector, direct the Deputy Collector—

I.—Cease to issue permits for the irrigation of lands in villages where there have been constant difficulties in realizing water-rates until all the arrears of water-rates due are paid up, and also, if specially so ordered, unless half the amount due under new applications is paid in advance. An order under this rule shall be in force for the time stated therein, which shall not exceed three years.

II.—Cancel any five-years' lease if on the 1st of June of any year water-rates to the extent of half the demand for one year are in arrears.

24. Remission of water-rates, either in whole or part, as the case may require, shall be granted by the Deputy Collector for—

I.—Errors in the assessment of rates

II.—Injury to the crop on a leased area caused by deficient supply of water, provided a written application for remission has been made 15 days at least before the crop is cut.

In regard to applications under II, the written opinion of the Divisional Canal Officer shall be obtained and form part of the record of the case.

25. The Deputy Collector, with the written consent of the Divisional Canal Officer, may grant remissions of water-rates, either in whole or part, for injury to the crops on leased areas caused by excess of water due to deficient drainage.

26. The Deputy Collector may, with the written assent of the Divisional Canal Officer, commute rates charged under Rules 10 and 18 to those chargeable for water supplied on application, provided that a lease either for a term of years or for the season has been subsequently executed for the lands in question.

27. Remissions on other grounds than the above require the sanction of Government.

28. In cases where sums due on account of water-rates cannot be collected owing to the death, bankruptcy, or absconding of the defaulter, the amount which is non-realizable may be written off as irrecoverable on the authority of the Superintending Canal Officer.

29. Before awarding compensation under section 16 of the Act, or making a reference under section 17 of the Act, the Collector shall obtain the written opinion of the Superintending Canal Officer, and his written opinion shall form part of the record of the proceedings.

30. The *chaukidar* of any village in which lands are leased for a term of years shall be entitled to a remission of water-rates for his holding either as a *jaghir* or *ranyati* up to a limit of 3 acres, provided he gives efficient and willing assistance to the Canal Officers in respect to the following matters—

- I.—In the preparation of applications for leases
- II.—In the measurements of irrigated lands
- III.—In giving the names of the occupiers of the various fields
- IV.—In receiving demand statements and informing the cultivators of the demands against them.
- V.—In receiving *tappas* from the *zilladars* and distributing them
- VI.—In being present when complaints are investigated by Canal Officers, and giving information regarding the matters under investigation.
- VII.—In reporting to the *zilladars* any mutations in holdings of persons who have signed a lease for a term of years.

31. Tanks may be filled with canal water without charge, wherever water can be made available without injury to the cultivation dependent on a canal under the following conditions.—

- I.—No tank shall be filled unless the water is to be exclusively used for domestic purposes or for watering cattle.
- II.—No tank shall be filled from which irrigation is practised.
- III.—No tank shall be filled which intercepts any line of drainage or is liable to overflow from the accumulation of water from natural causes.
- IV.—No tank shall be filled except on the written order of the Sub-divisional Canal Officer issued on the written application of the persons concerned
- V.—No tank shall be filled unless the village channel used to convey water to it shall be shown to the satisfaction of the Sub-divisional Canal Officer to be in a sound condition when the application is made
- VI.—The privilege here accorded may, by the written order of the Sub-divisional Canal Officer, be suspended for twelve months for the breach of any of the above rules.

32. The Divisional Canal Officer may supply water for manufacturing or other purposes, and charge for the same at the rate of one rupee for each 10,000 cubic feet or part of 10,000 cubic feet supplied. The same charge will be made if water is taken into a tank without authority or used in an unauthorized manner.

33. No person shall, without the permission in writing of the Divisional or Sub-divisional Canal Officer, pass or cause any animal or vehicle to pass on or across any of the works, banks or channels of a canal or drainage work after he has been desired to desist therefrom, except by means of such bridges, fords and ferries and their approaches as are provided by the Divisional Canal Officer.

34. No officer employed on the canals, unless especially exempted by the Lieutenant-Governor from the operation of this rule, shall have any interest in the distribution of water from any of the canals, or purchase or bid for any Government property sold thereon, either in his own name or in the name of another, or jointly, or in shares with others.

35. Except as provided in the Act and in these rules, no appeal shall lie from any order passed by a Canal Officer; but the Sub-divisional Canal Officer shall modify any order passed by him in accordance with the order of the Divisional Canal Officer, and the Sub-divisional Canal Officer or Divisional Canal Officer shall modify any orders passed by them in accordance with the orders of the Superintending Canal Officer, who shall exercise a general control over the proceedings of all Canal Officers.

36. In appeals to the Collector under section 91 of the Act other than those specially provided for in Rule 19, the Collector may require the Superintending Engineer to state his opinion in writing, which shall form part of the record of the proceedings in the case.

[Fourth Publication]

The 8th December 1896.

No. 243 — *Notification*.—Notice is hereby given that the Lieutenant-Governor of Bengal proposes, under the provisions of section 6 of Act II (B O) of 1882, to declare that the provisions of clause (b) of section 76 of that Act shall take effect over the whole area between the sea-dyke and the Bay of Bengal, commencing from the village of Dariapur, pargana Bahjora, and ending where the sea-dyke terminates at a masonry pillar in the village of Khandaigobra, pargana Birkul, save and except the tract specified hereunder, viz., the lands between the sea-dyke and the sea so far as they appertain to the Majumutha

estate, bounded on the east by the boundary of mauza Kaluraibarih (up to the creek near Kanaichata), pargana Bahjora, and on the west by the boundary of mauza Saradpur, pargana Sarifabad near Haripur, pargana Dakshinmal.

2. The erection of any new embankment, or any addition to any existing embankment, or the obstruction or diversion of any water-course within the tract above declared without the previous sanction of the Collector of Midnapore, is prohibited.

Boundary of the tract to be declared

[Subject to the exceptions above noted]

Particulars	North by	East by	South by	West by	No	District

RAILWAY DEPARTMENT

The 28th December 1896.

No. 168.—*Addendum*.—Insert the following as paragraph 2 to this Department Declaration No. 135, dated the 10th November 1896, published at pages 1158-59, Part I of the *Calcutta Gazette* of the 11th idem —

“This declaration is made, under the provisions of section 6 of Act I of 1894, to all whom it may concern.”

The 29th December 1896.

No. 170.—*Declaration*.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz, for Nundee Colliery Siding at mile 127½ at Sheikhpur Branch, East Indian Railway, in the village of Nundee, pargana Shergarh, zilla Burdwan, it is hereby declared that for the above purpose a piece of land measuring, more or less, 2 bighas 6 cottahs 9 11 chitaks of standard measurement (corresponding to 3 roods 3 16 poles), bounded by a nick on the ground, is required within the aforesaid village of Nundee.

Mines of coal, iron-stone, slate or other minerals lying under the land, or any particular portion of the land, except only such parts of the mines and minerals as it may be necessary to dig or carry away, or use in the construction of the work for the purpose of which the land is being acquired, are not needed.

This declaration is made, under the provisions of section 6, Act I of 1894, and section 3, clause (1), Act XVIII of 1895, to all whom it may concern.

No. 171.—*Declaration*.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz, for Block Hut at Barrachuck, East Indian Railway, in the village of Barrachuck, pargana Shergarh, zilla Burdwan, it is hereby declared that for the above purpose a piece of land measuring, more or less, 1 bigha 7 cottahs 12 44 chitaks of standard measurement (corresponding to 1 rood 33 46 poles), bounded by a nick on the ground, is required within the aforesaid village of Barrachuck.

Mines of coal, iron-stone, slate or other minerals lying under the land, or any particular portion of the land, except only such parts of the mines and minerals as it may be necessary to dig or carry away, or use in the construction of the work for the purpose of which the land is being acquired, are not needed.

This declaration is made, under the provisions of section 6, Act I of 1894, and section 3, clause (1), Act XVIII of 1895, to all whom it may concern.

J. G. H. GLASS,
Secy. to the Govt. of Bengal.

No. 172.—Notification—The following notification issued by the Government of India, in the Public Works Department, is republished for information

J. G. H. GLASS,
Secy. to the Govt. of Bengal.

No. 524, dated the 18th December 1896—The following is published for general information:—

No. 951R.T, dated Calcutta, the 16th December 1896.

RESOLUTION—By the Government of India, Public Works Department.

General Rules of 1895 for working railways open for traffic

READ—

Section 47 of the Indian Railways Act, 1890

Government of India, Public Works Department, Notification No. 118, dated the 21st March 1895, publishing—in the *Gazette of India* of the 23rd March 1895—the Government of India circular No. 6 Railway, dated the 12th March 1895, and the General Rules for all open lines of railway in British India administered by the Government therewith promulgated

Government of India, Public Works Department, Notification No. 257, dated the 28th May 1896, publishing—in the *Gazette of India* of the 30th May 1896—the Government of India circular No. 3 Railway, dated the 22nd May 1896, and the amended rules therewith promulgated

Letter from the Government of Bengal, No. 1129R, dated the 29th October 1896, forwarding letter from the Managing Agents of the Deoghur Railway, No. 1585D., dated the 1st October 1896.

Letter from the Government of Bengal, No. 1352R, dated the 9th December 1896

OBSERVATIONS—The Managing Agents of the Deoghur Railway have applied that the General Rules for working open lines of railway in British India administered by the Government, which have been published under the Government of India, Public Works Department, notification No. 118, dated the 21st March 1895 (*vide the Gazette of India* of the 23rd March 1895), as modified by the Government of India circular No. 3 Railway, dated 22nd May 1896, which was published under Public Works Department notification No. 257, dated the 28th May 1896 (*vide the Gazette of India* of the 30th May 1896), may be made applicable to the Deoghur Railway

RESOLUTION—The Governor-General in Council is pleased to sanction, with effect from the 1st January 1897, the application to the Deoghur Railway of the General Rules, cited in the foregoing observations, for working open lines of railway in British India administered by the Government, in supersession of the rules now in force

ORDER—Ordered that this resolution be published under a notification in Part I of the *Gazette of India*, as required by section 47, sub-section (3) of the Indian Railways Act, 1890, also that the General Rules cited in the foregoing observations—which have already been published in the *Gazette of India*—be kept at railway stations as directed by sub-section (6) of the same section

Ordered, also, that this resolution be communicated to the Government of Bengal, Railway Department, for information and guidance

By order,
G. A. ANDERSON,
Under-Secretary.

MARINE DEPARTMENT.

J. H. GILLILAND, *Offg. Registrar*

SENATE HOUSE;
The 28th December 1896.

NOTIFICATIONS OF THE BOARD OF REVENUE.

No 2390B.

NOTICE is hereby given that the Second Sale of Opium, the provision of 1895-96, will be held at the Government Opium Sale-room, No. 2, Bankshall Street, on Wednesday, the 3rd February 1897, at 11 A.M., and will comprise 3,250 chests, viz.—

Opium manufactured at the Patna Factory	Chests. 1,625
Opium manufactured at the Ghazipur Factory	1,625
Total			3,250

2nd.—The general conditions of the sale now advertised will be the same as usual. They may be ascertained by reference to the Notification issued on the 23rd November 1896 and published in the *Government and Exchange Gazettes*, or on personal application at the Office of the Board of Revenue.

3rd.—The latest dates for deposit and clearance will be the 8th and 18th February 1897, respectively, that is to say, no Bank of Bengal Receipts, Government Promissory Notes or other Public Securities that may be tendered for deposit in redemption of Promissory Notes given by purchasers in the Sale-room will be received after 3-30 p.m. of Monday, the 8th February 1897, and no Bank of Bengal Receipts in full payment of lots will be accepted after 3-30 p.m. of Thursday, the 18th February 1897.

4th.—In addition to the quantity above advertised for sale, the following quantities, more or less, of the Opium manufactured at the Patna and Ghazipur Factories will be brought to sale down to December next about the dates specified below. The Board of Revenue, however, reserve to themselves the right of altering these dates should circumstances render it expedient to do so:—

Total			19,500	19,500	39,000

The following are the conditions of sale —

1.—The opium will be sold for exportation by sea only, and no certificate will be granted except to cover such export.

2.—The opium will be ordinarily offered for sale at an upset price of Rs. 800 per chest, and sold to the highest bidder above that price, except under the circumstances in which provision is made by clause 13 of these conditions of sale. The bids must advance by Rs. 5 at a time.

3.—The sale shall commence at the hour of 11 A.M. of the day fixed by previous notification, and shall not be continued after the hour of 5 P.M., but if at that hour any of the lots advertised for sale shall remain unsold, the sale may, at the discretion of the Board of Revenue, be resumed on the next day following (not being Sunday or a public holiday), at the hour of 11 A.M., and so on until the whole of the remaining lots are disposed of, or, if the whole quantity advertised shall not be sold on the day appointed, the Board of Revenue may dispose of the lots which remain on hand at a future sale.

4.—Each lot shall contain five chests.

5.—A Promissory Note for a sum, calculated according to the scale, noted in the margin, shall be taken as a deposit on each lot from the purchaser in the sale-room and before the lot is registered in the sale-book, and all such Promissory Notes shall be redeemed on the part of the purchasers at this Office by Bank of Bengal receipts or by substitution of other public securities of the Government of India, on or before 3-30 P.M., in the afternoon of the fifth day after the sale, provided it does not fall on a Saturday; if it falls on a Saturday, the said notes must be redeemed by 1-30 P.M., or, on the other hand, failing such redemption by the time aforesaid, then the lot or lots for which no Bank of Bengal receipts or deposit of other public securities as aforesaid shall have been delivered in, shall be re-sold at such time or times and under such conditions of re-sale as the Board of Revenue shall see fit, and all losses and expenses whatsoever attending such re-sale shall be borne and paid by the defaulters, whilst any profit accruing from such re-sale shall be forfeited to Government.

6.—The said Promissory Notes shall be absolutely payable in any event, and the amount thereof shall be absolutely forfeited upon such default as before mentioned, and the amount thereof shall not go or be credited in reduction of any loss on re-sale or expenses thereby incurred, but shall be recoverable whether such re-sale shall be had or not, or whether there shall be a loss on such re-sale or not.

7.—The Promissory Notes taken on the day of sale under the fifth condition, if remaining unredeemed at 3-30 P.M. of the fifth day following the day of sale, or 1-30 P.M., if the last day falls on a Saturday, will be placed in the hands of the Solicitor to the Government for realization in such manner as to him shall seem fit.

8.—No tender of money, Bank of Bengal Receipts, or public securities, on account of opium upon which the prescribed deposit may not have been made before the prescribed time in clause 5 on the fifth day following the day of sale will be afterwards accepted. Provided always that money so subsequently tendered may be taken in payment of the said Promissory Note, but such acceptance of money shall in no way entitle the payer thereof to

any right to delivery of the lot or lots in respect whereof the said note was given, or to any of the rights of a purchaser thereof, or release the payer from liability for any unpaid balance of such notes or from the additional liability for the loss and expenses of such re-sale as provided for in clauses No. 5 and No. 6.

9.—The opium advertised for sale shall be paid for not later than by 3-30 P.M. of the fifteenth day from the day of sale, provided it does not fall on a Saturday; if it falls on a Saturday, the opium must be paid for by 1-30 P.M.; and in case any lots of such opium shall not be so paid for and adjusted, then the cash deposit made under the fifth condition, or any public securities that may have been deposited on account of such lots or chests, shall be forfeited, and the opium shall be disposed of on account of Government at such time and in such manner as the Board of Revenue shall think fit; and the first purchaser shall further be required to make good all expenses and any loss or difference of price between that obtained at the re-sale and the amount at which the opium was first purchased, forfeiting all advantages that may arise from such re-sale, and the liability for the loss or difference of price and expenses shall be in addition to, and wholly independent of, the amount of the deposit so forfeited.

10.—Purchasers taking out certificates or orders for the delivery of opium, after making full payment as above prescribed, shall have the option of naming the number of lots of their purchase, which they may desire to be included in each certificate or order; and it is to be clearly understood that the certificates or orders so taken out shall be considered final, and not at all changeable for other certificates or orders authorizing the delivery of single lots, or of a different number of lots or chests, whether more or less, than the number of lots or chests originally required to be included in each certificate or order.

11.—No deposit of public securities under the fifth of the present conditions will be received in this office except from the party recorded as the purchaser in the sale-book, or his authorized agent. The receipt for deposit of public securities will be granted only in the name of such purchaser, and the securities so deposited will be returned when payment in full has been made by the said purchaser or his order.

12.—The officer superintending the sale on the part of the Government is empowered to reject, at his discretion, the bid of any individual, unless such individual shall on demand render at the time a deposit either in Government of India Notes, Bank of Bengal Receipts, or Government Securities, a sum equal to the amount for which a promissory Note would otherwise be taken under the fifth of these conditions.

13.—With a view to prevent fictitious biddings designed to obstruct the sale, it is hereby notified that the officer of Government superintending the sale shall be competent, at any time during the sale, to withdraw any unsold lot, and immediately to put it up again for sale at a maximum upset price, diminishing the same gradually by Rs. 5 at a time until a bid is obtained; and the first *bond fide* bidder for a lot after it has been offered for sale in the mode here described shall be held and declared to be the purchaser of the said lot, and the officer of Government Superintending the sale shall also be competent to dispose, in the same manner, of as many of the subsequent lots as he may think proper, provided always that no lot shall be sold below the minimum price of Rs. 800 specified in the second of these conditions.

14.—The purchaser of any lot shall have the option of naming and purchasing in immediate succession, at the same price and under the same conditions, any number of lots of the same Agency opium not exceeding altogether twenty-five lots, provided always that there remain a sufficient number of lots of the opium to complete the said twenty-five.

15.—In the event of any dispute or difference touching or concerning any matter or question arising out of the sale of the opium included in this notification, or adjustment of the account thereof, the same shall and may be tried and decided in the High Court of Judicature at Fort William in Bengal.

16.—The following papers will be exhibited for inspection on the day of sale, or may be seen previously to that date by personal application at the Office of the Board of Revenue:—No. 1, certificate of the opium advertised for sale; No. 2, report of the examination of such opium.

17.—The public are hereby informed that in providing the investment of the opium manufactured at the Patna Factory and the opium manufactured at the Ghazipur Factory for the year 1895-96, the same precautions have been taken as those which have been observed during past years to have the drug procured and sent down in a pure state, to have only the prescribed quantity of leaves used in forming the cakes, and to have the due proportion of opium put into each cake. An account of the weight of the drug when packed at the Patna and Ghazipur Factories, and a statement of the average weight of the chests, indiscriminately taken, for the purpose of comparison, from the despatches on arrival at Calcutta, may be seen on personal application at the Office of the Board of Revenue.

18.—Any further information respecting weight or quality of the opium advertised for sale, that may be desired by parties connected with the trade, will, as heretofore, be furnished to them on personal application at the Office of the Board of Revenue. But, in accordance with established usage, under no circumstances will the Board of Revenue entertain or recognize any claim to compensation for loss from any alleged deficiency of weight, abstraction of opium, or adulteration of the drug, which may be preferred on reference to chests after the sale and delivery of the opium for shipment.

By order of the Board of Revenue, L. P.,

E. H. WALSE,
Secretary.

FOR WILLIAM, the 28th November 1896.

No. 2193B.

NOTICE is hereby given that the First Sale of Opium, the Provision of 1895-96, will be held at the Government Opium Sale-room, No. 2, Bankshall Street, on Monday, the 4th January 1897, at 11 A.M., and will comprise 3,250 chests, viz.—

Opium manufactured at the Patna Factory	Chests	1,625
Ditto ditto at the Ghazipur Factory	1,625
Total				...	3,250

2nd.—The general conditions of the sale now advertised will be the same as usual. They may be ascertained by reference to the Notification issued on the 28th November 1896, and published in the *Government and Exchange Gazette*, or on personal application at the Office of the Board of Revenue.

3rd.—The latest dates for deposit and clearance will be the 9th and 19th January 1897, respectively, that is to say, no Bank of Bengal Receipts, Government Promissory Notes, or other public securities that may be tendered for deposit in redemption of Promissory Notes given by purchasers in the sale-room will be received after 1-30 P.M. of Saturday, the 9th January 1897, and no Bank of Bengal Receipts in full payment of lots will be accepted after 3-30 P.M. of Tuesday, the 19th January 1897.

4th.—In addition to the quantity above advertised for sale, the following quantities, more or less, of the Opium manufactured at the Patna and Ghazipur Factories will be brought to sale down to December 1897 about the dates specified below. The Board of Revenue, however, reserve to themselves the right of altering these dates, should circumstances render it expedient to do so:—

H. H. RISLEY,

Secretary to the Govt. of Bengal

RENT OF POUNDS AND FERRIES.

81 Private and substantially bound registers shall be kept in Form XII (a) to watch the realisations of rents due from the farmers of pounds and ferries. The registers shall be opened by bringing forward all arrears due from farmers whose leases have terminated and have not been renewed. The entries shall be made serially, one below the other, so that the total demand and realisations can be ascertained by totalling the vertical columns. The only columns on the demand side of the register which need be filled in for these arrear accounts are 1, 2, 3, 7, 24 and 26, and the demands should be separately grouped according to the years for which the arrears are due. If, however, the number of arrear accounts is large they may be recorded in a separate register of arrears in Form XII (b), but if this is done, the total realisations of each month shown in this register must be added at the foot of the monthly realisation columns in the register of current leases, Form XII (a), so that the total collections in the latter form may agree with the monthly figure in the abstract register of receipts.

82. Below the arrear demands due by defaulters [if these are shown in Form XII (a)] shall be entered the demands for current leases. These should be grouped so that all the pounds or ferries subject to the control of each Local Board come together, and sufficient space should be left after each group to insert any fresh leases granted during the year. A grand total shall, however, be made of the whole demand, arrears as well as current, and the realisations of each month. The entries in columns 1 to 6 and 8 to 25 shall be made from the *kabulyat*, and the Vice-Chairman shall place his initials in column 26 in token of having checked the entries. The balance to be shown in column 7 for addition to the current year's demand shall be taken from the previous year's account. Such entries will occur only when a lease is granted for a longer period than one year, or when, on the termination of the lease, the same pound is relet to the former lessee.

83. Since the amount of the security is added to the demand of the current year, it will be shown in column 8 only at the commencement of the lease, that is, when the period shown in column 6 is the same as that in column 5. If the security is trerched upon during the currency of the lease, it will be at once apparent by the collections falling short of the demand. It must, however, be remembered, in regard to the security, that it is a payment in advance of one quarter's rent, the demand will therefore be fully satisfied if nine monthly instalments (supposing the instalments to be equal) are paid. Accordingly, in the year in which the lease terminates no demand will be shown in columns 21, 22 and 23, and the same figure will appear in column 24, "due at the end of the year," as in column 20, "due at the end of the third quarter." For continuing leases, when the period to run, shown in column 6 exceeds one year, the demands for the last three months must always be recorded. If the monthly instalments are not equal, it must be arranged that three-fourths of the demand is to be paid during the first nine months of the year, and one-fourth in advance as security.

NOTE.—A separate column for each month is shown on the demand side of Form XII (a) to provide for cases in which the lessee contracts to pay by monthly instalments of varying amounts. If the instalments are equal, the quarterly demands only need be shown for comparison with the quarterly collections.

84. When a lease is cancelled, owing to the lessee failing to act up to the terms of his agreement, and the pound is resold, the demand up to date should be worked out and entered in column 24 as the demand for the year. If, however, there is any loss on the resale, this also must be added to the demand recoverable from the former lessee. Should the collections already made be greater than the demand so recorded, the difference should be refunded to the original lessee, the payment being noted in column 47.

85. The realisations shall be posted in the monthly columns 27 to 42 on the collection side of the account. The entries shall be made from the *challans*, and progressive cross totals shall be struck in columns 31, 35, 39 and 43. The rents paid shall be entered in the column for the month in which they are received, and not for that in which they are due. All realisations made, whether on due date, in arrears, in advance, or as security, shall be treated alike and credited as rent in the cash-book. Consequently, the total of each monthly column must agree with the receipts for the month under the head "Rent" in the abstract register of receipts. As, however, the security to be received in advance is usually paid in the March of the previous year, two columns for March are provided in the form. The first, No. 27, shall show all advances made during the last month of the previous year on account of the

demand of the current year, and in the second. No 42, shall appear all receipts during the last month of the current year in satisfaction of that year's demand. Consequently, to effect an agreement for the month of March with the abstract register of receipts, it will be necessary to add to the total of column 27 of the current year's register the total of column 42 of the previous year's register. The Vice-Chairman shall sign, at the foot of each of the monthly realisation columns, in token of having compared the total with the abstract register of receipts and the details with the chalang or cash-book.

86. At the close of the year the arrear balances shall be arrived at by adding the remissions, which shall be sanctioned by the District Board at a meeting, to the progressive total of the collections, column 43, and deducting the sum, column 45, from the demand for the year, column 24. The total of the figures shown in the balance, column 46, shall agree with the total of column 7 of the next year's return, or, if Form XII (b) be used, the total of column 46, Form XII (a), and column 24, Form XII (b), shall agree with the totals of column 7 of Form XII (a) and column 4 of Form XII (b).

87. Forms XII (a) and XII (b) shall be kept by the District Board, whether it has direct control of the pounds or ferries, or has placed them under the charge of the Local Boards, but in the latter case duplicate registers shall be kept by the Local Board, and these shall be prepared and checked in accordance with the instructions in rules 81 to 86 above. Directly the settlement for the year has been made by the Local Board, a copy of the sale list, accompanied by the kabulyats in original, shall be forwarded to the District Board. The following particulars must always be given, viz, (1) name of pound, (2) name of farmer, (3) term of lease, (4) security to be paid in advance, (5) annual rent, and (6) instalments in which payable. At the close of each quarter a return in Form XII (c) shall be submitted to the District Board by each Local Board. In this form the arrears due on expired leases should be grouped separately by the year [as in Forms XII (a) and XII (b)], and below these should be entered the current leases. These returns will inform the District Board of the action taken in regard to arrears. The details of the demands and collections shall also be carefully compared with those recorded in the register maintained by the District Board, and any discrepancies shall be immediately reconciled.

Collector's Office, Puri, the 2nd October 1896.

O. A. BELL, Offg. Collector.

Advertisement of Sale.

NOTICE is hereby given that the proprietary right of Government, as specified in the conditions of sale below, to the undermentioned estate situate in the district of Puri will be put up to sale at the Puri Collectorate on the 28th of April 1897, corresponding with 17th Bysack 1304 Uml: —

Conditions of Sale

- 1st.—The estate to be sold to the highest bidder above the upset price which will be fixed by Collector at the time of sale. The purchaser of this estate will be considered as the proprietor of the estate, and the entire proprietary right of Government in such estate will be transferred to him subject to the revenue fixed in perpetuity.
- 2nd.—The sale to be subject to existing leases and to the rights conferred by the settlement proceedings and by the laws in force, and purchasers to be bound to respect the rights of resident cultivators who have signed the schedule of assessment prepared by the revenue authorities.
- 3rd.—If the amount of purchase money do not exceed Rs. 100, the whole amount to be paid down at once.
- 4th.—If the amount of purchase money exceed Rs. 100, one fourth of the amount bid to be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or, if that day be a close holiday, then by noon of the first succeeding office day, the sale is to be cancelled (the sum deposited being forfeited to Government), and the estate to be again put up to sale at the risk of the defaulting purchaser after issue of advertisement as in the case of original sale.

Alipore, the 14th December 1896

POORNO CHANDRA CHATTERJEE, for Collector.

NOTICE is hereby given, under sections 6 and 13, Act XI of 1859, that the undermentioned estates and shares of estates in the district of Shahabad will be put up for sale at the office of the Collector of that district on the 11th January 1897 at 11 A.M. for arrears of revenue and other demands which by law are realizable as arrears of land revenue.

When in columns 5, 7 and 9 of the statement it is stated that only a share is to be sold, it is to be understood that a separate account is kept for that share, and that the other share or shares in the estate are excluded from the sale.

Patna Collectorate, the 18th December 1896.

ILLEGIBLE, for Collector.

Advertisement of Sale.

NOTICE is hereby given that the right and interest of Government, as specified in the conditions of sale below, to the undermentioned property situate in the district of Bankura, will be put up to sale on the spot by the Sub-Deputy Collector of Vishnupur on the 23rd January 1897, corresponding with the 11th Magh 1308 B.S.

The purchasers will be subject to the following conditions of sale —

Conditions of Sale.

- 1st —The property to be sold to the highest bidder above the upset price, which will be fixed by the Sub-Deputy Collector at the time of the sale. The purchaser of the property will be considered to have acquired the right and title of Government in the property, and they will be transferred to him, subject to the rent fixed in perpetuity.
- 2nd —The sale to be subject to existing leases and to the rights conferred by settlement proceedings and by the laws in force.
- 3rd. —If the amount of purchase-money do not exceed Rs 100, the whole amount to be paid down at once.
- 4th —If the amount of purchase-money exceed Rs 100, one-fourth of the amount bid to be immediately deposited. If the balance is not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or, if that day is a close holiday, then by noon of the first succeeding office day, the sale is to be cancelled (the sum deposited being forfeited to Government), and the property to be again put up to sale at the risk of the defaulting purchaser after issue of advertisement, as in the case of original sale.

Number on the district roll.	Description of property and pargana	Approximate area in acres	Government revenue assessed	REMARKS.
1	2	3	4	5
	(1) 4 bighas of rent-free land lying on the east, north and south of Gofoor Sheik's homestead land and on the west of Kisu Hazari's land in mauza Pearbera, thana Sonamukhi, pargana Barohazari, district Bankura.	A B P YD 1 1 11 17½	..	The property was acquired by Government at certificate sale, and the right and title of the judgment-debtors in the lands and tanks are to be sold.
	(2) 2 bighas of rent-free land lying on the north and east of Mohar Sheik's land, west of Hamu Mandal's land, south of Dhonoo Mandal's land in mauza Pearbera, thana Sonamukhi, pargana Barohazari, district Bankura.	0 2 25 23½		
	(3) 3½ bighas of mukarrari land lying on the south of Godadhor (cattle-path), north of Manulla Sheik and other's land, west of Zamindar Mandal's garden and east of Darsoo Sheik and other's land in mauza Samantabera, thana Sonamukhi, pargana Barohazari, district Bankura.	1 0 16 26

Price Rs. 20 for 1895-96. Published at the Calcutta Custom House. Previous years' volumes can also be obtained at the same price.

NOTICE TO SUBSCRIBERS.

SUBSCRIBERS to the *Calcutta* and *Bengali Gazettes* and *Indian Law Reports* are hereby informed that unless the amount of their subscription for 1897 is received before the 31st December 1896, it will be concluded that the Gazettes and Reports are no longer required, and the supply will accordingly be discontinued from 1st January 1897.

All remittances should be made direct to the Accountant and Treasurer, Bengal Secretariat, Calcutta, by means of money-orders. No postage stamps or stamps of any other kind will be received in payment of subscriptions.

The correct address of the subscriber should be legibly written on the money-order coupon, and the period for which the subscription is paid should also be stated. Omission to note these particulars will involve considerable delay.

B. FOLEY,

Under-Secy. to the Govt. of Bengal.

The 24th November 1896.

The Indian Law Reports.

Published under Authority.

THE Indian Law Reports, published under the authority of the Governor General in Council, appear in monthly parts, published as soon as possible after the first of each month at Calcutta, Madras, Bombay, and Allahabad and comprise four series—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat Book Depot, and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad respectively.

In supersession of the previous advertisements, on and from the 1st January 1897 the terms of subscription and sale will be as follows for current issues as well as for back numbers of the Reports from 1876—

Terms of subscription payable annually in advance.

For the complete series including postage, Rs 22-8.

Remittances to be forwarded to the Accountant and Treasurer, Bengal Secretariat, Writers' Buildings, Calcutta.		

All the wanting parts of the **INDIAN LAW REPORTS** (complete series) having now been reprinted, the complete Reports from 1876 to 1893 may be purchased for all the years, or for any particular year, on application to the Officer in charge of the Bengal Secretariat Book Depot.

The subscription, Rs. 22-8 per annum, should be remitted in advance to the Accountant and Treasurer, Bengal Secretariat.

Notice

It is hereby notified, for general information, that subscription to the complete series of the Indian Law Reports should be registered during the first three months of each calendar year. Subscribers are therefore requested to send in their subscriptions of the complete series before the 31st March in each year. Those who register their names after that date will understand that copies will be supplied only if available.

THE following Weather Reports of the Bengal Meteorological Department, issued by orders of the Government of Bengal, can be supplied to the public at the prices annexed

1st.—Bay of Bengal Daily Weather Report, giving meteorological observations taken at 23 stations on or near the coast of the Bay, with a chart and summary. This is published in connection with the Bay of Bengal Storm Signal Service. The report giving 8 A.M. observations of the day is distributed by post in Calcutta soon after 11 A.M. Price to subscribers in Calcutta Rs. 2 per quensem, payable in advance up to 30th April 1897.

This report will be issued every year from 1st November to 30th April. From 1st May again the Bay of Bengal and Bengal Report containing observations taken at 64 stations will be issued.

2nd.—A Monthly Statement of Meteorological Observations taken at 49 observing stations, and of rainfall recorded at 327 subdivisional and other stations, together with summaries of the more important features of the meteorology of the past month of the province, and of the distribution of the rainfall and its variation from the normal. Price of the Monthly Summary Rs. 2 per annum, payable in advance.

Subscriptions payable to the Meteorological Reporter to the Government of Bengal, 5, Russell Street, Calcutta, for the Bay of Bengal Daily Weather Report, and to the Accountant and Treasurer, Bengal Secretariat, for the Monthly Report.

C. LITTLE,

Meteorological Reporter to the Govt. of Bengal

Notice.

NOTICE is hereby given that the terms for the purchase of publications from the Bengal Secretariat Book Depot except for Government offices or offices under the control of Government Officers are strictly cash, and on no other terms will any publication be supplied, or advertisement, notice, &c. inserted in either of the Gazettes.

In the case of non-remittance notices, cash must be sent with such notices when forwarded by Mofussil courts or offices and for those forwarded by the Official Assignee cash must be paid on presentation of memorandum of cost by the Accountant and Treasurer, Bengal Secretariat.

Remittances in postage stamps should be accompanied by an addition of one anna in the rupee on account of discount.

Applications for Acts of the Bengal Legislative Council required on the public service should be addressed to the Registrar, Office of the Legislative Department, Government of Bengal. Copies are available for purchase at the Bengal Secretariat Book Depot.

INDIA, SOUTH—CEYLON COAST

Colombo—Regarding the light at extremity of N-E Breakwater.

With reference to Notice to Mariners No. 212, dated 12th November 1895, issued by this office, the British Admiralty has given further notice (No. 677 of 1896) that further information has been received that the pile light (*white*) mentioned in that notice was not exhibited.

Also, that, on 1st October 1896, a sixth order, dioptric, *green* lantern light would be shown from the western end of the staging of the North-east breakwater, now in course of construction

This breakwater extends in a S. 82° W. direction, for a distance of 450 yards, from the western side of Mutwal point.

Approximate position, on plan No 914, light, lat 6° 57' 55" N., long. 79° 51' 15" E
(Variation 1° Easterly in 1896)

B. P. CREAGH, Comdr., R.N.,
Port Officer of Calcutta.

Banka strait—Alterations in buoyage

THE British Admiralty has given Notice (No. 678 of 1896) that the undermentioned alterations have been made in the buoyage of Banka strait, to bring it into accordance with the uniform system of buoyage adopted in the fairways of the Netherlands East Indies:—

1. The buoy marking Kalian ledge has been replaced by a *can* buoy, painted black, and surmounted by a truncated cone, moored on the west side of the ledge
Approximate position, lat. 2° 4' S, long 105° 7½' E
2. The buoy marking the shoal at the north-west end of Nemesis bank has been replaced by a *spherical* buoy, painted red and black in horizontal stripes, and surmounted by an upright cross
Approximate position, lat. 2° 52½' S, long 105° 59½' E.
3. The two buoys marking the eastern side of Stanton channel have been replaced by two *can* buoys, painted black, each surmounted by a truncated cone.
Approximate position, south-east buoy, lat 3° 1½' S, long. 106° 19' E

4. The two buoys marking Round shoal and Merapi, Lucipara passage, have been replaced by two *can* buoys, painted black, each surmounted by a truncated cone

Approximate position, Round shoal buoy, lat. $3^{\circ} 7\frac{1}{2}'$ S., long. $106^{\circ} 6\frac{1}{2}'$ E

- 5 The topmark of the buoy (red *nun*) marking Frederick Henry rocks, northern entrance to Banka strait, has been altered to a ball.

B. P. CREAGH, *Comdr.*, R.I.M.,
Port Officer of Calcutta.

Cheruchup bay—Rocks near Karang Baka

WITH reference to Notice to Mariners No. 172, dated 1st September 1896, on a rock (Sri Billitong) northward of Karang Baka, issued by this office, the British Admiralty has given further notice that an examination has recently been made of the locality with the undermentioned result —

- 1 Sri Billitong rock has a depth of 2 fathoms on it at low water springs, and is situated about three-quarters of a mile northward of its reported position, or with Kalmoa beacon, entrance to Cheruchup river, bearing S. 36° E., distant $6\frac{7}{8}$ miles; and northern extreme of Tanjong Bienga N. 52° E.

Approximate position, lat. $2^{\circ} 39' 10''$ S., long. $107^{\circ} 33' 30''$ E

- 2 A coral rock, with a depth of $2\frac{1}{2}$ fathoms on it at low water springs, was found west-south-westward of Karang Baka, in a position with Kalmoa beacon bearing S 57° E, distant 5 miles; and Kelmanbang summit S. 6° W.

The black *nun* buoy, surmounted by a ball, previously moored on the south-west side of Karang Baka, has been moved to the south-west side of this rock.

- 3 A small coral rock, with a depth of $4\frac{1}{2}$ fathoms on it at low water springs, was found midway between the rock (2) and Karang Baka.

AUSTRALIA, SOUTH COAST—PRINCESS ROYAL HARBOUR

Alterations in buoyage

THE British Admiralty has given notice (No. 683 of 1896) that the undermentioned alterations have been made in the buoyage of Princess Royal harbour —

1. The colour of the buoy, moored N.W. $\frac{1}{4}$ N, distant nearly 2 cables, from the extremity of the Railway jetty, has been altered from black to red.
Approximate position, lat $35^{\circ} 2' 30''$ S, long. $117^{\circ} 54' 20''$ E
2. The colour of the buoy, moored S.S.E. $\frac{1}{4}$ E, distant $4\frac{1}{2}$ cables, from the extremity of Hanover bay jetty, has been altered from white to black.
3. A new buoy, painted black, has been moored in a position with the extremity of Hanover bay jetty bearing N.W. $\frac{1}{4}$ N, distant 3 cables; and the extremity of Coal jetty E.N.E
4. A new buoy, painted red, has been moored in a position with the extremity of Hanover bay jetty bearing N.W, distant $1\frac{1}{2}$ cables; and Wakefield point N.N.E $\frac{1}{4}$ E.
5. The black buoy, the white buoy and the black buoy, previously moored, respectively, S.S.E. $\frac{1}{4}$ E, distant $2\frac{1}{2}$ cables; S. by E $\frac{3}{4}$ E, distant $1\frac{1}{2}$ cables; and S.E. $\frac{1}{4}$ E, distant one cable; from the extremity of Hanover bay jetty, have been withdrawn.

AFRICA, NORTH-EAST—RED SEA, WESTERN SHORE.

Mahommed Ghul—Sunken rock in Raweiyah anchorage.

THE British Admiralty has given notice (No. 684 of 1896) of the existence of a rock, with a depth of 25 feet on it at low water and 6 fathoms close around, situated on the east side of Raweiyah anchorage in a position with the western point of Engineer island bearing about S.E. $\frac{1}{4}$ E, distant $1\frac{1}{2}$ miles, and Mahommed Ghul flagstaff W by S. $\frac{1}{4}$ S.

Approximate position, lat. $20^{\circ} 55' 5''$ N., long $37^{\circ} 12' 30''$ E

A rock marked 4 fathoms has been placed in the above position on the Admiralty Chart, with P D against it, as the survey on which the chart is based is only a rough one.

NOTICE TO MARINERS,—No 262

[First Publication.]

AFRICA, EAST COAST—DELAGOA BAY.

Shoal spot reported southward of Timpson point

THE British Admiralty has given notice (No 685 of 1896) that the Master of the steam-vessel *Transaal* reports having touched (8h 30m A.M., 6th October 1896) on a shoal spot, with a depth of $2\frac{1}{2}$ fathoms on it at low water, and 3 fathoms around, situated in a position with Timpson point (Sheffna island) beacon bearing N 9° E, distant nearly 2- $\frac{1}{2}$ miles, and south extreme Reuben point N. 71° W.

Approximate position, lat. $25^{\circ} 58' 40''$ S, long. $32^{\circ} 42' 10''$ E.

H.M.S. *Blonde* afterwards ran a line of soundings over this spot, with Reuben point on the bearing given above, and obtained nothing less than 3 fathoms of water, but as the shoal is said to be a narrow ridge, it is very probable it will only be found after a close examination.

Port Adelaide river—Erection of new beacons.

WITH reference to Notice to Mariners, No 189, dated 15th September 1896, issued by this office, the President, Marine Board, Port Adelaide, has given further notice (No. 5 of 1896) that pursuant to Notice to Mariners, No 3 of 1896, in connection with the scheme for lighting the river by electricity, that the new beacon referred to therein has been erected on the edge of the deep-water cutting, about 600 feet in a north-easterly direction from the site of No 10 light beacon. A white light is now shown from the new beacon, and that on No 10 beacon, which has been removed, discontinued.

A new beacon is being erected between Nos. 10 and 11 beacons, near the position of the red perch buoy, and opposite the red pile beacon with diamond-shaped head. During the erection of this beacon a white riding light will be exhibited from a barge moored alongside of the structure.

Charts affected, Nos. 2389 A and B, plan 1750

Amended particulars of Tannadice rock.

THE British Admiralty has given notice (No 666 of 1896), with reference to Notice to Mariners, No. 320 of 1892, and previous Notices, on Tannadice rock, originally reported by the Master of the steam-vessel *Tannadice* in 1883, that an examination of the locality has recently been made by Lieutenant and Commander W. V. Howard, H.M. Surveying Vessel *Dart*, with the undermentioned result.—

Tannadice rock has a least depth of 5 feet on it at low water ordinary springs, and is steep-to on its northern side, whilst in a S.E. direction, a coral shoal, 4 cables broad, with depths of 3 to 7 fathoms on it and 10 to 16 fathoms close around, stretches from the rock for a distance of $6\frac{1}{2}$ cables.

From the rock, Restoration island, eastward of Cape Weymouth, bears N. 59° W, distant $4\frac{1}{2}$ miles; and south extreme Lloyd island S. 38° W.

Approximate position, lat. $12^{\circ} 39' 50''$ S., long. $143^{\circ} 31' 15''$ E.

(2) *Extension of shoal ground northward of Cape Direction.*

Also, that Lansdown reef extends nearly a mile further northward than previously shown on the charts:—

From its northern extreme, where the depth is 2 fathoms, with 9 to 10 fathoms close to the northward, Cape Direction summit (500) bears S. 12° W, distant 4 miles, and Wye (y) reef beacon S 85° E

From the northern extreme, the eastern edge of the reef trends S 42° E, for a distance of 6 cables, and then S 31° E for a distance of 1½ miles

Approximate position, northern extreme Lansdown reef, lat. 12° 48' 10" S, long 143° 38' 25" E.

Shoals reported near Thistle island

THE British Admiralty has given notice (No. 670 of 1896) that information has been received from Captain F W Fisher, R.M.S. *Orlando*, dated 1st October 1896, that a fisherman at Port Lincoln has reported that he often fishes on the undermentioned dangers, which only break in southerly gales —

- 1 A shoal, with a depth of about 12 feet on it, situated about S.S.E., distant 2½ miles, from Dangerous reef, or approximately in lat. 34° 51½' S., long 136° 13½' E.
2. A shoal with a depth of about 4 fathoms on it, situated about S.S.E., distant 2 miles, from Hopkins island, or approximately in lat 35° 0' S., long 136° 4½' E.

Both these shoals have been marked *P D* on the Admiralty Charts

AUSTRALIA, SOUTH WEST COAST—CAPE LEEUWIN

Regarding establishment of a light on the Cape

WITH reference to Notice to Mariners No. 20, dated 18th January 1896, issued by this office, the British Admiralty has given further notice (No. 655 of 1896) that only one light will be established at Cape Leeuwin, instead of a main light and an auxiliary light; and also that the light will be exhibited for the first time on 10th December 1896 —

Cape Leeuwin light will be a first order, dioptric, flashing white light every five seconds, thus:—flash, a fifth of a second, eclipse, four and four fifths seconds, it will be elevated 185 feet above high water, (illuminating power 140,000 candles), and visible from a distance of 20 miles in clear weather

The lighthouse is a cylindrical, stone tower, 125 feet high, situated on the southern summit (48) of Cape Leeuwin.

Approximate position on Chart No. 413, lat 34° 21' 51" S, long 115° 8' 0" E

CAUTION.—Mariners are reminded that the dangerous Geographie reef lies 8 miles to the N.W. by W. ½ W. of this light, and that, powerful as the light is, it will be unsafe, with the weather at all thick, to stand in with the intention of making it. Mist also may hang about the land when clear to seaward

Abstract of the Proceedings of the Council of the Lieutenant-Governor of Bengal, assembled for the purpose of making Laws and Regulations under the provisions of the Indian Councils Acts, 1861 and 1892.

The Council met at the Council Chamber on Saturday, the 19th December, 1896.

Present:

The Hon'ble SIR ALEXANDER MACKENZIE, K.C.S.I., Lieutenant-Governor of Bengal, *presiding*.

The Hon'ble SIR CHARLES PAUL, K.C.I.E., *Advocate-General*.

The Hon'ble H. H. RISLEY, C.I.E.

The Hon'ble RAI DURGA GATI BANERJEE BAHADUR, C.I.E.

The Hon'ble NAWAB SYUD AMEER HOSSEIN, C.I.E.

The Hon'ble M. FINUCANE.

The Hon'ble C. W. BOLTON.

The Hon'ble W. H. GRIMLEY.

The Hon'ble J. G. H. GLASS, C.I.E.

The Hon'ble C. A. WILKINS.

The Hon'ble MAULVI MUHAMMAD YUSUF KHAN BAHADUR.

The Hon'ble SURENDRANATH BANERJEE.

The Hon'ble RAI ESHAN CHUNDRAN MITTRA BAHADUR.

The Hon'ble GURU PROSHAD SEN.

The Hon'ble W. B. GLADSTONE.

The Hon'ble A. H. WALLIS.

NEW MEMBER.

The Hon'ble C. A. WILKINS took his seat in Council.

STATEMENT OF THE COURSE OF BUSINESS.

The Hon'ble THE PRESIDENT said :—

"It may be convenient that I should say a few words regarding the work that will occupy the time of the Council. First on the list is a Bill to amend the Bengal Local Self-Government Act of 1885. Hon'ble Members will remember that the Hon'ble Mr. RISLEY mentioned at the last Session that it was not intended to proceed with the small measure which appears on the list of business, and you are all well aware that a larger measure has been in circulation, and that many opinions have been received regarding it, and that correspondence with the Government of India is at present going on in connection with it. I am not in a position to say when we shall be able to bring that measure before the Council. It, together with a Bill to make better provision for the sanitation of certain villages in Bengal, will be carefully considered by the Government with reference to the opinions which have been received, and it is possible that some time in the course of the Session we shall be able to introduce a Bill and take the question up.

"The next is a Bill to amend the law relating to the Partition of Estates. We have received many valuable and important opinions, and I think it very probable, with reference to those opinions, that some material changes may be made in the provisions of this measure. It will have to be referred to a Select Committee, but possibly before so referring it we shall be in a position to state the direction of the changes which we are ready to accept in the provisions of the measure.

"The Bill to amend the Public Demands Recovery Act, 1895, has been referred to a Select Committee, and regarding it also a mass of opinions has been received, and I have no doubt that they will receive the careful attention of the Select Committee.

"These are the only measures now actually before the Council. With regard to projects of law, the first on the list is a measure for amending the Bengal Tenancy Act. Hon'ble Members may be quite sure that I have not undertaken an amendment of the Bengal Tenancy Act except under the pressure of absolute necessity. The Government of India and the Government of Bengal are, I am happy to say, in accord with regard to the provisions of this amending Bill, and it is at present before the Secretary of State. I am not therefore in a position to announce definitely the nature of the measure, but I feel very sanguine that when it is introduced it will command a very large amount of assent, not only from those interested in the Government work of settlement, but also from the landed interest and those concerned in the welfare of the Bengal riyat.

"We hope to introduce very shortly a Bill to consolidate and amend the law in force in Bengal relating to the Excise Revenue. It has yet to be submitted to the Government of India for approval, but I have no doubt we shall be able, before the close of the Session, to bring the Bill before the Council and the public.

"A small Bill to amend the Calcutta Municipal Consolidation Act, 1888, was referred back to the Corporation for opinion in July last, and has not yet come back to us. The main object of the Bill is to amend one of the Schedules to the license clauses of the Act, and to correct a slight ambiguity in some of the building regulations. It is perhaps not altogether to be regretted that the Corporation have not yet taken up the consideration of the draft Bill, because it is very probable that considerable amendments in the Act will have to be considered by the Government.

"A Bill to amend the Salt Laws in Bengal has been referred to the Government of India, and I hope very shortly to receive their assent to its introduction.

"The Secretary has also prepared a Bill for further shortening the language used in Acts of the Lieutenant-Governor of Bengal in Council, and for other purposes. As Hon'ble Members are aware, the General Clauses Act in Bengal is a very ancient measure, dating back to the year 1867, and is an extremely meagre enactment. The object of the new Bill is to enact once for all

certain definitions and general clauses which are found to be necessary more or less frequently in the Acts of this Council. This Bill will supersede the Act of 1867. The Government of India have a similar Bill under consideration, and we propose to wait and see their Bill before introducing our own.

"Then there is a small Bill to enlarge the scope of the charitable trust created by the Will of the late Mrs. Sally Murray. The object and intention of that Bill will be explained to you shortly.

"We have also ready for introduction, or nearly ready for introduction, a Bill to regulate the enhancement of rents, the commutation of preclial conditions or services, and the registration and resumption of dependent taluks and tenures in parts of Chota Nagpur. For years past there have been agrarian disputes between landlords and tenants there in consequence of the excessive demands by the former of *beth-begari* or labour rents, and of *rakumats* or cesses, and of the refusal in some cases of the raiyats to render any services at all. The chief object of the Bill is to remove such causes of dispute by providing for the compulsory commutation of services into money-rents, whenever such a course may seem expedient to Government. The Bill also provides for the registration of tenures and the resumption, in accordance with local custom, of such tenures as are held conditionally on the survival of male heirs of the original grantee. When this Bill is passed, it is proposed to extend the Bengal Tenancy Act, with certain modifications, to Chota Nagpur. We are fortunate in having with us the Hon'ble Mr. Grimley, who, as Commissioner of Nagpur for many years, is thoroughly acquainted with local conditions, and who will be able to take charge of the measure with an authority that none of the rest of us can pretend to.

"Then there may be a Bill for the suppression of rani-gambling in Calcutta. Opinions differ as to the expediency or possibility of legislating in this direction, and I have yet to submit my views to the Government of India. I have therefore caused a Bill to be drafted on lines which it is hoped will avoid many of the objections taken to legislation of that description. There is a strong body of opinion in Calcutta in favour of such legislation, for which we have an example in Bombay. I have yet to lay the Bill before the Government of India, but I am not without hope that the Bill, if introduced, will be found open to very little objection."

The Hon'ble Mr. RISLEY said.—"The Council will remember that at the Meeting of the 1st August last, the following questions were asked by the Hon'ble Babu Guru Proshad Sen.—

Question No. III.

'Whether or not the District Board of Saran have, by a supplementary budget for the year 1895-96, sanctioned an expenditure of Rs. 36,068 for the purchase of that portion of the lands of Sonapur, in district Saran, which is yearly occupied, according to a letter of the Commissioner of the Patna Division, dated 1st December, 1894, published in the newspapers, "by the camps of the native gentry and European visitors" during the annual fair at Sonapur, and with respect to which the Hon'ble Mr. Risley, in his letter to the Commissioner, dated 16th July, 1895, also published in the newspapers, said "considering the immense demands on the funds of a District Board for roads, schools, hospitals, drainage, water-supply, &c, the Lieutenant-Governor hesitates to sanction such an expenditure on an object which is not of pressing importance, and which is mostly for the use of European visitors, and which benefits them only for a fortnight in each year"?'

'Whether the sanction of the District Board was not only provisional and subject, under Rule 40, Part IX of the rules passed by Government under section 138 of Act III of 1885 (B.C.), to the confirmation and approval of the Local Government, and whether the Local Government did confirm and approve of the provisional sanction of the District Board for this expenditure?'

Question No. IV.

'Whether, on account of this expenditure, necessary expenditure on roads previously sanctioned has not been curtailed? And whether, on this account,

the metalling and repairs of an important road from Siwan to Gopalganj subdivision could not be undertaken during the year ?

Question No. V.

'Whether under clause 3, section 100, head Miscellaneous, under which District Boards are empowered "to hold within their district from time to time fairs and exhibitions of cattle, &c, and incur expenditure with the approval of the Commissioner," apply to acquisition of lands, as the Hon'ble Mr. Risley, in his letter quoted above, says "mostly for the use of the European visitors and which benefits them for a fortnight in each year" in such an old and well-established fair as the one held at Sonepur ?'

Question No. VI.

'The letter of Mr. Forbes, Commissioner of the division, referred to above, states — "The desirability of the retention of the site in question in the hands of the District Board is set forth in the accompanying copy of a note on the subject by yourself when Magistrate-Collector of the district of Saran, with which I need scarcely say that I entirely agree." Was this note drawn up after the sanction of the District Board was obtained, or before ?'

Question No. VII.

'Whether or not a member of the District Board, at the meeting when this amount was sanctioned by the District Board provisionally under the rules, did propose an amendment to the effect that the expenditure on the purchase of the Sonepur lands be postponed until the District Board debts were paid off? Was this proposal also submitted to Government? Did the Government enquire whether there was such debts owing by the District Board ?'

"I said at the time that replies to the questions would be given hereafter when the result of certain enquiries was known. I have now the honour to reply as follows:—

Answer to Question No. III.

"It is not the case that Rs. 36,068 was provided in a supplementary budget for 1895-96 for the acquisition of certain land at Sonepur by the Saran District Board. Sums amounting to Rs. 21,870 were made available during 1896-97, and it was resolved that the balance necessary to make up the total expenditure of Rs. 32,213 should be provided during 1897-98. The quotation from my letter of the 16th July, 1895, is misleading, as it omits the closing sentence, which follows immediately on that quoted in the question, and is to the following effect — 'If, however, after deliberate reconsideration, the District Board persists in its proposal, and you support it, the Lieutenant-Governor will accord his sanction.' The District Board did reconsider the question, and their sanction, which, under the rules cited, is provisional, was, on the further representation of the District Board, supported by the Commissioner, confirmed by Sir Charles Elliott."

Answer to Question No. IV:

"No necessary expenditure on roads has been curtailed. The road believed to be referred to in the question is not of special importance, and the expenditure on it has not been affected by the acquisition of the land at Sonepur. The requisite improvements have for the most part been already carried out, and will be completed during the current year."

Answer to Question No. V.

"The District Board acted not only under section 100 (3) of the Act, but also under section 87, which empowers a District Board to provide for the proper sanitation of its district and to incur such expenses or undertake such liabilities as may be necessary in that behalf."

Answer to Question No. VI.

"The note in question was drawn up for the guidance of the District Board when the scheme was first brought forward."

Answer to Question No. VII.

"An amendment was proposed, but no one seconded it, and the original motion was carried unanimously. The District Board is not now in debt. The land acquired is outside of the race-course and its surroundings, and includes a large area always occupied by native gentlemen."

MEASURES OF FAMINE RELIEF.

The Hon'ble BABU GURU PROSHAD SEN asked—

What measures has the Government undertaken to relieve the severe distress that is already being caused to people by the extraordinary rise of prices of food-grains; and what further measures it proposes to undertake to afford relief during the months coming paddy (autumn, crops having failed, and the prospect of the winter (rabi), crops not being at all hopeful?

The Hon'ble MR. FINUCANE replied —

"The measures taken as regards the Patna Division were described in Government Resolution, dated 10th December, which was published in a Supplementary Gazette of 11th December and circulated to all the newspapers.

"The further measures proposed to be taken wherever distress may arise or is likely are those prescribed in the Famine Code, such as are indicated in the Resolution referred to.

"Relief works will be opened wherever necessary for those who can work, the wages to be given being sufficient to provide money for the purchase of food. Charitable relief will be given gratuitously to those who cannot work and have no friends to support them. Government does not intend itself to import grain, and looks to private trade to supply local deficits of food-grain."

PROPOSALS FOR EXCAVATION OF TANKS AND DIGGING OF WELLS.

The Hon'ble BABU GURU PROSHAD SEN asked—

Whether in suspension of some of the less necessary Public Works, specially some of those for which extraordinary grants were made in the last budget and the postponement of all other works not absolutely necessary during the coming year, it would not be well, if all available amount of money from the Provincial Public Works Class Fund were to be spent in repairing and excavating tanks in Bengal and in digging wells in Bihar through the panchaits and other respectable village agencies under the supervision of a Government Circle Overseer?

The Hon'ble MR. GLASS replied —

"Such Public Works as it has been found possible to discontinue without causing inconvenience to the general public or pecuniary loss to Government have been postponed. The Government has already pressed upon District Boards the importance of the measures referred to by the Hon'ble Member for improving water-supply, and will itself in drawing up schemes of relief works see that due attention is paid to this form of work. Government is not prepared to disorganise the whole Public Works Administration of the Province in the manner suggested in the question. Landowners and others who desire to excavate or re-excavate tanks as village improvements can obtain advances for this by applying to the Collector."

SYSTEM OF PAYMENT OF WAGES IN FOOD-GRAINS.

The Hon'ble BABU GURU PROSHAD SEN asked—

Whether in the relief works undertaken, or about to be undertaken, Government will be pleased to introduce a system of payment of wages in food-grains?

The Hon'ble Mr. FINUCANE replied:—

“In accordance with the provisions of section 106 of the Famine Code, payment of wages on relief works will ordinarily be made in cash. In exceptional cases when grain cannot be bought in the local markets, payment may be made in kind. The cash wage will, under sections 98 to 105 of the Code, be so regulated as to enable the labourers to purchase sufficient food to maintain them in health and strength. Under section 80 of the Code it is the duty of officers in charge of relief works to see that shop-keepers for sale of grain are provided on or near such works.”

ENQUIRY AS TO DESTITUTE PURDAH WOMEN AND POOR RESPECTABLE MEN.

The Hon'ble BABU GURU PROSHAD SEN asked—

Will an enquiry be ordered through the village panchait and municipalities of the number of those destitute *purdah* women and poor men of respectable classes, who, under no condition, resort to the relief works?

The Hon'ble Mr. FINUCANE replied:—

“Such enquiries as are indicated in this question have been ordered in Bihar and will be undertaken in other parts of the Province, according as the necessity for them may arise.”

FAMINE ALLOWANCE TO MENIAL SERVANTS.

The Hon'ble BABU GURU PROSHAD SEN asked—

Whether in view of the extraordinary rise of prices, Government will be pleased to make rules for the grant of a famine allowance during the next few months to all its servants on receipt of salaries from 15 rupees per month and downwards?

The Hon'ble Mr. RISLEY replied —

“The orders already passed on the subject of compensation for dearness of provisions are laid upon the table. The Lieutenant-Governor has since extended them to police constables, jail wardens, and ministerial officers drawing not more than Rs. 12 a month, but he sees at present no necessity for including Government servants whose pay exceeds that sum.”

No 4019F., dated Calcutta, the 28th July 1896.

From—B. FOLEY, Esq., Under-Secy to the Govt of Bengal, Financial Dept,
To—The Accountant-General, Bengal.

I AM directed to convey the Lieutenant-Governor's sanction to the grant, under Article 72 of the Civil Account Code, Volume I, of an increase of Re. 1 a month to the pay of all whole-time menial servants of Government (except process-serving peons attached to Civil Courts) drawing not more than Rs. 12 a month, who are permanently employed in the districts named in the margin, where the average price of common rice was dearer than 12 seers in the rupee during the quarter ending 30th June 1896. The allowance is sanctioned for three months with effect from the 1st April 1896

These orders were subsequently extended to Faridpur, Tippera and Chittagong.

No 5123F., dated Calcutta, the 26th October 1896.

From—H. H. RISLEY, Esq., C.I.E., Secy. to the Govt. of Bengal, Financial Dept.,
To—The Accountant-General, Bengal.

I AM directed to convey the Lieutenant-Governor's sanction to the grant, under Article 72 of the Civil Account Code, Volume I, of an increase of Re. 1 a month to the pay of all whole time menial servants of Government (except process-serving peons attached to Civil Courts) drawing not more than Rs. 12 a month, who are permanently employed in the districts named in the margin, where the average price of common rice was dearer than one rupee for 12 seers during the quarter ending the 30th September 1896. The Lieutenant-Governor also sanctions an increase of Re. 1-8 a month to the pay of such servants employed in the districts of Rangpur, Mymensingh, Backergunge and Tippera, where the average price of rice during the above-mentioned period was higher than ten seers the rupee.

2. The above orders will have retrospective effect from 1st July 1896.

GUNSHOT MURDERS IN BACKERGUNGE AFTER DISARMAMENT.

The Hon'ble BABU GURU PROSHAD SEN asked—

Whether it is true that after the disarmament of the district of Backergunge, three or four gunshot murders have taken place in that district?

The Hon'ble MR. BORTON replied —

"Two murders by gunshot have been committed in Backergunge since the issue of the order withdrawing licenses for guns in that district."

MUNICIPAL GRANTS TO SCHOOLS.

The Hon'ble BABU SURENDRANATH BANERJEE asked—

Whether the attention of the Government has been called to the following observations made in the Resolution of the Government of India on Municipal Administration published in the *Gazette of India* of the 31st October last:—

"The municipalities of the North-Western Provinces, Assam and Bengal are very backward in their contributions to the municipal schools."

What action does the Government propose to take in view of these remarks? Will the Government be pleased to direct Divisional Commissioners to encourage municipalities to make grants to municipal schools, or at any rate not to interfere with such grants when made by the municipalities?

The Hon'ble MR. RISLEY replied —

"The recent amendment of the Bengal Municipal Act has removed the restriction imposed by Bengal Act III of 1884, on contributions by municipalities to the establishment and maintenance of schools, and education is now classed among the ordinary objects of municipal expenditure. The policy of Government in the matter for many years past has been to encourage municipalities to make adequate provision for primary education and Commissioners of Divisions will be instructed to bear this in mind in exercising their powers under section 76 of the Act. The Government does not approve of the expenditure of Municipal Funds on higher education while the conservancy and water-supply of any town is inadequately provided for."

HOUSE ACCOMMODATION, &c., TO RURAL SUB-REGISTRARS.

The Hon'ble BABU SURENDRANATH BANERJEE asked—

(1) Is it the case, as stated in the *East* of the 13th June last, that Rural Sub-Registrars, who are gazetted servants of the Government, are not allowed house accommodation for their offices nor any furniture or stationery for use, and that in consequence the Rural Sub-Registrar of Sandwip, when he was transferred to some other place, actually sold his house to a local pleader, his ulmirahs and stationery to other people, and that his successor had to hire a hut in the *bazār* where valuable public documents had to be kept? Will the Government be pleased to remedy this state of things, which may be attended with serious public inconvenience and risk by providing Sub-Registrars with house accommodation and furniture and other equipments which they need for the performance of their public duties.

(2) Is it the case that Rural Sub-Registrars are required to meet from their own pockets the expenses of bi-monthly remittances to the treasury of fees which are Government money? Will the Government be pleased to consider the propriety of relieving Rural Sub-Registrars of bearing what obviously is a public charge, and directing that the money may be sent through the police or by postal money order at the public expense.

(3) Will the Government be pleased to state the number of Rural Sub-Registrars employed in the province and how many of them were promoted to Special Sub Registrarships within the last three years, 1893-94, 1894-95, and 1895-96? Will the Government consider the propriety of recognising the principle that deserving Rural Sub-Registrars should be promoted to the office of Special Sub Registrars in preference to outsiders, and of devising some scheme such as to the Government may seem fit with a view to give effect to this principle.

The Hon'ble MR. BOLTON replied —

“Under the conditions of their appointment, Rural Sub-Registrars are required to have a masonry house for their office, and to make their own arrangements for sending the fees received by them to the Treasury. They are responsible for the safe custody of Government money from receipt until deposit in the Treasury. They are supplied by the Government, at cost price, with registration ink and stationery, but are furnished with the requisite registers, index books and printed forms, and with machine-made paper for copies, free of charge. The appointments are sought for and taken on these conditions, which are well known, and the number of candidates is very large. The Government does not, therefore, consider it necessary to make any change. The Rural Sub-Registrars, though gazetted officers, are paid by fees only, and are not entitled to pension. They are rarely transferred, and then, except where their misconduct necessitates a transfer on public grounds, only in their own interests,—to an office with higher emoluments or in a place which they prefer on account of the climate or for some other reason. When a transfer takes place, the District Registrar sometimes assists the Sub Registrar in making an arrangement with his successor to take over his house and furniture.

“The Government has no information regarding the sale of his house and furniture by the Rural Sub Registrar of Sandip, and no complaint has been received from his successor as to the difficulty of finding a house and procuring furniture. The case of Sandip is exceptional, good houses not being available in that island. At most places such houses exist, and no difficulty is experienced by Rural Sub-Registrars in securing suitable accommodation for their office.

“There are at present 352 Rural Sub-Registrars in Bengal. In the past three years five of these officers were appointed Special Sub-Registrars. It is a recognized principle of the Department to promote the best Rural Sub-Registrars to these salaried posts, but the Government reserves to itself the right of appointing to some of the vacancies gentlemen of education and good family who have special claims to consideration.”

MODE OF ENQUIRY INTO COMPLAINTS AGAINST INDIGO PLANTERS, &c.

The Hon'ble BABU SURENDRANATH BANERJEE asked—

(a) Whether the attention of the Government has been drawn to statement which appeared in the *Amrita Bazar Patrika* that a complaint being made by one Dukhet Keori before the Deputy Magistrate of Muzaffarpur against the Tahsildar of an Indigo Factory, the said Deputy Magistrate summoned the Tahsildar, under section 352, Indian Penal Code, but added "the case is by a raiyat against an Indigo Factory Tahsildar; unless the District Magistrate direct otherwise, the case shall be sent to some Court on the date fixed"? Whether the matter having come before the District Magistrate the officer sent the case to the Manager of the factory concerned (the Shahpu Mircha Factory) "for favour of enquiry and report," and whether upon such report being received which was adverse to the complainant, the Deputy Magistrate dismissed the case on the ground that the complainant did not appear?

(b) Whether the attention of the Government has been called to another case of a somewhat similar character in which the facts are set forth as follows:—

"Some raiyats of Misrowlee, Madhupur, district Saran, petitioned Mr. Wheeler on the 11th ultimo (July) that Mr. Macgregor, the Manager of Arrowal Indigo Factory, has widened the village road leading from his Indigo Factory from 9 to 36 feet, encroaching on their fields and cutting the produce thereon, and requested a personal enquiry on the part of the District Magistrate into their case. The petition, which was received by one of the Deputy Magistrates, was forwarded by him to the District Magistrate with a tacit recommendation that Mr. Garrett, the Joint-Magistrate under Mr. Wheeler, may be deputed to enquire."

Whether it is the case that the Magistrate referred the complaint to the Manager complained against for report, and subsequently on the receipt of the report rejected the petition of the complainants?

Whether it is true that these raiyats were prosecuted by the Local Board of Chapra for pulling off the *sheesoo* trees planted by the said Local Board by trespassing into their fields?

Will the Government enquire whether it is the general practice followed by the District and Local Boards of Saran to plant trees, trespassing into the raiyats' fields against their consent, and record them in the Board's name in the cadastral survey?

(c) Whether these two cases and another case in which Mr. Konstam, then Subdivisional Officer of Hajipur, was concerned, to which I called the attention of the Government on the 25th August, 1894, by a question in this Council, point to the existence of any general practice followed by Magistrates in indigo districts in Bihar in regard to complaints instituted against Indigo Planters and their subordinates, the managers of factories or their assistants being called upon to report upon such complaints?

(d) Whether the Government approves of complaints made against Indigo Planters in Bihar and their subordinates being referred to such Indigo Planters for report? If not, will the Government be pleased to take such steps as to the Government may seem fit to put an end to a practice which must amount to a denial of justice to the raiyats who complain?

The Hon'ble Mr. BOLTON replied:—

"The Lieutenant-Governor's attention was drawn to the cases referred to by the Hon'ble Member and due notice was taken of them.

"In regard to the first case the Hon'ble Mr. Ananda Mohan Bose asked : question towards the close of the last Session of the Council, the answer to which was subsequently communicated to him by letter, as follows :—

"The Government have received a report from the Commissioner of Patna on the case referred to. It appears that the Tahsildar against whom the complaint was made was no under Mr. Exshaw, who, though managing the factory for the local zamindar, has nothing to do with rent collection. The Manager of the Factory was not, therefore, personally interested in the case. The Lieutenant-Governor, however, considers that the Magistrate was wrong under the circumstances of the case, apart from other possible minor irregularities, in making the reference to the Manager for enquiry and report, and, under orders which will be issued such references will not be made in the future."

"The orders mentioned at the end of the letter were issued to all Commissioners of Divisions, with the view of guarding against reference of complaint under section 202 of the Criminal Procedure Code for enquiry and report to any person who is in the remotest degree, directly or indirectly, connected with or likely to be interested in the case.

"Enquiry was also made in regard to the second case mentioned by the Hon'ble Member. It appears that the Local Board obtained summonses on the 11th July last against three raiyats for having uprooted sisu seedlings planted by the Board along the Arua Bishenpura Road. On the same day a petition was filed by the raiyats complaining that the Manager of the Arua Factory had widened the road by uprooting their crops. This petition was referred by the District Magistrate to the Manager for report, as member of the Local Board in charge of the road. Eventually the raiyats were convicted by the Bench Magistrates and fined, and their petition was rejected. The general orders which have been issued will apply to such cases.

"The Lieutenant-Governor has no reason to believe that encroachments are made on the raiyats' fields along the roads of the Saran district. The object of the cadastral survey is to ascertain rights and record them as they are found to exist."

ALLEGATIONS AGAINST MR. LISTER REGARDING THE WRITER-CONSTABLE OF CHATRA.

The Hon'ble BABU SURENDRANATH BANERJEE asked—

"Whether the attention of the Government has been drawn to the proceedings of Mr. Lister, Joint-Magistrate of Serampore, as reported in the newspapers?"

Is it the fact that Mr. Lister ordered a Writer-Constable attached to the Chatra out-post to be brought under arrest to his house, although the constable was not charged with any offence, nor had the Magistrate taken cognizance of any offence; whether in the Magistrate's house he was made to strike the ground with his forehead several times and to stand in a corner with his face turned towards the wall, and whether a whip was brought when his *jawab* or answer was taken; whether subsequent thereto he was sent under police custody and detained under such custody from the evening of the 20th August to 11 o'clock of the morning of the 22nd August?

Is it the case that on the 21st August the Writer-Constable applied for bail, and that the application was rejected by the Joint-Magistrate, although subsequently it appeared that he was being prosecuted for a bailable offence under section 29 of Act V of 1861, but that on the 22nd the Joint-Magistrate of his own motion released the Writer-Constable without any bail at all and without recording any reasons?

Whether, having regard to the fact that the sanction for the prosecution of the Writer-Constable under the Police Act was obtained on the 24th August, the arrest of the Writer-Constable, his detention in *hajat* and the other acts done by the Joint-Magistrate were not irregular and illegal?

Whether the Government approves of these proceedings; if not, will the Government be pleased to state what steps it has taken to mark its disapproval of such proceedings? Whether the Government will consider the propriety of not placing young officers in the position of Mr. Lister in charge of such an important subdivision as that of Serampore?

The Hon'ble Mr. BOLTON replied:—

“The facts of the case referred to by the Hon'ble Member are these:— At about 1 o'clock on the 20th August last the Health Officer of Calcutta and others arrived at Mr. Lister's office, and desired to see the death registers of the Konnagore and Chatra outposts for the purpose of obtaining information regarding the results of cholera inoculations carried out earlier in the year. Mr. Lister at once sent two peons for the registers. The man despatched to Konnagore, four miles distant, returned in due time with the register, but the other sent to Chatra, which is close to the Subdivisional Office, did not return, and a second peon was also sent, but without result. Dr. Simpson had, therefore, to leave Serampore in the evening without having seen the Chatra register. Mr. Lister called upon the Literate Constable of the outpost, who was in charge of the register, for an explanation, and he stated that he was ill with fever when the peon brought the order, and told the peon to come again. He also admitted that he was directed by the Head-Constable of the outpost to carry out the Subdivisional Officer's order, but being unwell, refused to give up the book at the time. The Head-Constable stated that the Literate Constable refused to comply with his or the Subdivisional Officer's order, that he did not complain of fever, but said that he felt uneasy, and that he told the peon to come afterwards for the register, and lay down. Mr. Lister sent for the Literate Constable. The latter was not brought under arrest, but was afterwards placed under arrest at the police-station, pending a reference to the District Superintendent of Police. He was not kept in the lock-up, and was, in fact, on parole at the station. No application for bail has been found, and bail was quite unnecessary. Mr. Lister's order amounted to confining the Constable to quarters, a form of punishment provided for in Act V of 1861, as amended by Act VIII of 1895. Beyond the man's statement there is no information as to what occurred when he came to Mr. Lister's house. Mr. Lister was suffering from fever at the time, and remained so seriously ill for several weeks afterwards that no question could be addressed to him regarding this case. He has since been compelled to proceed on leave to England.

“The Lieutenant-Governor considers that the Constable was guilty of grossly insubordinate conduct in not sending the register on receipt of the Subdivisional Officer's order, and his prosecution under section 29 of Act V of 1861 appears to have been justifiable. Mr. Lister was not authorised to pass an order confining him to quarters, that power being vested in the District Superintendent of Police.

“The Lieutenant-Governor obtained reports from the Commissioner and the Magistrate of Hooghly on this matter at the time, but having regard to the Constable's conduct and Mr. Lister's serious illness, necessitating his departure on leave, His Honour deemed it unnecessary to take further notice of the case.

“The reply to the last part of the Hon'ble Member's question is that the Government appoints to the charge of Subdivisions the most suitable officers available.”

ESTATE'S PARTITION BILL.

The Hon'ble Mr. Finucane stated that he would postpone to the next meeting of Council his motion that the Bill to amend the law relating to the Partition of Estates be referred to a Select Committee.

PUBLIC DEMANDS RECOVERY ACT, 1895, AMENDMENT BILL.

The Hon'ble Mr. Finucane moved that the Hon'ble Mr. Wilkins be added to the Select Committee on the Bill to amend the Public Demands Recovery Act, 1895, in place of Mr. Pratt, *resigned*.

• • The Motion was put and agreed to.

MURRAY TRUST BILL.

The Hon'ble Mr. FINUCANE also moved for leave to introduce a Bill to enlarge the scope of the charitable Trust created by the Will of the late Mrs Sally Murray. He said —

“The lady died more than fifty years ago in Calcutta, having by her Will devised the residue of her property, after payment of certain legacies, to the Wardens of St. John's Church for the purpose of obtaining the release from custody of deserving persons who may have been imprisoned for debt. This Fund came into the hands of the Wardens of St. John's Church in the year 1861, and was for some years duly applied to the purposes intended by the testatrix. But in the year 1888 the Debtors' Act was passed, and the effect of that Act was to make it extremely unlikely, if not practically impossible, that any person of the class contemplated by the testatrix should be in jail for debt, inasmuch as under that Act nobody is imprisoned for debt, except in cases of contumacy or bad faith. As the law now stands, it is not likely that there will ever be in the Calcutta Jail any person of the class whom the testatrix intended to benefit, namely, in the words of her Will, ‘persons who are fit objects of charity and commiseration,’ and there is therefore a practical failure of the Trust. In these circumstances the Wardens of St. John's Church have asked for authority to use the Fund in relieving deserving persons generally, who may be fit objects of charity, and this request is supported by the Lord Bishop of Calcutta. Sir Griffith Evans who was at that time acting as Advocate-General, held that the conditions of the Trust could not be altered without legislation. Hence the present Bill. The Fund at present amounts to about Rs. 50,000, and consists largely of accumulated interest. The Bill has been drafted with the view to carry out the intentions of the testatrix as closely as possible. It is, in the first place, provided that the Fund shall be appropriated to the release from custody of deserving debtors, if there be any such, next, failing deserving debtors in jail, it is proposed to appropriate the Fund to helping prisoners released from the criminal jail to start afresh in life and to enable them to earn an honest living, and, finally, failing these, the Bill enables the Wardens of the Church to spend the Fund towards the relief of the deserving poor of Calcutta generally. These are the substantive provisions of the Bill, which is a very small and unpretentious measure. It is intended, with the consent of the Wardens, to invest the funds in the hands of the Treasurer of Charitable Endowments, but the administration of the Fund will continue in the hands of the Wardens of St. John's Church.”

The Motion was put and agreed to.

BENGAL LOCAL SELF-GOVERNMENT ACT OF 1885 AMENDMENT
BILL.

The Hon'ble Mr. Risley moved that the Hon'ble Mr. Wilkins be added to the Select Committee on the Bill to amend the Bengal Local Self-Government Act of 1885, in place of Mr. Pratt, *resigned*.

The Motion was put and agreed to.

The Council adjourned to Saturday, the 2nd January, 1897.

CALCUTTA,
The 29th December, 1896. }

F. G. WIGLEY,
Offg. Asst. Secy. to the Govt. of Bengal,
Legislative Dept.

SOARCITY IN THE PATNA DIVISION.

No. 5542 Agri.—The 29th December 1896.—The following papers are published for general information.

M. FINUCANE,
Offg. Secy. to the Govt. of Bengal.

No 705G, dated Bankipore, the 21st December 1896

From—J A BOURDILLON, Esq, c s, Offg Commissioner of the Patna Division,
To—The Secretary to the Government of Bengal, General Department.

I HAVE the honour to forward herewith my report under sections 13 and 24 of the Famine Code for the weeks ending 5th and 12th December

PART I—INTRODUCTORY

2 I regret that this report is unavoidably a day or two late. As soon as possible after despatching my last report, I arranged to make a rapid tour through Shahabad with the Officiating Collector, Mr. Egerton, as I was anxious to go through the distressed parts of the district with him before he made over charge. I proceeded to Arrah on the evening of the 10th, and thence travelled by special steamer to Dehri, thence to Sasaram and Bhabhua, and back by Zamania. I inspected the offices at both subdivisions, and, using all the expedition possible, I was unable to reach my head-quarters at Bankipore till the evening of the 18th instant. I have been fully employed ever since my return in checking the district returns, and in disposing of other urgent work which could not be postponed. I trust that the delay will cause no inconvenience to Government

PART II—DISTRICT REPORTS.

3 *Patna.*—The prospects in this district continue good, and the situation, if anything, has changed for the better, since (a) it appears that the Islampur thana in the Bihar subdivision is better off than was at first supposed, (b) there is everywhere less apprehension of distress, and (c) the Collector thinks that the *aghani* rice crop will be nearer 10 annas than 9 annas.

4 I do not notice at present Mr. Inglis' estimate of food stocks, consumption and demand, as I intend to review the whole subject as soon as I succeed in obtaining reports from all districts. Those are coming in but slowly at present.

5. The exports and imports by steamer and by the Bengal and North-Western Railway *via* Digha Ghat are extremely small. Since the date of the Collector's letter I have received statistics of exports and imports on the East Indian Railway in the Patna district which are appended. He has also compared the figures with those of the corresponding fortnight in 1895. The total exports of the week by rail beyond the district were 1,10,688 maunds, and the imports from outside the district amounted to 22,473. In 1895 the corresponding figures were 39,914 and 4,256. The exports are nearly three-fold what they were a year ago, and the imports nearly five times as great. I have had an interview with Mr. Pearson, the Manager of the India General Steam Navigation Company at Bankipore, and he has offered to collect statistics of boat traffic on the Ganges—an offer which no doubt the Collector will thankfully accept.

6. The figures given by the Collector under section 24 (4) are obviously much below the mark, and inspire me with no confidence: they are, however, to be checked, and the result may be awaited. It is difficult to believe that in Patna city, which contains a population of 165,192, the number of persons in want of relief is 299 only, especially when it is also reported that in the same city 8,003 persons received gratuitous relief during the fortnight ending 20th November, an average of 571 per diem. I will enquire whether the action of the Patna Relief Committee in suspending operations is justified by the circumstances of the city.

7. *Gaya.*—The Collector's report shows that the prospects of the district are still good, and only one or two points require notice.

8. It is disappointing that the figures for exports and imports by rail are not available, the point is referred to again later.

9. As prospects in this district are so good, it seems quite unnecessary to reserve any longer the whole of the District Board's allotment for famine relief in the current year. The Collector reports that the sum amounts to

Rs. 1,11,850; but it will be seen from paragraph 3 of my report of the 11th November last, that only Rs. 51,850 of this sum are budgeted for the current year. If any relief at all has to be given in the Gaya district, it will fall within the year 1897-98, and I am therefore directing the Chairman to go on with the original programme of his current budget, leaving the estimate for 1897-98 to be considered hereafter. Should relief suddenly be required, the permission accorded by Government to all District Boards to overdraw to the extent of Rs. 25,000 will meet the case till an adjustment can be made.

10. There appears to be no objection to the measures described in paragraph 14 for the collection of small relief funds, and the grant of charitable relief to emergent cases; but I will ask Mr. Savage to push on the preparation of lists of persons likely to require relief, as has been done in Patna.

11. *Shahabad*.—Here too the Collector's report, the last which will be submitted by Mr. Egerton, shows that there is no need to be apprehensive for the Shahabad district at present. I have myself accompanied Mr. Egerton through the worst parts of this district, and the remarks and recommendations in his report were decided on with me.

12. The rice crop in the irrigated tracts has been excellent, and the prospects of the *rabi* are good everywhere, due chiefly to the rainfall of the 22nd November. A very large area near Mohania has been irrigated from a *bandi* erected at his own expense in the river Durgaoti by Babu Makund Saho, a local banker. The crops in this area are excellent, and the prospective benefits he has conferred on the vicinity are great. His services will be further acknowledged at a suitable time and place. Mr. Buckley also informs me that in the western part of this district, which is ethnologically and geographically a part of the North-Western Provinces and inhabited by a wheat-eating people, there is a great demand for water for the *rabi*. In Eastern Shahabad, Patna and Gaya they do not seem to want canal water.

13. I found that the relief works in the Bhabhua subdivision which still remain open were being managed very strictly, and there was certainly no waste. The task set was considerable, and less than the minimum wage was often given. It has now been arranged that the basis of calculation is to be 10 seers instead of 8 seers, as prices have fallen a little, and that at least the minimum wage must always be given. The people were in fair condition, and were nearly all of the lower classes and accustomed to labour. Significant evidence of this fact is afforded by their all bringing their own *kodalis* and baskets. The Collector's explanation of the comparatively large numbers entered as receiving daily wage irrespective of task is sufficient. I saw these persons myself.

14. I have ordered the tank at Sabar to be closed, but the Hata-Durgaoti road will be kept open. It certainly affords needed employment to a large number of persons in the vicinity, and the District Board are thus enabled to carry out an important work at a cheap rate. Here, as in Patna and Gaya, I am desiring the District Board to go on with their original programmes of work, with the limitations already explained above in dealing with the Gaya report.

15. I have satisfied myself that the petty gratuitous relief reported was not given indiscriminately. It was bestowed mostly on beggars and cripples, who in hard times such as these find their usual sources of relief greatly curtailed. Loans have been freely given in the Bhabhua subdivision to the extent of nearly Rs. 19,000 in all. The time for these is now past however.

16. Imports have increased and exports fallen off during the period under report, but, as already stated, this subject will be more fully discussed later.

17. *Saron*.—From this district, I regret to say, the reports are not satisfactory, and private advices confirm fully the Collector's views.

18. Mr. Earle has slightly altered his estimate of the area to be immediately affected, and has sent a map illustrating the changes in the situation. Instead of an area of 766 square miles and a population of 665,830, which are the latest previous figures in my possession, he now places the area and population immediately to be affected at 880 square miles and 779,705 persons, respectively. I am adopting these figures in my revised estimate of cost and persons to be relieved; but I do not send the map, as it is not due till the next fortnightly report.

19. The Collector has done well in organizing his relief circles so early, because, for a reason to be stated in the next paragraph, it is not unlikely that charitable relief will have to be granted in villages earlier than we at first anticipated. But I am doubtful whether in speaking of circles he means charges or not obviously Mirganj thana, which has an area of 435 square miles, is far too large for a circle, and too large also for a charge. Since the date of his report I have sanctioned the deputation of Mr. Garrett, Assistant Magistrate, to Gopalganj to assist the Subdivisional Officer in relief work.

20. Mr. Earle's remarks also suggest an important point, viz., that the unusually large number of emigrants to Bengal this year is not an unmixed blessing, for, as these are all adult males, the proportion of capable workers is largely decreased, and the number of weakly men, women and children without proper support is considerably advanced. It is true that eventually these men may be expected to send money to their homes, but in the meantime their families are thrown a good deal on our hands. This is a fact to be remembered in appraising the distress in Saran, as is the concomitant fact that most of these emigrants will be returning about May and June.

21. Crop prospects are good, but I have just heard by telegram that hoar frost on two nights has done some damage to the *rahar*, which, as Mr Earle reports, is unusually early in flower.

22. The partial cessation of imports and the increase of exports is difficult to explain, prices having remained almost stationary. Most of the exports, it will be seen, go to the westward, half of them from Revelganj, and they consist largely of "other grains." Of the imports, rice and "other grains" account for about 15,000 maunds each, the volume of the remaining cereals being small.

23. There has been some confusion, as already reported, in the starting of relief works, but the Collector has taken up the matter, and I trust that Famine Code rules will now be carefully followed. Charitable relief by the police has also been distributed not very intelligently. I propose to visit all the relief works in Saran with the Collector immediately after Christmas, and hope that by that time they will be in proper train.

24. Advances have been freely given, but the time for these is almost past. It is too soon yet for us to judge of the effect of the proposed bounty of one rupee for each *kutchra* well.

25. The proposals for increasing the number of poor-houses in the Hatwa estate has my entire support. It has long been the practice of this Raj to give food to the poor and diseased who choose to come for it to the poor-house at Hatwa, and it is entirely in accord with the traditions of this house that the system should be developed at the present crisis. Had the late Maharaja lived, he would have been the first to propose it. I have in a separate communication asked the sanction of the Court of Wards to the expenditure of Rs. 3,500 in this direction for the present.

26. The result of Mr. Earle's appeals to the generosity of zamindars is disappointing; but if they will assist him in preparing lists of those likely to need relief in villages, much will have been done.

27. *Champanan*.—In this district I regret to say that there has been a rapid change for the worse, as evidenced by the largely increasing numbers who flock to relief works.

28. Mr. Macpherson, on fuller information, has been forced to alter his estimate of the area and population to be immediately affected; and instead of an area of 570 square miles with a population of 271,415, he now estimates the tract requiring immediate relief to be 1,057 square miles with a population of 601,149. I have entered these figures in the revised estimate of numbers and cost, which I am to-day submitting to Government. The Collector now says that the greater part of the northern and eastern portion of the Bettiah subdivision, and most of the southern half of the Sadar subdivision are in present need of relief.

29. There has been some delay on the part of officers in joining the district for famine relief work, but in the meantime the gentlemen named in the margin (among others) have responded cordially to the Collector's appeal for help, and have not only filled the breach till regular Charge Superintendents should arrive, but have also started

Sir W B Hudson, K C I E.
Mr J J McLeod, C I E.
" H W J. Hill.
" A. W. N. Wyatt.

relief works in their own *debats* at their own expense. As Champaran is evidently at this moment the critical point in our line of defence, I am sending up there all the reinforcements I can.

30. The volume of exports and imports is extraordinarily small. As prices are on the whole a little easier, I ascribe this state of the market to a belief that stocks are sufficient for the present, but that, on the other hand, there is no surplus for exportation. It is satisfactory to learn that the drain of exports by road has ceased.

31. The information given by the Collector under the head of Relief Works is most instructive. The number of regular relief works has increased from 7 to 11, and more would have been opened had officers been available to take charge. Of these 11 works, 7 are in Bettiah and 4 in the Sadar subdivision. The average number of male units employed daily on relief has risen from 1,330 to 2,426, while those in receipt of daily wage irrespective of task have advanced from 9 to 240 per diem. On the last day of the fortnight under report there were 6,323 persons employed on Government relief works. The Collector also reports that the numbers on the private relief works started by planters were greater than on those under Government supervision. In the factories which sent returns, it appears that the average number employed daily during the week ending 12th December was 13,685, which, added to the 4,292 on Government works, gives a daily average of 17,977. Relief workers were also employed in other factories, from which no returns have been received; and if these be included, it is clear that the daily average for the week could not have been less than 20,000. On these private works it is to be observed that no task was exacted; but even making allowances for this fact, and for a possible reduction in numbers when Famine Code principles are applied, it is manifest that in Champaran every nerve must be strained to keep abreast of the requirements of the people.

32. Gratuitous relief has been commenced on a small scale, and lists are being prepared for villages. It is hoped that before Christmas all the Superintendents of charges immediately required will be in their places, and that this very important branch of their work will then be taken up.

33. Information as to loans is not complete; but as all officers have been busy in the field, we can afford to wait a little longer for the submission of statistical returns.

34. The total amount spent so far has been only Rs. 3,851-11 5, but it is manifest that payments will soon become much heavier. It was shown in paragraph 111 of my report of the 11th November that the District Board of Champaran have only Rs. 25,000 available for famine relief expenditure in 1896-97. I therefore propose at once to ask Government in a separate letter to place one lakh of rupees at the disposal of the Collector as a preliminary contribution.

35. *Muzaffarpur*—Judging by Mr. Hare's report, the change in his district during the last fortnight has been very small, and it is clear that events are not marching so fast there as in Champaran. This is in accordance with the expectations formed at the Muzaffarpur Conference on the 4th and 5th instant.

36. Prices are practically stationary, and this possibly accounts (as I have suggested in dealing with the Champaran report) for the comparative stagnation in railway traffic in food-grains. The total imports by rail aggregate 13,625 maunds and the exports 7,341 maunds, leaving a net excess of imports of only 6,284 maunds.

37. Relief works do not yet attract labourers, except one which is being conducted by the Sitamarhi Municipality. The average number of male units employed daily for the week ending 5th December was 210 28 and that for the week ending 12th idem was 33 18.

38. In spite of these small numbers, however, I have thought it right to sanction the opening of a poor-house at Sitamarhi, in order to enable the Subdivisional Officer to collect the beggars and other helpless persons, and to give them some shelter. The cold at this time of year greatly aggravates the distress caused by scanty food.

39. Mr. Hare is busy developing his system of circles. As has already been reported, many of his circle officers will be planters, and will give their services gratuitously: as he appears to have some time before him still before distress becomes severe, he will probably be able to bring his arrangements to great perfection before relief begins on a large scale.

40. *Darbhanga*.—The progress of affairs in this district during the fortnight gives it an intermediate place between Champaran and Muzaffarpur. There is not so much distress as in Champaran, but numbers are coming much more rapidly to the relief works than in Muzaffarpur.

41. Mr. Carlyle makes no material change in his estimate, and adheres to the classification which he at first adopted. Charges and circles are being plotted, and will be manned very shortly, for the Collector reports that the numbers on relief works are increasing rapidly, and he expects by the end of the month to have a daily average of between 20,000 and 30,000 workers on his hands. He is therefore not much behind Champaran, and more relief works will be opened rapidly during the present fortnight as occasion requires.

42. Wandering is also reported, and Mr. Carlyle has rightly judged that the time has come for opening poor-houses at Madhubani and Darbhanga. I will sanction these forthwith.

43. The volume of grain traffic is very large, and the railway statistics give a total of 61,385 maunds of exports and 15,620 maunds of imports, thus showing an apparent excess of 45,675 maunds under exports, and the Collector was at first inclined to attribute this to the new rice coming into the market. He has, however, while on tour near the frontier, found that the whole of this apparent drain is made good by the immense quantities of rice smuggled in from Nepal.

44. The number of relief works open at present is four, and the average daily number of male units was 254 in the first week of the fortnight and 535 in the second.

45. Loans and advances for wells have so far had no great vogue in this district, but Mr. Carlyle has now done his best to push them by putting a Deputy Collector on special duty in this connection. We shall learn from the next report what success has attended his efforts.

PART III—CONCLUSION

46. During the fortnight under review, there has been change in both directions, towards improvement and towards deterioration. In Patna, Gaya and Shahabad prospects have improved, while in Champaran the condition of the people has rapidly deteriorated; in Saran and Darbhanga the same process has been less rapid, and in Muzaffarpur there has been hardly any change.

47. Both in Saran and in Champaran, the area to be immediately affected must be enlarged in the opinion of the Collector, and the area and population which demand immediate assistance now stand as follows in each of the four northern districts of the Division:—

District	Area in square miles	Population.
Saran	880	779,705
Champaran	1,057	601,149
Muzaffarpur	1,851	1,660,000
Darbhanga	2,044	1,720,000
Total	5,832	4,760,854

48. In Champaran and Darbhanga, the numbers on relief works are rising, and it is expected that in them the numbers relieved will reach the high figure of 30,000 per diem during the current fortnight. Works will be opened as required, and we need not fear, I trust, any confusion. The Collector of Darbhanga has already received a contribution of one lakh of rupees from Government, and I am about to ask that a similar sum may be allotted to Champaran.

49. This rapid rise of the numbers seeking relief should give no cause for alarm. It has already been pointed out by myself and others that about the middle of December field work would fail a good deal. The rice crop, such as it is, has by this time been cut in most places, and that source of employment is closed. It was stated also in my last report that numbers of men had been turned back from Nepal, and these must have come on to our relief works in default of the employment on which they reckon at this time of year.

50. Some confusion has occurred at the opening of relief works in some places, but incidents of this kind are almost unavoidable at first. The mistakes, if not already corrected, will soon be put right.

51. Charitable relief has been afforded in many places, and it is clear that this form of relief must soon be considerably developed. I expect to hear in the next reports I receive that arrangements are completed everywhere.

52. There has been a general stagnation in the food-grain traffic, which is remarkable; and, as stated above, I attribute the fact to the belief that stocks are generally sufficient, but not excessive; the total traffic, so far as it has been reported, may be summarised as follows:—

District			Imports	Exports.	Exports.
			Mds	Mds	Mds.
Patna	25,455	1,10,886	E. 85,431
Gaya	Not given	Not given.
Shahabad	16,647	24,247	E 7,600
Saran	88,666	14,644	I 24,022
Champanan	3,934	3,993	E. 59
Muzaffarpur	13,625	7,311	I. 6,284
Darbhanga	15,620	61,085	E. 45,465

53. As to stocks in hand, information is not yet complete. A report on the subject will be submitted as soon as possible.

54. No mention has been made in any of the reports of the major works, which are about to be carried out entirely under Public Works Department agency. I have, however, to-day had an interview with Mr. C. A. Mills (who is about to be appointed Superintending Engineer for relief works), and he informs me that the scheme for the Bhagmati-Lakhandai cut in Sitamarhi has been approved by Mr. Toogood, who is now writing his report on the subject. If taken in hand at once, this scheme will cost Rs. 75,000 in earthwork alone during the current and next year, and will thus afford ample employment in that part of the Muzaffarpur district. Mr. Mills is now on his way to Champanan to take up the Dhanaoti scheme.

55. In conclusion, it is only necessary to say that during the current fortnight we must expect a considerable increase in the numbers of those on relief works and in the receipt of charitable relief, and that poor-houses will have to be opened in several places. So far as present indications can be trusted, they all tend to show that the estimates of numbers and cost, which I have propounded so far, are fairly correct. They certainly do not exaggerate the situation, but are unhappily, if anything, short of the truth. It has been known for some time that Champanan and Darbhanga would first require relief, that the high price of food-grains as compared with 1873-74 would call for an earlier distribution of charitable relief, and that after the rice had been cut and threshed, the numbers on relief works would rise.

No. 2058R., dated Bankipore, the 17th December 1896

From—T INGLIS, Esq., Collector of Patna,
To—The Commissioner of the Patna Division.

I HAVE the honour to submit the half-monthly report for the first-half of December, as required by Rule 24 of the Bengal Famine Code.

Your Famine Circular No. 13 of 1896 was not received in time to be given effect to by all reporting officers, and as a result my figures will cover both the half-monthly period and that of the fortnight ending Saturday, the 12th current. I shall endeavour to keep the figures so that no confusion may arise. When the period covered by the figures is not given, it will be understood that the figures relate to the first-half of December.

Section 24 (1).—There is no change under this head. No relief circles have been formed, as none are yet necessary.

Section 24 (2). (a).—*General state of the affected tracts*.—During the last 12 days I have been all over the Sadar subdivision and have travelled 283 miles by road, besides three small railway journeys. I am inclined to think that the winter rice crop has been over-estimated, and that 10 annas would be a better estimate than 12 annas, the figure formerly given. Though I have received many complaints as regards the incidence of the chaukidari tax owing to unfair assessments, and the refusal of the Irrigation Department to grant long-term leases, due, I am told by the Executive Engineer, to the failure on the part of the would-be lessees to maintain their village channels in order, I have not received any complaints from the people of distress. Beggars there are, but I found the same last year. My information is that the labouring classes will have full employment till after the *rabi* crop is gathered. The winter rice is still being harvested and is being threshed. The labourers get a share in the produce which will last them after the harvest is over for some time. Sugarcane land is being prepared, and *rabi* is still being sown in Dinapore, Bihar, and parts of the Sadar subdivision. The Subdivisional Officer, Bihar, writes that the condition of Islampur is less serious than was at first supposed. He adds that the people are more reassured, and no fears are entertained of stocks running short. Exportation has, however, again set in, and may again upset people's minds. The City Magistrate of Patna writes that symptoms of distress may be said to be somewhat less acute or observable than when the last half-monthly report was written. The Subdivisional Officer, Barh, writes that the state of his subdivision is good, while Dinapore reports that the high prices prevailing are beginning to be felt, and that the condition of the people is fair. I may say for the whole district that there has been no change during the period under report.

Section 24 (2) (b). *Crop prospects*.—I would reduce the outturn of winter rice for the Sadar subdivision to 10 annas. The police say that the Dinapore figure should be reduced from 6 to 4 annas owing to the large proportion of empty ears found in the rice when reaped. I found the same in the Sadar subdivision. This will not, however, alter the average for the district. The final report on the winter rice crop for 1896 submitted to the Director of Land Records and Agriculture on the 27th ultimo gave the district average at 9½ annas. This average was obtained by adding the averages for the four subdivisions and dividing the result by 4. This is obviously wrong, as the area under this crop is very small in Dinapore, only 4,000 bighas, whereas in Bihar it is given as 2,55,500 bighas. Working this average out on the number of bigha sown according to each subdivision, I find that with the reduced estimates now taken, the district average will be not less than 9½ annas, which is well above my former average of 9 annas. The *rabi* crop continues to look well, though admittedly in places it is suffering to some extent for want of moisture. In the Sadar subdivision even in those parts where the rice crop was not good, I found *khesari* and *tis* growing in the paddy fields. Poppy I found everywhere looking well. It has germinated at the first sowing. Rain in the second-half of this month would be of inestimable value. The Subdivisional Officers of Bihar and Barh estimate the *rabi* crops at 12 annas. Dinapore says that the crop is doing well. I would take the Sadar subdivision crop at 12 annas though both here and in the Bihar subdivision the area under *khesari* is greatly contracted.

Section 24 (2) (c). *Food-stocks*.—The notice issued to panchayats regarding the stocks of food-grains produced the following results:—

				Maunds.
Rice	2,16,617
Dhan	1,06,721
Wheat	22,398
Barley	9,618
Makai	60,366
Other food-grains	3,42,235
Total				7,57,955

A statement for each thana is submitted, taking the population of the district at 1,772,352, which is the figure obtained at the last census. This return, if accepted, would show that stocks are wholly inadequate. These figures are said to include the stocks in municipal areas which were ascertained by the police. They do not, however, include the produce of the rice

crop now being harvested. The final report regarding this crop gives the area under cultivation as 421,500 acres. The Department of Land Records and Agriculture gives 12 to 13 maunds as the produce of an average crop per acre.

Taking the average crop of an acre at 12 maunds, and the average outturn of the crop at 9 annas (to be on the safe side), the produce of this crop will amount to 28,45,125 maunds. The area under *rabi* (food-grains) in 1895-96 was 350,800 acres. If we take 300,000 as the area under this crop at present, and the outturn at 12 maunds per acre on an average with a 12-anna crop, these crops will produce in March a further stock of 27,00,000 maunds.

The estimate of food grains may be taken as follows —

	Maunds
In stock at end of November	7,58,000
Winter rice	28,45,000
<i>Rabi</i>	27,60,000
Total	63,63,000

As I said above, I consider the panchayat returns below the mark, but I take it for the purpose of this report as what is admittedly in existence. This stock will have to serve till the beginning of August, when the new *bhadai* will begin to come into the market. The population, according to Statement D, submitted with the Annual Administration Report, gives the following results —

Men	510,667
Women	582,929
Total adults	1,123,596
Children	646,716

Allowing 1 seer for each adult per diem and 6 chutaks on an average for each child the daily consumption for the district will be 34,153 maunds. At this rate the stock estimated above will last for 182 days, or, say, for six months, which will expire at the end of May. This estimate assumes that there will be no exportation, and that the crop will not suffer for want of moisture. It also discloses the fact that the district will be without food for two months—June and July. I regret that I have left in camp the necessary references as regards the normal consumption per head of the population, and my estimate on this head is, I feel sure, based on a too high rate of consumption. In the time of scarcity consumption is undoubtedly reduced and is capable of reduction before actual distress sets in. The figures of exportation and importation have not yet reached me, so I can say nothing of the direction trade is taking. The Subdivisional Officer of Bihar reports that exportation has again set in briskly, and proposes to take statistics on the main road. I do not think this is necessary, as the bulk of the grain finds its way to the railway which provides the necessary figures. It is generally reported that sweet potatoes and water nuts, which form the food of the poorer classes for a part of the year, have now come into the market, and relieved, to a certain extent, the pinch of high prices. My reason for disbelieving the panchayat returns is briefly this—that no one will admit having a stock of rice or food-grains. In the interior grain-dealers are also equally reticent. The most encouraging evidence of the existence of sufficient stocks is the absence of anxiety among the inhabitants of the interior. The cultivators are generally holding their stocks, and only sell when they have to meet their landlords' demands.

Section 24 (1) (d) Importation and exportation of food-grains—The figures received from the railway and steamer companies show that during the first 15 days of this month 1,10,886 maunds left the district and 25,495 maunds were received. The net export was therefore 85,431 maunds, which shows a renewed activity in exportation. The figures received from the East Indian Railway show that while the exports have increased from 37,914 maunds in the corresponding period of 1895 to 1,10,688, or, say, 175 per cent, imports have also risen from 4,556 maunds to 22,473 maunds, or by 393 per cent. The export trade is chiefly confined to "Indian-corn" and "Other food-grains," while imports mainly consist of rice. Mokameh, Barh, Khusimpur, and Patna are the chief exporting stations, while Patna, Digha, and Bankipore have taken most imports, chiefly of rice. Rice is the staple food, and during the period under report the net import of this article of food has been 13,617 maunds. The large exports from Barh and Mokameh explain the high prices prevailing in those marts.

The statements required for this report showing the traffic in food-grains are herewith submitted.

Section 24 (2) (c). Rainfall—Nil

Section 24 (2) (f). Public health—Good

Section 24 (2) (g). Emigration or immigration of famished people—No officer has reported any such movement. When at Bilta, in the beginning of my late tour, I met large numbers of people, chiefly from Azamgarh and one or two other districts in the North-Western Provinces, on their way to Mymensingh. They had been collected by a contractor, and have most of them gone there year after year. They say that they do not get enough to eat on the famine works in the North-Western Provinces, but the circumstances under which they were proceeding to Mymensingh and the prospects held out to them justified their proceeding so far to obtain work. Then women and children were going with them. They told me it would take them 22 days from the Son to reach their destination.

The steamer company also reports that a number of coolies for Lower Bengal, chiefly for the Dacca Division, have availed themselves of the company's service of steamers.

Section 24 (2) (h) Condition of cattle—No change reported. Green fodder is becoming scarcer, but the new straw provides sufficient fodder. Water is so far sufficient.

Section 24 (2) (i). Prices—The annexed table gives the prevailing prices. The new rice has risen in price to some extent. Wheat has improved, also barley and *vahar* (gram) has varied, and the maximum and minimum rates have come closer together. In Manair prices have slightly improved, but there is no trade there to speak of and there is no competition to keep down prices. Barh and Mokameh still maintain the highest rates in this district.

Section 24 (3).—The test-works at Manair and Mokameh are still open. The others have been closed as the rice harvest gives full occupation to the labouring classes. There is nothing new to report as regards these works. The usual statements are appended.

Section 24 (4)—No poor-houses have been opened anywhere. In calling for a return of food-stocks from panchayats, I called also for a return of the classes for whom gratuitous relief might become necessary. A statement showing the returns, thana by thana, is submitted. The following are the figures for the district.—

Idiots and lunatics	155
Cripples	3,020
Blind persons	1,697
Persons who from old age or physical infirmity are incapable of earning a living	1,447
Persons whose attendance on the sick or infants at their homes is absolutely necessary	906
Persons who are in distress and who being of respectable family cannot work	772
Total	7,997

I propose to have enquiries made into these cases by Subdivisional Officers and an officer from head-quarters. These totals include figures for municipal areas collected by the police. The figures for Patna City are 299.

The Patna City Relief Committee at Jhauganj is said to have collapsed owing to the apathy of the members. They report that for the fortnight ending the 20th November they relieved 10,196 persons, distributed as follows.—

By gratuitous relief	5,669
By sale at cheap rates	4,527

This gives an average of 728 persons relieved a day. The total cost was Rs 222-10-9 only, of which Rs 136-7-3 was spent on gratuitous relief, for which *maka* was chiefly used. Two hundred and seven maunds of rice were sold at a cheap rate at a cost of Rs. 86-3-6. By the Bankipore Committee 2,334 persons received gratuitous relief and 8,076 bought grain at a reduced rate up to the 15th current, since the Committee commenced work. The cost has not been stated.

Section 24 (5) Organisation for employment of artisans, &c—Nil.

Section 24 (6) Organisation for the distribution of grain doles—Nil.

Section 24 (7). Relief in kitchens.—Nil.

Section 24 (8). Loans.—

Application received under the Land Improvement Act, 1

Under the Agriculturists' Loans Act, 42 during the half-month against nil last year.

The total received up to date is as follows.—

Under Land Improvement Act, 2.

Under Agriculturists' Loans Act, 154.

No loans have as yet been granted. The kanungoes and general manager are making enquiries, but in most cases these applications are made to meet expenditure not contemplated by the Acts. No advances have been made for wells as the cultivators have already dug these, when necessary, themselves.

Section 24 (9)—

(a) No new grants have been made by the District Board. A grant of Rs. 10,000 has been made by Government for advances under the Land Improvement and Agriculturists' Loans Acts.

(b) These are embodied in the statements attached to this report.

(c) The balance available under the District Board grant is shown in the financial statement which is for the fortnight ending with the 12th current.

The following statements are also appended. They are for the fortnight ending the 12th current.—

(1) Famine Statement D

(2) Famine Statement E.

(3) List of prices of principal food-grains.

The figures of imports and exports will be submitted later when received from the East Indian Railway Company.

The following statement is blank :—

(1) Gratuitous relief, Form No. 6.

No report of any death from starvation or of distress approaching starvation has been received, and I see no signs of distress among the population. Crime is reported to have slightly increased in Patna City and Dinapore town. This is not unusual at this time of the year when the nights are dark and people sleep more soundly under their warmer bed clothing. The cases reported from Manair of respectable women who were in distress have been enquired into by the Sub-Inspector of Schools, but I cannot accept his report entirely. I have directed the Subdivisional Officer, Dinapore, to enquire into these cases personally. The Subdivisional Officer, Bihar, reports that the head-constable of Chandī outpost reported certain cases to him. The head-constable was directed to submit the names, &c, of the sufferers to the Subdivisional Officer who proposed to enquire into each case, but the Subdivisional Officer has heard nothing more of them, and considers that there was no foundation for the report.

Patna	Doorjanpore	54					54*	108	* This 54 consists of cheena

Heavy fleets of country boats laden chiefly with sugar and Fuller's earth; also coolies have passed Patna destined for Lower Bengal, Dacca Division principally

H. A. PEARSON,

Agent, Patna.

No 1622G., dated Camp Gurna, the 16th December 1896.

From—H. SAVAGE, Esq., C.S., Collector of Gaya,

To—The Commissioner of Patna Division, Bankipore.

I HAVE the honour to submit Famine Report for the first half of December. The figures given are for the fortnight ending 12th instant. I have not yet received from the Collector of Saran a copy of his form, and therefore submit this report on the same lines as my report for the 2nd half of November, i.e., under section 24 of the Code.

2. SECTION 24(1) No part of the district is affected with famine at present, and none of the 14 circles has been manned.

3. SECTION 24(2) The *aghani* rice is being reaped, and the general outturn for the district is 8 annas. *Rabi* is doing well and promises fully a 12-anna crop. I have during the fortnight been over the south-west part of the Aurangabad subdivision and find the *aghani* crops in that quarter about 10 annas; and the *rabi*, if we get the ordinary Christmas rains, will be above the average. All the subdivisional officers write hopefully of prospects in their subdivisions.

4. Price of common rice, as will be seen from Appendix A, has fallen somewhat in all subdivisions except Jehanabad, and prices of other food-grains have on the whole remained stationary. The stock of food grains is fully sufficient for three months' consumption.

5. Figures for import and export by rail will follow when received. I have no satisfactory statistics as to internal movements of grain, but there seems to be no particular activity in the trade in any part of the district.

6. No rain has fallen during the fortnight.

7. Public health is good.

8. There has been no noticeable emigration or immigration.

9. The condition of cattle continues good.

10. SECTION 24 (3) to (7) Nil

SECTION 24(8) The number of persons to whom loans have been given under the Loans Agriculturists Act during the fortnight is 15. The total amount given to date this year is Rs. 4,800, and average to each person is Rs. 47-8. The amount of unexpended grant is Rs. 5,200.

11. The amount given under the Land Improvement Act during the fortnight is Rs. 100, which was given to one person. Of the total grant of Rs. 59,500, Rs. 56,500 has been expended. Of the balance, Rs. 2,000 was allotted to the Subdivisional Officer, Aurangabad, but he has not yet reported what he has done with it.

12. SECTION 24 (9) The provision made by the District Board for famine amounts to Rs. 1,11,850. Nothing has as yet been expended. The financial statement is therefore not given.

13. SECTION 20, I to III. Statement D, the statement of gratuitous relief, and statement E for the half-month are blank.

SECTION 26 IV to V. A list of prices is annexed.

14. With reference to your Famine Circular No. , I have to report that I have asked the Chairman of each Municipality to collect a small sum at present and place it in the hands of a committee of the principal inhabitants, to expend in meeting cases of distress among people who ordinarily are not recipients of charity. I have also asked each Subdivisional Officer to organize a similar fund at the head-quarters of his sub-division, and have requested the District Superintendent of Police to again call the attention of officers in charge of thanas and outposts to their duties in connection with cases of distress.

15. Before receipt of your circular I had issued instructions to the police and village panchayats on the subject and had personally instructed many, both of the police and members of the panchayats, and ascertained that it was very improbable any real case of distress would escape notice.

In particular I have instructed the Subdivisional Officer of Aurangabad to arrange for one free meal at Aurangabad for each traveller in want of it who may pass through that place along the Grand Trunk Road, and have asked the Mohunth of Budh Gaya to be so good as to arrange for another free meal at Dobhi, which is 30 miles further on the way to Calcutta. The Subdivisional Officer has already collected funds for the purpose and will assist each traveller who may be in need. I have not as yet received a reply from the Mohunth, but trust he will make the arrangement I suggest. The number of travellers along the road is no larger than in ordinary years, but I have noticed many of them looking very thin and weary, and it will be a real charity to help them on their way.

APPENDIX A.

Comparative statement showing the prices of food-grains in the Gaya district for the fortnight ending 12th December 1896.

B. K. MULLICK,
For Collector of Gaya.

No. 2853, dated Arrah, the 19th December 1896.

From—W. EKERTON, Esq., c.s., Officiating Collector of Shahabad,
To—The Commissioner of the Patna Division.

I HAVE the honour to submit my half-monthly report under section 24 of the Famine Code for the period ending the 15th instant.

2. As you have yourself during this period visited with me the affected area in the Bhabua subdivision and the relief works, and noted the general condition of affairs, it will be unnecessary for me to submit a very lengthy report. Since my last report, I have, for the reasons stated therein, closed two relief works, i.e., the Jahanabad-Bhabua and Mohania-Panjraon roads, with effect from the 5th December. All labourers were, however, paid the minimum wage for Sunday, 6th December, so as to enable them to join either the railway works or the other relief works. Results have fully justified this action. A test relief work was opened on a tank at Sahar (14 miles south-east of Bhabua), with effect from the 10th instant, owing to certain reported distress in that locality; but very few people have joined this work (there were 63 all told on 12th instant), and it would seem hardly necessary to continue it, at any rate at present, as a relief work. On the other hand, a considerable number of labourers attend the Hata-Durgaoti road relief work, though the numbers fluctuate considerably, and I am of opinion that this work, in itself a very useful one, should not be closed. Owing to the chief staple food of the labourers, *mator* and *keraw* flour, having fallen in price to about 10 paise the rupee, I have reduced the minimum wage, in strict accordance with section 104 of the Famine Code, to 6 paise for a man, 5 paise for a woman, 3 paise for a child for the prescribed task of 150 cubic feet of earth and 50 feet load, and have issued necessary instructions on the spot to the circle and relief officers. It was found that in some cases less than the previously fixed minimum wage was being given to workmen who failed to do the prescribed task, and strict injunctions have been given that in no case should less than the minimum wage be given. As none of the workers are in a famished condition, the payment according to strict measurement does not appear to have had other than good results. The explanation of the comparatively large number of labourers employed on daily wage, irrespective of task, is the one given by me in paragraph 2 (3) of my last report: these labourers are for the most part weakly persons, who are employed on dressing the road and doing odd jobs about the place. They might be entered under class D if it is thought necessary, but the explanation is a satisfactory one, and no change in their classification seems to be needed. The condition of the *rabi* crop is satisfactory, and agricultural loans have been freely given in Bhabua. I am inclined to think that only the Hata-Durgaoti work need be kept open, under two Sub-Overseers, and that the District Board staff may be set free; and the proposed alterations in the programme of work for the current year cancelled, so that the ordinary District Board work may be taken in hand. The total expenditure on relief work, so far, has only been Rs. 2,706-10-5, to which may be added the small amount of Rs. 140-3-6 spent under section 12 of the Famine Code, and it does not now seem expedient to abandon the entire District Board programme for this year. I would therefore propose to resume all District Board work for the current year, which will give employment to about 2,000 labourers all over the District, while provision, as already contemplated, for possible subsequent expenditure on relief work should be made by cutting down next year's budget. You have seen for yourself how matters stand, and if you agree with me, the necessary steps will at once be taken.

3. The detailed information required by section 24 of the Code is as under:—

SECTION 24 (1) —The area affected remained the same, as also the relief circle and officer in charge. Two relief works, i.e., the Jahanabad-Bhabua and Mohania-Panjraon works were closed from the 5th instant, for reasons already given, and one fresh work, i.e., a tank at Sahar was opened. The Hata-Durgaoti work remained open as before. The numbers on railway work between Khajura and Jahanabad are said to have increased to nearly 3,000, which is satisfactory; and no doubt the closing of our relief work at Mohania has had the desired effect both of sending a class labourers on to the railway works where they can find suitable employment, and of avoiding any possibility of competition between our works and the railway work.

SECTION 24 (2).—The general state of the affected tract remained much the same. The *rabi* is germinating well, and the free distribution of loans for seeds prior to and after the rainfall on 2nd November has had the wished-for result of supplying funds to enable the raiyats to sow all available *rabi* lands. The general appearance of the country is much better than when last I visited it owing to the *rabi* sowing, and the rainfall. Considerable importation of food-grains from Sasaram into Bhabua is reported, which is satisfactory. Public health is good, and there has been no emigration or immigration of "famished" persons.* The figures of expenditure under section 12 of the Code for the last two months are

now available. It will be seen that the police, under the supervision of Mr. Ryan, Assistant District Superintendent, have distributed relief in the shape of small quantities of food-grain to 1,648 persons at a cost of Rs. 140-3-6. This relief has only been given in cases of real distress. It is very necessary to have some such safety-valve as this to meet the case of labourers coming from the North-Western Provinces to railway work or semi-starved professional beggars, and I think the money has been judiciously spent.

SECTION 24 (3).—At the beginning of the period under report the same three relief works as before were opened. On the 10th instant, work on the Sahar tank was commenced and a small number of labourers attended. On the 5th instant, the Bhabhua Jahanabad and Mohania-Panjraon works were closed, as the numbers employed were small and the works were not considered necessary any longer. The total numbers on the Hata-Durgaoti work were 3,827 for week ending 5th December, 4,257 for week ending 12th December.

The actual number of labourers of all classes on the work on 16th instant, when I visited the work with you, was 792, and the actual number on the Sahar tank was 109 on December 15th. The rates of wages were the same as before, but on a consideration of prevailing rates of *keraw* and *matur* flour, I fixed the minimum wage for both works on a 10-acres instead of an 8-acres basis under section 104 of the Code, i.e., 6 pice for a man, 5 pice for a woman 3 pice for a child; and the maximum wage, in case the full allotted task was completed, at 7 pice for a man, 5 pice for a woman, 3 pice for a child, which is well within the Famine Code rate. The task remained the same, i.e., 150 cubic feet of earthwork for the Hata-Durgaoti road; and for the Sahar tank the task was carefully worked out by the District Engineer as follows:—

Full task, 150 cubic feet for a 50-feet lead, and $\frac{1}{4}$ th of the task to be deducted for every 50 feet extra lead, that is to say—

	C ft.
Up to 50 feet lead task	= 150
From 50—100 feet „	= 120
„ 100—150 „ „	= 90
„ 150—200 „ „	= 60

This rate is only for level ground at the commencement of the work.

SECTION 24 (4) (5) (6) and (7).—There is nothing to report under these heads. The action taken under section 12 of the Code has already been mentioned. A general meeting has been called at Arrah for the 21st instant, to consider the organisation of a Committee for distribution of gratuitous relief if needed later on. At present it has not been thought desirable to call for private subscriptions for this object.

SECTION 24 (8).—The total amount of loans given under the Agriculturists Loans Act and Land Improvement Act in the Bhabhua subdivision up to date are as follows.—

Number.	Amount.		
	Rs.	A.	P.
Agriculturists Loans Act petitions, 1,647	..	13,994	8 0
Land Improvement Act petitions, 42	...	4,950	0 0
Total	..	18,944	8 0

The period for giving loans under the Agriculturists Loans Act has now expired. The free grant of loans has undoubtedly been of the greatest benefit to the cultivators, and has enabled a much larger area of land to be sown than would otherwise have been the case.

SECTION 24 (9).—The financial statements are annexed herewith. The total expenditure so far has been very small.

SECTION 24 (10).—No fresh tract has become affected whole to have been affected. The *dhan* crop on irrigated areas throughout the district seems to have done a great deal better than was anticipated at first. There is no doubt that the canals supplied by the railway authorities show that 16,647 maunds were imported into, and 24,247 maunds exported from, the district during the fortnight ending 14th December, as compared with 6,752 maunds imported, and 28,987 maunds exported in the previous fortnight. There is therefore been considerably more importation and less exportation by rail during the period under report.

8. Enquiries regarding food stocks are being pushed on, and results will be reported as soon as possible. Our recent tour together has enabled us to discuss various points on the spot and issue the necessary instructions without delay.

W. EGBERTON,
Collector.

The 19th December 1896.

No 2591G., dated Chapra, the 17th December 1896.

From—A. EARLE, Esq., c.s., Offg. Collector of Saran,
To—The Commissioner of the Patna Division, Bankipore.

IN continuation of my letter No. 2407G, dated the 3rd instant, I have the honour to submit my third half-monthly report under the Famine Code for the two weeks ending Saturday evening, the 12th instant

2. SECTION 24 (1).—*Area affected, 880 square miles, population affected, 779,705*—The position has again been modified—(1) by the Subdivisional Officer of Siwan defining more closely the area immediately affected in the Darowlia thana and adding three other tracts, and (2) by Mr. Chapman, in charge of the Sadar subdivision, adding four tracts. The changes

	Area in square miles	Population
The whole of the Gopalganj thana	358	275,023
Minus the Gundaik Deara	120	55,800
(Approximate figures)	238	219,223
Mirganj thana	485	350,007
Siwan tracts (approximate figures)	175	168,875
Sadar tracts	32	32,000
Total	880	779,705

affected by the above are shown in the margin, and a sketch map is herewith submitted indicating the position of the old and new tracts. 8 per cent. of the population in question amounts to 62,376. As indicated in paragraph 3 of my last report, I am taking steps to prepare a programme of work sufficient to give employment to not only the above, but the average number of those employed in the worst months in the

year 1873-74

3. SECTION 24 (1).—*Number of relief circles and of officers in charge.*—There are at present 11 relief circles with 11 officers in charge, of whom 3 are honorary, 2 are paid, and 6 are police officers. In the Gopalganj subdivision, the thana Mirganj circle is I consider far too large, and is in process of being subdivided. The Gopalganj thana circle will also have shortly to be subdivided. As this subject was fully discussed in the last report, I need not dwell on it at greater length on this occasion.

4. SECTION 24 (2).—*General state of the affected tracts during the half-month under report.*—This may be summed up by saying that there are visible signs of increasing distress, the number of beggars being larger, and exceptional immigration being reported to Eastern Bengal with a view to employment there. The latter I look upon as a good sign. All such persons will remit money by money-order to their families. On the other hand, it makes it more difficult to offer help in the shape of relief work, as the number of men available, as opposed to women and children, is small.

5. SECTION 24 (2).—*Crop prospects.*—The *rahi* crop is all round very good up to date. Planters of experience say that the reason of this is that the *raiya*s this year had, owing to the failure of other crops, plenty of time to prepare their lands thoroughly. The outturn will certainly not be less than 8 annas, and may be as much as 10 annas. Sugarcane is suffering from lack of moisture, and the *raha* has come into flower too early—a fact indicating short outturn.

6. SECTION 24 (2).—*Food-stocks.*—I shall be in a position to submit the special report called for by Government under this head as soon as the figures ordered by Government to be furnished by the railway authorities are received. My information is that there is a three months' supply in this district.

7. *Importation or exportation of food-grains.*—Forms 8 and 9 are herewith submitted. It will appear therefrom that imports have decreased from 98,919 to 38,666 maunds, while exports have increased from 7,703 to 14,624 maunds. These figures indicate that too much grain had been previously imported. Revilganj figures correspond; 1,751 maunds having been imported as against 11,763, and 5,651 having been exported as against 7,476.

8. SECTION 24 (2).—*Prices.*—Prices remain fairly steady, and may be expected to become more easy as the importing season is about to commence.

9. SECTION 24 (2).—*Rainfall.*—Nil.

10. SECTION 24 (2).—*Public health.*—This is still remarkably good.

11. SECTION 24 (2).—*No emigration or immigration of famished people* is reported, but emigration to Eastern Bengal in search of employment on an unprecedented scale is observed.

12. SECTION 24 (2).—*The condition of the cattle* continues exceptionally good, and there is now less disease in the Gopalganj subdivision.

13. SECTION 24 (3).—*Relief works.*

(a) Three relief works have been open during the fortnight in the affected area, viz., at Kataya, Bhore, and Kuchaikoto in the Gopalganj subdivision. I visited them all last week and, as reported in my tour diary, found great want of supervision and organization. I have issued detailed orders, and trust that these will have the result of putting things

* Since writing the above, I have received a semi-official communication from Mr. Tytler, Sub-Deputy Opium Agent, a copy of which I have forwarded to you for perusal. It will appear therefrom that the number of relief works will have to be increased.

A. EARLE

The 17th December 1896

(b) SECTION 24 (3).—121 labourers were paid by daily wages irrespective of task (*vide* Form D). These were all road-dressers, paid at a fixed rate of 2 annas per diem (*vide* column 7 of Famine Statement E), and should not have been included in the return of relief labour at all, *vide* the closing words of section 66 of the Famine Code. Orders to this effect have already issued.

into shape.* Although the number on the work is large (943), I am not prepared to draw inference until proper system is introduced. The appointment of an Assistant Engineer now being made will doubtless help materially towards better results.

(c) 4,954 labourers were paid for task work (*vide* Form D)

(d) The wages paid were 1 anna 6 pies and 1 anna 5 pies per malo unit, and the rate per 1,000 cubic feet was Rs. 2-5-10 and Rs. 2-2 respectively during the two weeks in question. (*vide* Form E) With *makai* as the commonest available food grain selling 11 seers 14 chitaks per rupee, this rate was a little too high. The rate per 1,000 cubic feet should not, as I have calculated, have exceeded Rs. 2-0-7 and with better arrangements and closer supervision, this rate will not, I hope, in futuro, be exceeded. I may add that the District Board contract rate in ordinary years is Re 1-8, of which the coolies receive Re. 1. With *makai* selling at just twice the price that it did at this time last year, the rate of Rs. 2-0-7 per 1,000 cubic feet is fair.

(e) Since my visit to the works, no relief worker is getting less than the minimum nor more than the maximum rate payable according to the Code, with *makai* selling at 11 seers 14 chitaks per rupee

(f) Mr Chapman only, of the Sadar subdivision, gives information concerning relief works opened under private agency. He writes as follows —“I have only been informed of three cases in which this has been undertaken. Mr Macgregor, manager of the Arrowah Factory, started a private relief work some three weeks ago. Some fifty to sixty persons were employed on the first day, and the numbers increased to 577* on the 12th December, when the work was closed. He reports that there is a keen demand for work among the weaker poor in his vicinity. This demand will be met by the work which I propose should be started near Aphour in the beginning of January unless circumstances change. The preparation of land for and go will soon cease, and the number of persons demanding employment will increase. Mr Macgregor reports that the wage averaged something under an anna. Rai Tara Prasad Mukerjee has a private relief work in the neighbourhood of Revilganj, and Bibu Galadhar Dyal has started similar relief in the north-west of Manjhi thana, but I have not yet obtained the details of it”

• Able bodied men	84
Old and decrepit women	90
Young and vigorous women	85
Boys	140
Girls	228
	577

(g) I am asking the Subdivisional Officers of Siwan and Gopalganj to explain why they failed to report similar details.

14. SECTION 24 (4).—*Number of poor-houses open and the scale of food distributed*—No poor-houses have been opened by Government; but I have made arrangements, with your approval, with the manager of the Hathwa Raj for the establishment of poor-houses on the estate at Hathwa, Bhore, Kateya, and Gopalganj, the scale of food distributed being that prescribed by the Famine Code. This will be a great relief, as the number of beggars is daily increasing, particularly in the Gopalganj subdivision. In view of the unprecedently high prices, and consequent shrinking of private charity, I am not at all sure that it will not be necessary before long to apply to you for sanction to establish poor-houses in other parts of the district. Details in respect of the Hathwa estate poor-houses will be submitted in future reports.

15. SECTION 24 (5).—The organization is referred to in paragraph 3 above, but it does not appear that up to date any artisans or women have been employed at their houses in weaving, cotton-spinning, husking corn, etc.

16. SECTION 24 (6).—(a) as above.

(b) The Police have again, in the two weeks under review, proved themselves most incompetent, having misinterpreted in the most flagrant manner clear orders issued to them by me through the District Superintendent of Police. Form 6 clearly shows that they have been absurdly lavish. They have again, been strictly warned to confine their attention to starving wanderers under section 166, and to leave all other cases to the Circle Inspectors.

(c) The Gopalganj thana Circle Inspector alone has afforded relief during the two weeks in question, and his action has been discommending. The main efforts of this officer, as well as of the officer in charge of the Mungunj thana circle, have been directed towards organizing private charity, *vide* section 31 (b) of the Famine Code.

17. SECTION 24 (7).—*Relief in kitchens*—Nil.

18. SECTION 24 (8).—The accompanying statement shows that 2,230 and 84 applications were received during the fortnight for advances under the Agriculturist Loans and Land Improvement Acts respectively, and that as much as Rs. 27,413-8 have been advanced up to date under both the Acts. Mr. Lyall at Siwan has done much good work in this direction. The Hathwa Raj has spent almost the entire sum of Rs. 20,000 allowed by the Court of Wards for the purpose of advances.

19. SECTION 24 (9).—*Financial statement*—Please see the statement attached.

20. SECTION 24 (10) AND (11).—Nil.

21. *Additional staff*.—(a) An Assistant Engineer has been appointed during the two weeks under review.

(b) One overseer and 1 sub-overseers have been appointed, and 6 more sub-overseers are being engaged.

(c) Up to date, 2 paid Circle Inspectors have been appointed at Rs 50 per mensem, but more are immediately required in the Gopalganj subdivision. Three honorary officers have been appointed and 6 Police officers. The travelling allowance fixed for all Circle Inspectors, paid as well as honorary (saving the Police officers), is Rs 25 per mensem.

(d) Four cashiers have been appointed at Rs 30 per mensem each, and more will be required as the number of relief works increase.

(c) Five special clerks for famine work have been appointed—2 in the District Engineer's office, 1 in the District Board's offices, 1 in the Siwan subdivisional office, and 1 in the Collector's office.

22 MEETINGS.—I *Municipal*—(a) The Chapra Municipal sub-committee have reported that about 1,000 persons in the town require aid. This number will probably be reduced. Subscriptions will be collected at a meeting to be held by me on the 18th instant.

(b) At Revilganj a sub-committee has been appointed, but their report has not yet been submitted.

(c) At Siwan the Chairman strongly deprecates any action being taken, as he states that no distress exists. I shall direct him to appoint a sub-committee to enquire and report.

II *Zamindar's meetings*—(a) I held a meeting of the Chapra zamindars on the 5th instant. The result was extremely disappointing. I never had the misfortune to meet so few liberal men before. With the exception of Rai Bahadur Tara Prasad Mukerjee, none can be said to realize the situation. Some promises to import grain from a distance, however, were secured, and some offers to furnish employment on private relief works. It was needless to discuss the question of remission of rent, as none are being paid by the raiyats. Zamindars promised to be especially liberal towards beggars and to report all cases of respectable destitution.

(b) I hold another meeting to-day of absentees from the meeting of the 5th instant, of Chapra zamindars as well as of the landholders of the Siwan and Gopalganj subdivisions. The result will be reported in my next return.

A. EARLE,

Offg. Collector of Saran.

SARAN, CHAPRA,

The 17th December 1896.

No. 60F, dated Motihari, the 17th December 1896.

From—D. J. MACPHERSON, Esq., Collector of Champaran,
To—The Commissioner of the Patna Division.

I HAVE the honour, in continuation of my letter No. 1115G, dated 6th instant, to submit the following half-monthly report on famine matters in the district of Champaran, as required by section 24 of the Famine Code, for the first half of the month of December. The figures in this report relate to the weeks ending on Saturday, the 5th, and on Saturday, the 12th instant.

2. The returns upon which this report is based have been received by the date, and were, in the first instance, either incomplete or incorrectly prepared, and they have reached me personally only this afternoon, although this is the latest date for despatching the report.

3. Section 24 (1) (a).—Area affected, &c.—In my last report I gave the following as a rough estimate of the area and population of each of the tracts already requiring relief:—

Tract.	Area in square miles.	Population.
1	2	3
(1) Ramnagar tract (thanas Hardi and Bagaha) ...	405	146,610
(2) Araraj tract (in thana Gobindganj) ...	80	52,640
(3) Madhuban tract (in thana Madhuban and South Dhaka thana) ...	85	72,165
Total ...	570	271,415

I regret to have now to report that distress has become severe over nearly one-third of the district, though allowance has to be made for considerable tracts interspersed throughout it, in which the people generally are able still to provide for themselves. Roughly speaking, I may say that the following tracts in addition to the above are now more or less in need of immediate relief:—

Name of Tract and Thana.	Estimated area of tract.	Estimated population of tract.
1	2	3
	Sq miles.	
Eastern portion of Bettiah thana from the Sikrahna river southwards ...	131	91,482
Greater part of Gobindganj thana ...	160	105,280
Southern part of Motihari thana ...	32	14,520
Northern portion of Kesaria thana ...	27	18,441
North-Western portion of Dhaka thana ...	137	110,011
Southern half of Dhaka thana ...		
Total ...	487	229,734

Added to the figures for the areas previously reported, the total comes to about 1,057 square miles, with a population of about 601,149. Roughly speaking, it may be said that the greater part of the northern and eastern portion of Bettiah subdivision and the southern half of the Sadar subdivision, with the exception of a great part of Kesaria thana on the south, is now in present need of relief.

4. Section 24 (1) (b).—Relief Circles.—Owing to delay in obtaining officers to fill the posts of Charge Superintendents, it has not been possible to organize relief circles properly. During the fortnight under report, Mr. Wood, Subdivisional Officer of Bettiah, was relieved of judicial work, and placed in charge of the Hardi and Bagaha thanas with his head-quarters at Ramnagar, while the Sadar subdivision generally has been under the immediate supervision of the District Engineer, Mr. Sealy. The Madhuban and southern portion of Dhaka thana were, however, really in charge of Sir William Hudson, K.C.I.E., who kindly undertook to look after it. Similarly, Messrs. J. J. Macleod, C.I.E., H. W. J. Hill, and A. W. N. Wyatt have, respectively, been in charge in the distressed tracts in Lalseriah (eastern portion of Bettiah

thana), Turkoulia (south-western portion of Motihari and most of Gobindganj thanas), and Pipra (south-east of Motihari and north of Kesaria thanas); and they have generously been giving extensive employment to the poorer agricultural classes in these areas on private relief works of their own choosing carried on at their own cost. Arrangements have been made for opening Government relief works at once in these tracts; but the organization cannot be completed until charge Superintendents arrive. Mr. Forrester, Assistant Collector, arrived yesterday, and has for the present gone on to Bagaha thana. It is hoped that Messrs. Boxwell and Hyde, Assistant Superintendents of Police, who are under orders of transfer to this district, will join in a day or two, and take regular charge of thanas. I have not so far succeeded in obtaining the services of any suitable Indigo-planters to take the responsible posts of Charge Superintendents. I am urgently in need of more officers of this class and Circle Officers than I can lay my hands on.

5. *Section 24 (2) (a).—General state of the affected tracts.*—There has been no improvement whatever in the general conditions, and, as already remarked, the area of severe distress has largely widened during the fortnight under review.

6. *Section 24 (2) (b).—Crop prospects.*—The winter-rice crop is being harvested everywhere where it has come to maturity, and the harvest will soon be over. I see no reason to alter my former estimate of a three to four-anna yield taking the district as a whole, though in irrigated tracts, and particularly in thana Adapur, the crop is really a good one. Much has been done to extend the area under *rabi* crops during the last fortnight by giving out advances for temporary wells and for *rabi* seed, and many wells both for sowing and for preserving *rabi* crops have also been sunk on the promise of a free gift of one rupee a well. So far the young crop, even on unirrigated land, is holding out wonderfully well, but if there is no rain within the next fortnight or three weeks, its prospects will be seriously endangered.

7. *Section 24 (2) (c).—Food stocks.*—Those who possess stocks of grain are holding them up as much as possible. There will be a large accession with the gathering of the winter-rice harvest. Detailed inquiries as to the stocks in hand have now been almost completed, and the results are being tabulated; but even the most experienced judges profess themselves quite unable to give even an approximate estimate of the food-supply existing in the district. There seems to be a pretty unanimous opinion that it will be very seriously deficient, and grave doubts are expressed as to the ability of private enterprise to meet the wants of the people at the proper time. So far, however, supplies have been forthcoming sufficient to meet the local demand.

8. *Section 24 (2) (d).—Importation and exportation of food grains.* The imports and exports of food-grain by rail during the first fortnight of December are shown in Forms Nos 8 and 9 annexed. They amount respectively to 3,934 and 1,993 maunds against 1,217 and 6,330 maunds in the preceding fortnight. The exports are therefore gradually declining and the imports increasing, but it is believed that the latter are due not to the operations of the ordinary grain-dealers, but mainly to the efforts of Indigo-planters and a few others to supplement the food-supply of the district. There is very little road traffic at present.

9. *Section 24 (2) (e).—Prices.*—I subjoin a statement showing how the prices of the principal food-grains at Motihari and at Bettiah have stood during the period under review, and on the last day of the preceding fortnight. As compared with the latter date, they have, on the whole, fallen slightly or remained stationary, the only exception being the price of common rice at Bettiah.

10. *Section 24 (2) (f).—Rainfall.*—Not a drop of rain has fallen during the fortnight. The outlook will become very grave if none falls in two to three weeks.

11. *Section 24 (3) (g).—Public Health.*—As I have not yet received the vital statistics for the month of November, I have nothing to add to what I said in last report. The physique of a considerable portion of the population in the distressed tracts appear to have deteriorated, as they do not resort to relief works unless they are near their villages, when they first begin to feel pinched. The following statistics relating to the health of prisoners on their admission to jail during the fortnight ending 12th December have been furnished me by the Civil Surgeon, Surgeon-Captain Evans:—

Health on admission.	Convicts.		Under-trial prisoners.	
	1896.	1895.	1896.	1895.
1	2	3	4	5
Good	10	8	16	5
Indifferent	2	5	14	4
Bad	1	...	4	...
Total	13	8	34	9

The admissions during the corresponding period of 1895 were so few that little can be inferred from these figures, but so far as they go they are not unsatisfactory.

12. *Section 24 (3) (h).—Emigration or Immigration of famished people.*—No emigration of famished people has been observed, but many people have been noticed coming into or passing through the district from the eastern districts of the North-Western Provinces, and some of these bore a pinched appearance. Many people of Champaran, and particularly professional labourers, have left the district in search of employment on public works and harvesting operations.

13. *Section 24 (3) (i).—Condition of cattle.*—The cattle everywhere are in good case, but rinderpest has, I now hear, made its appearance in places.

14. *Section 24 (3) (a).—Government relief works.*—Statements D (Form No. 5) and E (Form No. 7) annexed to this report show the number of relief works open during the period under review, and the number of persons employed on them. The number of relief works open has increased from 7 to 11, the new ones being the following, viz., digging the Masan Canal near Phagunahta (thana Hardi), repairing the Ramnagar-Bagaha road (thanas Hardi and Bagaha), repairing the Chainpattia Shikarpore road (thana Hardi), and re-excavating the Sisahnai tank (thana Dhaika). More works would have been opened had men to take charge of them been available, but Indigo-planters have been carrying on relief works on their own account meanwhile. The average number of male units employed daily on task work during the fortnight increased from 1,330 to 2,426 (or 1,699 in the week ending 5th December and 3,153 in that ending 12th idem). In the first week of the period these out and carried an average of 62 cubic feet of earth, and were paid an average wage of 1½ annas, the cost per 1,000 cubic feet amounting to Re. 1-10-6. In the second week they out and carried only 42 cubic feet on the average, and were paid an average wage of only 1½ annas (the minimum wage being 1½ annas), and the cost per 1,000 cubic feet reached Rs. 2-0-11. The poor outturn is due to the very large number of B class workers, and the increase in the proportion of women and children in the second week. The A class labourers are mostly obtaining employment in harvesting the winter rice harvest, but many have gone elsewhere in search of work. The average number of male units employed on daily wages irrespective of task work during the fortnight was 240 (week ending 5th December, 131; week ending 12th idem, 342), and each earned on the average 1 anna 10 pies in the first week and 1½ annas in the second week. In the preceding fortnight the number of male units on daily wages was only 91. The large proportion of workers not employed on task is due to 5 out of the 11 works consisting of road repairs, two of them, recently started, being merely surface repairs, in which it was impossible to set a task. I am of opinion that such repair works should not be shown as relief works at all, but should be carried out as ordinary works under the District Board, but in such a way as to give only, as far as possible, a wage corresponding to that allowed for regular relief works. If so instructed, I can revise the statements. All that has to be done is to exclude the line of entries in Statement D against the works marked I and F. On other road works, those paid a daily wage were chiefly employed in rough dressing.

15. The total number of persons employed on relief works on the 12th December was as follows—

Subdivision.	Men	Women	Children.	Total
1	2	3	4	5
Motihari (Sadar)	1,628	803	1,027	3,458
Bettiah	1,578	894	393	2,865
Total	3,206	1,697	1,420	6,323

The numbers have increased very rapidly of late, and would have been much greater but for the fact that the people prefer to go to the private works carried on by factories, as no task is exacted.

16. *Section 24 (3) (b).—Private relief works.*—In my last report I mentioned that "at a meeting of the Champaran District Board held on the 16th November, at which a number of planters and other landlords who were not members were present, it was resolved that zamindars and planters generally should be recommended to start works of their own, choosing to benefit the tracts in which they are specially interested on the first symptoms of real distress, and supply me with the results, so as to enable me to judge where public relief works are needed and give some time to collect the necessary staff." This arrangement has been loyally carried out by a number of the leading Indigo-planters, but I have not received regular returns from all who have done so. I annex, however, a statement giving particulars in regard to the principal works undertaken during the fortnight under review. Much work of the same kind was carried on in the preceding month by Sir William Hudson near Suraha and by Mr. Still near Shikarpur; but as these tracts were among the most distressed in the district, they have now been replaced by public relief works. Those who have furnished returns for the present fortnight are Mr. H. W. J. Hill of Tirkonlia, Mr. J. J. Macleod, C.B., of Lalsaraiya and Rajghat, Mr. A. W. N. Wyatt of Pipra, and

Mr W. A. Cox of Bairiya. Others who have carried on work are Mr. F. O. Walker of Nawada, Mr. Vincent of Padomkir, Mr. C. D. Miller of Motihari, and the Bettiah Raj. The works done were tanks and roads. No task work was exacted. The average wage paid appears to have been one and a half anna per head. It will be observed that the *average* daily number of persons employed during the second week on private works in the four concerns for which returns have been received was no less than 13,585, and almost all the works undertaken were such as would not have been taken up in an ordinary year. The extent to which there is distress requiring special relief is very great. The *average* number of persons employed on Government relief works during that week was 4,292, bringing the number up to 17,877. If work for which no returns have been received be added, the total average for the week would probably be about 20,000, and of course on the last day of the week it would be much greater than this. In all the concerns named, except Bairiya, orders have been issued for the starting of Government relief works.

17. *Section 24 (4) and (5) — Poor-houses and employment given at home* — No measures of this kind have yet been undertaken.

18. *Section 24 (6) — Distribution of grains and money-doles* — Pending the appointment of regular Charge Superintendents and Circle Officers, the distribution of gratuitous relief has been left in the hands of the police under sections 12 and 166 of the Code, except in thanas Hardi and Bagaha, of which Mr. Wood, Subdivisional Officer of Bettiah, is in charge. In these thanas he has four centres for distributing such relief at Ramnagar and Shikarpur under a Circle Officer, at Lauriya under his kanungo and Bagaha under the Civil Hospital Assistant of the dispensary under the superintendence of Mr. Murray, of Messrs. Dear and Company. There are police thanas or outposts at all these places. I annex a statement in Form No. 6, showing the average number of persons gratuitously relieved at each place during each of the weeks covered by the report and also during the fortnight as a whole. The average daily number in the first week was 50 and in the second 217. I am somewhat sceptical as to the returns on which these figures are based having been properly drawn up in every case, but if they turn out to be wrong, a revised statement will be submitted. All are shown as relieved under Chapter V, but I have no doubt several were wanderers relieved by the police under sections 12 and 166. The average amount of the daily dole per adult unit was 1 anna 2 pies in the first week and 10 pies in the second week. Lists are being prepared by village agency of persons who should receive gratuitous relief under section 42 of the Code, and pending the full organisation of the form of relief on the arrival of Charge Superintendents and Circle Officers. Many who would probably be classed as unable to work are paid a minimum wage for attending the relief works.

19. *Section 24 (7) — Kitchens* — These have not been opened.

20. *Section 24 (8) — Loans* — Again I regret to have to report that the information furnished to me in regard to these is incomplete, and what has been received has only come to hand to-day. This is no doubt because the officers were very busy until the middle of the month giving out advances while there is still time to sow *rabi*. The time for sowing *rabi* may now be said to be past, except as regards cheena-millet and catch-crops of *khenari* and other pulses in the rice fields. A sum of Rs. 15,887 was drawn from the Treasury during the fortnight, and made over to various officers and one factory for distribution as advances under the Agriculturists' Loans Act for the construction of temporary wells and purchase of *rabi* seed. The total amount actually given out to cultivators, so far as returns have been received, is Rs. 11,701. The Subdivisional Officer of Bettiah has not stated how much of the Rs. 6,987 distributed by him was for wells and how much for seed; but of the remainder, Rs. 3,181 was for the former purpose and Rs. 1,530 for the latter. Owing to the incompleteness of the Bettiah returns also, I am unable to report the number of villages and persons to whom the loans were granted. A sum of Rs. 300 was advanced under the Land Improvement Loans Act. All loans are granted on the joint and several security of all in one village who obtain them.

It is reported that wells have been dug in large numbers in consequence of these advances, and still more are being dug under the stimulus of a gift of one rupee a well announced by me ten days ago. It was found, however, that many persons were not digging wells with the advances they got until the officer went round again and compelled them to do so on pain of refunding the money at once.

21. *Section 24 (9) — Finance* — I annex a statement showing the money drawn and expended during the fortnight. The total expenditure has been Rs. 3,851-11-5.

No. 61F., dated Motihari, the 18th December 1896.

From — D. J. MACPHERSON, Esq., Collector of Champaran,
To — The Commissioner of the Patna Division

In continuation of my letter No. 61F., dated the 17th instant, submitting my first half-monthly famine report for December, I have the honour to request you to be good enough to substitute the enclosed statement for the one attached to that report giving particulars of famine relief works done by private agency. The calculation of the average daily wage per head shown in column 9 of the statement was incorrect.

2. In consequence of this please substitute for the sentence in paragraph 16 of my report, reading "The average wage paid appears to have been 1½ anna per head," the following:—"The average daily wage appears to have been 11 pies per head, or 1 anna 3½ pies per male unit, so that the wage actually given was less than that paid on the Government relief works."

D. J. MACPHERSON,
Collector.

No. 1557G., dated Darbhanga, the 17th December 1896.

From—R. W. CARLYLE, Esq., Collector of Darbhanga,
To—The Commissioner of the Patna Division

I HAVE the honour to submit herewith my third half-monthly report for the weeks ending 5th and 12 December 1896.

1 (a)—I have no change to report in the area affected. It is possible that in consequence of the rain in November part of Rosera thana is now safe; but as I have not been there lately myself, I do not think it safe to make any material change at present in my estimate, and I repeat, with very slight changes, my former forecast that distress will be pretty general by the end of this month over 2,044 square miles, with a population of approximately 1,720,000. In about 674 square miles, with a population of about 550,000, I do not expect much distress before March. The prospects of a considerable portion of this tract depend on the *rabi* crops. In about 203 square miles, with a population of about 180,000, there have been good crops. Here, however, it is possible that raiyats and petty zamindars, who in ordinary years would support their labourers, will this year manage to get rid of them on relief works. Thus it will be very difficult to prevent, and I do not think we can entirely exclude these tracts in estimating the numbers likely to come on relief works. The remainder of the district, namely, the Samastipur and Dalsingh Sarai thanas, are, I hope, quite safe, as they are largely *rabi*-producing tracts, and so far the *rabi* is coming on very fairly in the south of the district.

(b)—I have not as yet formally opened any relief circle. I have experienced much greater difficulty than I anticipated in getting suitable men as Circle Officers. I have, however, now selected a few, and am arranging with the Subdivisional Officer of Madhubani where to post them. I have appointed Mr Blackwood, Assistant Magistrate, Superintendent in Darbhanga thana, and will post Inspector Lalji Shahai, as a temporary measure, to Bahera. On the Assistant Superintendents of Police, lately gazetted, arriving here, I will post one of them to Bahera, and one to Phulparas. I will post the Sub-Deputy Magistrate at Madhubani to Banipati as soon as the Deputy Magistrate joins. Mr. King, late Manager of Betuiha Factory, I will post, as soon as he arrives, at Khajauli. I will also make arrangements for Madhubani in a day or two.

2. (a)—The number of labourers on the test works fell off towards the end of last month, but there has been a very rapid increase during the last few days, as the paddy-cutting is nearly over, and labourers are now out of work. For instance, at Basaitha, in the Banipati charge, the number at work yesterday had gone up to 1,350. I have not got figures from other charges, but I know the numbers are increasing very rapidly elsewhere. I have arranged to open at once works at Mureta, in the Jali outpost (Darbhanga thana), and at Umgaon in the north of Banipati. I am going to Madhubani on Saturday, the 19th, and will settle with the Subdivisional Officer on works to be opened in Madhubani thana. Work will probably also have to be given in a few days near Ladania outpost in Khajauli. Probably between 20,000 and 30,000 will be at work daily before the end of the month, judging from the very rapid increase going on at present.

(b)—Besides the increasing numbers coming on relief works, other indications of increasing scarcity are that I am getting reports from the Madhubani subdivision and from the Warisnagar thana of people wandering about in search of work. This will be met at Madhubani by the relief works opened or about to be opened. In Warisnagar thana, a portion of which is coloured black in my famine map, it will be met at present by road work. I also expect considerable private works to be started there shortly by the maliks of Dudgama, who will apply to me for advances. I have informed Mr. Webb, of Mukhtapur, who is willing to be surety, that I am ready to advance the money.

(c)—I have no change to report in the prospects of the crops. *Rahar* and *mastard* are everywhere doing well. Sugarcane looks very well, but I hear the produce of *gur* is not very satisfactory. The other *rabi* crops give very good promise in the south, and should, with favourable weather, be very nearly an average crop in the centre of the district. In the north a very large area has not been sown, or has not germinated. What has come up should give, with favourable weather, an 8 or 12-anna outturn, or 4 to 6 annas for the whole area usually under *rabi*.

(d)—There has been a very large increase in exports during the fortnight, owing no doubt to new rice coming into the market.

(e)—The grand total of exports, excluding internal district transfers, is 61,365 maunds, while the grand total of imports is similarly 15,620 maunds. This gives an excess of exports over imports of 45,765 maunds, or nearly 1,635 tons. But I have found that the importation of smuggled rice from Nepal is so large (not less than 1,000 maunds a week) that I believed that it fully covers the apparent excess of exports. I have collected figures for the last five years, but I have only just received these, and find they require certain corrections, so I cannot discuss the question of exports and imports till I submit my next report.

(f)—Public health continues good, except in the case of the poorest classes, among whom, as last month's jail returns showed, scurvy is beginning to show itself. I have noticed very few signs of distress among the people, except in the extreme north of the district. I am now writing at Kamtoul; and though it is situated in one of the worst tracts so far as the crops are

concerned, I have seen no signs of acute distress among the people. At Basaitha yesterday also I noticed very little appearance of want among the 1,850 labourers on the work. The raiyats and labourers here are, I believe, generally comparatively well off, and probably most of them have a little money saved. This is not the case in the north, at all events near Jaynagar.

(h)—I have not heard of any emigration or immigration of famished people, and I noticed a few days ago the healthy appearance of the coolies marching along the Musaffarpur-Darbhanga road, on the way to the east. It will, however, soon be necessary to patrol it, as probably many will soon be returning from Eastern Bengal, failing to get work, as there are so few districts this year where the people are in their normal state.

(j)—The condition of cattle is good at present, but I do not see how they will be provided for two or three months hence, unless we have good winter rains.

3. There are four works open at present:—

(a) Phulparas.

(b) Jaynagar.

(c) Khajauli.

(d) Basaitha in Banipati.

The test work at Kamtoul was closed after a few days, as only professional labourers came, and they refused to work at the wages offered. I have mentioned in a previous paragraph the new works I propose to open. All are paid for task work. The wages are 1 anna 6 pies for men, 1 anna 3 pies for women, 9 pies for big children, and 3 pies for small children.

So far I have had only one class of men and women (A), as hardly any but people accustomed to labour are coming on the works, and they are in fairly good health. The statements annexed give figures as to numbers, &c. I have not received any information as to relief works under private agency; but Mr Bell, the Manager of the Darbhanga Raj, has kindly promised to supply me with figures in future.

4. No poor-houses have yet been opened. I am about to make arrangements at Darbhanga and Madhubani.

5. There is no organization at present for the employment of artisans, &c. Probably it will soon be necessary to do something for high caste women.

6. The Deputy Inspector of Schools and two Sub-Inspectors of Schools were till lately employed in distributing grain doles. They are now required in connection with examinations, and at present gratuitous relief works is in the hands of the Police and of 17 other officers specially appointed or deputed for the purpose in Madhubani subdivision. Very shortly the whole of this work will be in the hands of my Circle Officers, except that the Police will still deal with urgent cases.

7. There are no kitchens.

8. (a)—I have given no loans as yet. As mentioned in a previous paragraph, I shall probably shortly be making an advance of several thousand rupees to the maliks of Dudgama under the Land Improvement Loans Act.

(b) I have put a Deputy Collector (Maulvi Gowhar Ali) on special duty for a few days to endeavour to get raiyats to take advances for *kutcha* wells. I have given him Rs. 200 to dig *kutcha* wells at the expense of the District Board to show the raiyats what can be done. I have not yet received any report as to the result. It will take a few days before I can get it. The raiyats generally say the wells will be a failure. The nature of the soil and the depth of the subsoil water are both unfavourable in most places, but the Deputy Collector has been instructed to select places where there appears to be some chance of success, and I have no doubt that the raiyats will quickly take to them if they see that water can be got easily and cheaply.

9. I submit the usual financial statements.

R. W. CARLYLE,
Collector.

No. 1380B., dated Musaffarpur, the 17th December 1896.

From—L. HARR, Esq., Collector of Musaffarpur,
To—The Commissioner of the Patna Division.

I HAVE the honour to submit my half-monthly report for the first-half of December 1896. The figures in this report relate to the two weeks ending Saturday, the 12th December 1896.

2. *Section 24 (1).—Area affected—Relief circles.*—There is no change in the area affected, &c. I am organising the relief circles as fast as I am able to do so, and am first ascertaining what areas the factories will undertake to look after. I have called for applications for the appointments for relief circles to be held by native officers, and have a fair number of applicants. Selections will be made as soon as the circles can be marked out.

3. *Charge Superintendents.*—Two Charge Superintendents have been put on duty—one in Sitamarhi, Mr. Clarke, and one in the Sadar, Mr. Sheepshanks.

4. *Section 24 (2).—General state.*—There are not wanting signs that the pressure of scarcity is beginning to be felt—in Sitamarhi subdivision more especially. It is reported that beggars are beginning to wander. The work supplied by the *dhan* cutting has been very scanty this year, and is not likely to last much longer. The Subdivisional Officer of Sitamarhi estimates that about one-eighth of this employment still remains. Besides the cutting there is of course the threshing and winnowing which give some employment.

5. *Crop prospects.*—So far the *rabi* prospects continue very favourable. The broadcast crops which are ordinarily put down in the wet *dhan* lands when the *dhan* is out have necessarily been very much reduced owing to the dryness of the soil. But other *rabi* crops have done well so far on the whole. *Rahar* promises very well indeed. These reports are very general, and I can certify that they are true of Katra thana, which I have very carefully inspected personally during the last week.

6. I take this opportunity to supply an omission in my report dated the 17th November 1896, and to say that in Mohwa thana the *bhadi* is estimated at about 8 annas, in Lalganj thana at 7 annas and in Hajipur thana at 8 annas. This is the Subdivisional Officer's estimate, and is in excess of the police and chankidari estimates, but I have no doubt it is more nearly correct.

The police have furnished extraordinary low estimates for the *rabi* estimates, which it seems to me to bear no sort of relation to the truth. This being so, I hope their other estimates similarly err.

7. *Section 24 (2).—Prices.*—Prices are slightly higher at the Sadar, much the same at Hajipur, and slightly easier in Sitamarhi. Tables are given for the subdivisional headquarters and for the several thanas and outposts.

8. *Food-stocks.*—I have received a number of returns from villages of their food-stocks. They are not complete. I will submit my special report on this subject as soon as I possibly can do so.

9. *Importation and exportation.*—I have not received copy of the Saran form referred to in Commissioner's Famine Circular No. 13 of 1896-97, dated the 9th December 1896. I therefore submit the Code form as before.

The net import by rail into the district from railway stations outside was as follows:—

	Import.	Export.	Net import.	Export.
Rice	... 3,708	1,643	2,160	...
Paddy	... 617	80	537	...
Wheat	... 87	88
Barley	... 417	167	250	...
Indian-corn	... 4,140	2,834	1,306	...
Other grains	... 4,661	1,629	3,032	...
Total	... 13,625	7,341	6,284	...

This is not a very considerable amount.

10. *Rainfall.*—Nil.

11. *Public health.*—Public health continues good. The nature of the particulars of information supplied by the Civil Surgeon of Darbhanga about the jail population has not been communicated to me, but I am aware that the Musaffarpur Jail population is healthy at present, as is also the general population.

12. *Emigration, &c.*—There has been no emigration or immigration of famished people. The exodus to the east by labourers in search of work still continues.

13. *Condition of cattle.*—The condition of the cattle is exceptionally good at present.

14. *Section 24 (3).—Relief works.*—There are two regular test works and one work under the Sitamarhi Municipality conducted on Famine Code lines. The latter is the only work which has attracted any materially large numbers of labourers.

The test work at Arihar has attracted no labourers, and that at Suhar extremely few. At Sitamarhi, on the other hand, the number of people has been increasing, and instructions have been issued to the District Engineer to open works under his own control in the neighbourhood of Sitamarhi; as the numbers are getting beyond the control of the municipal officers.

Statement showing prices-current prepared from police report for the 13th December 1896, District of *Muzaffarpur*.

L. HARR,
Collector.

**RESOLUTION ON THE ANNUAL GENERAL ADMINISTRATION REPORT
OF THE DACCA DIVISION FOR THE YEAR 1895-96.**

GENERAL DEPARTMENT—MISCELLANEOUS.

Calcutta, the 29th December 1896.

RESOLUTION.

READ—

The Annual General Administration Report of the Commissioner of the Dacca Division for 1895-96.

THIS report was partly prepared by Mr. L. Hare, but was finally submitted by Mr. H. Luttinan-Johnson, who held charge of the Division throughout the year 1895-96. It might have been compressed without losing any of its value. There were changes of charge in all the districts and in six of the twelve subdivisions, and the Commissioner reports that District Officers found difficulty in making a permanent distribution of work at their headquarters owing to frequent changes in the staff.

2. *Tours and Inspections.*—The Commissioner was on tour for 126 days; and all the District and Subdivisional Officers reached or surpassed the standards of touring; except the Collector of Mymensingh, whose tour fell short of the prescribed period of four months by two days. The Commissioner did not inspect the treasuries except at Mymensingh; nor did he visit the subdivisions of Netrokona and Kishorganj. The subdivisional offices of Pirojpur and Patuakhali were inspected in only one half year by the Collector of Backergunge. With these exceptions, all the prescribed inspections were apparently performed; but it is not stated whether Subdivisional Officers inspected their own offices.

3. *Weather and Crops: Public Health: Material Condition of the People.*—The rainfall in the Division was 62·14 inches, or 13·19 inches less than the average of the previous five years, and it was ill-distributed. A cyclone passed over Dacca and Backergunge on 2nd October 1895, and did much damage. On the whole, however, the spring crops were better than usual, and the year generally was not a particularly unfavourable one. Jute yielded nearly a 14-anna crop, and winter rice about 13 annas. A disease affected the betelnut palms in Backergunge, which did much damage: its causes were investigated by Dr. Watt and Mr. N. G. Mukharji, who, however, formed no precise opinion either as to its origin or the remedies for it. The people of the Division are generally prosperous, but the rise in the price of rice, which began before the year under report and has continued into the present year, is undoubtedly felt by persons who are not cultivators and have fixed incomes. The loans given in the previous year to cultivators in Faridpur, to relieve temporary distress, have all been repaid.

The death-rate per mille for 1895-96 is shown at 33·04, against 27·8 and 40·4 in the two previous years. The increase is partly attributable to improved registration. Curiously enough, where compulsory registration was introduced into certain selected areas, the death-rates were below the average of the whole Division. In Faridpur, Surgeon-Captain Deane, Deputy Sanitary Commissioner, and Maulvi Fuzlul Karim, Subdivisional Officer of Madaripur, and in Backergunge Mr. LeMesurier, the Collector, succeeded in overcoming the prejudices of the leading Muhammadans against vaccination, the result has been a very large increase in the number of persons vaccinated. In Backergunge and Mymensingh the number of vaccinations was more than double the numbers of the previous year. The Lieutenant-Governor is glad to notice that the question of improving the supply of drinking water received the attention of Municipalities and District Boards, and hopes that their efforts in this direction will be continued.

4. *Emigration and Immigration.*—Seventy-five thousand four hundred and twenty seven coolies embarked at Goalundo for the labour districts in 1895, or 33,475 more than in 1894. The increase among "free" emigrants was 17,114. More than the usual numbers of labourers from Bihar and the North-Western Provinces, and also from Nadia, came to the Division during the year in search of work.

5. *Manufactures: Trade and Commerce.*—There are 21 steam jute-presses in and about Narayangunge, and six in the Mymensingh district. There is a steam oil-mill at Jhalokati in Backergunge, and also a steam flour and oil-mill at Dacca.

This Division has received considerable benefit from the construction of the Assam-Bengal line to Chandpur, although no part of it lies within the Division. The principal articles of export are rice and paddy, jute and betelnut. The total exports of food-grains were 36,74,903 maunds, and the imports were only 2,85,027 maunds. These figures are not complete, in so far as they do not show exports by country boat to places outside Calcutta. No accurate figures are available to show the export of betelnuts. 1,21,19,688 maunds of raw jute were exported to Calcutta and the 24 Parganas. The port of Narayangunge is the principal centre of trade in the Division; 347 and 380 vessels entered and cleared from it during the year, as against 288·35 in the previous year. Almost the whole trade of this port is with Chittagong. Its import trade is valued at Rs. 2,83,689, and its export trade at Rs. 65,75,856, against Rs. 3,38,018 and Rs. 62,67,695 respectively in the previous year; so that the import trade shows a decline, and the export trade an increase.

The numerous Provident Societies in Backergunge whose sudden growth was commented on in Mr. Luttman-Johnson's report, as well as in the Government Resolution on it, of the previous year, have mostly died a natural death; out of 68, only 6 survive. The Loan Offices at Faridpur and Barisal pay large dividends.

6. *Civil Justice.*—One hundred and thirty-five thousand one hundred and sixty-three suits of all kinds were instituted in 1896, 2,572 more than in 1894, and 140,518 were disposed of. Of the whole number of witnesses examined, 9·5 per cent. were detained more than two days in the Munsifs' Courts, and 21·3 per cent. in the higher Courts.

7. *Crime, Police, Criminal Justice.*—The Commissioner has given a very complete and interesting review of the year's criminal administration. There were 19,179 cognizable offences reported, including 3,810 sanitary cases, their number showing a slight decrease on that of the previous year, and 22,936 non-cognizable offences, or 1,251 more than in 1894. The Commissioner points out that the number of cognizable cases has increased by 7,439, or 63·3 per cent., since 1869; but in 1875 again the number was practically the same as in 1895.

The views of the Lieutenant-Governor on the subject of the great increase of crime in Backergunge (especially in relation to gunshot murders) have already been published in the Resolution on the administration of the Police Department and in the letter to the Commissioner of the Dacca Division appended to it. The amount of cognizable crime increased by 37·4 per cent. in Backergunge, decreased in Mymensingh and Faridpur, and remained unaltered in Dacca. The number of cases of rioting that occurred in the Division decreased from 634 to 546; Backergunge had 156 cases, being the largest number of any district in the Division, as well as the largest number yet reported from Backergunge itself. 124 murders and 27 dacoities took place in the Division, but it is feared that numerous river dacoities were committed, which were not reported by the victims who are usually strangers. The improvement of the patrol-boat system, whose main aim is to check crime of this kind, is under the consideration of Government. A notorious dacoit, named Mohar Khan, who had already escaped from jail five times, added a sixth to his series of escapes.

The police of the Division generally are reported to be wanting in energy; but in Dacca and Backergunge they are said to have done good work. In Mymensingh 94 prosecutions were instituted against the police; 53 of these cases were held to be true, but only 11 resulted in conviction. No account is given of any charges made against the police in other districts of the Division. As regards the rural police, efforts were made throughout the Division, with some success, to recruit the chaukidars from a higher stratum of society than heretofore; in Backergunge their status is known to be very much higher than in most districts. In that district a graded scale of pay is in force, but freer use might with advantage be made of the Reward Fund, from which only Rs. 818 was distributed in rewards during the year. The total amount of rewards paid in the Division rose from Rs. 4,155 in 1894 to Rs. 5,981

in 1895, and might be increased still further with advantage. The Commissioner enumerates the chief instances of good service for which rewards were given. It is noticed with satisfaction that the number of chaukidars who were in arrears of pay at the end of 1895 was only about half the number of 1894. In Mymensingh there were no arrears. Dafadars have been appointed to supervise the rural police in a number of unions both in Backergunge and Mymensingh.

Stipendiary Magistrates disposed of 15,225 cases and examined 62,618 witnesses, against 15,659 cases and 63,223 witnesses in 1894; Honorary Magistrates and Benches tried 8,938 cases and examined 17,891 witnesses, against 6,978 cases and 14,925 witnesses in 1894. The attendance of Honorary Magistrates with few exceptions was regular, and the work which they performed is reported to have been of the greatest assistance to the administration. The proportion of witnesses detained more than two days to the total number of witnesses examined was 4·1 in the case of Stipendiary, and 8·5 in the case of Honorary Magistrates, against 4·3 and 8·6, respectively, in the previous year.

The number of cases declared false was 1,148; in 104 of these, or 9·48 per cent., prosecutions were instituted, but in only 20 was a conviction obtained. The number of police cases remanded six times or more was 8·1 per cent. of the whole number disposed of; in 1894 the ratio was 7·4 per cent.

The number of cases committed to the Sessions increased from 259 to 328; of the 297 cases disposed of, only 186 resulted in conviction, giving a proportion of 62·6 per cent. for the whole Division. In Backergunge 76·8 per cent. of the Sessions cases ended in conviction, but in the other districts the proportion was less than 57 per cent., a fact which shows that commitments were made with less care and discrimination in them than in Backergunge.

Fines to the amount of Rs. 1,21,162 were imposed during the year; the balance outstanding at the beginning of the year was Rs. 48,559. Rupees 1,07,653 were collected and Rs. 24,769 written off during the year, which closed with a reduced balance of Rs. 37,299.

8. *Land and Land Revenue.*—The current demand on account of land revenue in this Division was Rs. 35,30,994; and the arrear demand Rs. 1,42,083. Out of the total demand of Rs. 36,73,077, the sum of Rs. 35,19,720 was collected. In the case of permanently-settled estates the standard percentage (99 per cent.) of current collections to current demand was surpassed in Mymensingh and Faridpur, and was very nearly reached in the other two districts. The following table shows the standard and actual percentages in respect of the other two classes of estates:—

				CLASS II	CLASS III.
				Temporarily-settled estates.	Estates under direct management
Standard percentage	95	90
Percentage of collection in—					
Dacca	81·33	84·3
Mymensingh	96·4	96
Faridpur	82·2	90·9
Backergunge	82·5	90·2

The collections in all the districts except Mymensingh fell far short of the standard in class II, and in Dacca they fell short in class III. They were throughout best in Mymensingh. The current demand in estates under direct management in Backergunge is very large, amounting to Rs. 4,51,407. In this district, as well as in Faridpur, collections in this class of estates are now made by means of tahsil establishments, but are still capable of much improvement. They are improving in Faridpur but in Backergunge the results were less favourable than in 1894-95. The Lieutenant-Governor notices with satisfaction that steps are being taken to have the leases cancelled of farmers who are able to pay the Government demand, but habitually default till coercive measures are taken against them. The technical difficulties experienced in carrying out settlements under Chapter X of the Tenancy Act which the Commissioner remarks upon will, it is hoped, be overcome by the amendments in that chapter which the Lieutenant-Governor proposes to make. In estates managed direct Rs. 20,257 were spent on agricultural and other improvements. 2,297 estates and shares of estates defaulted for revenue, and 367 were actually sold.

The total demand on account of Road and Public Works cesses amounted to Rs. 11,44,897, and the collections to Rs. 10,43,670. The road cess has at

last been levied at the full rate in Backergunge. The Commissioner reports that in that district, and in Mymensingh, enquiries have shown that zamindars realise from the raiyats the whole of the cess, instead of half of it for which their tenants are legally liable, and sometimes exact even more. If the raiyats were informed of their legal liabilities in this respect, it is difficult to believe that they would continue to pay the whole of the cess.

Eleven thousand three hundred and fifty-five certificates were issued for the recovery of public demands, being 520 less than in the previous year; but the disposals have not kept pace with the institutions, and the number of cases pending at the close of the year increased to 4,284, or 718 more than were pending twelve months previously. The Lieutenant Governor hopes that vigorous efforts will be made to dispose of pending cases without delay, especially in Dacca where 107 cases were pending for more than six months, and in Backergunge where 1,897 cases were pending at the close of the year. A number of partition cases have been pending a long time, the oldest being that of Paigana Bhowal in Dacca, which commenced in 1884, and on which nearly a lakli of rupces has already been spent, the area under partition being about 1,90,000 acres. Sixty cases have been pending for more than five years. It is hoped that the amendment of the Partition Law will put an end to this state of things which is harassing alike to the proprietors, the tenants and the officers of Government.

The number of miscellaneous cases under the provisions of the Tenancy Act showed a decrease under every head, except that of transfers by decree sale, the number of which was almost doubled.

The Land Revenue Administration of the Division is on the whole satisfactory; the present Commissioner has given close attention to it with the co-operation of District Officers, especially of Messrs. Savage and Earle, and has in recent years done much to improve it, but there is still room for further improvement.

9. *Wards' estates* — There were six estates in the Division under the administration of the Court of Wards, with a rent-roll of Rs. 2,43,083 and an arrear demand almost equalling it (Rs. 2,12,470); and though the collections were only 60·7 per cent. of the total (current and arrear) demand, it is satisfactory that the outstanding balance was reduced by collections and remissions to Rs. 1,49,858. Rupees 41,831 were spent in improvements, and Rs. 44,673 in miscellaneous works—an outlay which having regard to the amount of the rental is not illiberal.

10. *Excise, Stamps, Income-tax*.—The excise revenue rose to Rs. 8,97,357, showing an increase of Rs. 76,224, which was contributed chiefly by country spirits and ganja. The year's revenue is the highest on record in the Division, although the incidence is only 1 anna 5·4 pies per head of the population. The increase in revenue under this head during the year is attributed to improvement in the material condition of the people, which also accounts for the increase from stamps and other sources of revenue.

Stamps yielded a revenue of Rs. 28,50,108, or Rs. 35,102 more than in the previous year.

The income-tax was finally assessed on 11,711 persons at Rs. 3,17,726, an increase of Rs. 27, 30 on the previous year's demand. Throughout the Division over 99 per cent. of the demand was collected, and in Faridpur the whole was realized.

11. *Communications* — The water communications in this Division are the most important; and the Commissioner points out that two main channels of traffic are in danger of silting up, namely, that portion of the steamer route from Calcutta to Eastern Bengal which runs through the Backergunge district, and the Dhalleswari and Buriganga rivers in Dacca. Indeed, all the streams which intersect the Dacca district from north-west to south-east must, it is feared, gradually diminish in volume, because the action of the Jamuna in throwing up silt on its left bank is gradually closing their intake. The Division is served by eight regular services of steamers, three of which are subsidized by the District Board of Backergunge; and there are nearly 300 ferries under the control of Government, District Boards and Municipalities, including one steam-ferry between Narayangunge and Munshingunge.

The District Boards have been able to add 53 miles of road, mostly of the "bridged and not metalled" class, to the previous total. In Dacca, more

feeder-roads to the railway are required; and the District Board is rightly turning its attention to the necessity of providing fair-weather roads in the tracts which are inundated during the rainy season.

12. *Education*.—There were 13,626 schools in the Division and 285,293 pupils, being an increase of 648 schools and 14,561 pupils on the numbers of the previous year. There are also four colleges. The number of pupils at school was 30·5 per cent. of the number of boys of a school-going age in the whole Division, Backergunge (with 51·5 per cent.) being the best and Mymensingh (with 23·9 per cent.) the worst districts in this respect. There were 13,452 girls at school, and 827 schools for girls only, including one high English school at Dacca. The technical schools at Mymensingh (mainly supported by Rai Jogendra Kishor Rai Chaudhuri Bahadur of Ramgopalpur) and at Barisal continue to do useful work; the latter, however, shows a falling off in the number of pupils. It is not reported what is the proportion of Muhammadan pupils at school, but the proportion increased in all districts except Dacca. A boarding-house for Musalmans is being built at Bhola in Backergunge, and the Lieutenant-Governor is glad to observe that Hindus have shown a friendly spirit to their Muhammadan neighbours by taking an active interest in this work.

13. *Hospitals and Dispensaries*.—Nineteen new dispensaries were opened during the year, and there are now 69 dispensaries and hospitals in the Division. In 1895, 335,298 patients were treated in them. The Mitford Hospital at Dacca ranks first among these institutions, and in it 26,979 patients were treated and 1,206 major operations performed. The two private dispensaries at Tangail in Mymensingh have been most successful. The Lieutenant-Governor is pleased to notice the liberality of Babu Nanda Lal Sen, a retired Deputy Inspector of Schools, who has built and endowed a dispensary in his own village in the Dacca district, and notices with satisfaction the progress made generally in the Division during the year in the matter of affording increased facilities for medical aid to the people.

14. *Local Self-Government Institutions*.—The District Boards worked without friction during the year. Their total income was Rs. 9,29,796, and they spent Rs. 9,54,548, thus reducing their aggregate balance to Rs. 1,32,085. The proportions of income spent on primary education were adequate. There are 17 municipalities in the Division, with an income of Rs. 3,48,252, nearly all of which was spent during the year, Rs. 32,365 were spent on water-supply. Nine of these bodies spent an adequate proportion of their income on primary education; but the other eight failed to do so, and Dacca, with an income of Rs. 1,42,123, spent only Rs. 2,119 on this object. The municipal administration of Dacca was disfigured by party struggles between the Commissioners, which impeded the conduct of public business, while that of Narayangunge in the same district was particularly good. There has been a general decrease in the income from pounds, owing, it is said, to the want of competition among the farmers, and the value of pounds cannot be expected to be great in a tract of country so much intersected with streams. But a decline in income from this source has occurred in other districts besides those of the Dacca Division.

15. *Political and Social Institutions*.—There are 13 political Associations in the Division, most of which considered the Bills which were before the Legislative Councils, and 11 other societies devoted to various objects. Ten newspapers and four periodicals were published in the Division.

16. *Conduct of Zemindars*.—The relations between landlord and tenant have been, with some exceptions, satisfactory. Nawab Ahsanullah Khan Bahadur, C.I.E., Raja Sir Sourendra Mohan Tagore, Raja Rajendra Narain Rai Bahadur of Bhowal, Mr. E. P. Caspersz, Babu Paibati Sankar Rai of Teota, Raja Surjya Kanta Acharjya and Babu Jagat Kishore Acharjya of Muktagacha, Rai Jogendra Kishore Rai Chaudhuri of Ramgopalpur, and Rai Radhaballabh Chaudhuri Bahadur of Sherpur, are commended by the Commissioner.

17. The Lieutenant Governor desires to thank Mr. Luttmann-Johnson for his thoughtful report and for the efficient manner in which he has supervised the administration of the Dacca Division. Extracts from the report are published for general information.

By order of the Lieutenant-Governor of Bengal,

M. FINUCANE,

Secretary to the Govt. of Bengal.

*Extracts from the Annual General Administration Report of the Dacca Division
for the year 1895-96.*

III.—WEATHER AND CROPS.

6. The average rainfall was 62·14 inches, against 78·71 in the previous year. The average of five years ending 1894-95 was 75·33 inches; so we had 13·19 inches less than the average of the previous five years. Generally the rainfall was not well distributed, and was not favourable to the crops.

The Collector of Dacca says, on the whole, the distribution was favourable to the crops, but the sudden rise of the rivers in the middle of July and the heavy rainfall in August caused some damage to the *aus* paddy, and also affected the jute slightly. The cyclone of 2nd October partially injured the *aman*, and hence the outturn of both *aus* and *aman* was somewhat less than in the previous year, but jute, pulses, and oilseeds were better, so that the slight loss in the case of rice was compensated.

The Collector of Mymensingh reports that the year was one of drought. The want of rain in October and November caused injury to the *aman* paddy in low lands.

Untimely and heavy downpour in October caused injury to the standing crops of Faridpur. The outturn of *rabi* and oilseeds was good.

The cyclone of October 1895 affected the *aman* in Backergunge, while the scanty cold-weather rains in January and February 1896 did but little good to the *rabi* crops. The outturn of other crops was also much below the average.

A violent cyclone passed over Dacca and Backergunge on the 2nd October 1895. It is reported to have caused much mischief by blowing down houses, by uprooting and breaking down trees, and by stranding boats. It is also reported that it caused the loss of three lives in Munshiganj in Dacca, and of six lives in Backergunge. The Subdivisional Officer of Jhola says that char Falcon was benefited by this cyclone, as the rats which had so long infested the crops, were most of them killed.

On the whole the year cannot be considered to have been a particularly unfavourable one. The spring crops were better than usual. The loss of rice was the most serious defect, and prices rose from 18 seers in April to 16 in October and 14 at the end of March.

The *aman* crop is returned at 13½ annas, against 16½ in the previous year, jute at 13½ annas. It must be remembered that these figures are but the aggregate impressions of a number of observers.

IV.—PUBLIC HEALTH AND SANITATION

7. The following statement shows the number of deaths from different diseases reported during the year and in the previous year:—

District.	Cholera		Small-pox		Fever		Bowel-complaints		Injuries		Other causes		Total		Ratio of deaths per mille of population.		
	1895	1894	1895	1894	1895	1894	1895	1894	1895	1894	1895	1894	1895	1894	1895	1894	
	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17
Dacca	16,970	9,305	298	170	46,548	42,037	5,116	3,243	670	735	12,677	12,815	70,789	68,511	33.3	28.3	
Mymensingh	10,516	7,728	743	620	74,025	68,104	1,160	706	724	718	13,493	10,040	107,461	88,490	30.9	26.6	
Faridpur	10,988	5,814	1,817	457	48,444	37,612	643	411	731	744	7,035	6,109	64,187	51,237	35.1	28.0	
Backergunge	7,800	4,076	480	94	42,951	38,500	483	630	1,320	1,277	20,728	20,513	73,791	65,724	34.2	30.2	
Total	53,278	26,847	2,839	1,255	206,808	187,164	5,701	4,003	3,144	3,174	51,163	50,180	225,327	213,002	33.04	27.8	

The death-rate for the year is 33·04 per mille, against 27·8 and 30·4 in the previous two years. The increase is due to some extent to improved registration, especially in Dacca. The small number of deaths in Faridpur "from other causes" is noticeable, and will be enquired into.

Fever as usual is the chief cause of mortality. Cholera, which was prevalent in an epidemic form in Dacca and Mymensingh during April and May, and again in October, November, and December, comes next. The Jamalpur subdivision was the most affected part in the latter district. The disease was largely prevalent in Faridpur, though in a sporadic form. There was increase in the mortality from cholera in all the circles of the district of Backergunge, except in the Bhola subdivision. The number of deaths from small-pox was more than double the number in 1894. There was increase in all the districts especially in Faridpur. It is said that in most cases the infection was brought from Calcutta, and spread rapidly among the unprotected population.

8. The following table compares the number of persons vaccinated during the years 1894 and 1895:—

District	Number of persons vaccinated during—		Ratio of persons vaccinated per mille of population	
	1895	1894	1895	1894.
1	2	3	4	5
Dacca ...	125,558	122,133	52.4	50.4
Mymensingh ...	148,473	73,417	31.2	21.1
Faridpur ...	33,134	49,472	40.0	27.5
Backergunge ..	61,284	30,914	28.4	14.3
Total	418,449	275,966	42.5	28.0

The spread of vaccination is one of the most satisfactory features of this report. In Mymensingh and Backergunge the number of vaccinations has doubled. In Faridpur there is an increase of 65 per cent. In Dacca there was not so much room for improvement. From column 4 it will be seen that in vaccination this district takes a strong lead. Instructions were issued in October last to Panchayats and rural police to give assistance. In Faridpur Dr. Deare, Deputy Sanitary Commissioner, and Maulvi Fuzlal Korim, Subdivisional Officer of Madaripur, persuaded Maulvi Syududdin, the Ferazi leader, who had hitherto forbidden vaccination among his followers, to have his children vaccinated and to support the movement. In Backergunge the Magistrate, Mr. LeMesurier, by the courtesy of the Anjuman Himayati Islamiya of Barisal, obtained a *fatwa* in favour of vaccination signed by most of the learned Maulvis of the district. He distributed copies of this to the Muhammadan public.

The Commissioners of the Narayanganj Municipality have done away with arm-to-arm vaccination, and have introduced vaccination from the calf. This is also being tried at Dacca.

9. The table below shows the expenditure incurred by the District Boards and Municipalities on water-supply during the last three years:—

NAME OF DISTRICT	DISTRICT BOARDS			MUNICIPALITIES		
	1895-96	1894-95.	1893-94.	1895-96	1894-95	1893-94
1	2	3	4	5	6	7
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Dacca ...	2,492	1,359	994	16,534	14,70	14,773
Mymensingh ..	8,317	3,677	2,896	8,766	6,924	1,343
Faridpur ...	1,508	3,710	2,295	2,814	2,100	185
Backergunge ...	4,627	3,734	6,116	4,521	122	748
Total ...	16,944	12,480	12,331	32,635	23,848	17,049

The Municipal Commissioners of Narayanganj spent Rs. 176 only on tube-wells during the year. They are thinking of trying some more tube-wells. The expenditure in the Dacca town was on account of the water-works.

I mentioned last year that the Dacca District Board proposed to try tube wells again. Altogether twelve have been put down in this district, eight of which have proved more or less successful. I have found it very difficult to keep these wells going. It is almost impossible to prevent the people playing with them.

The Raj Rajeswari Water-works at Nasirabad have been further extended at a cost of Rs. 1,145. Two *puc a* wells have been constructed in the Sherpur Municipality. The Tangail Municipality have excavated a large tank in the centre of the town. The District Board of Mymensingh has dug five tanks and 60 wells, and has commenced six more tanks and 44 wells.

In Backergunge also this subject is engaging the attention of all municipalities and of the District Board. The Bansal Municipality has completed the re-excavation of the jail tank, which has now been made a reserved tank for the use of the public. The cost was more than Rs. 5,000, of which Rs. 2,766 was met during the year. The water of this tank was sent for analysis to the Chemical Examiner, and the result showed it to be better than that of other reserved tanks in this town. The Chemical Examiner having declared the water of the Patuakhali thana tank to be suspicious, the Municipal Commissioners have commenced its re-excavation at an estimated cost of Rs. 565. The Pirojpur Municipality has spent Rs. 264 on the re-excavation of the thana reserved tank. The Commissioners of the Jhalokati Municipality are trying to acquire a piece of land for the purpose of digging another tank. The District Board has spent Rs. 4,612 in digging and repairing of tanks, and more are in course of construction. As regards the difficulty of getting sites for tanks, Mr. Collector LeMesurier writes —

“I am glad to say the difficulty of procuring free sites, to which I alluded last year, has been almost entirely overcome.”

Rupees 888 has been spent in digging tanks in Government khas mahals. Tanks are being excavated in the Sundarbans portion of Golachipa, Gulshakhali, and Matbaria thanas. Here the river and khal water is brackish, and rain water tanks are a necessity. The District Board has given its special attention to this matter, and if systematic measures be continued for some years more, Mr. Savage's ambition to give “every village in the district at least one good reserved tank” will be an accomplished fact. Wells are less costly, but the people of Backergunge are prejudiced against them, partly because, the Collector says, they cannot bathe in them. There are not even half a dozen in the whole district. Their water is frequently brackish. A good masonry well constructed by the District Board in 1889-90 is never used.

The Dacca Municipal Commissioners' proposal to lay out a separate line of pipes for watering the streets with unfiltered water and for flushing the drains has not received the sanction of Government on the ground that the scheme is beyond their present resources. They have been asked to raise the rate of their tax to its maximum limit, as money is urgently needed for many improvements.

10. The general drainage of the district of Backergunge is exceptionally good, but certain portions of the Sarupkati and Gournadi thanas, known as the *bhui* tracts, are water-logged and malarious, and will, the Magistrate thinks, have to be artificially drained. The Magistrates of other districts have not furnished any information under this head.

11. In May 1895 the sewage drainage scheme proposed by the Sanitary Authorities for the town of Dacca, which had been some years in incubation, was finally brought to a birth. It involved the deposit of all the sewage in the Buriganga river during the floods, that is, say for about four months out of twelve. It was also far beyond the means of the Municipality. On account of these difficulties, which were obvious and were foreseen, the scheme has been dropped. It is a great pity such a scheme was ever thought of. Now that it has been dropped, the Commissioners can pay attention to improving the present bucket system. A proposal for the construction of a light tramway in the town of Dacca for removal of night-soil, made some years ago by Mr. Hare, has been revived.

Trenching grounds for sewage give us much exercise. We now dig shallow trenches, but whether we dig them deep or shallow, the conundrum how to bury liquid remains unsolved.

12. The Collectors and Subdivisional Officers in their tours of inspection made enquiries regarding sale of quinine at post offices. The sale was generally large. The Postmaster of Daulatkhan complained to Mr. Bell, the Collector of Backergunge, of *kabirajes* circulating rumours to the effect that Government quinine is mixed with mercury. The Subdivisional Officer of Tangail in his tour diary for August 1895 reported two cases of poisoning by taking an overdose of quinine. In one case the patient took 6 packets (30 grains) at one time, and in the other several packets were taken at short intervals. No fatal consequence, however, occurred in either case. The Magistrates have asked all postmasters to give necessary instructions on this point to their ignorant customers. The experiment of selling quinine at rural centres in addition to post-offices has not yet been tried in this Division.

V—MATERIAL CONDITION OF THE PEOPLE.

13. I would refer to what I have said on this subject in previous reports. The people are exceedingly well off, and are not taxed according to their means. They are in fact living on the poorer but more heavily-taxed populations. Various suggestions for the mitigation of this state of affairs have been made.

I may mention some patent evidences of the prosperity of the people. They are everywhere replacing thatched roofs with galvanized iron ones. New lines of river steamers are opened out every year. Deposits in savings banks increase.

Their prosperity is partly owing to the jute crop, to which they have rather sacrificed rice. A lean rice year may hit them hard.

The rise in the price of rice from 18 seers to 14 affected those who are not cultivators and have fixed incomes.

In Faridpur all traces of the distress of 1894-95 are reported to have disappeared, and the loans given by Government and the District Board at the time (Rs 10,624-10) were repaid during the year.

The pleaders, seem to be doing very well. I have noted that in all four districts many of them have been building *pukka* houses.

* * * *

VII—PRICES OF FOOD AND LABOUR.

16. The prices of imported articles, viz, grain and salt, remained almost the same as in the previous year, whereas the price of wheat has fallen from 10s 13ch. to 11s. 8ch. The price of rice, our principal food-crop, has again risen from 17s. 11ch. to 13s. 12ch.

The price of common rice in the last six years in the last fortnight of March has been —

			Srs.	Ch
•	1890-91	...	15	12
	1891-92	..	13	14
•	1892-93	...	11	11½
•	1893-94	..	11	8½
•	1894-95	...	17	11
•	1895-96	...	13	12

The wages of labour were almost the same as in the preceding year in Mymensingh and Backergunge. A slight decrease has taken place in Dacca in the wages of all classes of labour except common blacksmiths, whereas there has been a slight increase in Faridpur in the wages of masons, carpenters, coolies, and *gharamis*. In Mymensingh the wages of the domestic servants are high, and they would have been still higher had there been no up-country men replacing local residents. In Backergunge, too, almost all hard labour and handicraft is done by immigrant foreigners, the *ryats* being too well off to do such work, which they look upon as degrading.

* * * *

IX.—TRADE AND COMMERCE

18. The trade of this Division is carried on by rail, rivers, and canals. No new railway lines were opened during the year under report, but the opening of the Chandpur-Chittagong Railway and the connection of Chandpur with the head-quarters of Madaripur in the Faridpur District and with Barisal by a daily steamer service has much added to the importance of those places as centres of trade. The river Brahmaputra in Mymensingh is gradually silting up, and it became so shallow in places during some part of the year under report that it was impossible for ordinary boats to pass. The pontoon bridge proposed to be constructed by the District Board over the Brahmaputra below Mymensingh is still a project. The paucity of feeder roads and of bridges on existing roads is still complained of in Mymensingh. The Collector states that, although some roads were constructed or repaired by the District Board, unless this disadvantage is removed, Mymensingh cannot cope with other districts in point of trade. He says that, as things at present stand, to convey some jute from the distant interior of the Jamalpur or Netrokona subdivisions to Mymensingh would consume over a quarter of its price. This inconvenience is not seriously complained of only because the cultivators in this district are as a class well off, and can afford to sit at home, selling the produce of their lands at any price, and leaving the purchasers to provide boats for its conveyance to Narainganj and Serajganj. In the district of Backergunge trade is almost exclusively carried on by water; and though there is now steam communication with Calcutta and the neighbouring districts, the service is necessarily limited. The bulk of the trade is carried on by means of large country boats, which are available throughout the district all the year round.

19. The principal articles of export from the Division are—rice, jute, gram and pulses, linseed, mustard seed, betel-nuts, cocoanuts, molasses, fish, hides, and Dacca-made piece-goods, such as plain and striped muslins, *kasids jamadan*, and plain *dhuties* and *chadars*.

Rice grows profusely all over the Backergunge district, and is exported in large country boats to Calcutta and the neighbouring districts. The outturn of this year was reported to be about 1,33,56,000 maunds, against 1,55,88,000 in the previous year. This short outturn is said to be due to damage of the *aman* paddy by the cyclone of autumn last, and the subsequent want of rain. The prices rose from Rs. 3 in 1894-95 to Rs. 3-13 during the year under report. In the other districts, jute has largely replaced this crop.

Mymensingh is the chief jute-producing district, but the other districts also have a considerable share in the export of this article. The increase in the export of jute is a sign of the times, and shows that this product has risen high in the estimation of the cultivators. Agencies of such firms as Messrs. Ralli Brothers & Co., Messrs. David & Co are now scattered all over the Division, and so much interest is now taken in jute that many of these firms depute assistants to the interior to inspect and report on the condition of the crops. The prices that ruled last season were not very favourable, and the cultivators kept a large stock in store, which will perhaps serve them in good stead this year.

One important feature of the trade in jute is that it gives a living to numerous middlemen or *dalals*, who stand between the cultivators and the jute merchants.

The next article of export which demands notice is the betel-nut, which grows in abundance in the Backergunge district. It is exported to Calcutta and elsewhere in large country boats and steamers. The bulk of the export, however, goes to Burmah, where it is highly esteemed. The crop suffered greatly from the cyclone of autumn last. The outturn is reported to be eight annas during the year under report, against about eighteen annas in the preceding year. The prices rose to Rs. 7-10 in 1895-96 from Rs. 6 per maund in 1894-95. It is estimated that about 90,000 maunds of the nut was exported from Backergunge during the year, against about 2,00,000 maunds in the previous year. The betel-nut trade of the district is at present in a critical state. A plague is spreading among the trees in some parts of the district, and an investigation was made by Dr. Watt and

Mr. Mukerjee. The extent of damage appears to have been exaggerated. The Collector says:—

"I have seen two villages close together, one of which has almost entirely escaped while its neighbour suffered severely. No one could show me why this should be so. One villager suggested that one of the places was sheltered from the wind, which carried the germs. This seems to be a likely explanation. As regards the ultimate cause of the plague, we are still more in the dark than ever. I find that the theory of causation by the cyclone is not universal as I thought. In fact, the majority of the people now attribute the misfortune to their sins. I am not prepared to say that they are wrong."

There was no appreciable change in the export of other articles, and they do not seem to call for any remark.

20. The principal articles of import are—salt, kerosine oil, tobacco, sugar, corrugated-iron, timber, European piece-goods, glass and Chinaware, fancy goods, Bahaduri wood, and *chota dasti* wood. There is nothing special to note about the importation of these articles. Kerosine oil is now almost universally used for lighting purposes. There must be a considerable import of corrugated-iron: it is very extensively used for the roofing of huts. It has the advantage of defying the incendiary and not requiring annual repairs. A stroll through any market shows how widespread is the demand for cheap European articles. Chinaware is being largely used by the Muhammadans, but delft pottery made in Maestricht has begun to be used by all classes, replacing the English plates, which are less durable, and the Hindu *thalás*, which are more costly and very heavy. Lucifer matches are used everywhere, but they are getting worse and worse every year. The Collector of Backergunge writes:—

"It is interesting to see that the new "Bengal Match Company" decorates its boxes with fictitious medals, among them one bearing the head of Napoleon III, who had been dead for 20 years or so before the Company came into existence. I am not aware that this company has yet received any medals at international exhibitions."

21. As not a very inconsiderable portion of the trade of this Division is carried on by means of country boats not passing through any registering centres, it is hardly possible to arrive at any correct estimate of its extent. The statistics now furnished under Government circular No. 1 of the 20th April 1896, however, give us a better idea of the true state of things than we had in previous years.

The table below shows the total import and export traffic in each of the 24 staples carried by rail and along the Nadia rivers and the Calcutta canal. It is not a comparative statement, as it is now prepared for the first time. The only comparative statements we have are the exports and the imports of the Division with Calcutta, the Narayanganj Custom House and the Bhairab Registration Office figures:—

LIST OF ARTICLES.				Imports.	Exports.
				Mds.	Mds.
1.	Rice	1,22,815	35,30,950
2.	Paddy	94,941	24,758
3.	Wheat	472	5,123
4.	Gram and pulses	64,001	85,362
5.	Other food-grains	3,578	215
6.	Jute, raw	5,876	57,78,371
7.	Gunny-bags	18,108	5,498
8.	Linsted	287	32,380
9.	Mustard seed	2,834	74,457
10.	Tea, Indian	20	814
11.	Cotton, raw	226	24,392
12.	Silk, raw	141	...
13.	Sugar, refined	9,681	11
14.	Do., unrefined	2,66,235	2,499
15.	Tobacco, manufactured	96	68
16.	Do., unmanufactured	87,647	437
17.	Indigo	10	24
18.	Cotton piece-goods,	in bales	...	Rs. 46,400 and	...
	European.	in boxes	...	275,830 bales	...
		in boxes	...	481 boxes	...
19.	Cotton piece-goods,	in bales	...	2,819 bales	648 bales.
	Indian.	in boxes
20.	Cotton twist, European	51,004	11
21.	Do., Indian	6,260	1,387
22.	Salt	1,247,351	1,784
23.	Kerosine oil	152,020	72
24.	Coal and coke	1,262,946	12

Articles were imported into the Division from 30 different districts of Bengal, and also from the North-Western Provinces and Oudh, Assam, the Bombay and Madras ports, and the Punjab; 25 districts of Bengal, the North-Western Provinces and Oudh, Assam, and Central India shared the exports from this Division.

Most of the articles, both of import and export, mentioned in the above table were carried by railway. Rice, paddy, gram and pulse, jute and mustard seeds are the only articles that were largely exported by the Calcutta canals and the Nadia rivers, and salt, kerosine oil, and coal and coke formed the bulk of the commodities imported into the Division by these canals and rivers.

22. The following table shows the principal articles imported from Calcutta during 1894-95 and 1895-96.—

ARTICLES.		1894-95	1895-96
		Rs.	Rs.
1 Cotton piece-goods	{ European	... 1,35,31,110	1,16,15,416
	{ Indian	... 7,140	410
		Mds.	Mds.
2. Cotton twist	{ European	... 54,435	54,607
	{ Indian	... 6,179	5,908
3. Salt	...	16,63,338	15,77,972
4. Kerosine oil	...	3,22,226	5,11,873

The chief articles exported to Calcutta during 1894-95 and 1895-96 are compared in the following statement.—

ARTICLES.		1894-95,	1895-96.
		Mds	Mds
1. Rice	...	37,38,303	35,41,619
2. Paddy	...	17,301	24,578
3. Wheat	...	526	5,961
4. Gram and pulse	...	1,10,769	90,167
5. Other food-grains	...	208	1,087
6. Jute, raw	...	1,20,12,314	1,15,35,090
7. Gunny bags	...	1,55,965	80,960
8. Linseed	...	41,111	32,714
9. Mustard seed	...	93,164	65,242
10. Tea, Indian	...	10,321	799
11. Cotton, raw	...	37,789	55,508
12. Silk, raw
13. Sugar, refined	...	125	...
14. Do, unrefined	...	1,756	2,058
15. Tobacco, manufactured	...	687	430
16. Do, unmanufactured	...	78	99
17. Coal and coke
18. Indigo	24

As regards imports, European piece-goods show a large falling off; fairly large in Mymensingh (over 30,000), much larger in Dacca (over 3 lacs); and quite astounding in extent in Backergunge, where it falls from Rs. 18,38,000 to Rs. 19,000. In Faridpur there is an increase of about three lacs.

Salt shows a considerable decrease, which is very slightly counterbalanced by increased importation at the port of Narayanganj. Kerosine oil shows a considerable increase, which is further supplemented by an increased importation at Narayanganj.

As regards exports between this Division and Calcutta, rice, jute, linseed, and mustard all show falling off, and only raw cotton and unrefined sugar show any increase.

23. The most important of all the centres of trade in the Division is the port of Narayanganj in the Dacca district. Three hundred and forty seven vessels, of a total tonnage of 46,506, entered the port during the year under report, against 288 vessels of 38,083 tonnage in the previous year. Of these, 68 with cargo were from Chittagong and one from Akyab, and the rest, which were in ballast, were 266 from Chittagong, 9 from Coconada, and 3 from Coringa. Three hundred and eighty vessels of 97,175 tonnage cleared during the year, against 351 vessels of 84,183 tonnage in 1894-95. Of these, 3 were in ballast, and the rest were with cargo and all went to Chittagong.

The statistics of the import trade of the port for the last two years are given below:—

ARTICLES.	1894-95.		1895-96.	
	Weight.	Value	Weight.	Value.
1	2	3	4	5
Salt	Tons 1,673	Rs 84,650	Tons 2,333	Rs 65,892

Timber	Tons 234	11,793	Tons 211	13,001
Treasure	"	" ..	16,000

The increase in salt is perhaps due to cheap freights to Narayanganj. I note, however, that there was a falling off of 26,789 maunds of salt exported from Calcutta to Dacca. The price of cotton was high in Narayanganj during some part of the year under report, and this is said to explain increased importation. There is a decrease in rice and paddy, but there was a large increase of paddy imported from the Surma Valley, some of which may have stopped in this district. Kerosine oil was imported in larger quantities than in the previous year. The imports of kerosine oil from Calcutta to Dacca were also largely in excess, so that in this article there was a real increase. The increase of imports of kerosine oil from Calcutta only occurred in the district of Dacca. In other districts there was a decrease.

The export trade of the port during 1895-96, as compared with 1894-95, is shown in the following statement:—

ARTICLES	1894-95		1895-96.	
	Weight	Value	Weight.	Value.
1	2	3	4	5
Chalk and lime ...	Cwt 5,868	Rs 3,474	Cwt. 7,220	Rs 4,648
Jute	" 76,252	6,03,965	" 893,586	6,433,489
Gram	" 1,199	4,380	" 1,100	3,452
Pulse	" 6,113	20,742	" 2,316	7,415

Oils (other kinds) ..	" 375	900	Gallons 640	1,082
Kerosine oil ...	" 32,420	15,050	" 51,960	25,445
Ghi	lbs 3,453	1,690	lbs. 140	280
Mustard	Cwt. 12,461	67,340	Cwt. 7,079	44,365
Other seeds	" 36	200	" 59	320
Sugar	lbs. 138	1,615	lbs 306	1,475
Tobacco	" 1,107,986	105,866	" 292,074	45,680

The increase under jute is considerably less than the diminution in the export from Dacca to Calcutta, so it must be accounted for as a variant, due to the relatively more extended use of the Chittagong route for export to foreign countries. There was some falling off in pulses and mustard, which is also found in the trade of Dacca with Calcutta.

24. There is a registering station at Bhairab bazar under the Government of Assam. The principal articles of export from Sylhet and Cachar are—

		1894-95.	1895-96.
		Mds.	Mds.
Cotton	...	3,615	7,407
Paddy	...	9,82,162	16,05,203
Rice	...	4,377	3,920
Jute	...	39,980	20,240
Linseed	...	18,910	6,575
Mustard seed	...	2,030	6,575

Hides, fish-oil, jinjili, ghi, oranges, potatoes, dried-fish, tejpat, lime, rattans, mats, Bahaduri-wood and bamboos were also exported from the same districts.

The following table shows the principal articles imported into those districts during 1894-95 and 1895-96 :—

		1894-95.	1895-96.
		Mds.	Mds.
Coal	...	1,11,236	15,140
Cotton fabrics	...	4,758	3,152
Wheat and barley	...	5,248	4,560
Paddy	...	8,210	
Pulses	...	1,81,586	2,12,385
Kerosine oil	...	1,31,566	1,52,891
Mustard seed	...	1,269	1,156
Salt	...	2,87,163	2,82,211
Sugar and sugarcandy	...	48,806	48,106
Tobacco	...	77,140	76,760

The other articles imported into those districts by this route were wine and spirits, cooking utensils, iron, corrugated iron sheets, cocoanut and mustard oil, cocoanut, ghi, potatoes, flour, betel-nuts, onions, chillies, molasses, bahaduri-wood and cattle.

Of these imports and exports, the Collector of Mymensingh writes:—

"It is certain that a portion of the up and down trade is confined to Mymensingh, and the Subdivisional Officer of Netrokona reports that a large quantity of rice was exported to Sylhet from his subdivision, but no figures are hazarded on guess. As regards imports again, a considerable portion of the lime exported from Sylhet must have been sold in Mymensingh district."

The principal points to notice are an important increase in the export of paddy from the Surma valley, much of which may of course have come from Mymensingh as suggested, and a very large falling off in the coal sent to that valley. I confess I do not understand this variation in coal sent up.

25. The Faridpur Loan Office is in a flourishing state and continues to command public confidence. The Company paid a dividend of Rs. 24-13-6 during the year under report against Rs. 22-8 in the previous year. The Loan Company at Barisal is also prospering and commanding public esteem. It declared a dividend of 24 per cent. at the end of the year against the same in the preceding year.

26. Of the 72 provident societies in the Backergange district, 68 are registered. The Barisal Family Relief Fund Company, Limited, which is the best of its kind in the district, is said to be conducted on business principles. The fund is self-supporting, and the income from interest, &c., meets the expenditure and leaves a small surplus.

An enquiry was made during the year as to whether any special steps were necessary to put a stop to gambling and swindling under cover of these

offices, and it was found that the societies are themselves dying natural deaths, and that no interference on the part of Government was necessary. Of the 68 registered companies referred to above, 6 only are reported by the Registrar of Companies to be in existence at the end of the year 1895-96.

The Collector of Backergunge reports having received a prospectus of a fund named "Fortune," the promoters of which wish to start a rice mill with a capital of Rs. 25,000, to be raised by 10,000 shares. They hold out hopes of paying Rs. 10,000 to the family of bereaved members in the first year, and Rs. 20,000 in the second year, and so on from the profits of the mill.

27. Mr. Hare suggests that the information formerly supplied to District Officers of the traffic of each railway station in their districts, which has been discontinued under the orders contained in Circular No. 1, dated 20th April 1896, should continue to be supplied. No doubt, used as this information was for a district and divisional statement of traffic, it was misleading, but to the District Officer these figures supply very valuable information, and as the figures are necessarily recorded, he suggests that a printed copy should be furnished to each district which has railway stations. He also suggests that the Government should endeavour to obtain similar figures for the steamer traffic at each port of all riverside stations. As far as this report is concerned, he would only use these figures for a paragraph on changes and activity of traffic within the district. They would show what is brought to each station to be carried away, and what is landed there to be redistributed; that is to say, the relative use and importance of each station in the district and its growth or diminution both for passenger traffic and trade. To the District Officer this is all important. Something has been done in the way of opening out feeder roads to railway stations. Not much has been done to open out such roads to steamer stations. It is most useful to the District Officer to know the importance of the several stations as indicated by their traffic, and to mark the effects of such improvements as he makes on this traffic.

XII—CIVIL JUSTICE

38. There are now 26 Munsifs in the Division—9 in Dacca, 6 in Mymensingh, 5 in Faridpur and 6 in Backergunge, vested under section 153(b) of Act VIII of 1885, with the power to try rent suits not exceeding Rs. 50 in value without appeal.

XIII—CRIME.

39. I regret to have to report a further increase in crime reported, an increase which is exaggerated in the first six months of the current year. The figures are—

Cases reported.	Year.	Cognizable.	Non-cognizable.	Total
	1893	16,952	20,898	37,850
	1894	19,697	21,684	41,381
	1895	19,179	22,935	42,114

Though there is a small decrease this year in cognizable crime, if we look back a few years to 1889, the increase in this class is phenomenal. In that year only 11,740 cognizable cases were reported. The increase is—

Dacca	84.9 per cent.
Mymensingh	47.3 "
Faridpur	30.7 "
Backergunge	116.3 "
			<hr/> 68.3

There has also been some increase in non-cognizable crime since that year. In 1889 we had one crime cognizable and non-cognizable to 330 persons, while in 1895 we had one to 233 persons—an increase of 41.3 per cent. The increase in non-cognizable crime is not very large and need not alarm us. It is due partly to improved facilities for reporting and trying such cases, partly to improvement in the condition of the people. This class indeed follows civil justice.

But the increase in cognizable crime and under serious headings is alarming. Even if, as is sometimes stated, it is due to better reporting, that reflects on our administration in former years, which allowed crime to be hushed up. But the increase is not entirely due to improved reporting. For instance, the increase in murders, the most heinous of crimes, is not attributed to this cause. I have gone somewhat carefully into this matter, and I attribute the increase in serious crime to the impunity with which such crime can be committed. It is not so much that crime actually escapes punishment more than it did formerly, but that people have come to know how good their chance of escaping punishment is. I find that in 1875 18,944 cognizable cases (exclusive of serial 57) were reported. So we have gone back twenty years.

From paragraph 178 below, it will be seen that Backergunge is our most educated district. In some quarters the increase in crime in this district has been attributed to the spread of education—a view I cannot concur in.

40. In cognizable crime (excluding sanitary offences, serial 57), the jump which we made in 1894 is maintained on the whole, but the district variations are remarkable :—

District	1893	1894.	1895	Increase or decrease	Percentage.	Persons to a crime.
1	2	3	4	5	6	7
Dacca ...	2,363	3,062	3,081	+19	6	Case Persons. 1 to 777
Mymensingh ...	5,786	6,642	6,800	+842	9.8	1 to 551
Faridpur ...	2,402	2,542	2,084	-454	17.9	1 to 374
Backergunge	2,094	2,795	3,902	+1,107	37.4	1 to 554
Total ...	12,595	15,041	15,869	+28	18	1 to 640

The main features of this table are—

(a) Decrease in Mymensingh and Faridpur, in both cases in crimes against property, attributed in the case of Faridpur to good harvests, in the case of Mymensingh to preventive measures. I note that Faridpur has gone back to the standard of 1892. I suspect good harvests have had some effect in Mymensingh.

(b) General increase in Backergunge, but most marked in crimes against property, attributed, as in the previous year, to improved reporting, especially in the case of thefts of boats and of cattle. An Inspector on special duty brought 89 suppressed cases under sections 457, 379, 380, 392 to light in a portion of the Sadar subdivision only. The crops were poor, but where the crops were poorest, crime increased least. An increase of 86.3 per cent. in two years is a very serious matter. That in 1893, a year almost of distress, there was only one case to 1,028 persons, goes to show there was room for better reporting; and we have made great efforts to improve the rural police. In this connection the Magistrate writes :—

“We are, I believe, experiencing the effects of Mr. Savage’s reorganization of the rural police, and gradually working our way out of an era of systematic suppression of crime alike by rural and regular police. Even now superior officers enquiring into serious crimes frequently come to know of other unreported cases; thus Mr. Ryland, when recently enquiring into a dacoity, came to hear of no less than five others, all unreported, committed in the neighbourhood during the year. Last year things were still worse. Inspector Kali Kishore Chaudhuri found many villages where 6 or more cases had occurred and been hushed up, and I myself, when taking criminal complaints at Sadar, found scores of cases where complainants had first reported occurrences at thanas in the absence of Sub-Inspector and head-constables, and the writer-constable in charge had simply suppressed the fact. A number of men were punished and the reporting improved. I have little doubt the number of crimes reported will continue to increase.”

I note, however, that in serious crimes against property the percentage of convictions is only 56, and that in murders suppression in previous years is

not even suggested." This suggests looking in another direction for an explanation of the increase. The fact that there is increase in all classes supports the local view.

(c) The greater prevalence of cognizable crime in Mymensingh and Backergunge compared with Dacca and Faridpur. The difference cannot be attributed to classification, as this is now very carefully done, especially in Mymensingh. That there is only a crime to 894 persons in Faridpur suggests suppression. It must be remembered that the Madaripur subdivision of this district is subject to the same conditions as the Backergunge district, where systematic suppression has been proved in the adjoining Gournadi thana of the Backergunge district. It is difficult to believe there is not similar suppression in the Madaripur subdivision.

(d) That the increase shown in Dacca in 1894 is maintained in spite of low prices. This goes to show high prices had not much to do with increase in 1894.

41. The increase in cognizable crime reported in the Backergunge district in face of low prices of food stuffs is so extraordinary that I have worked it out for subdivisions separately.—

Subdivisions.	1894.	1895.	Increase.	Proportion to population in 1895
1	2	3	4	5
Sadar ...	1,149	1,856	707	1 to 473
Pirojpur ...	785	1,029	244	1 to 504
Patuakhali ...	646	719	73	1 to 690
Bhola ...	215	298	83	1 to 867
Total ...	2,795	3,902	1,107	1 to 552

It will be seen that while the increase is 61·5 per cent. in Sadar, 81·0 per cent. in Pirojpur, and 38·6 per cent. in Bhola, it is only 11·3 per cent. in Patuakhali. In the Sadar subdivision the Gournadi, Nalchiti, Jhalokati, and Backergunge thanas are responsible. Gournadi returns 227·08 per cent. more first informations than in the previous year. One would have expected to find crime better reported in the Sadar than in outlying subdivisions.

The increase in this district, class by class, is—

CLASS.	1894.	1895.	Increase or decrease.
1	2	3	4
I ...	162	205	+ 43
II ...	441	519	+ 78
III ...	902	1,278	+ 376
IV ...	108	201	+ 93
V ...	825	1,424	+ 599
VI ...	357	275	- 82
Total ...	2,795	3,902	+ 1,107

It is said boat and cattle theft cases were formerly never taken up unless there was a chance of the property being recovered.

In my letter No. 1448J., dated 1st August 1895, I addressed the Inspector-General of Police on the large increase in serious crime in this district in the first six months. I again addressed him on the subject in my letter No. 2118J.,

dated 25th October 1895. In the course of my tour in Backergunge district in August and September, I made some enquiry into the matter, and came to the conclusion that the view entertained by the local officers that the increase is largely due to suppression in former years is correct.

Compared with other provinces, this Division is not a very criminal one; parts of it much the reverse:—

PROVINCES AND DISTRICTS.	Population.	Cognisable crime investigated.	Proportion of crime dealt with by Police to population
1	2	3	4
North-Western Provinces	46,905,085	—, —, —	Cases Reported 1 to 463
Punjab for 1893	20,866,847	54,260	1 to 384
Central Provinces for 1893	10,784,294	16,837	1 to 640
Bombay, including Sindh, for 1893.	18,035,280	24,738	1 to 729
Madras for 1893	85,986,744	72,413	1 to 496
Assam, exclusive of Frontier Police, for 1893.	5,414,258	10,576	1 to 511
Bengal, excluding Calcutta and Chittagong Hill Tracts, for 1893.	70,558,141	85,962	1 to 820
Dacca for 1895	2,395,602	2,861	1 to 837
Mymensingh for 1895	3,472,186	5,670	1 to 612
Faridpur for 1895	1,823,543	2,023	1 to 901
Backergunge for 1895	2,153,965	3,560	1 to 605
Total for Dacca Division	9,845,296	14,114	1 to 697

Cases refused enquiry under section 157, Criminal Procedure Code and cases under serial No. 57 are not included in this statement.

Though the proportion of cognizable crime to population in Faridpur is extremely low, this district stands high in certain classes. It is first in Bengal for dacoity, and second for rioting. It also stands high in murder and culpable homicide.

42. The following table shows cognizable crime reported by classes. It includes sanitary offences, serial No. 57:—

CLASS.	Year.				Increase or decrease as compared with 1894.
	1892.	1893.	1894.	1895.	
1	2	3	4	5	6
Against property	9,535	9,591	11,197	10,790	—407
„ persons ...	1,806	1,644	2,079	2,232	+153
„ public tranquillity.	609	670	796	737	—59
„ others ...	5,908	5,047	5,525	5,420	—105
Total ...	17,858	16,952	19,597	19,179	—418

Of these cases, 18,094 were returned as true, against 18,602 in the previous year.

Though there is not much increase or decrease in class "Other crimes" on the whole, the district variations in this class are violent:—

	1894.	1895.
Dacca	2,601	1,783
Mymensingh	1,221	1,875
Faridpur	67	1,338
Backergunge	736	524
Total	5,525	5,420

Such violent fluctuations might and should be avoided.

The average price of common rice in 1895 was 17 seers 13½ chitaks, against 12 seers 13 chitaks in 1894 and 11 seers 13½ chitaks in 1893. This fully accounts for the small decrease, especially in crimes, against property. As noted above in Backergunge, some other stronger cause has converted what should have been a decrease into an enormous increase.

43. The following table shows roughly the chance of punishment in serious crime in each district:—

Description of offence	DACCA			MYMENSINGH.			FARIDPUR			BACKERGUNGE			TOTAL		
	True cases	Cases came to trial	In how many convictions were obtained	True cases	Cases came to trial	In how many convictions were obtained	True cases	Cases came to trial	In how many convictions were obtained	True cases	Cases came to trial	In how many convictions were obtained	True cases	Cases came to trial	In how many convictions were obtained
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16
Murder	12	6	1	17	14	3	19	7	3	76	29	13	124	56	20
Dacoity	1			4			9	1	1	13	2		27	3	1
Robbery	3	5	2	6	3	1	7	1	1	17	3	3	33	12	7
Burglary	871	112	81	1,004	127	75	906	63	73	1,139	54	49	4,492	886	291
Theft	703	396	203	1,307	307	264	489	275	206	1,047	270	173	3,696	1,318	909
Riot	140	116	64	95	78	67	176	161	121	106	143	91	646	500	333
Total	1,772	635	414	3,213	619	403	1,285	608	385	2,443	483	329	8,718	2,245	1,531

On the whole, 8,718 serious cases were declared true, while 2,245 came to trial, and conviction followed in 1,531 cases. So, roughly, the odds are 5 to 1 in a man's favour. The odds vary in an extraordinary manner in different districts:—

Dacca	3 to 1
Mymensingh	7 to 1
Faridpur	2 to 1
Backergunge	7 to 1
Total	5 to 1

We are very successful in getting convictions in riot cases, especially in Faridpur. But, as I have said, the sentences are rarely exemplary.

Class I—Riots.

44. As in previous years, I have made a special table for riots:—

District	True cases of riot.						
	1889	1890	1891.	1892	1893	1894	1895.
1	2	3	4	5	6	7	8
Dacca	79	111	81	111	119	140	140
Mymensingh	104	106	170	146	127	204	95
Faridpur	94	166	134	116	147	166	155
Backergunge	100	95	133	93	107	124	156
Total	377	478	518	466	500	634	546

Backergunge beats its record, owing, it is said, to disputes in the Haturia estates.

An interesting administrative experiment was made in the churs in Faridpur, which have been the scene of so much bloodshed in previous years. In my letter No. 1805J., dated 8th September 1895, I ordered the Magistrate or the Subdivisional Officer to be present on the next pay day of the rural police, and to lecture them and the members of panchayets on their responsibilities. They were to ask them who should be bound down and what other assistance could be given to them. They were to impress on the members that, should a riot occur in their jurisdiction, the rural police rate will be immediately increased to its maximum, and special police will be appointed for the village in which the riot occurs. The members were directed to give immediate information of the formation of any new chur, to prevent its occupation until orders had been received from the thana. In reporting the formation of a new chur, they were to state who has the best claim, and whether there is any contention. In case of no contention being reported, the Sub-Inspector was to take no further steps, but to direct the panchayet to give the claimant possession. In case of contention, the Sub-Inspector was to proceed at once to the spot, enquire into the matter, and warn the parties not to take possession. These measures are reported to have been completely successful.

The handsome decrease in Mymensingh is said to be due to the extended use of section 107, Criminal Procedure Code.

The following table shows how many of the above cases ended in loss of life.—

District	1890	1891	1892.	1893.	1894	1895.
1	2	3	4	5	6	7
Dacca ...	3	2	3	3	3	6
Mymensingh ..	6	4	8	6	5	7
Faridpur ..	5	4	1	1	2	11
Backergunge	10	8	9	10	13	7
Total	24	18	21	20	23	31

Out of 31 cases in which there was loss of life and which were sent up in A form, conviction has followed in 19 cases and acquittal in 12; so the chance of acquittal is good. Out of 77 persons convicted in these cases, not one has been hanged and only two have been transported for life. Further experience confirms me in the view I have expressed in former reports that this crime cannot be suppressed so long as the courts admit the right of private defence in face of clauses 3 and 4 of section 99 of the Code and in case of conviction take a lenient view. It seems to me that people rarely, if ever, go into a riot in this Division, without knowing that they are likely to cause death; that there is rarely, if ever, grave and sudden provocation; that there is almost always pre-meditation; that riots rarely, take place on a sudden quarrel in a sudden fight in the heat of passion.

In one case in Mymensingh and also in one in Faridpur licensed guns were used. In the Faridpur case eleven persons were wounded, of whom one subsequently died of his wounds. In all the 7 cases in Backergunge guns were carried, but they were used in two only. It is unknown whether these guns were licensed or not. In Dacca no instance of guns being carried or used is reported. I am very glad to be able to report that in one important case in Faridpur the absentee landlord was fined Rs. 600 under sections 155-156 of the Penal Code.

45. One case in Mymensingh is interesting. A man in plain clothes went to inspect some sugar-mills, giving out that he was a constable, that he had left his uniform at the thana, and that he had been deputed to see whether certain rules issued by the District Magistrate for prevention of accidents in sugar-mills had been complied with. Fortunately the fraud was detected by a rural policeman before the pretended constable had extorted any money.

46. In murders the year is a record one, chiefly owing to Backergunge, and in spite of handsome decrease in Mymensingh.

Murder.

District.	1892.	1893.	1894.	1895.
1	2	3	4	5
Dacca ...	12	13	7	12
Mymensingh ...	24	15	24	17
Faridpur ...	15	13	11	19
Backergunge ...	41	57	63	76
Total ..	92	98	105	124

There was one case of murder by dacoits in Mymensingh. No clue was obtained.

47. I regret to have to report further increase in gunshot murders in the Backergunge district from 13 to 22, besides 12 attempts. In my letter No. 1483J, dated 2nd August 1895, I brought this matter to the notice of the Local Government.

Looking back through former years' reports, I find that in the last five years the average number of murders in this district has been 46. In the previous ten years the average was 17. In my letter No. 314J, dated 20th February 1896, I have attributed this appalling increase to the impunity with which the crime is committed—an impunity which is sure to increase unless the people will assist us in detection.

The Magistrate states that, out of 47 murders detected by the Police and sent up in A form, 19 ended in conviction and 28 in acquittal. The results are most unsatisfactory. The Magistrate states that detection in gunshot cases is specially difficult; most of the murders are committed at night, when identification is difficult and cannot be relied on. The Police receive little or no assistance from the people, least of all from the zamindars and men of position in the villages. In one case only was a conviction obtained during the year through the assistance of the local zamindar, Maulvi Mir Mauzzum Hossen Choudhuri, a retired Sub-Judge.

No less than 76 persons were murdered during the year in this district, in the sense that they were intentionally killed, that is, the persons who killed them knew they were likely, indeed almost certain, to kill them, yet only 5 persons were sentenced to death and 12 persons to transportation for life.

In Faridpur no less than 14 persons were murdered in the above sense, yet no one was executed, and only one person was sentenced to transportation for life.

A curious case of self-help is reported from the Dacca district. A released convict was detected committing a burglary and beaten. He managed to escape, but the whole village turned out, surrounded the jungle in which he was concealed, and beat him so that he died a few hours afterwards. No evidence could be obtained against the murderers.

48. The following statement shows the number of persons actually hanged and transported for life in the several districts of the Division during the last 10 years:—

YEAR.	PERSONS HANGED					PERSONS TRANSPORTED FOR LIFE				
	Dacca	Mymen-singh	Farid-pur	Backer-gunge.	Total	Dacca	Mymen-singh	Farid-pur	Backer-gunge.	Total.
1	2	3	4	5	6	7	8	9	10	11
1886	1			2	3	7	3	2	4	16
1887	2			2	4	3	3	4	11	21
1888	1	..		1	1	3	3	2	5	13
1889	3	3	3	5	4	8	20
1890	2	..		3	5	8	5	11	8	32
	6			10	16	24	19	23	36	102
1891	3	..		5	8	5	5	11	9	30
1892	1	4		1	6	2	6	4	14	26
1893	2	..	1	6	9	1	3	4	17	25
1894	1	1	1	4	7	1	1	3	18	23
1895		1		1	2	1	4	4	19	23
	7	6	2	17	32	10	19	26	77	132

The increase in punishment is not commensurate with the increase in crime.

Drugging cases

49. These cases appear to be on the increase.

In one case, in Dacca, a kabiraj left drugged sweetmeats lying about, so that children might eat them. When they got ill he appeared on the scene and offered to cure them for a consideration.

An up-country man, called Kokil Dosadh, came down here on a drugging tour on the railway. He used to make friends with his fellow passengers, drug and then rob them. He was concerned in four cases at the Dacca railway station alone. He was eventually identified as a professional by the anthropometrical system.

A curious case occurred in the Faridpur district at the Goalundo ghât. Some boatmen from Sirajganj had loaded their boat with coal. An up-country man whom they did not know joined them, and gave them ganja to smoke. They then ate rice. After eating, the boatmen became unconscious and the stranger disappeared. The boat was an old one and required constant baling. The crew being unconscious no baling was done, and the boat sank in shallow water. Two of the boatmen were drowned in the boat. Their stomachs were not sent for examination by the Chemical Examiner.

50. On the occasion of the Astamisnan held in April 1895, the roads in

Kidnapping or abduction

the Mymensingh district were much frequented by parties of Hindus proceeding to the Bishmaputra to bathe, often not too well protected. In several places Muhammadan badmashes, seeing their opportunity, abducted eligible females from such parties; 31 persons were sent up in connection with these cases, of whom 7 were sentenced to transportation for 7 years, and 5 received lighter punishment.

Dacoity.

51. In dacoity, again, different districts give opposite results.—

DISTRICT.	1892	1893.	1894.	1895.
1	2	3	4	5
Dacca ...	7	...	3	1
Mymensingh ...	6	17	5	4
Faridpur ..	5	6	15	9
Backergunge	3	9	13
Total	18	26	32	27

Mr. Herald, Magistrate of Faridpur, remarks that in his district the cases belong to the 1st and 2nd quarter of the year. Dacoity has now entirely disappeared, in consequence of the rigorous measures adopted to trace and bind over bad characters. He adds that to these measures is due also the satisfactory decrease in the number of house-breaking cases. The decrease in Mymensingh in 1894 and 1895, compared with 1893, is attributed to the same cause.

The increase in Backergunge is stated to be due entirely to better reporting. The Magistrate fears the figures given in the above table do not by half represent the actual number of dacoities that are committed in the numerous rivers in this district. In these river dacoities, the victims are usually strangers to the district and can never identify the dacoits. The property stolen is invariably merchandise, which cannot easily be identified and which the dacoits never keep, but dispose of at the numerous hâts and bazars where they find a ready sale. No trader dreams of anchoring except in well-known khals, or of travelling by night on the big rivers running north to south.

Though it was satisfactorily proved by the evidence of the confessing member of the gang that the serious dacoity referred to in last year's report as having occurred in the Dacca district was the work of a gang of dacoits from the Saian district, there was no sufficient evidence to justify the committal of the gang.

52. I regret to say that that notorious dacoit Mohar Khan, whose frequent escapes from our jails (no less than five) were detailed in last year's report, and who is under sentence of transportation for life, has again escaped. After having been convicted in Mymensingh, he was transferred to Assam, where cases of dacoity were pending against him. There he was convicted and sentenced to transportation for life. While in transit from the Gauhati Jail to Rangpur, to take his trial for a dacoity case, which he committed in 1893, he managed to escape from the Rangpur railway police station in October 1895. It is believed that he committed the serious dacoity which occurred at Sirajganj on the 13th or 14th November last, in which cash amounting to Rs. 30,000, the property of Messrs. Ralli Brothers, was looted while on transfer in a bullock cart in charge of two durwans at 8-30 p.m. from the steamer ghât to the company's office a distance of about 3 miles. It is said that the durwans resisted and were severely wounded, and the whole of the treasure was safely carried away. Two other dacoities which were committed in the Sirajganj thana jurisdiction a few days previous to the above occurrence are also supposed to be the doing of Mohar Khan's gang.

It has been ascertained that just after committing the dacoity in which Ralli Brothers' money was plundered, Mohar Khan came to his boat and proceeded with his comrades towards Goalundo, which he reached the following evening. Thence he went to Calcutta, where he managed to purchase English gold bars and sicca mohurs for Rs. 25,000 through two Kaiyas of

that place. He then returned to Goalundo, whence he proceeded to his old village in the district of Pabna, and removed his first wife and two sons therefrom in December 1895. He then went to his second wife, but finding that she had contracted an intimacy with a neighbour, beat her and her paramour and left her alone. Since then no trace of him has been found. It is believed that he has either concealed himself in Calcutta or has gone to Mecca, taking with him his first wife and her two boys.

53 Along with other crime against property, robbery has increased from 7 to 16 in the Backergunge district.

Arson too has made a great jump in this district, 33 cases being reported against 11 in 1894. The District Superintendent of Police states that this is a favourite mode of

Arson

taking revenge. He thinks there are badmashes who hire themselves out to commit this and other crimes. He is inclined to think the figures do not represent the full number of cases that occur. Mr. LeMesurier is sure of this, and adds that fire raising is an invariable accompaniment of a *jot* or no-rent conspiracy, such as exists in scores of places in the district. A Deputy Magistrate of Mymensingh remarked in his tour diary that people have got into their heads a curious impression that agents of tin sellers are inciting incendiaries to secretly burn all thatched houses, and promising them remuneration for their work. He thinks the impression is certainly a mistaken one.

Mischief by killing, poisoning or maiming animals is, states the District Superintendent of Police, another mode of taking revenge in this district; 74 cases under this serial were reported during the year, against 23 in the preceding year.

Mischief by killing

XXIX.—LOCAL SELF-GOVERNMENT INSTITUTIONS.

178. The constitution of the District and Local Boards, and the number of meetings held during the year, are shewn below:—

NAME OF BOARD.	NUMBER OF MEMBERS.			Number of meetings.
	Official.	Non-official.	Total.	
1	2	3	4	5
Dacca District Board ...	8	21	29	17
Mymensingh Ditto ..	4	21	25	20
Faridpur Ditto ...	7	18	25	16
Backergunge Ditto ...	12	13	25	16
Total District Boards ...	31	73	104	69
Local Boards in Dacca ..	1	44	45	84
Ditto in Mymensingh ..	4	61	65	74
Ditto in Faridpur ...	1	32	33	42
Ditto in Backergunge...	14	39	53	59
Total Local Boards ...	20	176	196	200

The non-official side of the Boards is composed mostly of persons interested in land and law. The officials have to look after the interest of the masses wherever these clash with those of the upper classes, but this is not often. All the District Boards and most of the Local Boards held a sufficient number of meetings. With the exception of Manikganj, the Local Boards in Dacca, I regret to observe again, were rather remiss in this respect.

The fourth general election of members of the Local Boards in Dacca and Faridpur took place during the latter part of the year. In all the thanas in Dacca the voters took some interest in the matter, but the case was otherwise in Faridpur. Elections were there very poorly attended in all the thanas, and, owing to non-attendance of 10 per cent. of the voters, the election for Muksudpur thana in the Sadar subdivision, and Palong thana in Madaripur, failed, and the vacancies had to be filled up by appointment under the provisions of section 10 of the Local Self-Government Act. Four bye-elections were held to fill up vacancies—two in the Sadar and two in the Netrokona Local Boards in Mymensingh, but all of them failed on account of short attendance of voters, and the places were filled up by appointment. It is clear that the rural population of this district do not take an intelligent interest in the elections.

179. As to the working of the District and Local Boards of Dacca, Mr. Shirres writes:—

“The District Board worked well and intelligently, and most of the members took great interest in the transaction of the business laid before them. The members always worked harmoniously with their official Chairman, and work was carried on smoothly. The Chairmen of the Local Boards report that the members of the Local Boards continued to take interest in the affairs of these Boards.”

Mr Harris, the Magistrate of Mymensingh, remarks:—

“The members of the District Board take an intelligent interest in the work. The meetings are chiefly attended by members living at head quarters. Even the payment of travelling allowance does not tempt mufassal members to come in frequently.”

About the District Board of Faridpur, Mr. French observes:—

“Only one meeting of the Board has been held under my Chairmanship, so I am not qualified to discuss the working of the Board. I understand that there has been no trace of friction in the relations between the Chairman and the Board.”

The services rendered by Messrs Faulder, Earle and Herald were acknowledged by the members of the District Boards on the eve of their departure from their districts.

180. The constitution of the Municipal Committees of this Division is shown below:—

Profession or occupation	Dacca.	Mymensingh	Faridpur.	Backergunge.	Total.
1	2	3	4	5	6
1. Government servants ...	4	16	6	9	35
2. Government pensioners ...	1	2	3
3. Zamindars and other landholders ...	14	25	2	9	50
4. Pleaders and mukhtears ...	6	36	17	13	72
5. Merchants, traders and money-lenders ...	5	6	1	6	18
6. Medical practitioners ...	1	5	.	5	11
7. Schoolmasters other than Government servants.	...	6	1	1	8
8. Unspecified ...	2	13	8	11	29
Total ...	33	109	30	54	226

The landed interest is well represented. The legal profession has deprived trade of its adequate share in representation, because in mufassal towns few persons of light and leading follow the latter vocation.

181. The table below shows the incidence of tax per head of population (excluding the taxes paid by Government) in the several municipalities:—

Name of Municipality.				Incidence of tax per head of population, 1895-96.		
1				2		
				Rs.	A.	P.
Dacca	1	7	6
Narainganj	2	3	4
Nasirabad	1	12	2
Mukttagacha	0	14	11
Jamalpur	0	8	5
Sherpur	0	7	10
Kishoreganj	0	4	7
Baztpur	0	3	2
Netrokona	0	5	10
Tangail	0	4	1
Faridpur	0	13	1
Madaripur	0	8	5
Barisal	1	5	2
Nalhati	1	1	0
Jhalokati	1	5	4
Pirojpur	0	6	5
Patuakhali	0	6	10

The proportion of taxes paid by Government is high in some municipalities as reported last year.

182. The following table shows the financial position of the municipalities:—

NAME OF DISTRICT.	Opening balance		Income during the year		Total		Total expenditure		Closing balance	
	1895-96	1894-95	1895-96	1894-95	1895-96	1894-95	1895-96	1894-95	1895-96	1894-95
1	2	3	4	5	6	7	8	9	10	11
	Rs.	R.	Rs.	R.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Dacca	8,780	8,632	1,06,764	2,04,481	2,05,494	2,10,863	1,98,305	2,02,148	9,169	8,730
Mymensingh	13,286	12,964	81,445	84,077	94,771	97,641	81,309	81,555	12,462	13,286
Faridpur	1,607	2,073	24,000	20,213	20,706	22,250	24,487	20,050	1,340	1,681
Backergunge	2,830	2,397	47,216	40,771	50,041	41,125	47,401	40,297	2,045	2,831
Total	26,453	25,916	34,954	34,822	3,76,017	3,74,168	3,50,372	3,47,735	25,645	26,453

187. I can only repeat, what I have often said before, that our municipal administration, weak and faulty as it doubtless is in many cases, is better than nothing; that where we have such an administration, roads are better, water supply is better, sanitation is more cared for than elsewhere. So much am I impressed with this fact, that I have always been a strong advocate for extending municipal administration over the whole of the mufassal—a measure which now seems within measureable distance of accomplishment. Though I may seem to damn municipal administration generally with faint praise, there can be no doubt that in some cases, as for instance at Narainganj, under an energetic and experienced Chairman, it is the blessing we are so often told it is.

188. Soon after my appointment to this Division, I revived a proposal I had made some years before in a neighbouring province to establish Local Self-Government in the mufassal, at least to provide our mufassal population, as we have provided our more urban population, with some means of satisfying their local wants. In Resolution No. 3688 of 5th September 1894, the local Government sanctioned experiments being made in this direction. Proposals have come up from District Officers which I have not been able to support,

because they appeared to me to be of an inconclusive nature. In paragraph 103 above, I have suggested what might be done with the one Local Self-Government institution we already have—our rural police panchayats. In his circular No. 10T.M. of 22nd May, the Lieutenant-Governor has taken up the subject in earnest, and we may now shortly expect that this country will be endowed with the blessings—the inestimable boon of Local Self-Government—as all other countries more or less are. Educated native opinion is, however, much opposed to Local Self-Government, but that is, I think, a good deal because the subject is misunderstood.

XXX—EMPLOYMENT OF MUHAMMADANS

189. Four subdivisions are in charge of Muhammadan officers. Out of 56 Rural Sub-Registrars, 32 are Muhammadans. Out of 277 Honorary Magistrates, 50 are Muhammadans. Out of 1,944 jurors and assessors, only 287 are Muhammadans. We have two Muhammadan Sub-Inspectors of Schools out of 26 Deputy and Sub-Inspectors. On the different Boards we have—

			Total number of members.	Number of Muhammadan members.
District Boards	104	12
Local Boards	196	35
Municipal Boards	226	38

I am enquiring whether Hindus largely preponderate in the constituencies. Mr. L. P. Shirres, Collector of Dacca, observes that “their religious instruction takes up so much time as to heavily handicap them in the educational race, and consequently they have fewer chances of rising in life, and this again acts and re-acts, for the children of poor parents have less chance than the children of rich ones. It is obvious, however, that the leaders of any reform movement must be supplied by themselves.”

The Collector of Mymensingh writes that “due consideration is given to the claims of Muhammadans in filling up appointments, both ministerial and menial.”

The Collector of Faridpur says that claims of Muhammadans are considered whenever vacancies occur, especially in filling up posts of Rural Sub-Registrars.

XXXVIII—GENERAL REMARKS.

209. The year I am glad to say has little history, though this report is long. The preceding paragraphs show, I think, that the Division has at least maintained its administrative position, perhaps in some directions improved it. We fail in the administration of criminal justice including jails and police, but that is an old story. The increase of serious crime in Backergungo has caused us much anxiety. This is largely due to improved administration, to the report of crime previously unreported. It is also due, especially in its more serious aspects, to the impunity with which crime can be committed. The people have less fear of the law and of the police. We have strengthened the police and are taking other measures, but unless the people, including panchayats and rural police, will co operate with the authorities, we can accomplish little. Last year I said we were within measureable distance of the establishment of Local Self-Government. The distance has been reduced not only by a year, but by the fact that the new Lieutenant-Governor has taken up the subject in real earnest. We have made no further progress I fear towards the separation of judicial and executive functions; but I am sure I shall eventually overcome all opposition in this matter. A year is so small a period in history that it is most difficult, if not impossible, to decide if it has been a year of administrative progress or not. It is permitted to me to look back over three years, and from this point of view I am satisfied we have made some progress.

We labour under great disadvantages, notably the disinclination of officers, European and Native, to serve where the cost of living is so much higher than in other parts of the province.

233. This report has been prepared under untoward circumstances. All the district officers were changed towards the end of the year, and I was on leave from April 1st to July 2nd. It is much longer than it ought to be, and has other obvious faults.

STOCKS OF RICE IN AND AROUND CALCUTTA.

No 1038 *Stats.*—The following is published for general information

M. FINUCANE,
Secy. to the Govt. of Bengal.

Statement showing the Stocks of Rice in and around Calcutta during December 1896.

M. FINUCANE,
Secretary to the Government of Bengal.

STATISTICS OF THE SEA-BORNE TRAFFIC OF CALCUTTA IN FOOD-GRAINS.

No. 1037 Statistics.—The following memorandum and statements are published for general information.

STATISTICAL DEPARTMENT,
The 28th December 1896.

M. FINUCANE,
Secy. to the Govt of Bengal.

Memorandum.

The aggregate quantity of food grains carried to and from Calcutta by sea during the week ending the 14th December 1896 and 1895 is shown in the following statement —

		8TH TO 14TH DECEMBER			
		1895.		1896.	
1		2	3	4	5
<i>Imports.</i>		Cwts.	Mds.	Cwts.	Mds.
From Foreign Ports	...	10	14	2,741	3,731
„ Indian „	...	54,162	73,720	40,342	54,910
Total	..	54,172	73,734	43,083	58,641
<i>Exports</i>					
To Foreign Ports	..	140,711	1,91,523	77,705	1,05,765
„ Indian „	...	75,722	1,03,668	26,056	35,465
Total	...	216,433	2,94,589	103,761	1,41,230

Imports—The total traffic showed a falling off of 20·47 per cent. in comparison with the figures for 1895, owing to a decline in the importation of paddy and gram and pulses, as shown below —

		8TH TO 14TH DECEMBER			
		1895		1896.	
1		2	3	4	5
<i>Food-grains.</i>		Cwts.	Mds.	Cwts.	Mds.
Rice	...	33,415	45,482	37,677	51,283
Paddy	...	12,809	17,434	909	1,278
Wheat
Gram and pulses	...	7,948	10,818	1,726	2,349
Other food-grains, such as jowar, barley, oats, &c.	2,741	3,731
Total	..	54,172	73,734	43,083	58,641

The Chandbali port which has hitherto been sending large supplies of rice and paddy, contributed nothing during the period under review, while the quantity received from Chandbali during the corresponding week last year was 41,394 cwts. Burma rice, however, is coming in plentifully, and during the period under report the total quantity is put down at 37,632 cwts against nil in the preceding year. A supply of 2,429 cwts of miscellaneous food grains was shipped from the United Kingdom, but in the previous year there were no such imports.

Exports.—The decrease in the export traffic was more than double the quantity shipped in 1895, the articles affected being rice and gram and pulses. The following statement shows the total traffic under each kind of food-grains exported from Calcutta during the week under report, as compared with 1895 —

1	8TH TO 14TH DECEMBER			
	1895.		1896.	
	2	3	4	5
	Cwts.	Mds.	Cwts.	Mds.
<i>Food grains.</i>				
Rice	181,012	2,46,377	88,348	1,20,252
Paddy	95	129	7	9
Wheat	2,517	3,426	1,049	1,488
Gram and pulses ..	32,338	44,016	11,177	15,213
Other food-grains, such as jowar, barley, oats, &c	471	611	3,180	4,328
Total ...	216,433	2,94,589	103,761	1,41,230

In the case of rice, the total decrease in the quantities carried to foreign ports was 45,875 cwts and in those sent to Indian ports 46,789 cwts in comparison with the preceding year. The chief fluctuations under the former head are a decrease of 73,466 cwts in the consignments to Ceylon, against an increase of 21,569 cwts. under Mauritius, and 6,100 cwts. under Maskat; the United Kingdom drew nothing during the week, as against 7,766 cwts in the corresponding period last year. Concerning Indian ports, the shipments to Madras ports declined by 37,175 cwts. and those to Bombay by 9,725 cwts. As regards gram and pulses, the United Kingdom is credited with merely 81 cwts. against 14,163 cwts. in the previous year, and there are small decreases in the quantities carried to Mauritius, Reunion, Ceylon and Madras. Under miscellaneous food-grains, transactions were practically confined to Mauritius, which imported 2,500 cwts against only 445 cwts. in 1895.

SUPPLEMENT TO THE CALCUTTA GAZETTE, DECEMBER 30, 1896.

Detailed statements showing the sources of supply and the places of destination, both as regards Foreign and Indian ports, are given below.—

Statement No. I showing the Imports of Food-grains into Calcutta from Foreign and Indian Ports from the 8th to 14th December 1895 and 1896 (both days inclusive).

WEATHER AND CROP REPORT.

For the week ending the 28th December 1896.

Burdwan.—Rainfall nil Weather seasonable. Harvesting of *aman* continues *Rabi* prospects fair, but rain wanted Fodder and water sufficient Condition of cattle good A few cases of cattle-disease in thanas Bud-bud and Monteswar. Common rice selling as follows:—

			Srs. o.	Srs. c.	
Sadar	10 0	to 12 0	} per rupee
Kalna	9 8	to 10 0	
Katwa	10 8	to 11 4	
Raiganj	10 0	

Birbhum.—No rain Weather fine and cold Rice selling at 9½ to 11 seers per rupee.

Bankura.—No rain Weather seasonably cold *Aman* paddy being threshed. No improvement in *rabi*. Fodder and water sufficient, except in portions of thanas Gangajalghati and Onda Rice selling at 11½ seers per rupee both at Bankura and Vishnupur.

Midnapore.—No rain Weather seasonable Harvesting of *aman* paddy continues Prospect of *rabi* crops moderate, and of indigo and sugarcane good Cattle-disease reported from Dantun, Narainganj, Garhbeta, and Keshpur. Fodder and water sufficient. Common rice selling as follows:—

			Srs.	
Sadar	Old 1100 9	} per rupee.
Contai	New „ 10	
Tamluk	12 to 14	
Ghatul	10½	
			11 to 11½	

Hooghly.—No rain. Harvesting of *aman* continues *Rabi* crops and sugarcane are suffering for want of rain. Common rice sells from 8 to 10 seers per rupee.

Howrah.—Rainfall nil Weather seasonable Rain wanted for *rabi* crops Harvesting of *aman* paddy continues Fodder and water sufficient Common rice sells from 8½ to 10½ seers per rupee.

24-Parganas.—Rainfall nil. Weather warmer with cloud Harvesting of *aman* rice continues. It is estimated to yield 10½ annas Prospects of *rabi* crops unfavourable No cattle-disease reported No complaints of lack of fodder and water at present. Price of common rice unchanged:—

			Srs.	
Sadar	9 to 12	} per rupee.
Barasat	10	
Basirhat	10	
Diamond Harbour	11	

Nadia.—No rain. Weather seasonable Harvesting of *aman* going on. *Khar* and *mug* are still being gathered Peas, gram, barley, &c., are getting worse daily on account of drought Fodder sufficient. Scarcity of drinking water felt in some places Common rice sells from 8½ to 11½ seers per rupee Latest price of rice where test-works are open is 9 and 10 seers per rupee Numbers attending test-works are as follows:—

19th December	840
20th	856
21st	962
22nd	1,253
23rd	1,300
24th	1,310
25th	1,336

Murshidabad.—No rain Weather cold. Harvesting of *aman* continues. State of *rabi* crops not good; that of sugarcane, indigo, and mulberry appears to be good. Fodder sufficient. Common rice sells as follows:—

			Srs.	
Sadar	10	} per rupee.
Jangipur	10½	
Kandi	11	

Jessore.—No rain. Weather seasonable. Harvesting of *aman* continues. Prospects of *rabi* crops on high lands are bad for want of rain. Fodder and water sufficient. No cattle-disease. Common rice sells as follows:—

				Srs.	c.	
Jessore	10	0	} per rupee.
Jhenida	9	0	
Magura	9 to 10	0	
Narail	11	6½	
Bongaon	10	0	

Khulna.—Rainfall nil. Weather fine. *Aman* paddy being harvested; the crop is below the average. *Boro* paddy is being transplanted. Common rice sells as follows:—

				Srs.	
Khulna	10 to 11	} per rupee.
Bagerhat	12	
Satkhira	Old rice 8 New „ 10	

Wages calculated at 9½ seers for staple food-grain. Number of men employed on test relief works—figure for 19th December, 103; none received since. No cattle-disease. Fodder and water available.

Rajshahi.—No rain. Harvesting of winter rice continues. *Rabi* crops not doing well. Fodder ample and water available. Average price of rice is 9 to 10 seers per rupee.

Dinajpur.—No rain. Weather seasonable. Condition of sugarcane fair. Mustard in flower. Harvesting of winter rice going on. Fodder and water sufficient. Common rice sells from 9 to 10 seers per rupee.

Jalpaiguri.—Rainfall nil. Weather cold. Harvesting of *haimanti* (winter) paddy approaching completion. *Rabi* crops doing fairly well. Cattle-pox at Santrahari has proved fatal in many instances. No want of fodder and water. Average price of common rice is 8½ seers per rupee.

Darjeeling.—Rainfall nil. Weather seasonable. Hills—*Bira marua* and *kalai* are being harvested; *haimanti dhan*, *phaphur*, *tori*, wheat and barley are coming up. Terai—Harvesting of *aghani* paddy going on; mustard, potato, *kalai* and tobacco are doing well. Coarse rice selling as follows:—

					Srs.	
Hills	8	} per rupee.
Terai	10	

Bhutia sells at 13 seers per rupee.

Rangpur.—No rain. Harvesting of *aman* progressing. Sugarcane is being cut. Mustard in flower. Prospects fair. Common rice selling at 8 to 10½ seers per rupee. Fodder and water sufficient.

Bogra.—No rain. Weather a little cloudy now and then. Harvesting of winter paddy in progress. Oilseeds and pulses are doing well. Common rice selling at head-quarters 10½ seers and in the interior from 9 to 11½ seers per rupee.

Pabna.—Rainfall nil. Weather dry and cool. No change in the prospects of crops since last week. Common rice sells at 9 seers per rupee. Fodder sufficient.

Dacca.—Rainfall nil. Weather seasonable. *Aman* harvest nearly finished. Prospects remain unchanged. Fodder available. No cattle-disease. Common rice sells at 8 to 11 seers per rupee.

Mymensingh.—Rainfall nil. Weather seasonable. Harvesting of *aman* paddy nearly finished. Prospects of *rabi* crops fair. New rice selling between 9 and 11 seers per rupee.

Faridpur.—No rain. Weather seasonable. Prospects as before. Rain badly wanted for the *rabi* crops. Common rice selling from 9 to 11 seers per rupee. Fodder and water available.

Backergunge.—Rainfall nil. Weather fine. Harvesting of *aman* continues. Prospects of standing crops very fair. No cattle-disease. Price of common rice (new *aman*) varies from 10 seers 10 chitaks to 12½ seers per rupee.

Tippera.—No rain. Weather seasonable. Reaping of *aman* and sowing of *rabi* crops almost over. Transplanting of *boro* commenced in north of the district. Fodder and water available. No cattle-disease. Prices of common rice :—

Sadar	Srs. 11 to 12	} per rupee.
Brahmanbaria	8 to 11	
Chandpur	9 to 13	

Noakhali.—No rain. Harvesting of winter rice continues. Prospects not favourable. No cattle-disease. Fodder and water available. Price of rice ranges from 8 to 10 seers per rupee.

Chittagong.—Rainfall nil. Weather cold. Reaping of *aman* nearly finished. *Rabi* crops not thriving well for want of rain. Prospects bad. Water and fodder sufficient. Rice selling at 8 to 10 seers per rupee.

Patna.—Rainfall at Sadar 0.03. Harvesting of paddy continues. *Rabi* and poppy doing well. Pressing of sugarcane going on. Prices stationary except in Bihar, where they have risen owing to export. Price of common rice at Patna 10½ seers per rupee. Fodder and water for cattle sufficient. Four test works are open.

Gaya.—Harvesting of paddy and pressing of sugarcane continue. *Rabi* and poppy doing well. Price of common rice at Sadar 9½ seers per rupee.

Shahabad.—Weather cloudy. *Rabi* sowing completed. Prospects so far good. Pressing of sugarcane continues. Common rice selling at 9½ seers per rupee. Numbers on relief works on Saturday, 26th December—men 350, women 377, and children 176—total 913.

Saran.—Showers in Sadar. Slight rain in Siwan and Gopalganj subdivisions on 25th December. *Rabi* doing well in irrigated tracts. *Rahar* in Sadar injured by frost. Relief wage fixed on *maka* selling at 10 seers 11 chitaks per rupee. Test-works started in Siwan and Sadar subdivisions. Numbers on relief works on Saturday, 26th—men 720, women 1,179, and children 1,182—total 3,081, gratuitous relief—men 230, women 711, and children 319—total 1,260.

Champaran.—Rain at Motihari and Bettiah .30. *Rabi* crops much improved. Prices are—common rice 9½ seers, wheat 9 seers, maize 10 seers 13 chitaks, maize (*sathu*) 9 seers 3 chitaks per rupee. Numbers on relief works on Saturday, 26th—men 15,263, women 11,232, and children 8,218—total 34,713, gratuitous relief—men 474, women 913, and children 430—total 1,867.

Muzaffarpur.—Rainfall of the week (Muzaffarpur .26, Sitamarhi .15, Shinhar .20, Paru .45) has improved the condition of the *rabi* crops and facilitated the planting of *ahua* in places, which is to be reaped in May and June. Prices are—common rice 8 seers, wheat 8 seers, *maka* 11 seers, barley 11 seers, gram 10 seers, *arhar* 11 seers. *Maka* and *arhar* fix the relief prices. Numbers on relief works in the Sitamarhi subdivision on Saturday, 26th—men 577, women 103, and children 193—total 878.

Darbhanga.—Rainfall on 25th at Sadar 0.07, Samastipur 13, Madhubani 0.04. Rain of the week has done great good to the standing *rabi* crops in Samastipur and more slightly so elsewhere. Sugarcane being pressed. *Rahar* and mustard flourishing. Common rice selling at 9 seers per rupee. Numbers on relief works on Saturday, 26th—Madhubani subdivision, men 848, women 620, and children 254—total 1,722; Sadar subdivision, total number 2,155. Gratuitous relief—Madhubani subdivision, men 966, women 1,837, and children 1,016—total 3,819; Sadar subdivision, men 134, women 203 and children 156—total 493. Also over 7,000 on other relief works for which accurate figures not received in time.

Monghyr.—No rain. Weather very cold. Standing crops doing well. Harvesting of paddy continues. Rain wanted for *rabi* crops. Cattle-disease reported from Begusarai. Sufficient fodder and water. Prices of common rice :—

Monghyr	Srs. 8 to 10	} per rupee.
Begusarai	8½	
Jamui	9 to 10½	

Bhagalpur.—Weather cloudy with a slight drizzling of rain on the 25th. Wind easterly today (23th). Harvesting of winter rice coming to an end; no change in the estimate of the outturn. Prospects of *rabi* crops remain unchanged. Fodder and water sufficient. Prices of common rice :—

Sadar	Srs. 10½	} per rupee.
Banka	11½	
Madhipura	16	
Supaul	10½	

Purnea.—Rainfall 0·03. Harvesting of *aghani* paddy in progress. *Rabi* crops promising. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	
Sadar	...	11
Araria	...	11
Kishanganj	...	9 to 10
		per rupee.

Malda.—No rain Weather cold Harvesting of winter paddy continues Gathering of *kala* nearly finished *Rabi* crops want rain No want of fodder or water. Ordinary rice selling at 9½ seers per rupee.

Sonthal Parganas.—Weather cloudy with a few drops of rain, but again bright and fair. Dews more abundant. Common rice sells at 11 to 12½ seers, and maize 11 to 12 seers per rupee. Fodder begins to fail. Water sufficient

Cuttack.—Rainfall nil Weather seasonable Reaping of *laghu sarad* nearly over, and that of *guru sarad* in progress *Dahua* being transplanted Cattle-disease in a few places. Fodder sufficient Food-grains available in small quantities Common rice sells as follows:—

	Srs. c.	
Cuttack	...	11 13
Jajpur	...	14 7
Kondrapara	...	14 7
Banki	...	15 12
		per rupee. •

Balasore.—Weather seasonable. Harvesting of winter rice going on. *Rabi* crops withering for want of rain. Sowing of *dahua* in progress. Sugarcane is being pressed New coarse rice sells at 13 and 15 seers per rupee at Sadar and Bhadrak respectively. In the mufassal prices vary from 12 to 21 seers per rupee. Fodder and water sufficient. Sporadic cases of cattle-pox in several chaklas.

Angul.—No rain Crop prospects and price of rice as reported for last week.

Puri.—No rain. Condition and prospects of rice and *rabi* crops much the same as before. Fodder sufficient. Price of common rice varies from 11 seers 13 chitaks to 15 seers 12 chitaks per rupee

Hazaribagh.—Weather cool Poppy and sugarcane promising. *Mahua* promises well. Rice sells at 7 to 9 seers per rupee Test relief works failed Travellers getting some assistance.

Lohardaga.—Rain wanted for *rabi* crops Rice sells at 10 seers at head-quarters and 11 to 12 seers per rupee in the interior. Fodder and water sufficient. No report of cattle-disease.

Palamau.—Rainfall 0·17. Weather seasonable There was a little rain which did some good, however slight, to the *rabi* crop Rice selling at 8½ to 10 seers per rupee. Test relief works will be opened in Latchar and Balumath thanas from the 1st proximo.

Manbhum.—No rain Weather somewhat warm for the time of year. Paddy practically all cut. *Rabi*, such as sown, poor generally, but fair in places Cattle disease reported from thanas Purulia, Barabhum, Pura and Raghunathpur Fodder and water sufficient at present Common rice sells as follows —

	Srs	
Sadar	...	Old rice 8
		New " 11
Gobindpur	...	Old " 9
		New " 10
		per rupee.

Stocks of food-grains sufficient at present.

Singhbhum.—Weather cloudy. No change to report

General Summary.—There was slight rain in North Bihar, Patna, Purnea and Palamau on the 25th instant. The rainfall was 30 in Champaran, 26 in Muzaffarpur, 13 in Darbhanga (Samastipur), and 17 in Palamau. In these districts the *rabi* crops are reported to have derived some benefit from it The *rabi* crops in the rest of the Patna Division and also in parts of the Rajshahi Division are doing well. Elsewhere, throughout the Province, the prospects of the *rabi* crops continue poor. The harvesting of winter rice is generally approaching completion, and in some districts the pressing of sugarcane is in progress. *Boro* or spring rice is being transplanted In Bihar the prospects of poppy are satisfactory. Cattle-disease is reported from a few districts only. Prices of food-grains were generally stationary, but there were rises in some districts, notably in Cuttack and Saran. In Cuttack the price of rice rose from 12 seers 8 chitaks per rupee to 11 seers 13 chitaks, and in Saran the price of Indian-corn rose from 11 seers 10 chitaks to 10 seers 11 chitaks. In the distressed districts

the prices are—Nadia (common rice) 9 and 10 seers, Khulna (common rice) 9½ seers, Patna (common rice) 10½ seers, Shahabad (common rice) 9½ seers, Saran (Indian-corn) 10 seers 11 chitaks, Ohamparan (Indian-corn) 10 seers 13 chitaks, Muzaffarpur (Indian-corn) 11 seers, Darbhanga (common rice) 9 seers. The numbers on relief works and in receipt of gratuitous relief on Saturday, the 26th December, were—

Relief works—

Nadia (25th December) ...	1,336.	
Khulna (19th December) ...	103.	
Shahabad ...	913	(men 360, women 377, and children 176).
Saran ...	3,081	(men 720, women 1,179, and children 1,182).
Ohamparan ..	34,713	(men 15,263, women 11,232, and children 8,218).
Muzaffarpur (Sitamarhi sub-division) ...	878	(men 577, women 108, and children 193).
Darbhanga ...	3,877.	Also over 7,000 on other relief works for which accurate figures have not been received in time

Total for the whole Province ... 51,901

Gratuitous relief—

Saran ...	1,260	(men 230, women 711, and children 319).
Ohamparan ...	1,867	(men 474, women 913, and children 480).
Darbhanga ...	4,312	(men 1,100, women 2,040, and children 1,172)

Total for the whole Province ... 7,439.

By order of the Lieutenant-Governor of Bengal,

REVENUE DEPARTMENT,
The 29th December, 1896.

M. FINUCANE,
Secy. to the Govt. of Bengal.

The total fall of rain from 20th to 26th December 1896	Inches.
The average fall of the corresponding period for 24 years, Surveyor-General's Office	Nil
The total fall from 1st January to 26th December 1896	Nil
The average fall of the corresponding period for 24 years, Surveyor-General's Office	53 22
	65 23

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h, 10h, 16h., and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed, open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official Tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

 dew.

BOOKS—contd.									
1896.	Pages.					Rs. & A. P.			
June 4th	150	12mo dy	1st...	1000	Printed	0 8 0	A well-written biography of Haridās Thākur, the well-known contemporary and disciple of Chaitanya. A Mussalman by birth, he became in early life a convert to Vaishnavism. He was greatly respected by his contemporaries for the purity of his life and the exemplary devotion to Vaishnavism.	4001
July 15th	92	16mo rl	1st ..	1,000	ditto ...	0 8 0	The Author ...	A life of the Muhammedan saint Mansur, who died the death of a heretic for having exclaimed 'Onāi Huq' (I am God) in a moment of extreme religious fervour. He was a native of Bagdad, and noted for his piety and devotion to God. The book is written in fairly good Bengali.	4002
" 10th	50	12mo dy	1st...	500	ditto ...	0 6 0	Sasibhūshan Sen, Rampur Boulia	A life of a Hindu girl, who died at the early age of twenty.	4003
June 15th	42	12mo dy	1st .	250	ditto	0 4 0	Harendra Nārāyan (Guhā, Munsi, Lucknow, Nounkhali.	Contains short lives of seven persons, viz., Rājā Pratāpāditya, Rājā Sitārām, Rājā Nirmāvar, Rājā Gopal Singh, Rājā Sathā Singh, Rājā Vira Singh and Rām Minavati. Of these the first six were Bengali zamindars, who during the declining years of Muhammadan rule in Bengal, assumed the title of Rājā, and ruled for a time as independent chiefs. Rām Minavati is said to have been a relative of the celebrated Pāl King, Dharmapāl, whom she defeated in battle, and ruled in her son's name with justice and vigour.	4004
July 18th	54	12mo dy	1st...	800	ditto ...	0 4 0	The Author, Maina, Sylhet.	Gopāl Bhatta was a native of Rangā Kahotra, a place on the bank of the Kāveri. When a boy of eleven he was met by Chaitanya, then touring through Southern India and converted to Vaishnavism. He was one of the most beloved of that reformer's disciples, and upon him devolved the task of compiling a treatise on Vaishnava ritual for the edification of Bengal Vaishnavas. The treatise compiled by him is known by the name of the <i>Haribhaktivilāsa</i> . He was born in 1422 Sak and died in 1509-10 Sak. This contribution to the life of the author of the <i>Haribhaktivilāsa</i> will no doubt be appreciated by the Vaishnavas.	4005
June 18th	131	12mo dy	1st...	1,000	ditto ...	0 8 0	A mythological drama, based on the Mahābhārat, or rather the Bengali recension of it by Kālidās. The sacrificial horse of the Pāndavas having been detained at Bhadravati by order of King Hansadharma, a battle was fought between the King's son, Sudhanvā and the Pāndava Prince, Arjuna, in which the former was killed. But Arjuna had to call in the aid of Śrī Kṛṣṇa before he succeeded in vanquishing his foe. As Sudhanvā was a devout Vaishnava, his death in the presence of the god he adored led to his salvation. Hence the name of the play.	4006
" 15th	127	12mo dy	1st...	1,200	ditto ...	0 10 0	A religious drama inculcating reliance on and devotion to Hari as the best solution of the mysteries of existence.	4007
Yoges Nāth, King of Gaur and his son Anāth Nāth, fell in love with a girl who was detained as hostage on behalf of the King of Magadha. The girl Virajā loved the Prince, but the latter, at the entreaties of his father, gave up all idea of having her for a bride and set his heart on the contemplation of God. The King's desire was, however, frustrated by the wiles of a woman named Sonā, who was the mistress of a Kāpālīka, whom she afterwards killed for his attempt on the life of the Prince and his desire to violate the chastity of Virajā. Through disappointment and disgust, the King, Virajā and Sonā, like the Prince before them, renounced the world and became devout admirers of Hari. This renunciation is mainly due to the teachings of Nasirām, a man, popularly believed to be mad, who united the most fervent love of God with an utter indifference to the cares and anxieties of the world. Nasirām's character has been ably drawn.

1896.	Pages.					Rs A. P.			
May 7th	30	12mo dy	1st...	1,000	Printed.	0 6 0	The Author, 6, Dárákán á t h Tagore's Lane, Calcutta.	A farce describing how a miserly old man of seventy, matrimonially inclined, was cheated of his cash box* by a party of youngsters, one of whom personated his bride and others his father-in-law, sister-in-law, &c	4008
Mar.	74	12mo dy	1st...	1,000	ditto ...	0 8 0	The Author, Calcutta	A mythological drama based on the Mahábháratá, describing the death of Jayadratha, Duryyodhan's brother-in-law, at the hands of Arjuna in the field of Kurukshetra.	4009
May 1st	61	12mo dy	1st...	500	ditto ...	0 4 0	The Author, Moyda, 24-Pergunnahs	The story of a young man, who has recently inherited his adoptive father's estate, running through his fortune and ultimately bringing ruin and disgrace upon himself through addiction to wine and woman	4010
" 15th	48	12mo dy	1st...	1,000	ditto ..	0 4 0	The Author, 30, Manik talá Street, Calcutta	Is a satire on the prevalence of Angloism in the Hindu society. A miserly old zemindar, squanders his annual Durgápujá expenditure to improbable limits, in order to save money for <i>nautch</i> girls and entertainment to friends. The Goddess Durgá, and the gods, goddesses and animals forming her train, accordingly refuse to go to the zemindar's house, and shew a distinct predilection for European millinery and perfumery. In the meantime, on the day of the preliminary worship of Durgá, the zemindar, his son and the priest get themselves drunk and the entire ceremony collapses in the midst of a drunken brawl between the father and the son over the possession of the <i>nautch</i> girls.	4011
May 20th	142	12mo dy	1st...	1,000	ditto ...	0 12 0	Amrita Lal Mukherji, 115, Upper Chitpur Road, Calcutta	A social novel depicting the evils of <i>Kulism</i> . Nirmalá is a Kulin Brahman's daughter, who secretly falls in love with Sris Chandra, a Brahman youth of her native village, Haridrápur. Their love discovered, the youth's elder brother tries in vain to get the consent of the girl's father to the union of the lovers. In the meantime, the girl becomes <i>enciente</i> and has to fly from her father's and take refuge in her maternal uncle's house in a different village. Driven thence, she gives birth to a son in the jungle, and goes to Benares in company of an old lady, who looks upon her as her own daughter. After the death of the lady, she comes down to Calcutta in company of another lady and stays at her house as a cook. There she meets her old lover, goes with him to her native village, where her past conduct is condoned and she leads a happy life.	4012
June 18th	117	12mo dy	1st...	2,000	ditto ...	1 0 0	B. Chakravarti & Co, 38, Manik talá Street, Calcutta,	A story of domestic life, showing how the happiness of a house was, for a time, marred by the wife's unfounded suspicions of her lord. The scene of the story is laid at Rajibpur, a village in the district of Jessore. Sanibhúshan Basu and his wife Kusumilá were a model couple, and the story describes the vicissitudes which for a time clouded their happiness and well nigh broke up their home	4013
" 24th	82	12mo dy	1st...	1,000	ditto ...	1 0 0	ditto * ditto	A story of every-day Bengali life, showing how unchaste women and lustful men are punished in this life for their misdeeds	4014

1896.	Pages					Rs A P			
June 30th	48	12mo dy	1st	1,000	Printed	0 3 0	The Author, 6, Beadon Street, Calcutta	A protest against bringing up Hindu girls in the modern fashion, and thereby incapacitating them, as the writer thinks, for performing the part which they are destined to play in the Hindu social economy. The <i>Black Wife</i> of the story is an ideal Hindu wife, who appears in her best colours, when compared with her friend of childhood, a typical modern girl of taste and fashion, who, however, lives to see, in time, the error of her ways and mends them accordingly.	401
" 10th	38	12mo dy	1st	1,000	ditto	0 6 0	ditto ditto	The story of the abduction of a Hindu girl, named Pramila by order of Nawab Siraj-uddowla. Pramila was married to Sanatan, who followed her to the Nawab's seraglio after her abduction. There the couple were found dead by Setaj, who had hoped to sacrifice the girl to his lust.	401

1896. July 11th	Pages 62	12mo dy	1st ..	2,500	Printed.	Rs. A. P 0 3 0	Priyanáth Mukherji, 88/1, Keránibágán East Lane, Calcutta.	The story of a murder in a public thoroughfare in Calcutta, in which an innocent man was sent up for trial by the police. The man was acquitted, and the writer of the story, an officer of the Calcutta Detective Police, was mortified to learn afterwards from the papers of a respectable Muhammedan gentleman, who died under suspicious circumstances, that it was he who had committed the murder.	4025
June 16th	64	12mo dy	1st.	1,000	ditto ...	0 3 0	The Publisher, 61, Ahiritólá Street, Calcutta	An unfinished detective story relating to a bag theft in a mercantile house.	4026
July 25th	60	12mo dy	1st...	1,000	ditto ...	0 3 0	Yogendra Náth De, 61, Ahiritólá Street, Calcutta	The story is concluded in this number. The theft of a girl is an incident in the same story. The series professes to be a translation of American detective stories.	4027
May 11th	223	12mo dy	1st...	1,000	ditto ..	1 4 0	The Publisher, Jorasáuko, Calcutta	An old-fashioned love story told without any art or skill.	4028
July 9th	52	12mo dy	1st..	2,000	ditto ..	0 4 0	The Author, 88/1, Keránibágán East Lane, Calcutta	A story of ordinary Hindu domestic life written with the object of illustrating the evils of marrying ladies, who have received a Western education and imbibed Western habits and manners. Rajan Kánta and Vipin are two brothers, of whom the former is married and lives in the orthodox fashion. Vipin, while at college, secretly marries a young lady and brings her home after a time. For a time, the brothers live jointly in the same house. Rajan's wife does all house hold work, while his brother's wife passes her time in dressing, novel reading, seeing friends, &c. In course of time, the brothers disagree and Vipin goes to live in a separate house with his wife Mánmí. There Vipin's financial difficulties increase, and unable to meet his dues, he has to go to jail. Regaining liberty he finds to his chagrin that his wife has deserted him and taken to a life of ill fame. The discovery proves fatal to him, and he dies a penitent man after declaring the unwisdom of marrying women, who have been denationalised by Western education and have imbibed a taste for Western ideals.	4029
" 14th	140	12mo dy	1st...	1,000	ditto ..	0 8 0	The Author, 17 Invar Mill Lane, Calcutta	A collection of very interesting detective stories, twelve in number, narrating incidents of real life, which happened in the days of the Thuggee Commission. The incidents related were investigated by an able officer of the police of the day, named Bankatulla, and hence the name of the book. The book may be read with profit by the detective officers of the present day.	4030

July 26th	264	8vo dy	1st...	500	ditto ...	Rs. A. R. 1 0 0	A romantic tale bristling with thrilling situations and hair-breadth escapes. It is a story of villany perpetrated on an innocent youth with a view to cheat him of his patrimony.	4033
" 15th	154	12mo dy	1st...	1,000	ditto ...	1 0 0	The Publisher, 75-1, Ahiritola Street, Calcutta	A story of middle class Bengali life, showing the ultimate triumph of virtue and the downfall of vice. Prafullav/la's marriage with Vinodlal forms the subject matter of the story, which derives its chief interest from the machinations of Shyamá Charan, a cousin of the girl to thwart such marriage	4034
Aug 1st	160	8vo dy	1st...	1,000	ditto ...	1 8 0	The Publisher, 70 Káliprasád Datta's Street, Calcutta.	A series of realistic sketches depicting some of the characteristic scenes of every day-life in Calcutta of the present day, given in the form of a story. The plot is as follows:—M N. Mitter, an England-retained gentleman, marries a young lady, named Sohágani, an M D of the university of London. After the marriage, the husband proves false to the wife, and the latter renounces the world in disgust and passes her days in religious contemplation on the heights of the Himalyas. The book contains some very powerful writing	4035

BOOKS—contd.									
1896	Pages					Rs A. P			
July 22nd	269	8vo dy	1st...	1,000	Printed	1 4 0	Is an excellent exposition of the <i>Achāras</i> or the daily (<i>nitya</i>), occasional (<i>namitika</i>) and optional (<i>kāmya</i>) rites and ceremonies enjoined in the Hindu Śāstras. In the opinion of the writer the observance of these rites is essential to the physical and spiritual well-being of the Hindus. Reference is made in the course of the book to the increase of drunkenness in the country under English rule, and Government is held morally responsible for the same. The writer calls his book <i>Achār</i> or <i>Sauca</i> , which is to cure the Bengali reading public of the literary surfeit caused by a constant perusal of dramas and novels. The book is well written and contains much useful and interesting information.	4075
June 20th	144	12mo dy	1st..	500	ditto ...	0 12 0	The Author, Gya	Eight critical essays dealing with the following historical personages—The poet Bhavabhūti, Śaṅkarācārya, Rājasekhara, Bhāratihari, Chāndesvar Thākura, King Bhoja, Jagaddhar Thākura, and Mitra Misra, the writer of the well-known <i>Smṛiti</i> compilation named the <i>Vira Mitrodaya</i> . The book contains a mass of accurate and interesting information, sifted and arranged with great care and considerable critical acumen. It is written in good Bengali.	4076
" 16th	634	12mo dy	1st..	1,000	ditto ..	2 0 0	The Author ...	Deals with the history of the principal Hindu castes in Bengal from the invitation by King Admur of five Brahmins from Kanauj to officiate at a sacrifice, which he was anxious to celebrate. It contains a great mass of valuable and interesting information regarding the different castes in Bengal, based on ancient records and local traditions. A large amount of new matter has been added in the present edition, which is nearly double the size of the first published twenty one years ago.	4077
July 15th	144	12mo dy	1st..	500	ditto ...	1 0 0	Vihārīlāl Sarkār, 10, Rām Chandra Nandī's Lane, Hogalkuria, Calcutta	A critique on Kālidāsa's <i>Abhijñāna Śakuntalā</i> , in the course of which the writer quotes extracts from the <i>Padma Purāna</i> to shew that Kālidāsa was indebted for his plot to that authority, and not, as is generally supposed, to the <i>Mahābhārata</i> . But as the writer says, though the plot does not differ in its main features from the account in the <i>Padma Purāna</i> , the poet has developed it in a way, which is worthy of his high genius. The book is well written.	4078

BOOKS—contd.									
1896.	Pages.					Rs. A. P.			
May 5th	82	12mo dy	1st...	1,000	Printed.	0 8 0	Hariharan Devasaram, Burdwan	A plea for Hindu orthodoxy and a protest against Western education and the affectation of Anglicism in food, dress, manners, &c. In the opinion of the writer the present moral and physical downfall of the Hindu race is due to their having neglected the injunctions of the Śāstras. The book is called a 'Śarpa' or winnow, which is to separate the chaff in the shape of un-Hinduclements from the wheat, which represents the orthodox manners and customs of the Hindus	407
July 8th	16	8vo rl	1st...	2,000	ditto	The first part of a monthly publication, which is to consist of several parts, devoted to the origin and history of the Vaidya caste. A portion of the first chapter of the book is published in this number, and an attempt is made in it to repel the charge of illegitimacy which is sometimes brought against the Vaidya caste.	408
" 10th	55	12mo dy	1st.	500	ditto.	...	Graham & Co, 9, Clive Street, Calcutta	A plea on behalf of Life Insurance put forth in the form of a conversation between two friends	408
June 5th	184	12mo dy	1st...	5,000	ditto...	0 3 0	Muhammad Reasuddin Ahmed, 4, Gouistán Road, Karyá.	Issued with the object of dissuading Mussulmans from using almanacs prepared by Hindus. Contains in the appendix an account of the Muhammadan States of the World	408
"	15	Gives some practical hints as to how the sexual appetite may be checked, and points out the necessity of abstinence in early youth	408
" 24th	362	8vo rl	1st...	2,500	ditto...	2 8 0	Ramesvaran and a Brahminachari, 8, Rájá Káli Krishna's Lane, Calcutta.	In this volume the writer professes to discuss the nature and relation of dharma and religion, the two words, being, in his opinion, not synonymous with one another. It is not easy to see the purpose running through the volume, which bristles with quotations from standard works, both English and Sanskrit. There can be no doubt that the bulk of the volume might be reduced with advantage.	408
Aug 20th	12	12mo dy	1st...	1,000	ditto..	0 1 0	Pitambar Chandra Chand, Kámar-purá, Bánkurá	The goddess Bhádu is worshipped by low-caste people in the district of Bankura.	408

July 3rd	222	8vo rl	1st...	1,000	ditto ...	0 12 0	An ancient Bengali poem by Vijay Gupta, who flourished in 1870 of the Saka era, published from the manuscript in its entirety for the first time. The author was a native of Gaila-Phullasri, once a place of note in the district of Barisal, and a near relative (nephew) of the well-known East Bengal grammarian Trilochana Dās. According to the statement contained in the book, Vijay commenced the poem in Saka 1406 in the reign of the Sultan Hossein Sāhā. The poem under notice is therefore older than other Bengali poems, except, perhaps, those written by Chandidās and Vidyapati. The popular story of the merchant Chānd, his son Lakshmindar and daughter-in-law Behulā, forms the subject-matter of the poem. It is written in a simple, popular style.	4104
Aug. 2nd	178	12mo dy	2nd...	1,000	ditto ...	1 0 0	Devendra Nāth Majumdar, 233, Bagbazar Street, Calcutta.	The author is a worshipper of the opposite sex, and his book is divided into two parts, headed the Mother and the Wife, respectively. The book is not without merit, and contains some really beautiful lines.	4105
" 10th	52	16mo rl	1st...	114	ditto ...		"	A paenegyric on a certain East Bengal Zemindar of the Perganna Sarail, by one of his raiyyats.	4106
July 10th	25	12mo dy	1st...	50	ditto ...	Gratis	Manmatha Nāth Rāy, Mahuganj, Rangpur	A collection of detached pieces.	4107

BOOKS—contd.									
1896.	Pages.					Rs. A P			
July 9th	54	12mo dy	1st...	400	Printed	0 8 0	The Author, Shibpur.	A philosophic poem discussing a variety of topics. There is much in this poem which is unintelligible.	4110
Sep. 25th	170	12mo dy	1st..	1,000	ditto ...	0 12 0	Srimati Nagen-diaññā Mus-tapha, Ball, Kat-ghara Lane, Hugh	A book of poems by a Hindu lady, consisting of a number of short pieces on a variety of topics. The lady seems to have been unfortunate in life, and a melancholy pessimism pervades the book. Many of the pieces contain very good poetry.	4111
June 16th	34	12mo dy	1st...	500	ditto ...	0 2 0	Amrita Lal Datta.	A book of poems by a Hindu lady. There is a piece in the book headed "Litigation," which is described as only another form of the terrific goddess Kālī, who has incarnated herself in that form in this Kali era to do her work of destruction.	4112
Aug. 12th	51	12mo	1st...	390	ditto ...	0 10 0	The Author, 6, Drākā Nath Tagore's Lane, Calcutta	Short poems on a variety of topics. There is a poem in the book headed "Punkha Cooly," describing the murder of a punkha cooly by a European, and his acquittal on trial on the strength of the medical opinion that the man had come by his death from rupture of the spleen. The writing is not without power.	4113
July 2nd	162	12mo	2,000	ditto ...	0 6 0	A collection of Vaishnava songs compiled from various authors, with short foot-notes.	4114
June 17th	16	12mo dy	1st...	500	ditto	The Author, 18, Rādhā Nath Mallik's Lane, Calcutta	A lady lamenting the death of her daughter Prabhāvatī in child-bed.	4115
" 20th	12	12mo dy	1st...	1,000	ditto ...	0 0 6	Muhamamad Reza-zuddin Ahmed, 4, Goresau Road, Karayah	Collected from the well-known Arabic work named <i>Monāb-behāt</i> .	4116
August 7	33	12mo dy	1st...	500	ditto	Satyendra Nath Banerji, Chandrakona, District Midnapur	A coarse satirical poem, purporting to be an attack on a certain person.	4117

June 15th	178	12mo dy	5th...	2,000	Printed	0 10 0	The Author, Sāntragāchl.	A revised edition	3829
Mar. 28th	160	8vo dy	1st...	500	ditto	A short story of English life intended to convey the moral that, sin, however secretly committed, is sure to be found out in the end. The hero of the story is a Baronet, named Sir Robert Heatherleigh, who succeeds to the family estates by poisoning his elder brother and forging a will in his own favor. He cruelly drives away from home his niece, who is the frightful heroine, and who soon dies in utter destitution. In this way, the Baronet proceeds in his career of villany, adding crime after crime in rapid succession, until it is suddenly brought to a close by a violent death. At his death-bed, he confesses his crimes and makes reparation to those he had injured. Besides this story, the book contains short sketches descriptive of Indian life and scenery.	3830

1896.	Pages					Rs A P			
July 9th	387	12mo dy	2nd	1 500	Printed	12- 0 0	The Author ...	Short descriptive notices of the medicinal products of India, about 500 in number, alphabetically arranged, with their names in several Indian vernaculars given for facility of reference and identification. The book is intended as a text book for medical students, and will serve the useful purpose of directing the attention of the public to the vast botanical resources of India. It is admirably got up and represents about 30 years' labour and patient research on the part of the author, who made the subject of the indigenous drugs of India his special study. The first edition of the work was published as early as 1867.	3852

May 28th	24	12mo	1st.	1,000	ditto .	0 1 0	The Author, 41, Shâm Bazar, Street, Calcutta	A paper read at a public meeting describing the sufferings of clerks in mercantile firms and Government Offices. The writer advises his educated countrymen to stick to their hereditary professions, and instead of hankering after service, try to seek a livelihood in trade, agriculture, and other honourable and independent walks of life.	3868
June 1st	58	8vo dy	1st ..	30,000	ditto .		The Author, 50, Park Street, Calcutta	A series of articles reprinted from the <i>Indian Medical Record</i> , containing a severe attack on the Memorandum written by Sir William Roberts as Medical Member of the late Royal Commission on Opium. The writer is of opinion that the requirements necessary for a membership of the Commission were entirely wanting in the case of Sir W. Roberts, inasmuch as his peculiar views on the subject of intoxicants were perfectly well-known in medical circles. That he should, therefore, advocate the use of opium was almost a foregone conclusion. The author also attempts to find out the fallacy of many of the pro opium statements made by high-placed official witnesses, both civil and medical. Finally, while admitting the sincerity of the Government of India in its desire for the suppression of the opium dens, the writer roundly charges the local Governments of Bombay and Bengal with thwarting that desire and ignoring rules promulgated by it against opium smoking. The author says—"We are revealing no secret when we state that the orders in question found no favour with the Governments of Bombay and Bengal, and that consequently the executive winked at the continuance of the habit under the form of separate dens removed a few feet from the opium-selling shop. In Bengal we affirm that the smoking dens in most places are just as they were, and show no semblance even of complying with the orders of the Government of India."	3869
July 12th	164	8vo dy	2nd ..	500	ditto ...	1 8 0	Râm Gopâl Sârnayî, 23, Doctor's Lane, Calcutta	A new and enlarged edition. The special feature of this edition is a table giving, cases between Europeans and Natives in a chronological order. The number of cases noticed in the first edition was 47; while the number under notice in the present edition, is 120, thus conclusively showing that such cases are on the increase. In explaining his object in publishing this work, the compiler says—"I repeat what I said in the preface to the first edition that the object of this publication is not in any way to embarrass the Government or to accentuate racial differences, but to call prominent attention to a class of cases in regard to which there is a widespread impression that they are unsatisfactorily dealt with by our courts of law."	3870

" 9th	623	12mo dy	1st .	1,000	ditto ...	12 0 0	Thacker, Spink and Co	An interesting treatise on the caste system of the Hindus and the different religious sects into which they are divided. It contains short accounts of the different castes, gives the present numerical strength and social position of each and describes the trades or handicrafts by which they subsist. In describing the origin of the caste system, the author combat the view that the system was the	3874
<p>outcome of a policy of self aggrandisement on the part of its founders, and meant to be a practical application of the maxim—Divide and Rule. In his opinion all religions, without exception, are not only human in origin, but deliberate and systematic impostures on the credulity of the public. According to him the founders of all religion have been actuated solely by the motive of personal aggrandisement and the ambition to be regarded and worshipped as gods by their foolish and blind followers. The spirit in which the work is written is cynical and offensive in the extreme, and has considerably marred its literary and intrinsic worth.</p>

BOOKS—contd.									
1896.	Pages.					Rs A P			
May 10th	94	8vo dy	1st...	30	Printed	The Author, 1, Nimbakhuahal Road, Garden Reach.	Contains an academic discourse on the political side of Brahmanism. The Author thinks that the political aspect of Brahmanism, apart from its obvious religious bearings, is very little understood and appreciated by his countrymen. They	387
<p>have been so deeply imbued with Western teaching that in their opinion their hope of their country's advancement lies in the bodily adoption of Parliamentary and Democratic institutions of the West. But, says the author, the constitution of this country is essentially theocratic and the adoption of democratic methods of Government among a people constituted as the Indians are, is sure to end in miserable failure. Although fully alive to the defects of English rule, the writer strongly urges upon those of his countrymen, who desire to have a change of Government, that French or Russian rule in India would prove distinctly worse for them. The attempts of some of the Congressmen to obtain the rights of British citizenship and the extension of the British constitution to India are simply absurd and impracticable. He advises this party, whom he calls the Westernizers, to co-operate with the Hindu Revivalists. The latter should moderate, to some degree, their traditional exclusiveness and pass from the region of speculative theology and philosophy into practical politics. Brahmanism should be somewhat remodelled in order to bring it in touch with the progress and spirit of modern times. The proletary classes in this country have had a distinct theocratic culture, and are positively religious in their nature, and although much mischief has been done among them by the preachers of the modern doctrines of liberty and equality, which have undermined the powers of the Brahman and struck a heavy blow at the constitution of the Hindu society, the majority of them happily are still amenable to the control of the sacerdotal and patrician castes. Great things can only be expected from Brahmanism, and their political system is the only system available to us, as Parliamentary or Democratic methods of Government are utterly unsuited to this country. The author then constructs a scheme of Church-Government with successive grades of priests, whose succession to office should be, as among the Mohants and other monastic orders, testamentary, and whose functions should embrace many things more than what now forms part of their duty, the education, secular and spiritual, of the masses being one of their chief duties. This change should be gradually worked out by the Hindu patricians. All this may not be productive of immediate political independence, but then people should understand that political privileges cannot be secured all on a sudden and by violent methods.</p>									
July 18th	52	F. cap	1st...	300	ditto ..	1 0 0	Mano Mohan Ghosh, Barrister-at-Law, 17, Theatre Road, Calcutta.	A compilation of cases intended to illustrate the evils of the union of the judicial and executive functions. It contains short accounts of altogether twenty cases, which have occurred in Bengal during the last twenty years and with which the author was personally connected in the exercise of his profession as an Advocate of the High Court.	387

" 5th	72	8vo rl	1st...	2,000	ditto ...	0 6 0	The Editors.	Contains articles of literary interest Political notes appended to this number refer to the outburst of praise, which Sir	4108
<p>Alexander Mackenzie's accession to the throne of Bengal, has called forth from all classes of the people, and comment on it in the following words —"The Bengali politicians, who are singing this chorus of praise in honour of the new Lieutenant Governor, should bear in mind that before he stepped into the <i>guddi</i> of Bengal, His Honour did not surely throw 'British policy' over board into the Bay of Bengal, and that he had promised beforehand that his policy would be in harmony with that of his predecessor in office. Judging from the view which His Honour has expressed on local self-government, his policy in regard to it appears to be not a whit more liberal, nay, two steps more retrograde, than that of Sir Charles Elliott." In the course of an article headed 'Bureaucracy versus Babucracy,' it is remarked that while Sahebs want to convert local self-government into Bureaucracy, the Babus are trying to convert it into Babucracy. But from the standpoint of real democracy, there is very little difference between the two. Democracy is as yet very far from a country where the President of the National Congress himself does not hesitate to call agriculturists coolies, and thereby mark his disrespect for the class. The alleged diversion of the proceeds of the Road Cess and increase of the burdens of the District Boards form the subject-matter of a separate article.</p>
